ALPHA AND OMEGA SEMICONDUCTOR LIMITED NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

### 1. The Company and Significant Accounting Policies

### The Company

Alpha and Omega Semiconductor Limited and its subsidiaries (the "Company," "AOS," "we" or "us") design, develop and supply a broad range of power semiconductors. The Company's portfolio of products targets high-volume applications, including portable computers, flat panel TVs, LED lighting, smart phones, battery packs, consumer and industrial motor controls and power supplies for TVs, computers, servers and telecommunications equipment. The Company conducts its operations primarily in the United States of America ("USA"), Hong Kong, Macau, China, Taiwan, Korea and Japan.

### **Basis of Preparation**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP") for interim financial information and with the instructions to Article 10 of Securities and Exchange Commission Regulation S-X, as amended. They do not include all information and footnotes necessary for a fair presentation of financial position, results of operations and cash flows in conformity with U.S. GAAP for complete financial statements. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes contained in the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2014. All significant intercompany balances and transactions have been eliminated in consolidation. In the opinion of management, all adjustments (consisting of normal recurring adjustments and accruals) considered necessary for a fair presentation of the results of operations for the period presented have been included in the interim periods. Operating results for the three months ended September 30, 2014 are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2015. The condensed consolidated balance sheet at June 30, 2014 is derived from the audited financial statements included in the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2014. Use of Estimates

The preparation of the condensed consolidated financial statements in conformity with U.S. GAAP requires the Company to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. To the extent there are material differences between these estimates and actual results, the Company's condensed consolidated financial statements will be affected. On an ongoing basis, the Company evaluates the estimates, judgments and assumptions including those related to stock rotation returns, price adjustments, allowance for doubtful accounts, inventory reserves, warranty accrual, income taxes, share-based compensation, and useful lives for property, plant and equipment and intangible assets.

### Fair Value of Financial Instruments

The fair value of cash equivalents are based on observable market prices and have been categorized in Level 1 in the fair value hierarchy. Cash equivalents consist primarily of short term bank deposits. The carrying values of financial instruments such as cash and cash equivalents, accounts receivable and accounts payable approximate their carrying values due to their short-term maturities. The carrying value of the Company's debt is considered a reasonable estimate of fair value which is estimated by considering the current rates available to the Company for debt of the same remaining maturities, structure and terms of the debts.

### Comprehensive Income (Loss)

Comprehensive income (loss) is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. The Company's accumulated other comprehensive income (loss) consists of cumulative foreign currency translation adjustments. Total comprehensive income (loss) is presented in the condensed consolidated statements of comprehensive income (loss).

# ALPHA AND OMEGA SEMICONDUCTOR LIMITED NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

### **Recent Accounting Pronouncements**

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers ("ASU 2014-09"). The standard provides companies with a single model for use in accounting for revenue arising from contracts with customers and supersedes current revenue recognition guidance, including industry-specific revenue guidance. The core principle of the model is to recognize revenue when control of the goods or services transfers to the customer, as opposed to recognizing revenue when the risks and rewards transfer to the customer under the existing revenue guidance. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016. Early adoption is not permitted. The guidance permits companies to either apply the requirements retrospectively to all prior periods presented, or apply the requirements in the year of adoption, through a cumulative adjustment. The Company is in the process of evaluating the impact of adoption on its consolidated financial statements.

### 3. Concentration of Credit Risk and Significant Customers

The Company manages its credit risk associated with exposure to distributors and direct customers on outstanding accounts receivable through the application of credit approvals, credit ratings and other monitoring procedures. In some instances, the Company also obtains letters of credit from certain customers.

Credit sales, which are mainly on credit terms of 30 to 60 days, are only made to customers who meet the Company's credit requirements, while sales to new customers or customers with low credit ratings are usually made on an advance payment basis. The Company considers its trade accounts receivable to be of good credit quality because its key distributors and direct customers have long-standing business relationships with the Company and the Company has not experienced any significant bad debt write-offs of accounts receivable in the past. The Company closely monitors the aging of accounts receivable from its distributors and direct customers, and regularly reviews their financial positions, when available.

Summarized below are individual customers whose revenue or accounts receivable balances were 10% or higher than the respective total consolidated amounts:

#### 5. Debt

On May 11, 2012, the Company entered into a loan agreement with a financial institution that provides a term loan of \$20.0 million for general purposes and a \$10.0 million non-revolving credit line for the purchase of equipment. Both the term loan and equipment line will be fully repayable in May 2015. The borrowings may be made in the form of either Eurodollar loans or Base Rate loans. Eurodollar loans accrue interest based on an adjusted London Interbank Offered Rate ("LIBOR") as defined in the agreement, plus a margin of 1.00% to 1.75%. Base Rate loans accrue interest at the highest of (a) the lender's Prime Rate, (b) the Federal Funds Rate plus 0.5% and (c) the Eurodollar Rate (for a one-month interest period) plus 1%; plus a margin of -0.5% to 0.25%. The applicable margins for both Eurodollar loans and Base Rate loans will vary from time to time in the foregoing ranges based on the cash and cash equivalent balances maintained by the Company and its subsidiaries with the lender. In May 2013, the equipment credit line expired and there was no outstanding balance. As of September 30, 2014 and June 30, 2014, the outstanding balances of the term loan were \$7.9 million and \$13.6 million, respectively.

The obligations under the loan agreement are secured by substantially all assets of two subsidiaries of the Company, including, but not limited to, certain real property and related assets located at the Oregon fab. In addition, the Company and certain subsidiaries of the Company have agreed to guarantee full repayment and performance of the obligations under the loan agreement. The loan agreement contains customary restrictive covenants and includes certain financial covenants that require the Company to maintain on a consolidated basis specified financial ratios including total liabilities to tangible net worth, fixed charge coverage and current assets to current liabilities. As of September 30, 2014, the Company was in compliance with these covenants.

