SPECIAL NOTE ABOUT FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q, or Quarterly Report, contains “forward-looking statements” that involve substantial risks and uncertainties. In some cases, you can identify forward-looking statements by the following words: “may,” “might,” “will,” “could,” “would,” “should,” “expect,” “intend,” “plan,” “anticipate,” “believe,” “estimate,” “potential,” “continue,” “ongoing” or the negative of these terms or other comparable terminology, although not all forward-looking statements contain these identifying words. Forward-looking statements relate to future events or future financial performance or condition and involve known and unknown risks, uncertainties and other factors that could cause actual results, levels of activity, performance or achievement to differ materially from those expressed or implied by the forward-looking statements. These forward-looking statements include, but are not limited to, statements about:

- our expectations regarding the sales and marketing of our products;
- our expectations regarding our manufacturing and production and the integrity of our supply chain for our products, including the risks associated with our single source suppliers;
- the timing and likelihood of FDA approvals and regulatory actions on our product candidates, manufacturing activities and product marketing activities;
- our ability to advance product candidates in our platforms into successful and completed clinical trials and our subsequent ability to successfully commercialize our product candidates;
- our ability to compete in the development and marketing of our products and product candidates;
- our expectations regarding the business expansion plans of our Chinese subsidiary, ANP;
- the potential for adverse application of environmental, health and safety and other laws and regulations on our operations;
- our expectations for market acceptance of our new products and proprietary drug delivery technologies, as well as those of our API customers;
- the potential for our marketed products to be withdrawn due to patient adverse events or deaths, or if we fail to secure FDA approval for products subject to the Prescription Drug Wrap-Up program;
- our expectations in obtaining insurance coverage and adequate reimbursement for our products from third-party payers;

- the amount of price concessions or exclusion of suppliers adversely affecting our business;
- our ability to establish and maintain intellectual property protection for our products and our ability to successfully defend our intellectual property in cases of alleged infringement;
- the implementation of our business strategies, product development strategies and technology utilization;
- the potential for exposure to product liability claims;
- future acquisitions, divestitures or investments, including the anticipated benefits of such acquisitions, divestitures or investments;
- our ability to expand internationally;
- economic and industry trends and trend analysis;
- our ability to remain in compliance with laws and regulations that currently apply or become applicable to our business both in the United States and internationally;
- global, national and local economic and market conditions, specifically with respect to geopolitical uncertainty;
- the impact of trade tariffs or other trade barriers;
- the impact of the Patient Protection and Affordable Care Act (as amended) and other legislative and regulatory healthcare reforms in the countries in which we operate;
- the impact of global and domestic tax reform, including the Tax Cuts and Jobs Act of 2017, or the Tax Act;
- the timing for completion of the validation of the new construction at our ANP and IMS facilities; and
- our financial performance expectations, including our expectations regarding our backlog, revenue, cost of revenue, gross profit or gross margin, operating expenses, including changes in research and development, sales and marketing and general and administrative expenses, and our ability to achieve and maintain future profitability.

You should read this Quarterly Report and the documents that we reference elsewhere in this Quarterly Report completely and with the understanding that our actual results may differ materially from what we expect as expressed or implied by our forward-looking statements. In light of the significant risks and uncertainties to which our forward-looking statements are subject, you should not place undue reliance on or regard these statements as a representation or warranty by us or any other person that we will achieve our objectives and plans in any specified timeframe, or at all. We discuss many of these risks and uncertainties in greater detail in this Quarterly Report and in our Annual Report on Form 10-K for the year ended December 31, 2017, particularly in Item 1A. "Risk Factors." These forward-looking statements represent our estimates and assumptions only as of the date of this Quarterly Report regardless of the time of delivery of this Quarterly Report, and such information may be limited or incomplete, and our statements should not be read to indicate that we have conducted an exhaustive inquiry into, or review of, all potentially available relevant information. Except as required by law, we undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise after the date of this Quarterly Report.

Table of Contents

Unless expressly indicated or the context requires otherwise, references in this Quarterly Report to “Amphastar,” “the Company,” “we,” “our,” and “us” refer to Amphastar Pharmaceuticals, Inc. and our subsidiaries.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. General

Amphastar Pharmaceuticals, Inc., a California corporation, was incorporated in February 1996 and merged with and into Amphastar Pharmaceuticals, Inc., a Delaware corporation, in July 2004 (together with its subsidiaries, hereinafter referred to as “the Company”). The Company is a specialty pharmaceutical company that primarily develops, manufactures, markets, and sells generic and proprietary injectable, inhalation, and intranasal products, including products with high technical barriers to market entry. Additionally, the Company sells insulin active pharmaceutical ingredient, or API, products. Most of the Company’s products are used in hospital or urgent care clinical settings and are primarily contracted and distributed through group purchasing organizations and drug wholesalers. The Company’s insulin API products are sold to other pharmaceutical companies for use in their own products and are being used by the Company in the development of injectable finished pharmaceutical products. The Company’s inhalation products will be primarily distributed through drug retailers when they are brought to market.

The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements of the Company for the year ended December 31, 2017, and the notes thereto as filed with the Securities and Exchange Commission, or SEC, in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles, or GAAP, have been condensed or omitted from the accompanying condensed consolidated financial statements. The accompanying year-end condensed consolidated balance sheet was derived from the audited financial statements. The accompanying interim financial statements are unaudited, but reflect all adjustments which are, in the opinion of management, necessary for a fair statement of the Company’s consolidated financial position, results of operations, comprehensive income (loss) and cash flows for the periods presented. Unless otherwise noted, all such adjustments are of a normal, recurring nature. The Company’s results of operations, comprehensive income (loss) and cash flows for the interim periods are not necessarily indicative of the results of operations and cash flows that it may achieve in future periods.

Note 2. Summary of Significant Accounting Policies

Basis of Presentation

The unaudited condensed consolidated financial statements include the accounts of the Company and its subsidiaries, and are prepared in accordance with the requirements of the SEC for interim reporting. The Company's subsidiaries include: (1) International Medication Systems, Limited, or IMS, (2) Armstrong Pharmaceuticals, Inc., or Armstrong, (3) Amphastar Nanjing Pharmaceuticals Inc., or ANP, (4) Nanjing Letop Fine Chemistry Co., Ltd., or Letop, (5) Nanjing Hanxin Pharmaceutical Technology Co., Ltd, or Hanxin, (6) Nanjing Baixin Trading Co. Ltd., or Baixin, (7) Amphastar France Pharmaceuticals, S.A.S., or AFP, (8) Amphastar UK Ltd., or AUK, and (9) International Medication Systems (UK) Limited, or IMS UK.

In July 2018, ANP completed a private placement of its common equity interest to accredited investors for aggregate gross proceeds of approximately \$57.2 million, of which \$26.2 million has been received by ANP as of September 30, 2018. The investors are required to complete their contributions in cash by December 31, 2018. The Company has retained approximately 58% of the equity interest in ANP immediately after the private placement and continues to consolidate the financial results of ANP with the Company's results of operations. ANP's net income or loss after July 2, 2018, was attributed to the Company in accordance with the Company's equity interest of approximately 58% in ANP.

During the quarter ended September 30, 2018, the Company identified errors in its accounting primarily related to the depreciation of certain leasehold improvements within property, plant and equipment. The errors were not material to any of the Company's prior period annual or interim financial statements. However, for comparative purposes, the Company has revised the prior period condensed consolidated financial statements included herein. As a result, the net income for the three and nine months ended September 30, 2017 was reduced by \$0.1 million and \$0.2 million, respectively. The

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

errors did not result in a change to the basic or diluted net income per share for the three months ended September 30, 2017. The basic net income per share for the nine months ended September 30, 2017, was reduced by \$0.01. The error did not result in a change to the diluted net income per share for the nine months ended September 30, 2017. The balances of property, plant, and equipment, net and retained earnings as of December 31, 2017, were reduced by \$4.8 million and \$3.6 million, respectively. The error did not result in a change to the net cash provided by operating activities in the Company's condensed consolidated statement of cash flows for the nine months ended September 30, 2017. The Company will revise additional financial statements and disclosures as applicable in future filings.

Use of Estimates

The preparation of condensed consolidated financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and accompanying notes. Actual results could differ from those estimates. The principal accounting estimates include determination of allowances for doubtful accounts and discounts, provision for chargebacks and rebates, provision for product returns, adjustment of inventory to their net realizable values, impairment of long-lived and intangible assets and goodwill, self-insured claims, workers' compensation liabilities, litigation reserves, stock price volatilities for share-based compensation expense, valuation allowances for deferred tax assets, and liabilities for uncertain income tax positions.

Foreign Currency

The functional currency of the Company, its domestic subsidiaries, its Chinese subsidiary, ANP, and its U.K. subsidiary, AUK, is the U.S. dollar, or USD. ANP maintains its books of record in Chinese Yuan. These books are remeasured into the functional currency of USD using the current or historical exchange rates. The resulting currency remeasurement adjustments and other transactional foreign currency exchange gains and losses are reflected in the Company's statements of operations.

The Company's French subsidiary, AFP, maintains its book of record in Euros. Its other Chinese subsidiaries maintain their books of record in Chinese Yuan. Its U.K. subsidiary, IMS UK, maintains its book of record in Great Britain Pounds. These local currencies have been determined to be the subsidiaries' respective functional currencies. These books of record are translated into USD using average exchange rates during the period. Assets and liabilities are

translated at the rate of exchange prevailing on the balance sheet date. Equity is translated at the prevailing rate of exchange at the date of the equity transactions. Translation adjustments are reflected in stockholders' equity and are included as a component of other accumulated comprehensive income (loss). The unrealized gains or losses of intercompany foreign currency transactions that are of a long-term investment nature are reported in other accumulated comprehensive income (loss). The unrealized gains and losses of intercompany foreign currency transactions that are of a long-term investment nature for the three and nine months ended September 30, 2018, were \$0.2 million loss and \$1.0 million loss, respectively, and for the three and nine months ended September 30, 2017, were \$1.1 million gain and \$3.8 million gain, respectively.

The Company does not undertake hedging transactions to cover its foreign currency exposure.

Comprehensive Income (loss)

For the three and nine months ended September 30, 2018 and 2017, the Company included its foreign currency translation gain or loss as part of its comprehensive income (loss).

Restricted Cash and Short-term Investments

Restricted cash and short-term investments are collateral required for the Company to effect a standby letter of credit and to qualify for workers' compensation self-insurance and are available to meet the Company's workers' compensation obligations on a current basis, as needed. As of September 30, 2018 and December 31, 2017, restricted cash and short-

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

term investments included \$1.9 million in cash and \$2.3 million in certificates of deposit, respectively. The certificates of deposit have original maturities greater than three months and are classified as short-term investments.

Financial Instruments

The carrying amounts of cash and cash equivalents, short-term investments, restricted cash and short-term investments, accounts receivable, accounts payable, accrued expenses, and short-term borrowings approximate fair value due to the short maturity of these items. The majority of the Company's long-term obligations consist of variable rate debt, and their carrying value approximates fair value as the stated borrowing rates are comparable to rates currently offered to the Company for instruments with similar maturities. The Company at times enters into fixed interest rate swap contracts to exchange the variable interest rates for fixed interest rates without the exchange of the underlying notional debt amounts. Such interest rate swap contracts are recorded at their fair values.

Deferred Income Taxes

The Company utilizes the liability method of accounting for income taxes, under which deferred taxes are determined based on the temporary differences between the financial statements and the tax basis of assets and liabilities using enacted tax rates. A valuation allowance is recorded when it is more likely than not that the deferred tax assets will not be realized. At September 30, 2018, the Company was in the process of completing its accounting for the tax effects of the enactment of the Tax Act.

Business Combinations

If an acquired set of activities and assets is capable of being operated as a business consisting of inputs and processes from the viewpoint of a market participant, the assets acquired and liabilities assumed are a business. Business combinations are accounted for using the acquisition method of accounting, which requires an acquirer to recognize the assets acquired and the liabilities assumed at the acquisition date measured at their fair values as of that date. Fair value determinations are based on discounted cash flow analyses or other valuation techniques. In determining the fair value of the assets acquired and liabilities assumed in a material acquisition, the Company may utilize appraisals from

third party valuation firms to determine fair values of some or all of the assets acquired and liabilities assumed, or may complete some or all of the valuations internally. In either case, the Company takes full responsibility for the determination of the fair value of the assets acquired and liabilities assumed. The value of goodwill reflects the excess of the fair value of the consideration conveyed to the seller over the fair value of the net assets received.

Acquisition-related costs that the Company incurs to effect a business combination are expensed in the periods in which the costs are incurred. When the operations of the acquired businesses were not material to the Company's condensed consolidated financial statements, no pro forma presentations were disclosed.

Recent Accounting Pronouncements

In February 2016, the Financial Accounting Standards Board, or FASB, issued ASU No. 2016-02, Leases, that is aimed at making leasing activities more transparent and comparable, and which requires substantially all leases be recognized by lessees on their balance sheets as a right-of-use asset and corresponding lease liability, including leases currently accounted for as operating leases. The ASU and the related clarifications subsequently issued by the FASB will become effective for the Company's interim and annual reporting periods during the year ending December 31, 2019, and all annual and interim reporting periods thereafter. Early adoption is permitted. The Company is required to use a modified retrospective approach for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements for the reporting periods in which the guidance is adopted. While the Company continues to evaluate the provisions of ASC 842 to determine how it will be affected, the primary effect of adopting the new standard will be to record right-to-use assets and obligations for current operating leases on its consolidated financial statements. provides details on the Company's current operating lease arrangements. The adoption of ASC 842 is not expected to have a material impact on the Company's results of operations or cash flows.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments – Credit Losses, which is aimed at providing financial statement users with more useful information about the expected credit losses on financial instruments and other commitments to extend credit. The standard update changes the impairment model for financial assets measured at amortized cost, requiring presentation at the net amount expected to be collected. The measurement of expected credit losses requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. Available-for-sale debt securities with unrealized losses will be recorded through an allowance for credit losses. The guidance is effective for the Company's interim and annual reporting periods during the year ending December 31, 2020. Early adoption is permitted for interim or annual periods after December 31, 2019. The Company will be required to apply the standard's provisions as a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective. The Company does not believe the adoption of this accounting guidance will have a material impact on its consolidated financial statements and related disclosures.

In January 2017, the FASB issued ASU No. 2017-04, Simplifying the Test for Goodwill Impairment, which eliminates the requirement to calculate the implied fair value of goodwill. An entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The update also eliminated the requirements for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails that qualitative test, to perform Step 2 of the goodwill impairment test. An entity is required to disclose the amount of goodwill allocated to each reporting unit with a zero or negative carrying amount of net assets. The guidance is effective for the Company's interim and annual reporting periods during the year ending December 31, 2020, and applied on a prospective basis. Early adoption is permitted for interim and annual goodwill impairment testing dates after January 1, 2017. The Company currently does not believe that the adoption of this accounting guidance will have a material impact on its consolidated financial statements and related disclosures.

In August 2017, the FASB issued ASU No. 2017-12, Targeted Improvements to Accounting for Hedging Activities, which amends the hedge accounting model in ASC 815 to enable entities to better portray the economics of their risk management activities in the financial statements and enhance the transparency and understandability of hedge results. The amendments also simplify the application of hedge accounting in certain situations. The new guidance is effective for the Company's interim and annual reporting periods during the year ending December 31, 2019. Early adoption is permitted. The Company does not believe that the adoption of this accounting guidance will have a material impact on

its consolidated financial statements and related disclosures.

