UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended September 30, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 001-33963

Iridium Communications Inc.

(Exact name of registrant as specified in its charter)

DELAWARE  
(State of incorporation)

26-1344998  
(I.R.S. Employer

Identification No.)

1750 Tysons Boulevard, Suite 1400, McLean, Virginia  
(Address of principal executive offices)

22102  
(Zip code)

703-287-7400

(Registrant's telephone number, including area code)

Edgar Filing: Iridium Communications Inc. - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of the registrant's common stock, par value \$0.001 per share, outstanding as of October 24, 2016 was 95,771,083.

Iridium Communications Inc.

Notes to Condensed Consolidated Financial Statements

## 1. Basis of Presentation and Principles of Consolidation

Iridium Communications Inc. (the “Company”) has prepared its condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”). The accompanying condensed consolidated financial statements include the accounts of (i) the Company, (ii) its wholly owned subsidiaries, and (iii) all less than wholly owned subsidiaries that the Company controls. All material intercompany transactions and balances have been eliminated.

In the opinion of management, the condensed consolidated financial statements reflect all normal recurring adjustments that the Company considers necessary for the fair presentation of its results of operations and cash flows for the interim periods covered, and of the financial position of the Company at the date of the interim condensed consolidated balance sheet. The operating results for interim periods are not necessarily indicative of the operating results for the entire year. Certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to instructions, rules and regulations prescribed by the U.S. Securities and Exchange Commission (“SEC”). These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2015, as filed with the SEC on February 25, 2016.

## 2. Significant Accounting Policies

### Adopted Accounting Pronouncements

In April 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2015-03, Interest—Imputation of Interest (Subtopic 835-30), Simplifying the Presentation of Debt Issuance Costs. The amendment requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs is not affected by the amendment. Effective January 1, 2016, the Company applied the new guidance retrospectively to all prior periods presented in the accompanying financial statements. The adoption had no effect on the Company’s condensed consolidated statements of operations and comprehensive income, and condensed consolidated statements of cash flows for each of the three and nine months ended September 30, 2016 and 2015. The implementation of this accounting standard resulted in a reduction of \$123.1 million and \$133.1 million in the deferred financing costs asset and in the credit facility as of September 30, 2016 and December 31, 2015, respectively, as shown below.

	September 30, 2016	December 31, 2015
	(in thousands)	
Credit facility	\$1,669,872	\$1,521,822
Deferred financing costs	(123,095 )	(133,056 )
Credit facility, net	\$1,546,777	\$1,388,766

## Recent Accounting Developments

In March 2016, the FASB issued ASU No. 2016-09, Compensation—Stock Compensation, Improvements to Employee Share-Based Payment Accounting. The amendment addresses multiple changes. The amendment requires all income tax effects of awards to be recognized in the income statement when the awards vest or are settled. It also will allow an employer to repurchase more of an employee's shares for tax withholding purposes without triggering liability accounting and to make a policy election to account for forfeitures as they occur. This ASU is effective for public business entities for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. The Company will be required to make the disclosures about a change in accounting principle, but will not have to quantify the income statement effect of the change in the period of adoption. Early adoption is permitted, but all of the guidance must be adopted in the same period. The Company is currently evaluating the effect ASU 2016-09 may have on its condensed consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU No. 2016-02, Leases. The amendment requires lessees to put most leases on their balance sheets but recognize expenses on their income statements in a manner similar to current accounting. This ASU is effective for public business entities in fiscal years beginning after December 15, 2018, including interim periods within those years. Early adoption is permitted and reporting organizations are required to use a modified retrospective approach for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements. The Company is currently evaluating the effect ASU 2016-02 may have on its condensed consolidated financial statements and related disclosures, but recognizing the lease liability and related right-of-use asset will impact its balance sheet.

In July 2015, the FASB issued ASU No. 2015-11, Simplifying the Measurement of Inventory. The amendment requires that inventory within the scope of the guidance be measured at the lower of cost and net realizable value. Inventory measured using last-in, first-out and retail inventory method are excluded from this new guidance. This ASU replaces the concept of market with the single measurement of net realizable value and is intended to create efficiencies for preparers and more closely aligns U.S. GAAP with International Financial Reporting Standards (IFRS). This ASU is effective for public business entities in fiscal years beginning after December 15, 2016, including interim periods within those years. Prospective application is required and early adoption is permitted as of the beginning of an interim or annual reporting period. The Company is currently evaluating the effect ASU 2015-11 may have on its condensed consolidated financial statements and related disclosures.