# ALPHA AND OMEGA SEMICONDUCTOR LIMITED NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

During July 2012, the Company entered into a loan agreement with the State of Oregon for an amount of \$0.3 million. The loan was required to be used for training new and re-training existing employees of the Oregon fab. The loan bore a compound annual interest rate of 5.0% and was to be repaid in April 2014 if the required conditions were not met. In September 2014, the State of Oregon forgave the outstanding balance in full as we had satisfied the conditions. The \$0.3 million loan forgiven was recorded as a reduction of costs of goods sold in our condensed consolidated statements of operations. There was no outstanding balance of the loan as of September 30, 2014.

# 6. Shareholders' Equity and Share-based Compensation Share Repurchase

On October 22, 2010, the Company's Board of Directors authorized a \$25.0 million share repurchase program. Under this repurchase program the Company may, from time to time, repurchase shares from the open market or in privately negotiated transactions, subject to supervision and oversight by the Board. The Company accounts for treasury stock under the cost method. Shares repurchased are accounted for as treasury shares and the total cost of shares repurchased is recorded as a reduction of shareholders' equity. From time to time, treasury shares may be reissued as part of the Company's stock-based compensation programs. Gains on re-issuance of treasury stock are credited to additional paid-in capital; losses are charged to additional paid-in capital to offset the net gains, if any, from previous sales or re-issuance of treasury stock. Any remaining balance of the losses are charged to retained earnings.

On May 8, 2014, the Company's Board of Directors approved to reactivate the share repurchase program with a remaining balance of \$22.7 million. The Board authorized management to repurchase, subject to oversight by the Board, our common shares up to the remaining balance of the program, or \$22.7 million. The repurchases may be made from the open market or through negotiated block transactions and to date repurchases have been made pursuant to a pre-established 10b5-1 trading plan. Such 10b5-1 trading plan was expired in August 2014 and the Board intends to review conditions from time to time to determine whether it is appropriate to implement a new 10b5-1 trading plan or to conduct repurchases under the program outside of a 10b5-1 trading plan.

During the three months ended September 30, 2014, the Company did not repurchased any shares under the program. As of September 30, 2014, the Company repurchased an aggregate of 361,364 shares for a total cost of \$3.2 million, at an average repurchase price of \$8.82 per share since inception of the program. No repurchased shares have been retired. Of the 361,364 repurchased shares, 21,650 shares with a weighted average repurchase price of \$13.81 per share, were reissued at an average price of \$3.00 per share for option exercises and vested RSU.

### **Stock Options**

-	Options Outs	standing	-	Options Vest Exercisable	ted and
		Weighted-Average			
	Number	Remaining	Weighted-Avera	ag <b>N</b> umber	Weighted-Average
	Outstanding	Contractual Life (years)	Exercise Price	Exercisable	Exercise Price
Total options outstanding	3,103,069	5.68	\$ 10.40	2,115,149	\$ 11.26
Options vested and expected to	3,005,766	5.57	\$ 10.48		

Options expected to vest are the result of applying the pre-vesting forfeiture rate assumption to total outstanding options.

The fair value of stock options granted were estimated at the date of grant using the Black-Scholes option valuation model for the three months ended September 30, 2014 with the following weighted average assumptions:

	•		Three Months Ended
			September 30,
			2014
Volatility rate			43.5%
Risk-free interest rate			1.7%
Expected term			5.5 years
Dividend yield			0%

Historically, the Company estimates its expected volatility based on that of the publicly traded shares of industry peers over a period equivalent to the expected term of the stock awards granted. Beginning in July 2015, the Company estimates its expected volatility based on a weighted average calculation of both the Company's volatility of its publicly traded share prices since its IPO and that of the publicly traded shares of industry peers over a period equivalent to the expected term of the stock awards granted.

Restricted Stock Units ("RSU")

The following table summarizes the Company's RSU activities for the three months ended September 30, 2014:

erage Remaining Aggregate are Recognition Intrinsic Value Period (Years)
1.77 \$6,084,587
1.61 \$5,943,150
1.52 \$5,241,267

The fair value of RSU is estimated based on the market price of the Company's share on the date of grant.

# ALPHA AND OMEGA SEMICONDUCTOR LIMITED NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

### Employee Share Purchase Plan

The Employee Share Purchase Plan (the "ESPP") was established in May 2010 upon the completion of the Company's initial public offering. The assumptions used to estimate the fair values of common shares issued under the ESPP were as follows:

Three Months Ended September 30, 2014

Volatility rate 50%

Risk-free interest rate 0.1% - 0.4%

Expected term 1.3 years

Dividend yield 0%

**Share-based Compensation Expense** 

The total share-based compensation expense related to stock options, ESPP and RSUs described above, recognized in the condensed consolidated statements of operations for the periods presented was as follows:

	Three Months Ended September 30,			
	2014	2013		
	(in thousands			
Cost of goods sold	\$154	\$196		
Research and development	206	295		
Selling, general and administrative	742	718		
	\$1,102	\$1,209		

Total unrecognized stock-based compensation expense as of September 30, 2014 was \$4.7 million, which includes estimated forfeitures and is expected to be recognized over a weighted-average period of 1.4 years.

#### 7. Income Taxes

The Company recognized income tax expense of approximately \$1.2 million and \$1.0 million for the three months ended September 30, 2014 and 2013, respectively. The estimated effective tax rate for the three months ended September 30, 2014 was 67.5% compared to 76.5% for the three months ended September 30, 2013. The effective tax rate for the three months ended September 30, 2014 was lower than the effective tax rate for the same period last year primarily due to the changes in the mix of earnings in various geographic jurisdictions between the two periods. The Company files its income tax returns in the United States and in various foreign jurisdictions. The tax years 2001 to 2014 remain open to examination by U.S. federal and state tax authorities. The tax years 2005 to 2014 remain open to examination by foreign tax authorities.