In February 2018, the FASB issued ASU No. 2018-02, Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income, which allows entities to reclassify from accumulated other comprehensive income to retained earnings stranded tax effects resulting from the Tax Act. The guidance is effective for the Company's interim and annual reporting periods during the year ending December 31, 2019. Early adoption is permitted. The Company does not believe that the adoption of this accounting guidance will have a material impact on its consolidated financial statements and related disclosures.

In June 2018, the FASB issued ASU No. 2018-07, Improvements to Non-employee Share-Based Payment Accounting, which simplifies the accounting for share-based payments to non-employees by aligning it with the accounting for share-based payments to employees. The Company early adopted the guidance on July 1, 2018. The adoption did not have a material impact on its consolidated financial statements and related disclosures.

In August 2018, the FASB issued ASU No. 2018-13, Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement, which removes, modifies, and adds certain disclosure requirements to ASC 820, Fair Value

-8-

(Unaudited)

Measurement. The guidance is effective for the Company's interim and annual reporting periods during the year ending December 31, 2020. Early adoption is permitted. The Company does not believe that the adoption of this accounting guidance will have a material impact on its consolidated financial statements and related disclosures.

In August 2018, the FASB issued ASU No. 2018-14, Disclosure Framework – Changes to the Disclosure Requirements for Defined Benefit Plans, which removes, modifies, and adds certain disclosure requirements to ASC 715-20, Defined Benefit Plans. The guidance is effective for the Company's interim and annual reporting periods during the year ending December 31, 2021. Early adoption is permitted. The Company does not believe that the adoption of this accounting guidance will have a material impact on its consolidated financial statements and related disclosures.

In October 2018, the FASB issued ASU No. 2018-17, Targeted Improvements to Related Party Guidance for Variable Interest Entities, which requires indirect interests held through related parties in common control arrangements be considered on a proportional basis for determining whether fees paid to decision makers and service providers are variable interests. The guidance is effective for the Company's interim and annual reporting periods during the year ending December 31, 2020. Early adoption is permitted. The Company currently does not believe that the adoption of this accounting guidance will have a material impact on its consolidated financial statements and related disclosures.

In November 2018, the FASB issued ASU No. 2018-18, Clarifying the Interaction between Topic 808 and Topic 606, which requires transactions in collaborative arrangements to be accounted for under ASC 606, Revenue from Contracts with Customers, or ASC 606, if the counterparty is a customer for a good or service that is a distinct unit of account. The amendments also preclude entities from presenting consideration from transactions with a collaborator that is not a customer together with revenue recognized from contracts with customers. The guidance is effective for the Company's interim and annual reporting periods during the year ending December 31, 2020. Early adoption is permitted, including in any interim period. The Company is currently evaluating the impact that the adoption of this guidance will have on its consolidated financial statements and related disclosures.

Note 3. Revenue Recognition

In 2018, the Company adopted ASC 606 using the modified retrospective transition method. The adoption of ASC 606 did not have a material impact on the Company's revenue recognition or on the condensed consolidated financial statements and related disclosures. Subsequent to the adoption of ASC 606 revenue is recognized at the time that the

Company's customers obtain control of the promised goods. Revenues derived from contract manufacturing services are recognized when third-party products are shipped to customers, after the customer has accepted test samples of the products to be shipped. The results for the reporting period beginning after January 1, 2018, are presented in accordance with the new standard, although comparative information continues to be reported under the accounting standards and policies in effect for those periods. For the accounting policy related to revenue recognition for the years ended prior to and on December 31, 2017, see Note 4, Revenue Recognition, to the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2017.

The Company only records revenue to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved, by estimating and recording reductions to revenue for discounts, product returns, and pricing adjustments, such as wholesaler chargebacks and retailer rebates, in the same period that the related revenue is recorded.

Provision for Chargebacks and Rebates

The provision for chargebacks and rebates is a significant estimate used in the recognition of revenue. Wholesaler chargebacks relate to sales terms under which the Company agrees to reimburse wholesalers for differences between the gross sales prices at which the Company sells its products to wholesalers and the actual prices of such products that wholesalers resell under the Company's various contractual arrangements with third parties such as hospitals and group

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

purchasing organizations in the United States. Rebates include primarily amounts paid to retailers, payers, and providers in the United States, including those paid to state Medicaid programs, and are based on contractual arrangements or statutory requirements. The Company estimates chargebacks and rebates using the expected value method at the time of sale to wholesalers based on wholesaler inventory stocking levels, historic chargeback and rebate rates, and current contract pricing.

The provision for chargebacks and rebates is reflected in net revenues. The following table is an analysis of the chargeback and rebate provision:

	Nine Months Ended	
	September 30,	
	2018	2017
	(in thousands)	
Beginning balance	\$ 18,470	\$ 39,709
Provision for chargebacks and rebates	88,797	120,546
Credits and payments issued to third parties	(86,892)	(148,037)
Ending balance	\$ 20,375	\$ 12,218

Changes in the chargeback provision from period to period are primarily dependent on the Company's sales to its wholesalers, the level of inventory held by wholesalers, and the wholesaler's customer mix. Changes in the rebate provision from period to period are primarily dependent on retailer's and other indirect customers' purchases. The approach that the Company uses to estimate chargebacks has been consistently applied for all periods presented. Variations in estimates have been historically small. The Company continually monitors the provision for chargebacks and rebates and makes adjustments when it believes that the actual chargebacks and rebates may differ from the estimates. The settlement of chargebacks and rebates generally occurs within 30 days to 60 days after the sale to wholesalers. Accounts receivable and/or accounts payable and accrued liabilities are reduced and/or increased by the chargebacks and rebate amounts depending on whether the Company has the right to offset with the customer. Of the provision for chargebacks and rebates as of September 30, 2018 and December 31, 2017, \$8.5 million and \$6.8 million were included in accounts receivable, net, on the condensed consolidated balance sheets, respectively. The remaining provision of \$11.9 million and \$11.7 million were included in accounts payable and accrued liabilities, respectively.

Accrual for Product Returns

The Company offers most customers the right to return qualified excess or expired inventory for partial credit; however, API product sales are generally non-returnable. The Company's product returns primarily consist of the returns of expired products from sales made in prior periods. Returned products cannot be resold. At the time product revenue is recognized, the Company records an accrual for product returns estimated using the expected value method. The accrual is based, in part, upon the historical relationship of product returns to sales and customer contract terms. The Company also assesses other factors that could affect product returns including market conditions, product obsolescence, and the introduction of new competition. Although these factors do not normally give the Company's customers the right to return products outside of the regular return policy, the Company realizes that such factors could ultimately lead to increased returns. The Company analyzes these situations on a case-by-case basis and makes adjustments to the product return reserve as appropriate. As of September 30, 2018 and December 31, 2017, cumulative sales of approximately \$0.6 million and \$1.2 million, respectively, for one of the Company's products were not recognized in revenues, due to insufficient information available to determine that a significant reversal of such amount will not occur when the uncertainty associated with the return refund is subsequently resolved.

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

The provision for product returns is reflected in net revenues. The following table is an analysis of product return liability:

	Nine Months Ended September 30,	
	2018	2017
	(in thousands)	
Beginning balance	\$ 6,522	\$ 3,143
Provision for product returns	2,248	4,196
Credits issued to third parties	(1,995)	(1,825)
Ending balance	\$ 6,775	\$ 5,514

Of the provision of product returns as of September 30, 2018 and December 31, 2017, \$4.7 million and \$4.1 million were included in accounts payable and accrued liabilities on the condensed consolidated balance sheets, respectively. The remaining provision of \$2.1 million and \$2.4 million were included in other long-term liabilities, respectively. For the nine months ended September 30, 2018 and 2017, the Company's aggregate product return rate was 1.3% and 1.2% of qualified sales, respectively.

Note 4. Income (loss) per share attributable to Amphastar Pharmaceuticals, Inc. shareholders

Basic net income (loss) per share attributable to Amphastar Pharmaceuticals, Inc. shareholders is calculated based upon the weighted-average number of shares outstanding during the period. Diluted net income (loss) per share attributable to Amphastar Pharmaceuticals, Inc. shareholders gives effect to all potential dilutive shares outstanding during the period, such as stock options, non-vested restricted stock units, and shares issuable under the Company's Employee Stock Purchase Plan, or ESPP.

For the three months ended September 30, 2018, options to purchase 1,273,884 shares of stock with a weighted-average exercise price of \$20.46 per share were excluded in the computation of diluted net income per common share attributable to Amphastar Pharmaceuticals, Inc. shareholders because the effect from the assumed exercise of these options would be anti-dilutive.

As the Company reported a net loss for the nine months ended September 30, 2018, the diluted net loss per share attributable to Amphastar Pharmaceuticals, Inc. shareholders, as reported, equals the basic net loss per share attributable to Amphastar Pharmaceuticals, Inc. shareholders since the effect of the assumed exercise of stock options, vesting of non-vested RSUs, and issuance of common shares under the Company's ESPP are anti-dilutive. Total stock options, non-vested RSUs, and shares issuable under the Company's ESPP excluded from the nine months ended September 30, 2018, net loss per share were 10,646,602 stock options; 1,210,718 non-vested RSUs, and 60,854 shares issuable under the ESPP.

For the three and nine months ended September 30, 2017, options to purchase 1,162,850 and 2,424,430 shares of stock with a weighted-average exercise price of \$27.87 per share and \$21.93 per shares, respectively, were excluded in the computation of diluted net income per common share attributable to Amphastar Pharmaceuticals, Inc. shareholders because the effect from the assumed exercise of these options would be anti-dilutive.

Denominator:				
Weighted-average shares outstanding — basic	46,241	46,101	46,437	46,065
Net effect of dilutive securities:				
Incremental shares from equity awards	2,040	2,114	—	1,981
Weighted-average shares outstanding — diluted	48,281	48,215	46,437	48,046
Net income (loss) per share attributable to Amphastar Pharmaceuticals, Inc. shareholders — basic	\$ 0.05	\$ 0.00	\$ (0.16)	\$ 0.06
Net income (loss) per share attributable to Amphastar Pharmaceuticals, Inc. shareholders — diluted	\$ 0.05	\$ 0.00	\$ (0.16)	\$ 0.06

Note 5. Segment Reporting

The Company's business is the development, manufacture, and marketing of pharmaceutical products. The Company has established two reporting segments that each report to the Chief Operating Decision Maker, or CODM, as defined in ASC 280, Segment Reporting. The Company's performance is assessed and resources are allocated by the CODM based on the following two reportable segments:

- Finished pharmaceutical products

- Active pharmaceutical ingredients, or API

The finished pharmaceutical products segment manufactures, markets, and distributes enoxaparin, naloxone, phytonadione, lidocaine, medroxyprogesterone acetate, as well as various other critical and non-critical care drugs. The API segment manufactures and distributes recombinant human insulin API and porcine insulin API for external customers and internal product development.

Discontinuation of epinephrine injection, USP vial product

In February 2017, the U.S. Food and Drug Administration, or FDA, requested the Company to discontinue the manufacturing and distribution of its epinephrine injection, USP vial product, which had been marketed under the “grandfather” exception to the FDA’s “Prescription Drug Wrap-Up” program. The Company discontinued selling this product in the second quarter of 2017. For the year ended December 31, 2017, the Company recognized \$17.8 million in net revenues for the sale of this product.

Total	\$ 75,543	\$ 57,916	\$ 204,976	\$ 179,773	\$ 202,526	\$ 180,545

Note 6. Customer and Supplier Concentration

Customer Concentrations

Three large wholesale drug distributors, AmerisourceBergen Corporation, or AmerisourceBergen, Cardinal Health, Inc., or Cardinal, and McKesson Corporation, or McKesson, are all distributors of the Company's products as well as suppliers of a broad range of health care products. The Company considers these three customers to be its major customers, as each individually, and these customers collectively, represented a significant percentage of the Company's net revenue for the three and nine months ended September 30, 2018 and 2017, and accounts receivable as of September 30, 2018 and December 31, 2017, respectively. The following table provides accounts receivable and net revenue information for these major customers:

	% of Total Accounts Receivable	% of Net Revenue
--	-----------------------------------	---------------------

	September 30, 2018	December 31, 2017	Three Months Ended September 30,		Nine Months Ended September 30,			
			2018	2017	2018	2017		
McKesson	19	% 22	% 30	% 27	% 27	% 27	%	
AmerisourceBergen	30	% 33	% 30	% 24	% 28	% 27	%	
Cardinal Health	24	% 12	% 23	% 25	% 22	% 25	%	

Supplier Concentrations

The Company depends on suppliers for raw materials, active pharmaceutical ingredients, and other components that are subject to stringent FDA requirements. Some of these materials may only be available from one or a limited number of sources. Establishing additional or replacement suppliers for these materials may take a substantial period of time, as suppliers must be approved by the FDA. Furthermore, a significant portion of raw materials may only be available from foreign sources. If the Company is unable to secure, on a timely basis, sufficient quantities of the materials it depends on to manufacture and market its products, it could have a materially adverse effect on the Company's business, financial condition, and results of operations.

Note 7. Fair Value Measurements

The accounting standards of the FASB define fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability at the measurement date (an exit price). These standards also establish a hierarchy that prioritizes observable and unobservable inputs used in measuring fair value of an asset or liability, as described below:

- Level 1 – Inputs to measure fair value are based on quoted prices (unadjusted) in active markets on identical assets or liabilities;
- Level 2 – Inputs to measure fair value are based on the following: a) quoted prices in active markets on similar assets or liabilities, b) quoted prices for identical or similar instruments in inactive markets, or c) observable (other than quoted prices) or collaborated observable market data used in a pricing model from which the fair value is derived; and
- Level 3 – Inputs to measure fair value are unobservable and the assets or liabilities have little, if any, market activity; these inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities based on best information available in the circumstances.

As of September 30, 2018, cash equivalents include money market accounts. Short-term investments consist of certificates of deposit with original expiration dates within 12 months. These certificates of deposit are carried at amortized cost in the Company's consolidated balance sheet, which approximates their fair value determined based on Level 2 inputs. The restrictions on restricted cash and short-term investments have a negligible effect on the fair value of these financial assets.

The Company does not hold any Level 2 or Level 3 instruments that are measured for fair value on a recurring basis.

Nonfinancial assets and liabilities are not measured at fair value on a recurring basis but are subject to fair value adjustments in certain circumstances. These items primarily include long-lived assets, goodwill, and intangible assets for which the fair value of assets is determined as part of the related impairment test. As of September 30, 2018 and

December 31, 2017, there were no significant adjustments to fair value for nonfinancial assets or liabilities.

Sale of Fourteen Injectable ANDAs

In March 2016, the Company acquired 14 abbreviated new drug applications, or ANDAs, representing 11 different injectable chemical entities from Hikma Pharmaceuticals PLC. In February 2017, the Company sold the 14 ANDAs to an unrelated party. The consideration included a purchase price of \$6.4 million of which \$1.0 million was received upon closing, \$1.0 million was received in the second quarter of 2017 and the remaining \$4.4 million was received in January 2018. In addition to the purchase price, the purchaser agreed to pay the Company a royalty fee equal to 2% of net sales derived from purchaser's sales of the products for the period from February 2017 through February 2027. The Company has not recognized any royalty fee revenue. The Company recognized a gain of \$2.6 million within operating (income) expenses on its condensed consolidated statement of operations for the nine months ended September 30, 2017.