The Company's income tax returns are subject to examinations by the Internal Revenue Service and other tax authorities in various jurisdictions. In accordance with the guidance on the accounting for uncertainty in income taxes, the Company regularly assesses the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of its provision for income taxes. These assessments can require considerable estimates and judgments. As of September 30, 2014, the gross amount of unrecognized tax benefits was approximately \$6.8 million, of which \$4.8 million that, if recognized, would reduce the effective income tax rate in future periods. If the Company's estimate of income tax liabilities proves to be less than the ultimate assessment, then a further charge to expense would be required. If events occur and the payment of these amounts ultimately proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when the Company determines the liabilities are no longer necessary. The Company does not anticipate any material changes to its uncertain tax positions during the next twelve months.

# ALPHA AND OMEGA SEMICONDUCTOR LIMITED NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

### 8. Segment and Geographic Information

The Company is organized as, and operates in, one operating segment: the design, development and supply of power semiconductor products for computing, consumer electronics, communication and industrial applications. The chief operating decision-maker is the Chief Executive Officer. The financial information presented to the Company's Chief Executive Officer is on a consolidated basis, accompanied by information about revenue by customer and geographic region, for purposes of evaluating financial performance and allocating resources. The Company has one business segment, and there are no segment managers who are held accountable for operations, operating results and plans for products or components below the consolidated unit level. Accordingly, the Company reports as a single operating segment.

The Company sells its products primarily to distributors in the Asia Pacific region, who in turn sell these products to end customers. Because the Company's distributors sell their products to end customers which may have a global presence, revenue by geographical location is not necessarily representative of the geographical distribution of sales to end user markets.

The revenue by geographical location in the following tables is based on the country or region to which the products were shipped to:

	2014	2013	
	(in thousands)		
Hong Kong	\$75,247	\$71,256	
China	10,957	10,892	
South Korea	639	797	
United States	683	473	
Other countries	691	703	
	\$88,217	\$84,121	
The following is a summary of revenue by product type:			
	Three Months Ended September 3		
	2014	2013	
	(in thousands)		
Power discrete	\$64,891	\$65,145	
Power IC	19,156	13,612	
Packaging and testing services	4,170	5,364	
	\$88,217	\$84,121	
Long-lived assets, net consisting of property, plant and equipment, by geograph	nical area are as foll	ows:	
	September 30,	June 30,	
	2014	2014	
	(in thousands)

Three Months Ended September 30,

\$120,899

# ALPHA AND OMEGA SEMICONDUCTOR LIMITED NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

### 9. Commitments and Contingencies

**Purchase Commitments** 

As of September 30, 2014 and June 30, 2014, the Company had approximately \$20.6 million and \$34.5 million, respectively, of outstanding purchase commitments primarily for purchases of semiconductor raw materials, wafers, spare parts and packaging and testing services, and approximately \$2.5 million and \$4.6 million, respectively, of capital commitments for the purchase of property and equipment.

Contingencies and Indemnities

The Company is currently not a party to any pending material legal proceedings. The Company has in the past, and may from time to time in the future, become involved in legal proceedings arising from the normal course of business activities. The semiconductor industry is characterized by frequent claims and litigation, including claims regarding patent and other intellectual property rights as well as improper hiring practices. Irrespective of the validity of such claims, the Company could incur significant costs in the defense of such claims and suffer adverse effects on its operations.

The Company is a party to a variety of agreements that it has contracted with various third parties. Pursuant to these agreements, the Company may be obligated to indemnify another party to such an agreement with respect to certain matters. Typically, these obligations arise in the context of contracts entered into by the Company, under which the Company customarily agrees to hold the other party harmless against losses arising from a breach of representations and covenants related to such matters as title to assets sold, certain intellectual property rights, specified environmental matters and certain income taxes. In these circumstances, payment by the Company is customarily conditioned on the other party making a claim pursuant to the procedures specified in the particular contract, which procedures typically allow the Company to challenge the other party's claim. Further, the Company's obligations under these agreements may be limited in time and/or amount, and in some instances, the Company may have recourse against third parties for certain payments made by it under these agreements. The Company has not historically paid or recorded any material indemnifications and no accrual has been made at September 30, 2014 and June 30, 2014.

The Company has agreed to indemnify its directors and certain employees as permitted by law and pursuant to its bye-laws, and has entered into indemnification agreements with its directors and executive officers. The Company has not recorded a liability associated with these indemnification arrangements, as it historically has not incurred any material costs associated with such indemnification obligations. Costs associated with such indemnification obligations may be mitigated by insurance coverage that the Company maintains. However, such insurance may not cover any, or may cover only a portion of, the amounts the Company may be required to pay. In addition, the Company may not be able to maintain such insurance coverage in the future.

# ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Except for the historical information contained herein, the matters addressed in this Item 2 constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such forward-looking statements are subject to a variety of risks and uncertainties, including those discussed below under the heading "Risk Factors" and elsewhere in this Quarterly Report on Form 10-Q, that could cause actual results to differ materially from those anticipated by the Company's management. The Private Securities Litigation Reform Act of 1995 (the "Act") provides certain "safe harbor" provisions for forward-looking statements. All forward-looking statements made in this Quarterly Report on Form 10-Q are made pursuant to the Act. The Company undertakes no obligation to publicly release the results of any revisions to its forward-looking statements that may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unexpected events. Unless the context otherwise requires, the words "AOS," the "Company," "we," "us" and "or refer to Alpha and Omega Semiconductor Limited and its subsidiaries.

This management's discussion should be read in conjunction with the management's discussion included in the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2014, filed with the Securities and Exchange Commission on August 29, 2014.