(Unaudited)

Goodwill

The changes in the carrying amounts of goodwill were as follows:

	September 30, 2018	December 31, 2017
	(in thousands)	
Beginning balance	\$ 4,461	\$ 3,976
Currency translation	(464)	485
Ending balance	\$ 3,997	\$ 4,461

Primatene® Trademark

In January 2009, the Company acquired the exclusive rights to the trademark, domain name, website and domestic marketing, distribution and selling rights related to Primatene® Mist, an over-the-counter bronchodilator product, which are recorded at the allocated fair value of \$29.2 million, its carrying value as of September 30, 2018.

The trademark was determined to have an indefinite life. In determining its indefinite life, the Company considered the following: the expected use of the intangible; the longevity of the brand; the legal, regulatory and contractual provisions that affect their maximum useful life; the Company's ability to renew or extend the asset's legal or contractual life without substantial costs; effects of the regulatory environment; expected changes in distribution channels; maintenance expenditures required to obtain the expected future cash flows from the asset; and considerations for obsolescence, demand, competition and other economic factors.

As a result of environmental concerns about Chlorofluorocarbons, or CFCs, the FDA issued a final ruling on January 16, 2009 that required the CFC formulation of its Primatene® Mist product to be phased out by December 31, 2011.

In 2013, the Company filed a new drug application, or NDA, for Primatene® Mist, which is delivered by a metered dose inhaler with a non-CFC propellant. In November 2018, the FDA approved the NDA for Primatene® Mist.

Note 9. Inventories

Inventories consist of the following:

	September 30, 2018	December 31, 2017
	(in thousands)	
Raw materials and supplies	\$ 28,560	\$ 19,973
Work in process	26,308	22,469
Finished goods	10,546	21,167
Total inventories	\$ 65,414	\$ 63,609

Charges totaling \$3.5 million and \$6.6 million were included in the cost of revenues in the Company's condensed consolidated statements of operations for the three and nine months ended September 30, 2018, respectively, to adjust the Company's inventory and related firm inventory purchase commitments to their net realizable value. For the three and nine months ended September 30, 2017, charges totaling \$2.2 million and \$7.3 million were included in the cost of revenues, respectively, to adjust the Company's inventory and related firm inventory purchase commitments to their net realizable value.

Less current portion of long-term debt and capital leases	18,592	6,312
Long-term debt and capital leases, net of current portion	\$ 32,606	\$ 40,844

As of September 30, 2018, the fair value of the loans approximates their carrying amount. The interest rate used in the fair value estimation was determined to be a Level 2 input. For certain loans with East West Bank, the Company has entered into fixed interest rate swap contracts to exchange the variable interest rates for fixed interest rates over the life of certain debt instruments without the exchange of the underlying notional debt amount. The interest rate swap contracts do not qualify for hedge accounting and are recorded at fair value based on Level 2 inputs. These swap contracts have an aggregate fair value of \$0.5 million and \$0.1 million as of September 30, 2018 and December 31, 2017, respectively. The change in fair value is recorded in other income (expense) in the Company's condensed consolidated statement of operations.

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Loans with East West Bank

Equipment Credit Line—Due December 2022

In June 2018, the Company drew down \$8.0 million on the equipment credit line from East West Bank, which is due in December 2022. The loan bears a variable interest rate at the Prime Rate as published by The Wall Street Journal. The Company entered into a fixed interest rate swap contract on this facility to exchange the variable interest rate for a fixed interest rate of 5.87% over the life of the facility without the exchange of the underlying notional debt amount. The interest rate swap contract does not qualify for hedge accounting and will be recorded at fair value based on Level 2 inputs. As of September 30, 2018, the Company had \$8.0 million outstanding under this facility.

Covenants

At September 30, 2018 and December 31, 2017, the Company was in compliance with its debt covenants, which include a minimum current ratio, minimum debt service coverage, minimum tangible net worth, maximum debt-to-effective-tangible-net-worth ratio, and minimum deposit requirements, computed on a consolidated basis.

Equipment under Capital Leases

The Company entered into leases for certain equipment under capital leasing arrangements which will expire at various times through 2023. The cost of equipment under capital leases was \$1.6 million at September 30, 2018 and December 31, 2017.

Note 13. Income Taxes

The following table sets forth the Company's income tax provision for the periods indicated:

	Three Months Ended		Nine Months Ended	
	September 30, 2018	2017	September 30, 2018	2017
	(in thousands)			
Income (loss) before taxes	\$ 2,574	\$ (2,114)	\$ (10,515)	\$ 2,394
Income tax expense (benefit)	958	(2,213)	(2,137)	(466)
Net income (loss)	\$ 1,616	\$ 99	\$ (8,378)	\$ 2,860
Income tax provision as a percentage of income before income taxes	37.2	% 104.7	% 20.3	% (19.5) %

The difference in the Company's effective tax rate for the three and nine months ended September 30, 2018 was primarily due to differences in income (loss) before taxes and timing of discrete items, as well as the Tax Act, which was enacted on December 22, 2017. The Tax Act, among other things, reduces the statutory U.S. federal corporate income tax rate from 35% to 21% and requires companies to pay a one-time transition tax on earnings of certain foreign subsidiaries that were previously tax deferred. In March 2018, the FASB issued ASU No. 2018-05 to incorporate Staff Accounting Bulletin, or SAB 118, pursuant to which the Company's final analysis will be completed over a one-year measurement period ending December 22, 2018, and any adjustments during this measurement period will be included in net earnings from continuing operations as an adjustment to income tax expense in the reporting period when such adjustments are determined. During the three and nine months ended September 30, 2018, the Company has made no material changes to the provisional amounts recorded at December 31, 2017. The Company will continue to refine its calculations as additional analysis and changes to certain amounts and estimates are completed and tax returns are filed. The Company's estimates may also be affected as it gains a more thorough understanding of the tax law. During the nine months ended September 30, 2018, the Company recognized a discrete tax benefit of \$1.3 million for previously unrecognized tax benefits upon a favorable state audit resolution.

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Effective January 1, 2018, the Company adopted ASU No. 2016-16, Intra-Entity Transfers of Assets Other Than Inventory, pursuant to which the income tax consequences of intra-entity transfer of an asset other than inventory is required to be recognized in the period in which the transfer occurs. The Company adopted the standard on a modified retrospective basis resulting in an increase of deferred tax assets and the beginning balance of retained earnings by \$0.5 million, respectively.

Valuation Allowance

In assessing the need for a valuation allowance, management considers whether it is more likely than not that some portion or all of the deferred tax assets will be realized. Ultimately, the realization of deferred tax assets depends on the existence of future taxable income. Management considers sources of taxable income such as income in prior carryback periods, future reversal of existing deferred taxable temporary differences, tax-planning strategies, and projected future taxable income.

The Company has discontinued recognizing AFP's income tax benefits by recording a full valuation allowance until it is determined that it is more likely than not that AFP will generate sufficient taxable income to realize its deferred income tax assets.

Note 14. Stockholders' Equity

Changes in stockholders' equity consisted of the following:

Three Months Ended		Nine Months Ended

Share Buyback Program

Pursuant to the Company's share buyback program, the Company purchased 441,175 and 1,278,916 shares of its common stock during the three and nine months ended September 30, 2018, for total consideration of \$7.6 million and \$22.4 million, respectively. The Company purchased 472,379 and 1,584,661 shares of its common stock during the three and nine months ended September 30, 2017, for total consideration of \$7.6 million and \$24.8 million, respectively.

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

On May 7, 2018, the Company's Board of Directors authorized an increase of \$20.0 million to the Company's share buyback program, which is expected to continue for an indefinite period of time. The primary goal of the program is to offset dilution created by the Company's equity compensation programs.

Purchases are made through open market and private block transactions pursuant to Rule 10b5-1 plans, privately negotiated transactions or other means as determined by the Company's management and in accordance with the requirements of the SEC. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements, and other conditions. These repurchased shares are accounted for under the cost method and are included as a component of treasury stock in the Company's consolidated balance sheets.

The 2015 Equity Incentive Plan

As of September 30, 2018, the Company reserved an aggregate of 5,511,252 shares of common stock for future issuance under the 2015 Equity Incentive Plan, or the 2015 Plan. In January 2018, an additional 1,165,590 shares were reserved under the 2015 Plan pursuant to the evergreen provision.

Share-Based Award Activity and Balances

The Company accounts for share-based compensation payments in accordance with ASC 718, which requires measurement and recognition of compensation expense at fair value for all share-based payment awards made to employees and directors. Under these standards, the fair value of option awards and the option components of the Employee Stock Purchase Plan awards are estimated at the grant date using the Black-Scholes option-pricing model. The fair value of RSUs is estimated at the grant date using the Company's common share price. Prior to the adoption of ASU No. 2018-07, Improvements to Non-employees Share-Based Payment Accounting, non-vested stock options held by non-employees were revalued at each balance sheet date. As a result of the Company's early adoption of the guidance on July 1, 2018, stock options held by non-employees are no longer revalued after grant. The portion that is expected to vest is amortized and recognized in compensation expense on a straight-line basis over the requisite service period, generally from the grant date to the vesting date.

The weighted-averages for key assumptions used in determining the fair value of options granted during the three and nine months ended September 30, 2018 and 2017, are as follows:

	Three Months		Nine Months	
	Ended		Ended	
	September 30,		September 30,	
	2018	2017	2018	2017
Average volatility	40.3 %	36.9 %	39.9 %	37.0 %
Risk-free interest rate	2.8 %	2.0 %	2.7 %	2.1 %
Weighted-average expected life in years	6.3	6.3	5.7	5.5
Dividend yield rate	— %	— %	— %	— %

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

A summary of option activity under all plans for the nine months ended September 30, 2018, is presented below:

	Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value(1) (in thousands)
Outstanding as of December 31, 2017	10,898,701	\$ 14.65		
Options granted	1,088,313	20.15		
Options exercised	(824,003)	12.32		
Options cancelled	(131,530)	13.47		
Options expired	(384,879)	34.99		
Outstanding as of September 30, 2018	10,646,602	\$ 14.67	4.94	\$ 50,196
Exercisable as of September 30, 2018	7,361,813	\$ 14.32	3.73	\$ 36,501

(1) The aggregate intrinsic value is calculated as the difference between the exercise price of the underlying awards and the estimated fair value of the Company's common stock for those awards that have an exercise price below the estimated fair value at September 30, 2018.

For the three and nine months ended September 30, 2018, the Company recorded expenses of \$1.8 million and \$6.4 million, respectively, related to stock options granted under all plans. For the three and nine months ended September 30, 2017, the Company recorded expenses of \$2.1 million and \$6.4 million, respectively, related to stock options granted under all plans.

Information relating to option grants and exercises is as follows:

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2018	
	2018	2017	2018	2017
Weighted-average grant date fair value per option share	\$ 7.90	\$ 6.23	\$ 7.79	\$ 4.95

Edgar Filing: Amphastar Pharmaceuticals, Inc. - Form 10-Q

Intrinsic value of options exercised	2,302	1,668	3,640	4,730
Cash received from options exercised	1,537	782	4,048	9,521
Total fair value of the options vested during the year	93	779	7,963	6,984

A summary of the status of the Company's non-vested options as of September 30, 2018, and changes during the nine months ended September 30, 2018, is presented below:

	Options	Weighted-Average Grant Date Fair Value
Non-vested as of December 31, 2017	4,310,241	\$ 4.21
Options granted	1,088,313	7.79
Options vested	(1,982,235)	4.02
Options forfeited	(131,530)	5.00
Non-vested as of September 30, 2018	3,284,789	5.47

As of September 30, 2018, there was \$12.9 million of total unrecognized compensation cost, net of forfeitures, related to non-vested stock option based compensation arrangements granted under all plans. The cost is expected to be recognized over a weighted-average period of 2.4 years and will be adjusted for future changes in estimated forfeitures.

(Unaudited)

Restricted Stock Units

The Company grants restricted stock units, or RSUs, to certain employees and members of the Board of Directors with a vesting period of up to five years. The grantee receives one share of common stock at a specified future date for each RSU awarded. The RSUs may not be sold or otherwise transferred until certificates of common stock have been issued, recorded, and delivered to the participant. The RSUs do not have any voting or dividend rights prior to the issuance of certificates of the underlying common stock. The share-based expense associated with these grants was based on the Company's common stock fair value at the time of grant and is amortized over the requisite service period, which generally is the vesting period using the straight-line method. During the three and nine months ended September 30, 2018, the Company recorded expenses of \$1.9 million and \$5.9 million, respectively, related to RSU awards granted under all plans. During the three and nine months ended September 30, 2017, the Company recorded expenses of \$1.9 million and \$5.9 million, respectively, related to RSU awards granted under all plans.

As of September 30, 2018, there was \$14.1 million of total unrecognized compensation cost, net of forfeitures, related to non-vested RSU-based compensation arrangements granted under all plans. The cost is expected to be recognized over a weighted-average period of 2.4 years and will be adjusted for future changes in estimated forfeitures.

Information relating to RSU grants and deliveries is as follows:

	Total RSUs Issued	Total Fair Market Value of RSUs Issued as Compensation(1) (in thousands)
RSUs outstanding at December 31, 2017	1,392,781	
RSUs granted	436,309	\$ 8,484
RSUs forfeited	(49,480)	
RSUs vested(2)	(568,892)	
RSUs outstanding at September 30, 2018	1,210,718	

(1)

Edgar Filing: Amphastar Pharmaceuticals, Inc. - Form 10-Q

The total fair market value is derived from the number of RSUs granted times the current stock price on the date of grant.

(2) Of the vested RSUs, 206,430 shares of common stock were surrendered to fulfill tax withholding obligations.

The Company recorded share-based compensation expense under all plans and it is included in the Company's consolidated statement of operations as follows:

	Three Months Ended		Nine Months Ended	
	September 30, 2018	2017	September 30, 2018	2017
	(in thousands)			
Cost of revenues	\$ 884	\$ 815	\$ 3,025	\$ 2,843
Operating expenses:				
Selling, distribution, and marketing	86	88	297	237
General and administrative	2,615	2,947	8,251	8,715

Note 15. Employee Benefits

401(k) Plan

The Company has a defined contribution 401(k) plan, or the Plan, whereby eligible employees voluntarily contribute up to a defined percentage of their annual compensation. The Company matches contributions at a rate of 50% on the first 6% of employee contributions, and pays the administrative costs of the Plan. Total employer contributions for the three and nine months ended September 30, 2018, were approximately \$0.3 million and \$0.9 million, respectively, compared to the prior year expense of \$0.3 million and \$0.8 million for the three and nine months ended September 30, 2017, respectively.

Defined Benefit Pension Plan

In connection with the Merck API Transaction, the Company assumed an obligation associated with a defined-benefit plan for eligible employees of AFP. This plan provides benefits to the employees from the date of retirement and is based on the employee's length of time employed by the Company. The calculation is based on a statistical calculation combining a number of factors that include the employee's age, length of service, and AFP employee turnover rate.