Overview

We are a designer, developer and global supplier of a broad portfolio of power semiconductors. Our portfolio of power semiconductors includes over 1,400 products, and has grown rapidly with the introduction of over 150 new products during the fiscal year 2014, and over 195 and 240 new products in the fiscal years 2013 and 2012, respectively. During the three months ended September 30, 2014, we introduced an additional 20 new products. Our teams of scientists and engineers have developed extensive intellectual properties and technical knowledge that encompass major aspects of power semiconductors, which we believe enables us to introduce and develop innovative products to address the increasingly complex power requirements of advanced electronics. We have an extensive patent portfolio that consists of 452 patents and 201 patent applications in the United States as of September 30, 2014. We differentiate ourselves by integrating our expertise in technology, design and advanced packaging to optimize product performance and cost. Our portfolio of products targets high-volume applications, including personal computers, flat panel TVs, LED lighting, smart phones, battery packs, consumer and industrial motor controls and power supplies for TVs, computers, servers and telecommunications equipment.

Our business model leverages global resources, including research and development and manufacturing in the United States and Asia. Our sales and technical support teams are localized in several growing markets. We operate a 200mm wafer fabrication facility located in Hillsboro, Oregon, or the Oregon fab, which is critical for us to accelerate proprietary technology development and new product introduction and to improve our financial performance in the long run. For example, during the first quarter of fiscal year of 2015, we rolled out new family of 25-V and 30-V high performance MOSFETs in compact 3 x 3mm DFN packages. These devices are ideally suited for a variety of DC/DC step-down conversion solutions for personal computing, gaming, servers, and telecom/datacom applications. We also enhanced the EZPower(TM) smart load switch portfolio with rapid turn-off fault protection and current monitoring. The device has an operating input voltage range from 5-V to 16-V and is capable of supplying up to 6A of continuous current. A low on-resistance of 23m in a thermally enhanced 3mm x 3mm DFN package makes the AOZ1363 optimal for space-constrained applications that require circuit protection such as the latest notebook PCs, hot swap supplies and micro servers. To meet the market demand for more mature high volume products, we also utilize the wafer manufacturing capacity of selected third party foundries. For assembly and test, we primarily rely upon our in-house facilities in China while utilizing selected subcontracting partners for industry standard packages. We believe our in-house packaging and testing capability provides us with a competitive advantage in proprietary packaging technology, product quality, cost and cycle time.

Factors affecting our performance

Our performance is affected by several key factors, including the following:

The global, regional economic and PC market conditions: Because our products primarily serve consumer electronic applications, a deterioration of the global and regional economic conditions could materially affect our revenue and results of operations. In particular, because a significant amount of our revenue is derived from sales of products in the personal computing ("PC") markets, such as notebooks, motherboards and notebook battery packs, a significant decline or downturn in the PC markets can have a material adverse effect on our revenue and results of operations. Our revenue from the PC markets accounted

for approximately 47.3% and 45.2% of our total revenue for the three months ended September 30, 2014 and 2013, respectively. Since the beginning of calendar year 2013, we have experienced a significant global decline in the PC markets due to continued growth of demand in tablets and smart phones, worldwide economic conditions and the industry inventory correction which had and may continue to have a material negative impact on the demand for our products, revenue, factory utilization, gross margin, our ability to resell excess inventory, and other performance measures.

In response to this trend, we have been executing and are continuing to execute strategies to diversify our product portfolio and penetrate other market segments, such as the consumer, communication and industrial market segments, which we believe will mitigate and eventually overcome the reduced demand resulting from the declining PC markets. As we develop and sell new products that serve more diversified markets, we expect that sales based on the PC markets, as a percentage of the total revenue, will continue to decline. However, if the rate of decline in the PC markets is faster than we expect, or if we cannot successfully diversify or introduce new products to keep pace with the declining PC markets, we may not be able to alleviate its negative impact, which will adversely affect our results of operations.

Manufacturing costs: Our gross margin may be affected by our manufacturing costs, including utilization of our own manufacturing facilities, pricing of wafers from other foundries and semiconductor raw materials, which may fluctuate from time to time largely due to the market demand and supply. Capacity utilization affects our gross margin because we have certain fixed costs associated with our in-house packaging and testing facilities and our Oregon fab. If we are unable to utilize the capacity of our in-house manufacturing facilities at a desired level, our gross margin may be adversely affected. In addition, the continuing decline of the PC markets as discussed above contributed to a reduced level of capacity utilization at our manufacturing facilities. If we are not able to mitigate the negative impact of the declining PC markets, we may not be able to improve our factory utilization or offset the increasing manufacturing costs, which could have a material adverse effect on our gross margin.

Erosion of average selling price: Erosion of average selling prices of established products is typical in our industry. Consistent with this historical trend, we expect that average selling prices of our existing products will continue to decline in the future. However, in the normal course of business, we seek to offset the effect of declining average selling prices by introducing new and higher value products, expanding existing products for new applications and new customers, and reducing the manufacturing cost of existing products.

Product introductions and customers' product requirements: Our success depends on our ability to introduce products on a timely basis that meet or are compatible with our customers' specifications and performance requirements. Both factors, timeliness of product introductions and conformance to customers' requirements, are important in securing design wins with our customers. We have introduced new mid- and high-voltage products as part of our business strategy to diversify our product portfolios and penetrate new markets such as the power supply and industrial markets. As we accelerate the development of new technology platforms, we expect to increase the pace at which we introduce new products and obtain design wins. Our failure to introduce new products on a timely basis that meet customers' specifications and performance requirements and our inability to continue to expand our serviceable markets could adversely affect our financial performance, including loss of market share with customers. Distributor ordering patterns and seasonality: Our distributors place purchase orders with us based on their forecasts of end customer demand, and this demand may vary significantly depending on the sales outlooks and market and economic conditions of end customers. Because these forecasts may not be accurate, channel inventory held at our distributors may fluctuate significantly, which in turn may prompt distributors to make significant adjustments to their purchase orders placed with us. As a result, our revenue and operating results may fluctuate significantly from quarter to quarter. In addition, because our products are used in consumer electronics products, our revenue is subject to seasonality. Our sales seasonality is affected by numerous factors, including global and regional economic conditions as well as the PC market conditions, revenue generated from new products, changes in distributor ordering patterns in

response to channel inventory adjustments and end customer demand for our products and fluctuations in consumer purchase patterns prior to major holiday seasons. In recent periods, broad fluctuations in the semiconductor markets and the global and regional economic conditions, and in particular the decline of the PC market conditions, have had a more significant impact on our results of operations than seasonality.