The liability under the plan is based on a discount rate of 1.60% as of September 30, 2018 and December 31, 2017, respectively. The liability is included in accrued liabilities in the accompanying consolidated balance sheets. The plan is currently unfunded, and the benefit obligation under the plan was \$2.2 million and \$2.1 million at September 30, 2018 and December 31, 2017, respectively. The Company recorded an immaterial amount of expense under the plan for the three months ended September 30, 2018, and \$0.2 million for the nine months ended September 30, 2018. The Company recorded an immaterial amount of expense under the plan for the three months ended September 30, 2017, and \$0.1 million for the nine months ended September 30, 2017.

Note 16. Commitments and Contingencies

Collaboration Agreements with Medical Device Manufacturers

In August 2014, the Company entered into a collaboration agreement with a medical device manufacturer to develop a drug delivery system to be used by the Company for one of its pipeline products. As of September 30, 2018, the Company has paid an upfront payment of \$0.5 million and \$1.5 million in milestone payments under this agreement, which were classified as research and development expense as the milestones were met. The Company is obligated to pay up to an additional \$0.5 million if certain research and development milestones are met. As of September 30, 2018, no such obligation existed. Pursuant to the collaboration agreement, if the medical device manufacturer is successful in the development of this drug delivery system and the Company's pipeline products receive appropriate regulatory approval, the Company intends to enter into a commercial supply agreement with such medical device manufacturer for a minimum purchase of 1.0 million units during the first 12 months.

In October 2017, the Company entered into a collaboration agreement with a medical device manufacturer to develop a drug delivery system to be used by the Company for one of its pipeline products for a total of \$1.6 million. As of September 30, 2018, the Company has paid and expensed an upfront payment of \$0.4 million and \$0.2 million in milestone payments under this agreement, which were classified as research and development expense as the milestones were met. The Company is obligated to pay up to an additional \$1.0 million, if certain research and development milestones are met. As of September 30, 2018, no such obligation existed for the milestones. In addition, pursuant to the collaboration agreement, if the medical device manufacturer is successful in the development of this drug delivery system and the Company's pipeline products receive appropriate regulatory approval, the Company intends to enter into a commercial supply agreement with such medical device manufacturer under which the Company is obligated to pay an additional \$1.0 million if certain commercial development milestones are met and to purchase a minimum of 100,000 units per year for three years.

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Operating Lease Agreements

The Company leases real and personal property in the normal course of business under various non-cancelable operating leases. The Company, at its option, can renew a substantial portion of its leases, at the market rate, for various renewal periods ranging from one to six years. Rental expense under these leases for the three and nine months ended September 30, 2018, was approximately \$1.1 million and \$3.1 million, respectively, compared to \$0.9 million and \$2.6 million for the three and nine months ended September 30, 2017, respectively.

Purchase Commitments

As of September 30, 2018, the Company has entered into commitments to purchase equipment and raw materials for an aggregate amount of approximately \$55.0 million. The Company anticipates that most of these commitments with remaining terms in excess of one year will be fulfilled by 2019. In addition, the Company is obligated to pay a supplier certain payments up to \$1.5 million based on the sales of one of the Company's products.

In accordance with certain agreements between ANP and the Chinese government, in January 2010 and November 2012, the Company acquired certain land-use rights for \$1.2 million and \$1.3 million, respectively. As required by these agreements, the Company has committed to spending approximately \$15.0 million in the related land development, which primarily includes the construction of fixed assets according to a specified timetable. As of September 30, 2018, the Company has spent \$4.3 million on such construction. The current pace of the land development is behind the schedules described in the purchase agreements and potential monetary penalties could result if the development is delayed or not completed in accordance with the terms of the agreements. The Company is in discussion with the Chinese government regarding the development and believes that the likelihood of incurring any penalty is remote.

Note 17. Related-Party Transactions

ANP Private Placement

In July 2018, ANP completed a private placement of its common equity interest to accredited investors for aggregate gross proceeds of approximately \$57.2 million. The investors are required to complete their contributions in cash by December 31, 2018. In connection with the private placement, all of the executive officers of the Company, Stephen Shohet, Howard Lee, and Richard Koo, directors of the Company, and certain employees of ANP entered into subscription agreements (each, a “Subscription Agreement”) for the indirect investment in ANP. These Subscription Agreements were transacted either through an investment in Amphastar Cayman, a Cayman Islands limited liability company, Qianqia, or Zhongpan, Chinese partnerships. The total aggregate gross proceeds from such executive officers and directors were approximately \$29.7 million.

Note 18. Litigation

Enoxaparin Patent Litigation

In September 2011, Momenta Pharmaceuticals, Inc., or Momenta, a Boston based pharmaceutical company, and Sandoz Inc., or Sandoz, the generic division of Novartis, initiated litigation against the Company for alleged patent infringement of two patents related to testing methods for batch release of enoxaparin, which the Company refers to as the “’886 patent” and the “’466 patent.” The lawsuit was filed in the United States District Court for the District of Massachusetts, or the Massachusetts District Court. In October 2011, the Massachusetts District Court issued a preliminary injunction barring the Company from selling its generic enoxaparin product and also requiring Momenta and Sandoz to post a \$100.1 million bond. The preliminary injunction was stayed by the United States Court of Appeals for the Federal Circuit, or the Federal Circuit, in January 2012, and reversed by the Federal Circuit in August 2012.

In January 2013, the Company moved for summary judgment of non infringement of both patents. Momenta and Sandoz withdrew their allegations as to the ’466 patent, and in July 2013, the Massachusetts District Court granted the Company’s motion for summary judgment of non infringement of the ’886 patent and denied Momenta and Sandoz’s motion for leave to amend their infringement contentions. On January 24, 2014, the Massachusetts District Court judge entered final judgment in the Company’s favor on both patents. Momenta and Sandoz also filed a motion to collect attorneys’ fees and costs relating to a discovery motion, which the Massachusetts District Court granted. On May 9, 2016, the Massachusetts District Court issued an order imposing fees and costs of approximately \$0.4 million in relation to this discovery motion. This amount has been accrued in the general and administrative expense for the quarter ended March 31, 2016. On January 30, 2014, Momenta and Sandoz filed a notice of appeal to the Federal Circuit appealing the court’s final judgment including summary judgment denying Momenta and Sandoz’s motion for leave to amend their infringement contentions.

Following appeal briefing filed by the parties, the Federal Circuit held oral argument on May 4, 2015. On November 10, 2015, the Federal Circuit panel affirmed-in-part and vacated-in-part the decision of the Massachusetts District Court granting summary judgment of non-infringement as to the Company, and it remanded the case to the Massachusetts District Court for further proceedings consistent with its opinion. The Federal Circuit panel affirmed the Massachusetts District Court’s holding in the Company’s favor that the Company does not infringe under 35 U.S.C.

271(g), and the panel vacated the grant of summary judgment to the extent it was based on the determination that the Company's activities fall within the 35 U.S.C. 271(e)(1) safe harbor. The Federal Circuit panel also left to the Massachusetts District Court's discretion whether to reconsider on remand its denial of leave for Momenta and Sandoz to amend their infringement contentions. On January 11, 2016, the Company filed a Petition for Rehearing En Banc with the Federal Circuit. On February 17, 2016, the Federal Circuit denied the Company's Petition, and the Federal Circuit issued its mandate on February 24, 2016, whereby the case returned to the Massachusetts District Court for further proceedings.

On March 18, 2016, the parties filed a joint status report with the Massachusetts District Court. On June 21, 2016, the Massachusetts District Court granted Momenta and Sandoz's Motion for Leave to Amend its Infringement Contentions. In light of Momenta and Sandoz's Amended Infringement Contentions and recent changes in Supreme Court precedent since the case was stayed in 2012, the Company sought to amend its Non-Infringement and Invalidity Contentions.

On July 18, 2016, the Company submitted its Motion for Leave to Amend Its Non-Infringement and Invalidity Contentions and Momenta and Sandoz responded on July 25, 2016. In light of the new arguments made in their response, the Company further filed a Motion For Leave to Reply in Further Support of Defendants' Motion for Leave to Amend Non-Infringement and Invalidity Contentions, which was granted. A hearing was held on August 23, 2016, where the Magistrate Judge ordered the Company to file its proposed amended contentions, which it filed on August 31, 2016. On February 4, 2017, the Magistrate Judge issued an order denying the Company leave to amend its contentions. The Company filed objections to this order with the District Court on February 21, 2017. On April 13, 2017, the District Court rejected the determination of the Magistrate Judge with respect to the Company's amended non-infringement contentions,

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

and allowed the Company to amend its non-infringement contentions. With respect to the Company's amended invalidity contentions, the District Court accepted the Magistrate Judge's determination; however, the District Court specifically stated that the Company can argue changes in law at the summary judgment stage or at trial.

In parallel with the Massachusetts District Court proceedings, the Company appealed the Federal Circuit's decision to vacate the grant of the Company's summary judgment to the extent it was based on the determination that the Company's activities are protected under the Safe Harbor. The Company filed a Petition for a Writ of Certiorari with the Supreme Court on May 17, 2016. Momenta and Sandoz initially waived their right to respond to the petition; however, on May 31, 2016, the Supreme Court requested a response from Momenta and Sandoz. The response from Momenta and Sandoz was initially due on June 30, 2016, but they requested an extension. Momenta and Sandoz filed their response on August 1, 2016. On October 3, 2016, the Supreme Court declined the Petition for a Writ of Certiorari.

Fact discovery in the Massachusetts District Court proceedings closed on November 22, 2016, and the parties proceeded with expert discovery and exchanged opening and rebuttal expert reports. Expert discovery closed on March 24, 2017. On April 14, 2017, Plaintiffs filed a Motion for Summary Judgment seeking to dismiss the Company's equitable defenses. On April 14, 2017, the Company filed Defendants' Motion for Summary Judgment of Invalidity and Noninfringement. In the Motion, the Company moved for the District Court to grant summary judgment in favor of the Company on the following issues: (1) the '886 patent is invalid under 35 U.S.C. § 101 as claiming non-patentable subject matter; (2) the '886 patent is invalid under 35 U.S.C. § 112 because the claims are indefinite; and (3) the Company's tests do not infringe the claims of the '886 patent. Oppositions to the motions for summary judgment were filed on May 5, 2017. Replies in support of the motions for summary judgment were filed on May 19, 2017. On June 16, 2017, the District Court issued an order denying the summary judgment motions. The District Court also denied Plaintiffs' motion for summary judgment dismissing the Company's defenses of implied waiver and equitable estoppel, and denied Plaintiffs' alternative request for a separate hearing on the implied waiver and equitable estoppel defenses holding that the defenses would be submitted to the jury for an advisory verdict.

Trial in the Massachusetts District Court on all claims and defenses began on July 10, 2017. On July 21, 2017, the jury returned a unanimous verdict finding that although the Company's tests infringed the asserted patent, the patent was invalid for lack of enablement and lack of written description and the jury further found that Plaintiffs are entitled to zero (\$0) damages. As for the Company's defenses of implied waiver and equitable estoppel, the jury found that Plaintiffs waived their right to recover for infringement of the asserted patent and that Plaintiffs are estopped from enforcing the asserted patent against the Company. The verdict on these equitable defenses was briefed by the parties and submitted to the Court. In the post-trial briefing, the Company requested the Court to adopt the findings of the jury on the equitable defenses, and to set aside the jury's finding of infringement. In Plaintiffs' post-trial briefing,

Plaintiffs requested a new trial, and requested the Court to set aside the jury's finding that the asserted patent was invalid for lack of enablement and lack of written description. In a February 7, 2018 Memorandum and Order and with respect to the equitable defenses, the Court found that Plaintiffs waived their right to enforce the '866 patent against the Company for its use of one of its test, and are equitably estopped from enforcing the '866 patent against the Company for its use of that same test. The Court also found that Plaintiffs have not waived their right to enforce the '866 patent against the Company for its use of a second test, and are not equitable estopped from enforcing the '866 patent against the Company for its use of that same second test. On February 7, 2018, the Court also denied all other post-trial motions. On March 20, 2018, the Court entered final judgment in this matter reflecting the jury's verdict and the Court's February 7, 2018 Memorandum and Order.

On March 23, 2018, the Company filed a motion to enforce liability on the bonds related to the preliminary injunction issued in October 2011, stayed in January 2012, and reversed by the Federal Circuit in August 2012. On March 27, 2018, Plaintiffs filed a notice of appeal with the Federal Circuit. On April 3, 2018, Plaintiffs filed a motion with the District Court to defer decision on the Company's motion to enforce liability on the bonds pending their appeal. On July 13, 2018, the District Court allowed Momenta's motion to defer consideration of the Company's motion to enforce liability on the bonds until the appeal is resolved. The appeal is ongoing.

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

The Company will continue to vigorously defend the jury's verdict, including against any appeal by the Plaintiffs. The Company intends to continue to pursue its attempt to collect the \$100.1 million bond posted by Momenta and Sandoz.

False Claims Act Litigation

In January 2009, the Company filed a qui tam complaint in the U.S. District Court for the Central District of California, or the California District Court, alleging that Aventis Pharma S.A., or Aventis, through its acquisition of a patent through false and misleading statements to the U.S. Patent and Trademark Office, as well as through false and misleading statements to the FDA, overcharged the federal and state governments for its Lovenox® product. If the Company is successful in this litigation, it could be entitled to a portion of any damage award that the government ultimately may recover from Aventis. In October 2011, the California District Court unsealed the Company's complaint.

On February 28, 2014, Aventis filed a motion for summary judgment on the issue of the adequacy of the Company's notice letter to the government, and the California District Court denied Aventis' motion for summary judgment in a final order it issued on May 12, 2014. On June 9, 2014, at Aventis' request, the California District Court issued an order certifying for appeal its order denying Aventis' motion for summary judgment. On June 9, 2014, Aventis filed with the United States Court of Appeals for the Ninth Circuit, or the Ninth Circuit, a petition for permission to appeal the California District Court's denial of Aventis' motion for summary judgment, and the Company filed an opposition to Aventis' petition on June 19, 2014. On August 22, 2014, the Ninth Circuit granted Aventis' petition. The parties filed their respective appeal briefs with the Ninth Circuit. On November 10, 2016, the Ninth Circuit heard oral argument on the appeal.

The California District Court set an evidentiary hearing for July 7, 2014 on the "original source" issue, a key element under the False Claims Act. The evidentiary hearing was conducted as scheduled, from July 7, 2014 through July 10, 2014. On July 13, 2015, the California District Court issued a ruling concluding that the Company is not an original source under the False Claims Act, and entered final judgment dismissing the case for lack of subject matter jurisdiction.

On July 20, 2015, the Company filed with the Ninth Circuit a notice of appeal of the California District Court's dismissal of the case, and Aventis filed a notice of cross-appeal on August 5, 2015. On November 12, 2015, Aventis

filed a pleading asking that the California District Court impose various monetary penalties and fines against the Company, including disgorgement of enoxaparin revenues and attorneys' fees expended by Aventis in this action, based on Aventis' allegations that the Company engaged in sanctionable conduct. On November 23, 2015, the California District Court issued an order setting forth a procedure for sanctions proceedings as to the Company as well as its outside counsel. On December 24, 2015, the Company filed a pleading with the California District Court opposing the imposition of sanctions, and on January 20, 2016, Aventis filed a response pleading further pressing for the imposition of sanctions. On May 4, 2016, the California District Court issued three orders requesting that the Company and its outside counsel file a document showing cause as to why sanctions should not be imposed and to set up a conference call with the parties and the court to discuss whether any discovery and/or a hearing is necessary. On June 13, 2016, the Company and its outside counsel each filed responses to the court's order to show cause as to why sanctions should not be imposed. On July 21, 2016, Aventis filed a response contending that the court should impose sanctions. On February 10, 2017, the Court held a show cause hearing regarding the potential imposition of sanctions and took the matter under submission. On September 18, 2017, the District Court issued its decision that no sanctions will be imposed on either the Company or its counsel.

On March 28, 2016, the Company filed its opening brief with the Ninth Circuit Court of Appeals setting forth detailed arguments as to why the False Claims Act litigation should not have been dismissed by the California District Court. On June 20, 2016, Aventis filed its principal brief in the appeal, responding to the Company's arguments regarding dismissal of the False Claims Act litigation, and setting forth Aventis' argument that it should be awarded attorneys' fees and expenses. On September 19, 2016, the Company filed its reply brief to Aventis's principal brief. On October 3, 2016, Aventis filed its reply brief in support of its cross-appeal of the District Court's denial of attorneys' fees. On November 10, 2016, the Ninth Circuit heard oral argument on the appeals.

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

On May 11, 2017, the Ninth Circuit issued an opinion affirming the California District Court's dismissal of the action for lack of subject matter jurisdiction; dismissing as moot Aventis' appeal from the District Court's denial of its motion for summary judgment on the issue of the adequacy of the Company's notice letter to the government; reversing the District Court's denial of Aventis' motion for attorneys' fees; and remanding the case to the District Court for resolution of the attorneys' fees issue. On July 14, 2017, Aventis filed an application with the District Court for entitlement to attorneys' fees and expenses. On November 20, 2017, the District Court issued its order granting Aventis' application for fees, stating that it would refer the matter to a magistrate judge for a report and recommendation regarding the amount of the award to be made. On November 21, 2017, the District Court referred the matter to a magistrate judge. The parties have agreed to a discovery and briefing schedule that is scheduled to conclude in January 2019. The Company intends to continue to vigorously defend against any such imposition of attorneys' fees or sanctions.

Momenta/Sandoz Antitrust Litigation

On September 17, 2015, the Company initiated a lawsuit by filing a complaint in the California District Court against Momenta and Sandoz, or the Defendants. The Company's complaint generally asserts that Defendants have engaged in certain types of illegal, monopolistic, and anticompetitive conduct giving rise to various causes of action against them. On December 9, 2015, Defendants filed a motion to dismiss and a motion to transfer the case to the District of Massachusetts. On January 4, 2016, the Company filed oppositions to both motions. On January 26, 2016, the California District Court granted Defendants' motion to transfer and did not rule on Defendants' motion to dismiss. Accordingly, the case was transferred to the District of Massachusetts. On February 9, 2016, the Company filed a writ of mandamus with the Ninth Circuit to attempt to appeal the California District Court's granting of Defendants' motion to transfer to the District of Massachusetts. The Ninth Circuit denied this petition on May 20, 2016, and as such the case will remain before the District of Massachusetts. On July 27, 2016, the Massachusetts District Court granted Defendants' motion to dismiss based on antitrust immunity doctrine, without addressing the substantive merits of the claims.

On August 25, 2016, the Company filed with the First Circuit Court of Appeals a notice of appeal of the Massachusetts District Court's dismissal of the antitrust case. On October 31, 2016, the Company filed its appeal brief with the First Circuit. On December 5, 2016, Defendants filed their response brief with the First Circuit Court of Appeals. On December 19, 2016, the Company filed its reply brief with the First Circuit Court of Appeals, which concluded the briefing on this appeal. On February 9, 2017, the First Circuit Court of Appeals heard oral arguments. On March 6, 2017, the First Circuit Court of Appeals issued its decision, in which it held 3 to 0 that the District Court of Massachusetts erred in dismissing the Company's antitrust case and sent the case back to the District Court to

consider additional arguments.

On April 20, 2017, Defendants filed their supplemental motion to dismiss and the Company filed its opposition on May 4, 2017. On March 19, 2018, the District Court entirely denied the Defendants' motion to dismiss. On April 19, 2018, the Defendants filed a motion to seek interlocutory appeal of the District Court's motion to dismiss opinion. The Company filed its opposition to interlocutory appeal on May 1, 2018. On June 1, 2018, the District Court denied Defendants' motion seeking interlocutory appeal.

On August 23, 2018, the District Court granted the parties' joint motion to extend the schedule as to fact and expert discovery and accepted their proposed dates. Under the schedule, fact discovery will close on November 30, 2018 and expert discovery will close on April 12, 2019. Summary judgment arguments are due on April 26, 2019, oppositions are due on June 14, 2019, and replies are due on July 10, 2019. Trial is scheduled for September 9, 2019.

Epinephrine Injection, 0.1 mg/mL Litigation

On June 28, 2018, Belcher Pharmaceuticals, LLC, or Belcher initiated a lawsuit by filing a complaint against IMS for infringement of U.S. Patent No. 9,283,197 with regard to IMS's New Drug Application No. 211363, filed under 21 U.S.C. § 355(b)(2) of the Hatch-Waxman Act, for FDA approval to manufacture and sell 0.1 mg/mL epinephrine injections. On

Table of Contents

AMPHASTAR PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

July 20, 2018, the Company filed a motion to dismiss Belcher's complaint for patent infringement under Federal Rule of Civil Procedure 12(b)(6). The briefing concluded on October 2, 2018. The District Court has not yet ruled on the motion to dismiss.

Other Litigation

The Company is also subject to various other claims and lawsuits from time-to-time arising in the ordinary course of business.

The Company records a provision for contingent losses when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. In the opinion of management, the ultimate resolution of any such matters is not expected to have a material adverse effect on its financial position, results of operations, or cash flows; however, the results of litigation and claims are inherently unpredictable and the Company's view of these matters may change in the future. Regardless of the outcome, litigation can have an adverse impact on the Company because of defense and settlement costs, diversion of management resources, and other factors.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion and analysis of the consolidated operating results, financial condition, liquidity and cash flows of our company as of and for the periods presented below. The following discussion and analysis should be read in conjunction with the "Condensed Consolidated Financial Statements" and the related notes thereto included in this Quarterly Report on Form 10-Q, or Quarterly Report. This discussion contains forward-looking statements that are based on the beliefs of our management, as well as assumptions made by, and information currently available to our management. Actual results could differ materially from those discussed in or implied by forward-looking statements. These risks, uncertainties, and other factors include, among others, those identified under the "Special Note About Forward-Looking Statements," above and described in greater detail elsewhere in this Quarterly Report and in our Annual Report on Form 10-K for the year ended December 31, 2017, particularly in Item 1A. "Risk Factors."

Overview

We are a specialty pharmaceutical company that focuses primarily on developing, manufacturing, marketing and selling technically challenging generic and proprietary injectable, inhalation, and intranasal products as well as insulin API products. We currently manufacture and sell over 20 products. The FDA recently granted approval of Primatene® Mist in a new CFC free formulation. We plan to begin selling this product and have it on drug store shelves in early 2019.

We are currently developing a portfolio of 15 generic ANDAs, three generic biosimilar product candidates and five proprietary product candidates, which are in various stages of development and target a variety of indications. With respect to these product candidates, we have four ANDAs and one NDA on file with the FDA.

Our largest products by net revenues currently include enoxaparin sodium injection, naloxone hydrochloride injection, lidocaine jelly and sterile solution, phytonadione, and medroxyprogesterone acetate. We launched neostigmine methysulfate in the fourth quarter of 2017, medroxyprogesterone acetate in the first quarter of 2018, and isoproterenol hydrochloride injection in the third quarter of 2018.

To complement our internal growth and expertise, we have made several strategic acquisitions of companies, products and technologies. These acquisitions collectively have strengthened our core injectable and inhalation product technology infrastructure by providing additional manufacturing, marketing, and research and development capabilities including the ability to manufacture raw materials, APIs, and other components for our products.

Included in these acquisitions are marketing authorizations for 33 products in the UK, Ireland, Australia, and New Zealand, representing 11 different injectable chemical entities, from UCB Pharma GmbH. We are in the process of transferring the manufacturing of these products to our facilities in California, which will require approvals from the UK Medicines and Healthcare products Regulatory Agency before we can relaunch the products.

In July 2018, ANP completed a private placement of its common equity interest to accredited investors for aggregate gross proceeds of approximately \$57.2 million, of which \$26.2 million has been received by ANP as of September 30, 2018. The investors are required to complete their contributions in cash by December 31, 2018. In connection with the private placement, all of the executive officers of the Company, Stephen Shoet, Howard Lee, and Richard Koo, directors of the Company, and certain employees of ANP entered into subscription agreements for the indirect investment in ANP. The total aggregate gross proceeds from such executive officers and directors were approximately \$29.7 million. We have retained approximately 58% of the equity interest in ANP immediately after the private placement. ANP intends to use the net proceeds from the private placement for its business expansion plans. ANP's net income or loss after July 2, 2018, was attributed to us in accordance with our equity interest of approximately 58% in ANP.

Business Segments

As of September 30, 2018, our performance is assessed and resources are allocated based on the following two reportable segments: (1) finished pharmaceutical products and (2) API products. The finished pharmaceutical products

Table of Contents

segment manufactures, markets, and distributes enoxaparin, naloxone, phytonadione, lidocaine, medroxyprogesterone acetate, as well as various other critical and non-critical care drugs. The API segment manufactures and distributes recombinant human insulin API and porcine insulin API for external customers and internal product development. Information reported herein is consistent with how it is reviewed and evaluated by our chief operating decision maker. Factors used to identify our segments include markets, customers and products.

Results of Operations

Three Months Ended September 30, 2018 Compared to Three Months Ended September 30, 2017

Net revenues

	Three Months Ended September 30, 2018		September 30, 2017		Change Dollars	%
	(in thousands)					
Net revenues						
Finished pharmaceutical products	\$ 71,767	\$ 54,455	\$ 17,312	32	%	
API	3,776	3,461	315	9	%	
Total net revenues	\$ 75,543	\$ 57,916	\$ 17,627	30	%	
Cost of revenues						
Finished pharmaceutical products	\$ 41,196	\$ 33,233	\$ 7,963	24	%	
API	5,087	4,130	957	23	%	
Total cost of revenues	\$ 46,283	\$ 37,363	\$ 8,920	24	%	
Gross profit	\$ 29,260	\$ 20,553	\$ 8,707	42	%	
as % of net revenues	39	%	35	%		

The increase in net revenues of the finished pharmaceutical products for the three months ended September 30, 2018, was primarily due to the following changes:

	Three Months Ended September 30, 2018		September 30, 2017		Change Dollars	%
	(in thousands)					
Finished pharmaceutical products net revenues						
Enoxaparin	\$ 18,564	\$ 6,549	\$ 12,015	183	%	

Edgar Filing: Amphastar Pharmaceuticals, Inc. - Form 10-Q

Lidocaine	9,875	9,596	279	3	%
Naloxone	9,432	12,709	(3,277)	(26)	%
Phytonadione	8,968	9,352	(384)	(4)	%
Medroxyprogesterone	7,552	—	7,552	N/A	
Epinephrine	1,881	2,027	(146)	(7)	%
Other finished pharmaceutical products	15,495	14,222	1,273	9	%
Total finished pharmaceutical products net revenues	\$ 71,767	\$ 54,455	\$ 17,312	32	%

A market shortage for enoxaparin in September led to a large increase in non-contract sales at list prices. Additionally, we raised prices on enoxaparin to partially offset material cost increases. These pricing trends resulted in \$7.2 million in additional sales, while the remaining increase in sales was due to higher unit volumes.

We launched medroxyprogesterone acetate in a vial form in January 2018 and in a pre-filled syringe form in February 2018. Additionally, we launched isoproterenol hydrochloride injection in July 2018 which contributed to the increase in other finished pharmaceutical product sales. The decrease in sales of naloxone was primarily driven by lower unit volumes.

We discontinued our epinephrine injection, USP vial product in the second quarter of 2017 in accordance with the FDA's request. Our epinephrine injection, USP vial product, was marketed under the "grandfather" exception to the

Table of Contents

FDA's "Prescription Drug Wrap-Up" program. The remainder of our epinephrine sales was from our pre-filled syringe product, which remains on the market.

We anticipate that sales of naloxone and enoxaparin will continue to fluctuate in the future as a result of competition.

Sales of API primarily depend on the timing of customer purchases and, in particular, MannKind Corporation's, or MannKind, purchases of recombinant human insulin, or RHI, API for use in MannKind's product Afrezza®. In September 2018, MannKind notified us that they would not exercise their minimum annual purchase option of RHI API for 2019 under the supply option agreement between us and MannKind, or the Option Agreement. Under the Option Agreement, we recognized the cancellation fee for 2019 of \$1.0 million in net revenues during the three months ended September 30, 2018 and subsequently received the payment. We anticipate that sales of API will continue to fluctuate and will likely decrease due to the inherent uncertainties related to sales to MannKind. In addition, most of our API sales are denominated in Euros, and the fluctuation in the value of the Euro versus the U.S. Dollar has had, and will continue to have, an impact on API sales revenues in the near term.

A significant portion of our customer shipments in any period relate to orders received and shipped in the same period, generally resulting in low product backlog relative to total shipments at any time. We had no significant backlog as of September 30, 2018. Our backlog is generally not a meaningful indicator in any given period of our ability to achieve any particular level of overall revenue or financial performance.

Cost of revenues

Changes in cost of revenues and the resulting gross margins increase were primarily due to the effects of the launch of medroxyprogesterone acetate and isoproterenol hydrochloride in 2018 as well as the higher average selling price of enoxaparin.

In June 2018, we received FDA approval for our ANDA supplement for the manufacture of semi-purified heparin at ANP, our subsidiary in China, and the manufacture of heparin sodium at IMS, our subsidiary in South El Monte, California. The cost of heparin, which is the starting material for enoxaparin, has increased and is expected to increase further putting downward pressure on our gross margins. However, we believe that this trend will be offset by sales of our higher-margin products, such as medroxyprogesterone acetate, neostigmine, and isoproterenol that were recently launched.

Selling, distribution and marketing, and general and administrative

	Three Months Ended		Change	
	September 30, 2018	2017	Dollars	%
	(in thousands)			
Selling, distribution, and marketing	\$ 1,963	\$ 1,756	\$ 207	12 %
General and administrative	\$ 13,407	\$ 11,665	\$ 1,742	15 %

The increase in selling, distribution, and marketing expenses is primarily due to increased freight costs. The increase in general and administrative expense was primarily due to higher legal expenses compared to the same period in 2017 (see Note 18 to the condensed consolidated financial statements for more information regarding litigation matters).

We expect that general and administrative expenses will increase on an annual basis due to increased costs associated with ongoing compliance with public company reporting obligations and an increase in legal fees associated with patent challenges.