Principal line items of statements of operations

The following describes the principal line items set forth in our condensed consolidated statements of operations:

We generate revenue primarily from the sale of power semiconductors, consisting of power discretes and power ICs. Historically, a majority of our revenue was derived from power discrete products and a smaller amount was derived from power

IC products. Because our products typically have three-year to five-year life cycles, the rate of new product introduction is an important driver of revenue growth over time. We believe that expanding the breadth of our product portfolio is important to our business prospects, because it provides us with an opportunity to increase our total bill-of-materials within an electronic system and to address the power requirements of additional electronic systems. In addition, a small percentage of our total revenue is generated by providing packaging and testing services to third-parties through one of our subsidiaries.

Our product revenue includes the effect of the estimated stock rotation returns and price adjustments that we expect to provide to our distributors. Stock rotation returns are governed by contract and are limited to a specified percentage of the monetary value of products purchased by the distributor during a specified period. At our discretion or upon our direct negotiations with the original design manufacturers ("ODMs") or original equipment manufacturers ("OEMs"), we may elect to grant special pricing that is below the prices at which we sold our products to the distributors. We estimate for the price adjustments for inventory at the distributors based on factors such as distributor inventory levels, pre-approved future distributor selling prices, distributor margins and demand for our products. Cost of goods sold

Our cost of goods sold primarily consists of costs associated with semiconductor wafers, packaging and testing, personnel, including share-based compensation expense, overhead attributable to manufacturing, operations and procurement, and cost associated with yield improvements, capacity utilization, warranty and inventory reserves. As the volume of sales increases, we expect cost of goods sold to increase. We implemented a process to improve our factory capacity utilization rates by transferring more wafer production to our Oregon fab and reducing our reliance on outside foundries. While our utilization rates cannot be immune to market conditions, our goal is to make such rates less vulnerable to market fluctuations. We believe our market diversification strategy and product growth will drive higher volumes of manufacturing which will improve our factory utilization rates and gross margin in the long run. Operating expenses

Our operating expenses consist of research and development, selling, general and administrative expenses. We expect our operating expenses as a percentage of revenue to fluctuate from period to period as we continue to exercise cost control measures in response to the declining PC markets as well as align our operating expenses to the revenue level. Research and development expenses. Our research and development expenses consist primarily of salaries, bonuses, benefits, share-based compensation expense, expenses associated with new product prototypes, travel expenses, fees for engineering services provided by outside contractors and consultants, amortization of software and design tools, depreciation of equipment and overhead costs for research and development personnel. We continue to invest in developing new technologies and products utilizing our own fabrication and packaging facilities as it is critical to our long-term success. We also evaluate appropriate investment levels and stay focused on new product introductions to improve our competitiveness. We expect that our research and development expenses will fluctuate from time to time. Selling, general and administrative expenses. Our selling, general and administrative expenses consist primarily of salaries, bonuses, benefits, share-based compensation expense, product promotion costs, occupancy costs, travel expenses, expenses related to sales and marketing activities, amortization of software, depreciation of equipment, maintenance costs and other expenses for general and administrative functions as well as costs for outside professional services, including legal, audit and accounting services. We expect our selling, general and administrative expenses to fluctuate in the near future as we continue to exercise cost control measures in response to the declining PC markets. Income tax expense

We are subject to income taxes in various jurisdictions. Significant judgment and estimates are required in determining our worldwide income tax expense. The calculation of tax liabilities involves dealing with uncertainties in the application of complex tax regulations of different jurisdictions globally. We establish accruals for potential liabilities and contingencies based on a more likely than not threshold to the recognition and de-recognition of uncertain tax positions. If the recognition threshold is met, the applicable accounting guidance permits us to recognize a tax benefit measured at the largest amount of tax benefit that is more likely than not to be realized upon settlement

with a taxing authority. If the actual tax outcome of such exposures is different from the amounts that were initially recorded, the differences will impact the income tax and deferred tax provisions in the period in which such determination is made. Changes in the location of taxable income (loss) could result in significant changes in our income tax expense.

We record a valuation allowance against deferred tax assets if it is more likely than not that a portion of the deferred tax assets will not be realized, based on historical profitability and our estimate of future taxable income in a particular jurisdiction. Our judgments regarding future taxable income may change due to changes in market conditions, changes in tax laws, tax planning strategies or other factors. If our assumptions and consequently our estimates change in the future, the deferred tax assets may increase or decrease, resulting in corresponding changes in income tax expense. Our effective tax rate is highly dependent upon the geographic distribution of our worldwide profits or losses, the tax laws and regulations in each geographical region where we have operations, the availability of tax credits and carry-forwards and the effectiveness of our tax planning strategies.

### **Results of Operations**

18

The following tables set forth statements of operations, also expressed as a percentage of revenue, for the three months ended September 30, 2014 and 2013. Our historical results of operations are not necessarily indicative of the results for any future period.