Table of Contents

Research and development

	Three Months Ended		Change Dollars	%	
	September 30, 2018	2017			
	(in thousands)				
Salaries and personnel-related expenses	\$ 4,313	\$ 3,392	\$ 921	27	%
Clinical trials	193	13	180	1,385	%
FDA fees	229	15	214	1,427	%
Testing, operating and lab supplies	4,286	4,579	(293)	(6)	%
Depreciation	1,291	1,128	163	14	%
Other expenses	1,028	948	80	8	%
Total research and development expenses	\$ 11,340	\$ 10,075	\$ 1,265	13	%

Research and development costs consist primarily of costs associated with the research and development of our product candidates. We expense research and development costs as incurred. Salaries and personnel-related expenses increased primarily due to the expansion of our ANP facility. FDA fees increased due to an ANDA filing fee for one of our pipeline products.

We expect that research and development expenses will increase on an annual basis due to increased clinical trial costs related to our biosimilar and inhalation product candidates. These expenditures will include costs of APIs developed internally and purchased externally, the cost of purchasing reference listed drugs and the costs of performing the clinical trials.

Provision for income tax expense (benefit)

	Three Months Ended		Change Dollars	%	
	September 30, 2018	2017			
	(in thousands)				
Income tax expense (benefit)	\$ 958	\$ (2,213)	\$ 3,171	NM	
Effective tax rate	37 %	105 %			

The decrease in the effective tax rate for the three months ended September 30, 2018, was primarily due to the differences in pre-tax income positions, the timing of discrete items, and the decrease of tax rates as a result of the Tax Act enacted on December 22, 2017, which has reduced the statutory U.S. federal corporate income tax rate from 35% to 21%.

Table of Contents

Nine Months Ended September 30, 2018 Compared to Nine Months Ended September 30, 2017

Net revenues

	Nine Months Ended September 30,		Change	
	2018	2017	Dollars	%
	(in thousands)			
Net revenues				
Finished pharmaceutical products	\$ 188,125	\$ 174,154	\$ 13,971	8 %
API	16,851	5,619	11,232	200 %
Total net revenues	\$ 204,976	\$ 179,773	\$ 25,203	14 %
Cost of revenues				
Finished pharmaceutical products	\$ 110,269	\$ 99,865	\$ 10,404	10 %
API	22,411	9,889	12,522	127 %
Total cost of revenues	\$ 132,680	\$ 109,754	\$ 22,926	21 %
Gross profit	\$ 72,296	\$ 70,019	\$ 2,277	3 %
as % of net revenues	35 %	39 %		

The increase in net revenues of the finished pharmaceutical products for the nine months ended September 30, 2018, was primarily due to the following changes:

	Nine Months Ended September 30,		Change	
	2018	2017	Dollars	%
	(in thousands)			
Finished pharmaceutical products net revenues				
Enoxaparin	\$ 34,286	\$ 25,247	\$ 9,039	36 %
Lidocaine	29,667	27,218	2,449	9 %
Naloxone	29,492	33,909	(4,417)	(13) %
Phytonadione	28,955	27,242	1,713	6 %
Medroxyprogesterone	16,623	—	16,623	N/A
Epinephrine	8,791	22,249	(13,458)	(60) %
Other finished pharmaceutical products	40,311	38,289	2,022	5 %
Total finished pharmaceutical products net revenues	\$ 188,125	\$ 174,154	\$ 13,971	8 %

We launched medroxyprogesterone acetate in a vial form in January 2018 and in a pre-filled syringe form in February 2018. These products were both approved by the FDA in November 2017. Additionally, we launched isoproterenol hydrochloride injection in July 2018.

The increase in sales of enoxaparin was primarily driven by higher average selling price due to a price increase and an increase in non-contract sales at list prices in the third quarter, which resulted in an increase of approximately \$5.7 million. Increased unit volumes of enoxaparin also contributed to the sales increase. The increase in sales of lidocaine was primarily driven by higher unit volumes, which resulted in an increase of \$1.3 million, as well as the higher average selling price. The decrease in sales of naloxone was primarily driven by lower unit volumes. The increase in sales of phytonadione was primarily driven by a higher average selling price. We anticipate that the sales of naloxone and enoxaparin will continue to fluctuate in the future as a result of competition.

Sales of epinephrine decreased primarily as a result of the discontinuation of our epinephrine injection, USP vial product in the second quarter of 2017 in accordance with the FDA's request. Our epinephrine injection, USP vial product, was marketed under the "grandfather" exception to the FDA's "Prescription Drug Wrap-Up" program. In fiscal 2017, we recognized \$17.8 million in net revenues for the sale of the discontinued vial product. The remainder of our epinephrine sales was from our pre-filled syringe product, which remains on the market.

Table of Contents

Sales of API increased primarily due to the timing of customer purchases, and in particular, MannKind’s purchases of RHI API for use in MannKind’s product Afrezza®. In September 2018, MannKind notified us that they would not exercise their minimum annual purchase option of RHI API for 2019 under the Option Agreement. Under the Option Agreement, we recognized the cancellation fee for 2019 of \$1.0 million in net revenues during the three months ended September 30, 2018, and subsequently received the payment. We anticipate that sales of API will continue to fluctuate and will likely decrease due to the inherent uncertainties related to sales to MannKind. In addition, most of our API sales are denominated in Euros, and the fluctuation in the value of the Euro versus the U.S. Dollar has had, and will continue to have, an impact on API sales revenues in the near term.

A significant portion of our customer shipments in any period relate to orders received and shipped in the same period, generally resulting in low product backlog relative to total shipments at any time. We had no significant backlog as of September 30, 2018. Our backlog is generally not a meaningful indicator in any given period of our ability to achieve any particular level of overall revenue or financial performance.

Cost of revenues

Changes in cost of revenues and gross margins were primarily due to the effect of the launch of medroxyprogesterone acetate and isoproterenol hydrochloride in 2018 as well as the higher average selling price of enoxaparin, as offset by the discontinuation of our epinephrine injection, USP vial product in 2017. In addition, production expenses increased due to increased labor costs resulting from the implementation of new quality standards and increased hourly rates. In addition, for the nine months ended September 30, 2018, a charge of \$6.6 million was recorded to adjust certain inventory items and related purchase commitments to their net realizable value, as compared with \$7.3 million recorded for the nine months ended September 30, 2017.

In June 2018, we received FDA’s approval of our ANDA supplement for the manufacture of semi-purified heparin at ANP, our subsidiary in China, and the manufacture of heparin sodium at IMS, our subsidiary in South El Monte, California. The cost of heparin, which is the starting material for enoxaparin, has increased and is expected to increase further putting downward pressure on our gross margins. However, we believe that this trend will be offset by sales of our higher-margin products, such as medroxyprogesterone acetate, neostigmine, and isoproterenol that were recently launched.

Selling, distribution and marketing, and general and administrative

Nine Months Ended		Change	
September 30,		Dollars	%
2018	2017		

Edgar Filing: Amphastar Pharmaceuticals, Inc. - Form 10-Q

	(in thousands)			
Selling, distribution, and marketing	\$ 5,560	\$ 4,831	\$ 729	15 %
General and administrative	\$ 36,074	\$ 35,237	\$ 837	2 %

The increase in selling, distribution, and marketing expenses is primarily due to increased freight costs. The increase in general and administrative expense was primarily due to higher personnel expenses associated with our ANP facility, and was partially offset by lower legal expenses compared to the same period in 2017 (see Note 18 to the condensed consolidated financial statements for more information regarding litigation matters).

We expect that general and administrative expenses will increase on an annual basis due to increased costs associated with ongoing compliance with public company reporting obligations and an increase in legal fees associated with patent challenges.

Table of Contents

Research and development

	Nine Months Ended		Change Dollars	%	
	2018	2017			
	(in thousands)				
Salaries and personnel-related expenses	\$ 12,691	\$ 10,862	\$ 1,829	17	%
Pre-launch inventory	1,573	711	862	121	%
Clinical trials	2,219	2,064	155	8	%
FDA fees	1,690	115	1,575	1,370	%
Testing, operating and lab supplies	15,349	12,341	3,008	24	%
Depreciation	3,852	3,373	479	14	%
Other expenses	3,456	2,651	805	30	%
Total research and development expenses	\$ 40,830	\$ 32,117	\$ 8,713	27	%

Research and development costs consist primarily of costs associated with the research and development of our product candidates. We expense research and development costs as incurred.

Salaries and personnel-related expenses increased primarily due to the expansion of our ANP facility. Pre-launched inventory expenses relate to the production of Primatene® Mist and purchases of APIs for an ANDA candidate ahead of their launches. FDA fees increased due to the NDA and ANDA filing fees for products we currently market or previously marketed under the grandfather exception, as well as an ANDA filing for our pipeline product. Testing, operating, and lab supplies increased due to expenditures on materials for our pipeline products, particularly production of APIs for our ANP facility.

We have made, and expect to continue to make, substantial investments in research and development to expand our product portfolio and grow our business. We expect that research and development expenses will increase on an annual basis due to increased clinical trial costs related to our biosimilar and inhalation product candidates. These expenditures will include costs of APIs developed internally and purchased externally, the cost of purchasing reference listed drugs and the costs of performing the clinical trials. As we undertake new and challenging research and development projects, we anticipate that the associated costs will increase significantly over the next several quarters and years.

Gain on sale of intangible assets

Edgar Filing: Amphastar Pharmaceuticals, Inc. - Form 10-Q

	Nine Months Ended		Change	
	September 30, 2018	September 30, 2017	Dollars	%
	(in thousands)			
Gain on sale of intangible assets	\$ —	\$ (2,643)	\$ 2,643	(100) %

In February 2017, we sold the ANDAs that we acquired in March 2016 and recognized a gain of \$2.6 million (see Note 8).

Provision for income tax expense (benefit)

	Nine Months Ended		Change	
	September 30, 2018	September 30, 2017	Dollars	%
	(in thousands)			
Income tax expense (benefit)	\$ (2,137)	\$ (466)	\$ (1,671)	NM
Effective tax rate	20 %	(19) %		

The difference in the effective tax rate for the nine months ended September 30, 2018, was primarily due to the differences in pre-tax income positions, the timing of discrete items, and the decrease of tax rates as a result of the Tax Act enacted on December 22, 2017, which has reduced the statutory U.S. federal corporate income tax rate from 35% to 21%.

Table of Contents

Liquidity and Capital Resources

Cash Requirements and Sources

We need capital resources to maintain and expand our business. We expect our cash requirements to increase significantly in the foreseeable future as we sponsor clinical trials for, seek regulatory approvals of, and develop, manufacture and market our current development stage product candidates and pursue strategic acquisitions of businesses or assets. Our future capital expenditures include projects to upgrade, expand, and improve our manufacturing facilities in the United States, China, and France. Our cash obligations include the principal and interest payments due on our existing loans and lease payments, as described below and throughout this Quarterly Report on Form 10-Q. As of September 30, 2018, our foreign subsidiaries collectively held \$29.9 million in cash and cash equivalents. Cash or cash equivalents held at foreign subsidiaries are not available to fund the parent company's operations in the United States. We believe that our cash reserves, operating cash flows, and borrowing availability under our credit facilities will be sufficient to fund our operations for at least the next 12 months. We expect additional cash flows to be generated in the longer term from future product introductions, although there can be no assurance as to the receipt of regulatory approval for any product candidates that we are developing or the timing of any product introductions, which could be lengthy or ultimately unsuccessful.

In July 2018, ANP completed a private placement of its common equity interest to accredited investors for aggregate gross proceeds of approximately \$57.2 million, of which \$26.2 million has been received by ANP as of September 30, 2018. The investors are required to complete their contributions in cash by December 31, 2018. The proceeds from this private placement will be used to fund the cash requirements of the expansion of our manufacturing facility in China.

Working capital decreased by \$22.4 million to \$98.2 million at September 30, 2018, compared to \$120.6 million at December 31, 2017.

Cash Flows from Operations

The following table summarizes our cash flows used in operating, investing, and financing activities for the nine months ended September 30, 2018:

Nine Months Ended
September 30, 2018

(in thousands)

Statement of Cash Flow Data:

Net cash provided by (used in)	
Operating activities	\$ 28,674
Investing activities	(33,385)
Financing activities	8,086
Effect of exchange rate changes on cash	(235)
Net decrease in cash, cash equivalents, and restricted cash	\$ 3,140

Sources and Use of Cash

Operating Activities

Net cash provided by operating activities was \$28.7 million for the nine months ended September 30, 2018, which included net loss of \$8.4 million. Non-cash items were primarily comprised of \$12.1 million of depreciation and amortization, and \$12.8 million of share-based compensation expense.

The increase in accounts receivable was due to an increase in sales. An increase in inventory, due to increased purchases of raw materials for enoxaparin and other products in the U.S., was partially offset by a decrease in finished RHI API at AFP. Accounts payable and accrued liabilities increased, primarily due to the timing of payments.

Table of Contents

Investing Activities

Net cash used in investing activities was \$33.4 million for the nine months ended September 30, 2018, primarily as a result of \$37.2 million in purchases of property, machinery, and equipment, which included \$12.3 million incurred in the United States, \$8.6 million in France, and \$16.3 million in China. The cash used was partially offset by the \$4.4 million receipt of the remaining consideration of the sale of the various ANDAs in February 2017 (see Note 8 to the condensed consolidated financial statements for more information).

Financing Activities

Net cash provided by financing activities was \$8.1 million for the nine months ended September 30, 2018, primarily as a result of \$26.2 million received from the ANP private placement, which was partially offset by \$22.4 million used to purchase treasury stock. Additionally, we made \$4.3 million in principal payments on our long-term debt, and drew down \$8.0 million on the equipment line of credit from East West Bank, which is due December 2022.

Indebtedness

For more information regarding our outstanding indebtedness, see Note 12 of Notes to Condensed Consolidated Financial Statements of this Quarterly Report on Form 10-Q.

Contractual Obligations

There have been no material changes outside the ordinary course of our business in the contractual obligations disclosed in our Annual Report on Form 10-K for the year ended December 31, 2017, except that our outstanding debt obligations have changed as follows:

	September 30, 2018	December 31, 2017	Change
	(in thousands)		
Short-term debt and current portion of long-term debt	\$ 18,592	\$ 6,312	\$ 12,280
Long-term debt	32,606	40,844	(8,238)
Total debt	\$ 51,198	\$ 47,156	\$ 4,042

As of September 30, 2018, we had \$35.0 million in unused borrowing capacity under revolving lines of credit with Cathay Bank and East West Bank.

Critical Accounting Policies

The preparation of our condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the notes to the financial statements. Some of those judgments can be subjective and complex, and therefore, actual results could differ materially from those estimates under different assumptions or conditions. A summary of our critical accounting policies is presented in Part II, Item 7, of our Annual Report on Form 10-K for the year ended December 31, 2017.

During the quarter ended September 30, 2018, we identified an error in our accounting related to the depreciation of certain leasehold improvements within property, plant and equipment. The error was not material to any of our prior period annual or interim financial statements. However, for comparative purposes, we have revised the prior period condensed consolidated financial statements included herein. As a result, the net income for the three and nine months ended September 30, 2017, was reduced by \$0.1 million and \$0.2 million, respectively. The error did not result in a change to the basic or diluted net income per share for the three months ended September 30, 2017. The basic net income per share for the nine months ended September 30, 2017, was reduced by \$0.01. The error did not result in a change to the diluted net income per share for the nine months ended September 30, 2017. The balances of property, plant, and equipment, net and retained earnings as of December 31, 2017, were reduced by \$4.6 million and \$3.4 million, respectively. The error did not result in a change to the net cash provided by operating activities in our condensed

Table of Contents

consolidated statement of cash flows for the nine months ended September 30, 2017. We will revise additional financial statements and disclosures as applicable in future filings (See note 2).