•	Three Months Ended September 30,					
	2014	2013	2014	,	2013

#### Revenue

The following is a summary of revenue by product type:

Three Months Ended September 30,					
2014	2013	Change			
(in thousands)	)	(in thousan	nds)	(in percent	iage)
\$64,891	\$65,145	\$(254	)	(0.4	)%
19,156	13,612	5,544		40.7	%
4,170	5,364	(1,194	)	(22.3	)%
\$88,217	\$84,121	\$4,096		4.9	%
	2014 (in thousands) \$64,891 19,156 4,170	2014 2013 (in thousands) \$64,891 \$65,145 19,156 13,612 4,170 5,364	(in thousands) (in thousands) \$64,891 \$65,145 \$(254) \$19,156 \$13,612 \$5,544 \$4,170 \$5,364 \$(1,194)	2014 2013 Change (in thousands) (in thousands) \$64,891 \$65,145 \$(254 ) 19,156 13,612 5,544 4,170 5,364 (1,194 )	2014 2013 Change (in thousands) (in thousands) (in percent \$64,891 \$65,145 \$(254 ) (0.4 19,156 13,612 5,544 40.7 4,170 5,364 (1,194 ) (22.3

Total revenue was \$88.2 million for the three months ended September 30, 2014, an increase of \$4.1 million, or 4.9%, as compared to \$84.1 million for the same period last year. The increase consisted of \$5.5 million increase in sales of power IC products partially offset by a \$0.3 million and \$1.2 million decrease in sales of power discrete product and packaging and testing services. The net increase in product revenue, including power discrete and power IC products was primarily due to a 14.2% increase in unit shipments, partially offset by a 6.6% decrease in average selling price as compared to the same period of last year mainly due to selling price erosion in the computing and consumer markets and to a lesser extent, a shift in product mix. The decrease in revenue of packaging and testing services for the three months ended September 30, 2014 as compared to the same period last year was primarily due to reduced demand as a result of the declining PC markets.

Cost of goods sold and gross profit

	Three Months Ended September 30,				
	2014	2013	Change		
	(in thousands)		(in thousands)	(in percentage)	)
Cost of goods sold	\$70,057	\$66,970	\$3,087	4.6	%
Percentage of revenue	79.4	% 79.6 %	)		
Gross profit Percentage of revenue	\$18,160 20.6	\$17,151 % 20.4 %	\$1,009	5.9	%

Cost of goods sold was \$70.1 million for the three months ended September 30, 2014, an increase of \$3.1 million, or 4.6%, as compared to \$67.0 million for the same period last year, primarily due to increased unit shipments and raw material pricing. The increase was partially offset by the overall manufacturing cost reduction due to improved factory utilization and continued cost control efforts as compared to the same period last year. Gross margin slightly increased by 0.2 percentage points to 20.6% for the three months ended September 30, 2014 as compared to 20.4% for the same period last year. The slight increase in gross margin was primarily due to higher factory utilization and continued cost reduction efforts during the three months ended September 30, 2014, offset by decreased average selling price primarily due to price erosion during the three months ended September 30, 2014.

Research and development expenses

	Three Months	Ended Septemb	er 30,			
	2014	2013	Change			
	(in thousands)		(in thousands	s) (i	n percenta	ge)
Research and development	\$6,796	\$6,847	\$(51	) ((	0.7	)%

Research and development expenses remained flat at approximately \$6.8 million for both the three months ended September 30, 2014 and 2013, primarily attributable to a \$0.3 million increase in product prototyping engineering expenses, offset by a \$0.1 million decrease in depreciation and amortization expense as a result of increased fully depreciated assets, a \$0.1 million decrease in share-based compensation expense primarily due to increased

cancellations of stock options and awards in the current quarter, as well as a \$0.1 million decrease in consulting fees due to reduced consulting activities. We continue to evaluate

and invest resources in developing new technologies and products utilizing our own fabrication and packaging facilities. We expect our research and development expenses to continue to fluctuate from time to time. Selling, general and administrative expenses

	Three Months Ended September 30,				
	2014	2013	Change		
	(in thousand	ds)	(in thousan	ds) (in perc	entage)
Selling, general and administrative	\$9,604	\$8,940	\$664	7.4	%

Thurs Months Ended Contourless 20

Selling, general and administrative expenses were \$9.6 million for the three months ended September 30, 2014, an increase of \$0.7 million, or 7.4%, as compared to \$8.9 million for the same period last year. The increase was primarily due to a \$0.3 million increase in employee compensation and benefits mainly as a result of increased headcount during the current quarter ended September 30, 2014, a \$0.4 million in recovery of doubtful accounts as a result of continued effort in collection from a service customer in the same period of last year as well as a \$0.1 million increase in consulting expenses due to increased consulting activities, partially offset by a \$0.1 million decrease in legal fee.

### Interest income and expenses

Interest income was primarily related to interest earned from cash and cash equivalents. The increase in interest income during the three months ended September 30, 2014 as compared to the same period last year was primarily due to the increase in average cash balances.

Income tax expense

	I nree Months	Ended Sept	ember 30,		
	2014	2013	Change		
	(in thousands)	(in thousands)		(in perce	ntage)
Income tax expense	\$1,171	\$1,002	\$169	16.9	%

We recognized income tax expense of approximately \$1.2 million and \$1.0 million for the three months ended September 30, 2014 and 2013, respectively. The effective tax rate was 67.5% and 76.5% for the three months ended September 30, 2014 and 2013, respectively. Our effective tax rate for the three months ended September 30, 2014 was lower than that for same period of last year primarily due to the changes in the mix of earnings in various geographic jurisdictions between the two periods.

### Liquidity and Capital Resources

Our principal need for liquidity and capital resources is to maintain sufficient working capital to support our operations and to invest adequate capital expenditures to fuel the growth of our business. Currently, we primarily financed our operations and capital expenditures through funds generated from operations.

On May 11, 2012, we entered into a loan agreement with a financial institution that provides a term loan of \$20.0 million for general purposes and a \$10.0 million non-revolving credit line for the purchase of equipment. Both the term loan and equipment credit line will be fully repayable in May 2015. The borrowings may be made in the form of either Eurodollar loans or Base Rate loans. Eurodollar loans accrue interest based on an adjusted London Interbank Offer Rate ("LIBOR") as defined in the agreement, plus a margin of 1.00% to 1.75%. Base Rate loans accrue interest at the highest of (a) the lender's Prime Rate, (b) the Federal Funds Rate plus 0.5% and (c) the Eurodollar Rate (for a one-month interest period) plus 1%; plus a margin of -0.5% to 0.25%. The applicable margins for both Eurodollar loans and Base Rate loans will vary from time to time in the foregoing ranges based on the cash and cash equivalent balances maintained by us and our subsidiaries with the lender. In May 2013, the equipment credit line expired and there was no outstanding balance. As of September 30, 2014, the outstanding balance of the term loan was \$7.9 million.

The obligations under the term loan are secured by substantially all assets of two of our subsidiaries, including but not limited to, certain real property and related assets located at the Oregon fab. In addition, we and certain of our subsidiaries have agreed to guarantee full repayment and performance of the obligations under the loan agreement. The loan agreement contains customary restrictive covenants and includes certain financial covenants that require us to maintain on a consolidated basis specified financial ratios including total liabilities to tangible net worth, fixed charge coverage and current assets to current liabilities. As of September 30, 2014, we were in compliance with these covenants.

During July 2012, the Company entered into a loan agreement with the State of Oregon for an amount of \$0.3 million. The loan was required to be used for training new and re-training existing employees of the Oregon fab. The loan bore a compound annual interest rate of 5.0% and was to be repaid in April 2014 if the required conditions were not met. In September 2014, the State of Oregon forgave the outstanding balance in full as we had satisfied the conditions. The \$0.3 million loan forgiven was recorded as a reduction of costs of goods sold in our condensed consolidated statements of operations.

On May 8, 2014, our Board of Directors approved to reactivate the share repurchase program which was originally authorized on October 22, 2010 for a total amount of \$25.0 million. The Board authorized management to repurchase, subject to oversight by the Board, our common shares up to the remaining balance of the program, or \$22.7 million. The repurchases may be made from the open market or through negotiated block transactions and to date repurchases have been made pursuant to a pre-established 10b5-1 trading plan. Such 10b5-1 trading plan was expired in August 2014 and the Board intends to review conditions from time to time to determine whether it is appropriate to implement a new 10b5-1 trading plan or to conduct repurchases under the program outside of a 10b5-1 trading plan. The amount and timing of any purchases will depend on a number of factors, including but not limited to the price and availability of our common shares, trading volume of our common shares, applicable regulatory requirements, our business and financial conditions and general market environment, and there is no guarantee that any repurchases will be made or that such repurchases may enhance the value of our shares. During the three months ended September 30, 2014, we did not repurchase any shares under the share repurchase program. Since the inception of the program in 2010, we repurchased an aggregate of 361,364 shares from the open market for a total cost of \$3.2 million, at an average price of \$8.82 per share. Shares repurchased are accounted for as treasury shares and the total cost of shares repurchased is recorded as a reduction of shareholders' equity.

We believe that our current cash and cash equivalents and cash flows from operations will be sufficient to meet our anticipated cash needs, including working capital and capital expenditures, for at least the next twelve months. In the

long-term, we may require additional capital due to changing business conditions or other future developments, including any investments or acquisitions we may decide to pursue. If our cash is insufficient to meet our needs, we may seek to raise capital through equity or debt financing. The sale of additional equity securities could result in dilution to our shareholders. The incurrence of indebtedness would result in increased debt service obligations and may include operating and financial covenants that would restrict our operations. We cannot be certain that any financing will be available in the amounts we need or on terms acceptable to us, if at all.

### Cash and cash equivalents

We had \$117.8 million of cash and cash equivalents as of both September 30, 2014 and June 30, 2014. Our cash and cash equivalents primarily consisted of cash on hand and short-term bank deposits with original maturities of three months or less.

The following table shows our cash flows from operating, investing and financing activities for the periods indicated:

	Three Months Ended September 30,		
	2014	2013	
	(in thousands)		
Net cash provided by operating activities	\$7,629	\$6,740	
Net cash used in investing activities	(2,467	) (1,426	)
Net cash used in financing activities	(5,093	) (1,739	)
Effect of exchange rate changes on cash and cash equivalents	(23	) 14	
Net increase in cash and cash equivalents	\$46	\$3,589	

### Cash flows from operating activities

Net cash provided by operating activities of \$7.6 million for the three months ended September 30, 2014 resulted primarily from net income of \$0.6 million, non-cash charges of \$8.0 million, and net change in assets and liabilities using net cash of \$0.9 million. The non-cash charges of \$8.0 million included (a) \$7.0 million of depreciation and amortization expenses, (b) \$1.1 million of share-based compensation expense and (c) \$0.1 million of net deferred income taxes, partially offset by \$0.3 million of forgiveness of the loan from the State of Oregon during the period. The net change in assets and liabilities using net cash of \$0.9 million was primarily due to a (i) \$1.8 million increase in inventories as we increased our inventories to meet market demand, (ii) \$0.4 million increase in other current and long term assets primarily due to increase in advance payments to vendors, (iii) \$0.5 million decrease in accounts payable primarily due to timing of payment, and (iv) \$0.1 million decrease in accounts receivable due to the timing of billings and collection of payments, and (b) \$0.5 million increase in income taxes payable.