There were no material changes to our critical accounting policies during the three and nine months ended September 30, 2018, other than the adoption of ASC 606, Revenue from Contracts with Customers, or ASC 606, using the modified retrospective transition method. The adoption of ASC 606 did not have a material impact on the Company's revenue recognition or on the condensed consolidated financial statements and related disclosures. The results for the reporting period beginning after January 1, 2018, are presented in accordance with the new standard, although comparative information has not been restated and continues to be reported under the accounting standards and policies in effect for those periods.

Recent Accounting Pronouncements

For information regarding recent accounting pronouncements, see Note 2 of Notes to Condensed Consolidated Financial Statements of this Quarterly Report on Form 10-Q.

Off-Balance Sheet Arrangements

We do not have any relationships or financial partnerships with unconsolidated entities, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. In addition, we do not engage in trading activities involving non-exchange traded contracts.

Government Regulation

Our products and facilities are subject to regulation by a number of federal and state governmental agencies. The FDA, in particular, maintains oversight of the formulation, manufacture, distribution, packaging, and labeling of all of our products. The Drug Enforcement Administration maintains oversight over our products that are considered controlled substances.

From April 19, 2018 to April 27, 2018, two contract laboratories that provide testing services for heparin sodium raw materials were inspected. The first inspection was for the laboratory providing testing services for our current heparin supplier. There was one Form 483 observation issued. The current heparin supplier has responded to the Form 483

and we expect the response to satisfy the requirements of the FDA and that no further actions will be necessary. The second inspection was for the laboratory providing testing services of heparin sodium for the pending submission for our facility in Nanjing China. These vendors are related to our filing for the heparin sodium. There were no Form 483 observations issued. The inspections covered compliance with Good Laboratory Practice regarding the analytical testing performed for heparin sodium release.

From June 26, 2018 to June 29, 2018, our French subsidiary, AFP, had a routine inspection performed by the FDA. The routine inspection covered compliance with Current Good Manufacturing Practices. There were five Form 483 observations issued. A response was sent to the FDA within the 15 working day requirement which we expect will satisfy the requirements of the FDA and that no further actions will be necessary.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The following discussion provides forward-looking quantitative and qualitative information about our potential exposure to market risk. Market risk represents the potential loss arising from adverse changes in the value of financial instruments. The risk of loss is assessed based on the likelihood of adverse changes in fair values, cash flows or future earnings. We are exposed to market risk for changes in the market values of our investments (Investment Risk), the impact of interest rate changes (Interest Rate Risk), and the impact of foreign currency exchange changes (Foreign Currency Exchange Risk).

Investment Risk

We regularly review the carrying value of our investments and identify and recognize losses, for income statement purposes, when events and circumstances indicate that any declines in the fair values of such investments below our accounting basis are other than temporary. As of September 30, 2018, we did not have any such investments. We do not enter into investments for trading or speculative purposes.

As of September 30, 2018, we had \$25.6 million deposited in seven banks located in China, \$3.2 million deposited in one bank located in France, and \$1.1 million deposited in one bank located in the United Kingdom. We also maintained \$31.8 million in cash equivalents that include money market accounts, as of September 30, 2018. The remaining amounts of our cash equivalent as of September 30, 2018, are in non-interest bearing accounts.

Interest Rate Risk

Our primary exposure to market risk is interest rate sensitive investments and credit facilities, which are affected by changes in the general level of U.S. interest rates. Due to the nature of our short-term investments, we believe that we are not subject to any material interest rate risk with respect to our short-term investments.

As of September 30, 2018, we had \$51.2 million in long-term debt and capital leases outstanding. Of this amount, \$13.9 million had variable interest rates which were not locked-in through fixed interest rate swap contracts. The debt with variable interest rate exposure had a weighted-average interest rate of 5.0% at September 30, 2018. An increase in the index underlying these rates of 1% (100 basis points) would increase our annual interest expense on the debt with variable interest rate exposure by approximately \$0.1 million per year.

Foreign Currency Exchange Risk

Our finished pharmaceutical products are primarily sold in the U.S. domestic market, and have little exposure to foreign currency price fluctuations. However, as a result of our acquisition of the API manufacturing business in Éragny-sur-Epte, France, we are exposed to market risk related to changes in foreign currency exchange rates. Specifically, our insulin sales contracts are frequently denominated in Euros, which are subject to fluctuations relative to the U.S. Dollar, or USD.

Our Chinese subsidiary, ANP, maintains its books of record in Chinese Yuan. These books are remeasured into the functional currency of USD, using the current or historical exchange rates. The resulting currency remeasurement adjustments and other transactional foreign exchange gains and losses are reflected in our statement of operations.

Our French subsidiary, AFP, maintains its books of record in Euros. Our U.K. subsidiary, IMS UK, maintains its books of record in Great British Pounds. These books are translated to USD at the average exchange rates during the period. Assets and liabilities are translated at the rate of exchange prevailing on the balance sheet date. Equity is translated at the prevailing exchange rate at the date of the equity transactions. Translation adjustments are reflected in stockholders' equity and are included as a component of other comprehensive income.

We are also exposed to the potential earnings effects from intercompany foreign currency assets and liabilities that arise from normal trade receivables and payables and other intercompany loans.

Table of Contents

We do not undertake hedging transactions to cover our foreign currency exposure. As of September 30, 2018, a 10% unfavorable change in the exchange rate of the U.S. Dollar strengthening against the foreign currencies to which we have exposure would result in approximately \$2.3 million reduction of foreign currency gains, and approximately \$4.2 million reduction in other comprehensive income.

As of September 30, 2018, our foreign subsidiaries had cash balances denominated in foreign currencies of \$13.1 million.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, under the supervision and with the participation of our Chief Executive Officer and our Chief Financial Officer, our principal executive and principal financial officers, respectively, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act of 1934, as amended, as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures were effective (a) to ensure that information that we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and (b) to include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in reports filed or submitted under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the quarter ended September 30, 2018, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act).

Inherent Limitations of Internal Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management overriding of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The information set forth under the “Legal Proceedings” subheading in Note 18 of Notes to Consolidated Financial Statements in Part I, Item 1, of this Quarterly Report on Form 10-Q is incorporated herein by reference.

ITEM 1A. RISK FACTORS

Except as noted below, there were no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2017, filed with the Securities and Exchange Commission on March 14, 2018.

Some of our products are marketed without FDA approval and may be subject to enforcement actions by the FDA.

A number of our prescription products are marketed without FDA approval. These products, like many other prescription drugs on the market that FDA have not been formally evaluated as being effective, contain active ingredients that were first marketed prior to the enactment of the Federal Food, Drug, and Cosmetic Act, or FDCA. The FDA has assessed these products in a program known as the “Prescription Drug Wrap-Up” and has stated that these drugs cannot be lawfully marketed unless they comply with certain “grandfather” exceptions to the definition of “new drug” in the FDCA. These exceptions have been strictly construed by FDA and by the courts, and the FDA has stated that it is unlikely that any of the unapproved prescription drugs on the market, including certain of our drugs, qualify for the exceptions. At any time, the FDA may require that some or all of our unapproved prescription drugs be submitted for approval and may direct us to recall these products and/or cease marketing the products until they are approved. The FDA may also take enforcement actions based on our marketing of these unapproved products, including but not limited to the issuance of an untitled letter or a warning letter, and a judicial action seeking an injunction, product seizure and/or civil or criminal penalties. The enforcement posture could change at any time and our ability to market such drugs could terminate with little or no notice. Moreover, if our competitors seek and obtain approval and market FDA-approved prescription products that compete against our unapproved prescription products, we would be subject to a higher likelihood that FDA may seek to take action against our unapproved products. Such competitors have brought and may bring claims against us alleging unfair competition or related claims.

As a result of our meetings with the FDA in 2009, we decided to discontinue all of our products that were subject to the Prescription Drug Wrap-Up program, with the exception of epinephrine in vial form. These products were all produced at our subsidiary, IMS. During the third quarter of 2010, the FDA requested that we reintroduce several of

the withdrawn products to cope with a drug shortage, while we prepared and filed applications for approval of the products. Between August and October, 2010, we reintroduced atropine, calcium chloride, morphine, dextrose, epinephrine prefilled syringes, epinephrine injection, USP vial, and sodium bicarbonate injections.

In February 2017, the FDA requested that we discontinue the manufacturing and distribution of our epinephrine injection, USP vial product, which had been marketed under the “grandfather” exception to the FDA’s Prescription Drug Wrap-Up program. We discontinued selling this product in the second quarter of 2017. For the years ended December 31, 2017, 2016, and 2015, we recognized \$17.8 million, \$18.6 million, and \$7.8 million in net revenues for the sale of this product, respectively.

The FDA granted approval of our ANDAs for Sodium Bicarbonate injection and Calcium Chloride injection in September 2017 and May 2018, respectively.

For the years ended December 31, 2017, 2016, and 2015, we recorded net revenues of \$22.0 million, \$17.4 million, and \$19.8 million, respectively, from our unapproved products. For the nine months ended September 30, 2018 and 2017, we recorded net revenues of \$19.8 million and \$15.1 million, respectively from our unapproved products. Our unapproved products currently on the market include: atropine, morphine, dextrose and epinephrine prefilled syringes. We have filed two ANDAs and one NDA with respect to our remaining unapproved products in order to mitigate all risk associated with the marketing of unapproved drug products. Prior to the approval of our ANDA and NDA submissions, we continue to operate in compliance with the FDA Compliance Policy Guide, CPG Sec. 440.100 Marketed New Drugs Without Approved NDAs and ANDAs.

Table of Contents

Because a portion of our manufacturing takes place in China, a significant disruption in the construction or operation of our manufacturing facility in China, political unrest in China, tariffs or changes in social, political and economic conditions or in laws, regulations and policies governing foreign trade could materially and adversely affect our business, financial condition and results of operations.

We currently manufacture the starting material for Amphadase® and the API for Nitroprusside at our manufacturing facility in China, and we plan to use this facility to manufacture several of the APIs for products in our pipeline. Additionally, we intend to continue to invest in the expansion of this manufacturing facility. Our manufacturing facility and operations in China involve significant risks, including:

- disruptions in the construction of the manufacturing facility;
- interruptions to our operations in China or the inability of our manufacturing facility to produce adequate quantities of raw materials or APIs to meet our needs as a result of natural catastrophic events or other causes beyond our control such as power disruptions;
- product supply disruptions and increased costs as a result of heightened exposure to change in the policies of the Chinese government, political unrest or unstable economic conditions in China;
- the imposition of tariffs or other trade barriers as a result of changes in social, political, and economic conditions or in laws, regulations, and policies governing foreign trade, including the tariffs recently implemented and additional tariffs that have been proposed by the U.S. government on various imports from China and by the Chinese government on certain U.S. goods, the scope and duration of which, if implemented, remain uncertain;
- the nationalization or other expropriation of private enterprises by the Chinese government, which could result in the total loss of our investment in China;

Any of these matters could materially and adversely affect our business and results of operations. These interruptions or failures could impair our ability to operate our business, impede the commercialization of our product candidates or delay the introduction of new products, impact our product quality, or impair our competitive position.

We are exposed to risks related to our international operations and failure to manage these risks may adversely affect our operating results and financial condition.

We have operations both inside and outside the U.S. For example, we have suppliers in Asia and Europe, and we own manufacturing facilities in Nanjing, China, and Éragny-sur-Epte, France. As a result, a significant portion of our operations is conducted by and/or rely on entities outside the markets in which our products are sold, and, accordingly, we import a substantial number of products into such markets. We may, therefore, be denied access to our customers or suppliers or denied the ability to ship products from any of our sites as a result of a closing of the borders of the countries in which we sell our products, or in which our operations are located, due to economic, legislative, political and military conditions in such countries.

International operations are subject to a number of other inherent risks, and our future results could be adversely affected by a number of factors, including:

- requirements or preferences for domestic products or solutions, which could reduce demand for our products;
- differing existing or future regulatory and certification requirements;
 - management communication and integration problems resulting from cultural and geographic dispersion;
- greater difficulty in collecting accounts receivable and longer collection periods;

Table of Contents

- difficulties in enforcing contracts;
- difficulties and costs of staffing and managing non-U.S. operations;
- difficulty hiring and retaining appropriate personnel due to intense competition for such resources and resulting wage inflation in the cities where our operations are located;
- different labor regulations, especially in the European Union, where labor laws are generally more advantageous to employees as compared to the United States, including deemed hourly wage and overtime regulations in these locations;
- the uncertainty of protection for intellectual property rights in some countries and resulting exposure to misappropriation of intellectual property or information that is proprietary to us, our customers and other third parties;
- tariffs and trade barriers, export regulations and other regulatory and contractual limitations on our ability to sell our products;
- changes in social, political, and economic conditions or in laws, regulations and policies governing foreign trade, manufacturing, development and investment both domestically as well as in other countries and jurisdictions into which we manufacture or sell our products;
- exposure to liabilities under both U.S. and foreign laws, including export and antitrust regulations, anti-corruption and anti-money laundering laws, including the U.S. Foreign Corrupt Practices Act of 1977, as amended, and similar applicable laws and regulations in other jurisdictions, and any trade regulations ensuring fair trade practices;
- uneven electricity supply that can negatively impact manufacturing;
- heightened risk of unfair or corrupt business practices in certain geographies and of improper or fraudulent sales arrangements that may impact financial results and result in restatements of, or irregularities in, financial statements;
- fluctuations in currency exchange rates and regulatory compliance;
- delays, inefficiencies, and other challenges inherent to efficiently managing an increased number of employees over large geographic distances, including the need to implement appropriate systems, policies, benefits, and compliance programs;
- potentially adverse tax consequences, including multiple and possibly overlapping tax structures; and
- political and economic instability, political unrest and terrorism.

Furthermore, weak domestic or global economic conditions or fear or anticipation of such conditions could adversely affect our business, financial condition, results of operations and prospects in a number of ways, including lower prices for our products, reduced sales and lower or no growth. For example, the global macroeconomic environment could be negatively affected by, among other things, instability in global economic markets resulting from increased U.S. trade tariffs and trade disputes between the U.S. and other countries, instability in the global credit markets, the impact and uncertainty regarding global central bank monetary policy, rising interest rates and increased inflation, including the recent rise in U.S. interest rates, the instability in the geopolitical environment as a result of the United Kingdom “Brexit” decision to withdraw from the European Union, economic challenges in China and ongoing U.S. and foreign governmental debt concerns. Such challenges have caused, and are likely to continue to cause, uncertainty and instability in local economies and in global financial markets, particularly if any future sovereign debt defaults or significant bank failures or defaults occur. Market uncertainty and instability in Europe or Asia could intensify or spread further, particularly if ongoing stabilization efforts prove insufficient. Continuing or worsening economic instability could

Table of Contents

adversely affect sales of our products. Continued turmoil in the geopolitical environment in many parts of the world may also affect the overall demand for our products. Although we do not believe that our business, financial condition, results of operations and prospects have been significantly adversely affected by economic and political uncertainty in Europe, Asia or other countries to date, deterioration of such conditions may harm our business, financial condition, results of operations and prospects in the future. A prolonged period of economic uncertainty or a downturn may also significantly affect financing markets, the availability of capital and the terms and conditions of financing arrangements, including the overall cost of financing. Circumstances may arise in which we need, or desire, to raise additional capital, and such capital may not be available on commercially reasonable terms, or at all.