Net cash provided by operating activities of \$6.7 million for the three months ended September 30, 2013 resulted primarily from net income of \$0.3 million, non-cash charges of \$8.2 million, and net change in assets and liabilities using net cash of \$1.7 million. The non-cash charges of \$8.2 million included (a) \$7.0 million of depreciation and amortization expenses, (b) \$1.2 million of share-based compensation expense and (c) \$0.4 million of net deferred income taxes, partially offset by \$0.4 million of allowance for doubt accounts and \$0.1 million of gain on disposal of property and equipment during the quarter. The net change in assets and liabilities using net cash of \$1.7 million was primarily due to a (i) \$2.3 million increase in accounts receivable due to the timing of billings and collection of payments, (ii) \$0.5 million increase in other current and long term assets primarily due to increase in advance payments to vendors, (iii) \$0.5 million decrease in income taxes payable, and (iv) \$0.1 million increase in inventories as we built up our inventories to meet market demand, partially offset by (a) \$0.7 million increase in accounts payable primarily due to increase in inventory purchase and timing of payment, and (b) \$0.9 million increase in accrued and other liabilities primarily related to employee contributions to ESPP.

### Cash flows from investing activities

Net cash used in investing activities of \$2.5 million for the three months ended September 30, 2014 was primarily attributable to purchase of property and equipment of \$2.3 million to increase our in-house production capacity, partially offset by \$0.1 million increase in restricted cash during the period.

Net cash used in investing activities of \$1.4 million for the three months ended September 30, 2013 was primarily attributable to purchase of property and equipment of \$1.6 million to increase our in-house production capacity, partially offset by \$0.2 million proceeds from sale of property and equipment during the quarter.

### Cash flows from financing activities

Net cash used in financing activities of \$5.1 million for the three months ended September 30, 2014 was primarily attributable to \$5.7 million of repayment of our borrowings and \$0.2 million in payment of capital lease obligations, partially offset by \$0.9 million of proceeds from exercise of stock options.

Net cash used in financing activities of \$1.7 million for the three months ended September 30, 2013 was primarily attributable to \$1.4 million of net repayment of our borrowings and \$0.3 million in payment of capital lease obligations.

### Capital expenditures

Capital expenditures were \$2.3 million and \$1.6 million for the three months ended September 30, 2014 and 2013, respectively. Our capital expenditures primarily consisted of the purchases of property and equipment.

Capital expenditures for the three months ended September 30, 2014 primarily consisted of purchases of equipment for our packaging and testing services, the Oregon fab as well as for upgrading our operational and financial systems. Capital expenditures for the three months ended September 30, 2013 primarily consisted of purchases of equipment for our packaging and testing services as well as for upgrading our operational and financial systems.

### Commitments

As of September 30, 2014 and June 30, 2014, we had approximately \$20.6 million and \$34.5 million, respectively, of outstanding purchase commitments primarily for purchases of semiconductor raw materials and wafers.

As of September 30, 2014 and June 30, 2014, we had approximately \$2.5 million and \$4.6 million, respectively, of capital commitments for the purchase of property and equipment.

### Off-Balance Sheet Arrangements

As of September 30, 2014, we had no material off-balance sheet arrangements as defined in Regulation S-K 303(a)(4)(ii) arrangements.

#### Recent Accounting Pronouncements

See <u>Note 1</u> of the Notes to the Condensed Consolidated Financial Statements contained in this Quarterly Report on Form 10-Q for a description of recent accounting pronouncements, including the expected dates of adoption and estimated effects on results of operations and financial condition, which is incorporated herein by reference.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in the market risks previously disclosed in Part II, Item 7A, "Quantitative and Qualitative Disclosures About Market Risk," of our Annual Report on Form 10-K for the year ended June 30, 2014, filed with the SEC on August 29, 2014.

#### ITEM 4. CONTROLS AND PROCEDURES

Management's Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, (the "Exchange Act")), as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of September 30, 2014 have been designed and are functioning effectively to provide reasonable assurance that the information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the three months ended September 30, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitation on Effectiveness of Controls

While our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance that their respective objectives will be met, we do not expect that our disclosure controls and procedures or our internal control over financial reporting are or will be capable of preventing or detecting all errors and all fraud. Any control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met.

#### PART II. OTHER INFORMATION

#### ITEM 1. LEGAL PROCEEDINGS

We are currently not a party to any material legal proceedings. We have in the past, and may from time to time in the future, become involved in legal proceedings arising from the normal course of business activities. The semiconductor industry is characterized by frequent claims and litigation, including claims regarding patent and other intellectual property rights as well as improper hiring practices. Irrespective of the validity of such claims, we could incur significant costs in the defense thereof or could suffer adverse effects on its operations.

#### ITEM 1A. RISK FACTORS

Item 1A of Part I of our Annual Report on Form 10-K for the year ended June 30, 2014, filed with the SEC on August 29, 2014, contains risk factors identified by the Company. There have been no material changes to the risk factors we previously disclosed. Our operations could also be affected by additional factors that are not presently known to us or by factors that we currently consider immaterial to our business.

#### ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On May 8, 2014, our Board of Directors approved to reactivate the share repurchase program which was originally authorized on October 22, 2010 for a total amount of \$25.0 million. The Board authorized management to repurchase, subject to oversight by the Board, our common shares up to the remaining balance of the program, or \$22.7 million. The repurchases may be made from the open market or through negotiated block transactions and to date repurchases have been made pursuant to a pre-established 10b5-1 trading plan. Such 10b5-1 trading plan was expired in August 2014 and the Board intends to review conditions from time to time to determine whether it is appropriate to implement a new 10b5-1 trading plan or to conduct repurchases under the program outside of a 10b5-1 trading plan. During the three months ended September 30, 2014, we did not repurchase any shares under the share repurchase program.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES Not applicable.

ITEM 4. MINE SAFETY DISCLOSURES Not applicable.

ITEM 5. OTHER INFORMATION Not applicable.