In addition, the expansion of our existing international operations, including our facility expansion in Nanjing, China, and entry into additional international markets, including our acquisition of a manufacturing business in Éragny-sur-Epte, France, have required and will continue to require significant management attention and financial resources. These and other factors could harm our ability to gain future revenues and, consequently, materially impact our business, results of operations and financial condition.

Enhanced trade tariffs, import restrictions, export restrictions, Chinese regulations or other trade barriers may materially harm our business.

We are continuing to expand our international operations as part of our growth strategy. There is currently significant uncertainty about the future relationship between the United States and various other countries, most significantly China, with respect to trade policies, treaties, government regulations and tariffs. The current U.S. presidential administration has called for substantial changes to U.S. foreign trade policy with respect to China and other countries, including the possibility of imposing greater restrictions on international trade and significant increases in tariffs on goods imported into the United States. In September 2018, the U.S. Trade Representative (the “USTR”) enacted a tariff on the import of other Chinese products, including non-U.S. sourced APIs and starting materials used in our products, with a combined import value of approximately \$200 billion. The tariff became effective on September 24, 2018, with an initial rate of 10% until the end of the year when it is expected to increase to 25%. It is expected that these tariffs will raise our cost of goods. Furthermore, if tariffs, trade restrictions, or trade barriers are placed on products such as ours by foreign governments, especially China, it could cause us to raise prices for our products, which may result in the loss of customers and our business, financial condition and results of operations may be harmed. Additionally, the Trump Administration continues to signal that it may alter trade agreements and terms between China and the United States, including limiting trade with China, and may impose additional tariffs on imports from China. Therefore, it is possible further tariffs may be imposed that could cover imports of APIs and starting materials used in our products, or our business may be adversely impacted by retaliatory trade measures taken by China or other countries, including restricted access to APIs or starting materials used in our products, causing us to raise prices or make changes to our products, which could materially harm our business, financial condition and results of operations. Further, the continued threats of tariffs, trade restrictions, and trade barriers could have a generally disruptive impact on the global economy and, therefore, negatively impact our sales. Given the relatively fluid regulatory environment in China and the United States and uncertainty regarding how the U.S. or foreign governments will act with respect to tariffs, international trade agreements and policies, a trade war, further governmental action related to tariffs or international trade policies, or additional tax or other regulatory changes in the future could occur and could directly and adversely impact our financial results and results of operations.

We could be materially and adversely affected by violations of the U.S. Foreign Corrupt Practices Act and similar worldwide anti-bribery laws.

The U.S. Foreign Corrupt Practices Act of 1977, as amended and similar applicable laws and regulations in other jurisdictions generally prohibit companies and their intermediaries from making improper payments to non-U.S. officials for the purpose of obtaining or retaining business. Our policies mandate compliance with these anti-bribery laws, which often carry substantial penalties. We are currently expanding our operation abroad, including expanding our facilities in China, a country which has experienced governmental and private sector corruption to some degree, and in certain circumstances, strict compliance with anti-bribery laws may conflict with certain local customs and practices. Our internal control policies and procedures may not always protect us from acts committed by our affiliates, employees or agents which may violate these laws and regulations. Violations of foreign and U.S. laws and regulations could result in

-47-

Table of Contents

finances and penalties, criminal sanctions against us, our officers or our employees, prohibitions on the conduct of our business and on our ability to offer our products in one or more countries, and could also materially affect our brand, our international growth efforts, our ability to attract and retain employees, our business, and our operating results. There can be no assurance that our partners, our employees, contractors, or agents will not subject us to potential claims or penalties. Any violations of these laws, or allegations of such violations, could have a material adverse effect on our business, financial position, and results of operations and could cause the market value of our common stock to decline.

Movements in foreign currency exchange rates could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

A portion of our revenues, indebtedness and other liabilities and our costs are denominated in foreign currencies, including the Chinese Yuan and the Euro. We report our financial results in U.S. dollars. Our results of operations and, in some cases, cash flows may in the future be adversely affected by certain movements in exchange rates. From time to time, we may implement currency hedges intended to reduce our exposure to changes in foreign currency exchange rates. However, any such hedging strategies may not be successful, and any of our unhedged foreign exchange exposures will continue to be subject to market fluctuations. These risks could cause a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

The Chinese government may exert substantial influence over the manner in which we conduct our business operations in China.

The Chinese government has exercised, and continues to exercise, substantial control over virtually every sector of the Chinese economy through regulation and state ownership. Our ability to conduct our proposed manufacturing operations in China may be harmed by changes in its laws and regulations, including those relating to taxation, import and export tariffs, environmental regulations, land use rights, property ownership and other matters. We believe that our operations in China are in material compliance with all applicable legal and regulatory requirements. However, the central or local governments of the jurisdictions in which we operate may impose new, stricter regulations or interpretations of existing regulations that would require additional expenditures and efforts on our part to ensure our compliance with such regulations or interpretations. Accordingly, government actions in the future, including any decision not to continue to support recent economic reforms and to return to a more centrally planned economy or regional or local variations in the implementation of economic policies, could have a significant effect on economic conditions in China or particular regions thereof and could require us to divest ourselves of any interest we then hold in Chinese properties or entities, including our Chinese operating subsidiary, Amphastar Nanjing Pharmaceuticals Co., Ltd., or ANP.

The Chinese legal system can be uncertain and could limit the legal protections available to us.

Unlike common law systems, such as the United States, the Chinese legal system is based on written statutes and decided legal cases have little precedential value. Our Chinese operating subsidiary, ANP, is subject to laws and regulations applicable to foreign investments in China in general and laws and regulations applicable to foreign invested enterprises in particular. ANP is also subject to laws and regulations governing the formation and conduct of domestic Chinese companies. Relevant Chinese laws, regulations and legal requirements may change frequently, and their interpretation and enforcement involve uncertainties. For example, we may have to resort to administrative and

court proceedings to enforce the legal protections under law or contract. However, since Chinese administrative and court authorities have significant discretion in interpreting and implementing statutory and contract terms, it may be more difficult to evaluate the outcome of administrative and court proceedings and our level of legal protection in China compared to other legal systems. Such uncertainties, including the inability to enforce our contracts and intellectual property rights, could materially and adversely affect our business and operations. In addition, confidentiality protections in China may not be as effective as in the U.S. or other countries. Accordingly, future developments in the Chinese legal system, including the promulgation of new laws, changes to existing laws or the interpretation or enforcement thereof, or the preemption of local requirements by national laws, could limit the legal protections available to us.

Table of Contents

Our financial performance is impacted by the financial performance of our Chinese operating subsidiary, ANP.

Because we consolidate ANP's financial results in our results of operations, our financial performance is impacted by the financial performance of ANP. ANP's financial performance may be affected by a number of factors, including, but not limited to:

- ANP's ability to execute on its expansion plans;
- the commercial success of ANP's APIs, starting materials and finished pharmaceutical products;
- results of clinical trials of our product candidates or those of ANP's customers;
- pricing actions by competitors;
- the timing of orders or any cancellation of orders from ANP's customers;
- manufacturing or supply interruptions;
- actions by regulatory bodies, such as the FDA;
 - changes or developments in laws or regulations;
- disputes or other developments relating to patents or other proprietary rights;
- litigation or investigations involving ANP, our industry, or both; and
- ANP's ability to control costs, including its operating expenses.

The Affordable Care Act and certain legislation and regulatory proposals may increase our costs of compliance and negatively impact our profitability over time.

In March 2010, former President Barack Obama signed the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Affordability Reconciliation Act, which we refer to collectively as the Affordable Care Act. The Affordable Care Act made extensive changes to the delivery of health care in the United States. We expect that the rebates, discounts, taxes and other costs resulting from the Affordable Care Act over time will have a negative effect on our expenses and profitability in the future. Furthermore, the Independent Payment Advisory Board created by the Affordable Care Act to reduce the per capita rate of growth in Medicare spending could potentially limit access to certain treatments or mandate price controls for our products. Moreover, expanded government investigative authority and increased disclosure obligations may increase the cost of compliance with new regulations and programs.

Since its enactment, there have been judicial and Congressional challenges to certain aspects of the Affordable Care Act, and we expect that there will be additional challenges and amendments to the Affordable Care Act in the future. The Trump administration and members of the U.S. Congress have indicated that they may continue to seek to modify, repeal, or otherwise invalidate all, or certain provisions of, the Affordable Care Act. Most recently, the Tax Act, was enacted, which, among other things, removes penalties for not complying with the individual mandate to carry health insurance. Any changes to the Affordable Care Act are likely to have an impact on our results of operations, and may have a material adverse effect on our results of operations. However, we do not currently know the extent to which any such changes may impact our business or financial condition, as well as the pharmaceutical industry as a whole. In addition, the Trump administration has also proposed the establishment of an “international pricing index”, which may have the effect of decreasing prices for certain prescription drugs. We cannot predict what other health care programs and regulations will ultimately be implemented at the federal or state level or the effect of any future legislation or regulation in the United States may have on our business.

Table of Contents

In addition, there have been a number of other legislative and regulatory proposals aimed at changing the pharmaceutical industry. For example, in November 2013, Congress passed the Drug Quality and Security Act, or the DQSA. The DQSA establishes federal pedigree tracking standards requiring drugs to be labeled and tracked at the lot level, preempts state drug pedigree requirements, and will eventually require all supply-chain stakeholders to participate in an electronic, interoperable prescription drug track and trace system. The DQSA also establishes new requirements for drug wholesale distributors and third party logistics providers, including licensing requirements in states that had not previously licensed such entities. As a result of these and other new proposals, we may determine to change our current manner of operation, provide additional benefits or change our contract arrangements, any of which could have a material adverse effect on our business, financial condition and results of operations.

Former President Barack Obama also signed into law the Food and Drug Administration Safety and Innovation Act. The law and related agreements make several significant changes to the FDCA and FDA's processes for reviewing marketing applications that could have a significant impact on the pharmaceutical industry, including, among other things, the following:

- reauthorizes the Prescription Drug User Fee Act, which increases the amount of associated user fees, and, for certain types of applications, increases the expected time frame for FDA review of NDAs;
- permanently reauthorizes and makes some revisions to the Best Pharmaceuticals for Children Act and the Pediatric Research Equity Act, which provide for pediatric exclusivity and mandated pediatric assessments for certain types of applications, respectively;
- revises certain standards and requirements for FDA inspections of manufacturing facilities and the importation of drug products from foreign countries;
- creates incentives for the development of certain antibiotic drug products;
- modifies the standards for accelerated approval of certain new medical treatments;
- expands the reporting requirements for potential and actual drug shortages;
- requires the FDA to issue a report on, among other things, ensuring the safety of prescription drugs that have the potential for abuse;
- requires the FDA to hold a public meeting regarding the potential rescheduling of drug products containing hydrocodone, which was held in October 2012; and
- requires electronic submission of certain marketing applications following the issuance of final FDA regulations.

The full impact on our business of the new laws is uncertain; however, we anticipate that it will have an adverse effect on our results of operations.

Additionally, we encounter similar regulatory and legislative issues in most other countries. In the European Union, or EU, and some other international markets, the government provides health care at low cost to consumers and regulates pharmaceutical prices, patient eligibility or reimbursement levels to control costs for the government-sponsored health care system. This international system of price regulations may lead to inconsistent prices.

If significant additional reforms are made to the U.S. health care system, or to the health care systems of other markets in which we operate, those reforms could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

Jack Y. Zhang and Mary Z. Luo, each of whom serves as a director and an executive officer, own a significant percentage of our stock and will be able to exert significant control over matters subject to stockholder approval.

Table of Contents

As of November 2, 2018, Jack Y. Zhang and Mary Z. Luo, each of whom serves as one of our directors and executive officers, and their affiliates beneficially own approximately 27.7% of our outstanding common stock, including shares of common stock subject to options exercisable within 60 days of November 2, 2018. Our directors, executive officers and each of our stockholders who own greater than 5% of our outstanding common stock and their affiliates, in the aggregate, own approximately 31.7% of the outstanding, including shares of our common stock, based on the number of shares outstanding and shares of our common stock subject to options exercisable within 60 days of November 2, 2018. As a result, these stockholders, if acting together, will be able to influence or control matters requiring approval by our stockholders, including the election of directors and the approval of mergers, acquisitions or other extraordinary transactions. They may also have interests that differ from yours and may vote in a way with which you disagree and which may be adverse to your interests. This concentration of ownership may have the effect of delaying, preventing or deterring a change of control of our company, depriving our stockholders of an opportunity to receive a premium for their common stock as part of a sale of us and might ultimately affect the market price of our common stock.

Jack Y. Zhang and Mary Z. Luo have pledged shares of our common stock to secure certain borrowed funds. The forced sale of these shares pursuant to a margin call or otherwise could cause our stock price to decline and negatively impact our business.

Since September 2015, UBS Bank USA, or UBS USA, has made extensions of credit in the aggregate amount of \$7.8 million to Applied Physics & Chemistry Laboratories, Inc., or APCL, which is controlled by Jack Y. Zhang and Mary Z. Luo. The loan is secured by a pledge of 2,000,000 shares of our common stock currently held by APCL. Interest on the loan accrues at market rates. UBS received customary fees and expense reimbursements in connection with these loans.

Since May 2017, UBS Bank Utah, or UBS Utah, has made an extension of credit in the aggregate amount of \$7.8 million to APCL. The loan is secured by a pledge of 1,907,898 shares of our common stock currently held by APCL. Interest on the loan accrues at market rates. UBS Utah received customary fees and expense reimbursements in connection with these loans.

In October 2017, East West Bank, or East West, entered into an agreement with Drs. Zhang and Luo whereby East West would loan them up to \$5.0 million. The loan is secured by a pledge of 650,000 shares of our common stock held by Dr. Zhang and 550,000 shares of our common stock held by Dr. Luo. Interest on the loan accrues at market rates.

In May 2018, Drs. Zhang and Luo entered into a business loan agreement with Cathay Bank, or Cathay, for the extension of credit in the aggregate amount of \$25.0 million. The loan is secured by pledged shares of our common stock currently held by APCL. Interest on the loan accrues at market rates. Cathay received customary fees and expense reimbursements in connection with this loan.

We are not a party to these loans, which are full recourse against APCL and each of Drs. Zhang and Luo, respectively, and are secured by pledges of a portion of the shares of our common stock currently beneficially owned by Drs. Zhang and Luo.

If the price of our common stock declines, Drs. Zhang and Luo may be forced by these financial institutions to provide additional collateral for the loans or to sell shares of our common stock held by them in order to remain within

the margin limitations imposed under the terms of their loans. Furthermore, in the event of a default under the terms of such loans, the pledged shares may be acquired and sold by the lenders. The loans between these banking institutions and Drs. Zhang and Luo prohibit the non-pledged shares currently owned by Drs. Zhang and Luo from being pledged to secure any other loans. These factors may limit Dr. Zhang and Dr. Luo's ability to either pledge additional shares of our common stock or sell shares of our common stock held by them as a means to avoid or satisfy a margin call with respect to their pledged common stock in the event of a decline in our stock price that is large enough to trigger a margin call. Any sales of our common stock following a margin call that is not satisfied may cause the price of our common stock to decline further.