In May 2014, the FASB and the International Accounting Standards Board jointly issued a comprehensive new revenue recognition standard, ASU No. 2014-09, Revenue from Contracts with Customers, that will supersede nearly all existing revenue recognition guidance under U.S. GAAP. The amendment requires a company to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In July 2015, the FASB voted to defer the effective date of ASU 2014-09 for public entities to be effective for annual and interim periods beginning after December 15, 2017. Early adoption would be permitted no earlier than the original effective date beginning after December 15, 2016. ASU 2014-09 becomes effective for the Company in the first quarter of fiscal 2018. The Company has not yet selected a transition method and is currently evaluating the effect ASU 2014-09 may have on its condensed consolidated financial statements and related disclosures.

## Warranty Expense

The Company provides the first end-user purchaser of its subscriber equipment a warranty for one to five years from the date of purchase by such first end-user, depending on the product. The Company maintains a warranty reserve based on historical experience of warranty costs and expected occurrences of warranty claims on equipment. Costs associated with warranties, including equipment replacements, repairs, freight, and program administration, are recorded as cost of subscriber equipment in the accompanying condensed consolidated statements of operations and comprehensive income. Changes in the warranty reserve during the nine months ended September 30, 2016 were as

follows:

	Nine Months Ended September 30, 2016 (in thousands)
Balance at beginning of the period	\$ 3,320
Provision	413
Utilization	(1,080 )
Balance at end of the period	\$ 2,653

#### Fair Value Measurements

The Company evaluates assets and liabilities subject to fair value measurements on a recurring and non-recurring basis to determine the appropriate level to classify them for each reporting period. This determination requires significant judgments to be made by management of the Company. The instruments identified as subject to fair value measurements on a recurring basis are cash and cash equivalents, marketable securities, prepaid expenses and other current assets, accounts receivable, accounts payable and accrued

7

---

expenses and other current liabilities. Fair value is the price that would be received from the sale of an asset or paid to transfer a liability assuming an orderly transaction in the most advantageous market at the measurement date. U.S. GAAP establishes a hierarchical disclosure framework which prioritizes and ranks the level of observability of inputs used in measuring fair value. The fair value hierarchy consists of the following tiers:

- Level 1, defined as observable inputs such as quoted prices in active markets for identical assets or liabilities;
- Level 2, defined as observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and
- Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

The carrying values of short-term financial instruments (primarily cash and cash equivalents, prepaid expenses and other current assets, accounts receivable, accounts payable, and accrued expenses and other current liabilities) approximate their fair values because of their short-term nature. The fair value of the Company's investments in money market funds approximates its carrying value; such instruments are classified as Level 1 and are included in cash and cash equivalents in the accompanying condensed consolidated balance sheets. The fair value of the Company's investments in commercial paper and short-term U.S. agency securities with original maturities of less than ninety days approximates their carrying value; such instruments are classified as Level 2 and are included in cash and cash equivalents in the accompanying condensed consolidated balance sheets.

The fair value of the Company's investments in fixed-income debt securities and commercial paper with original maturities of greater than ninety days are obtained using similar investments traded on active securities exchanges and are classified as Level 2 and are included in marketable securities in the accompanying condensed consolidated balance sheets. For fixed income securities that do not have quoted prices in active markets, the Company uses third-party vendors to price its debt securities resulting in classification as Level 2.

### Depreciation and Amortization

The Company calculates depreciation expense using the straight line method and evaluates the appropriateness of the useful life used on a quarterly basis or as events occur that require additional assessment. In addition to the changes made in prior quarters, in the third quarter of 2016, the Company updated its estimate of the current satellites' remaining useful lives based on the continued refinement of the launch schedule, health of the existing constellation, and deployment plan for the Company's next-generation satellite constellation ("Iridium NEXT"). As a result, the estimated useful lives of the satellites within the current constellation have been extended and are consistent with the expected deployment of Iridium NEXT. The \$1.5 million decrease in depreciation expense for the nine months ended September 30, 2016 compared to the prior year is primarily related to the continued refinement in the estimated useful lives, partially offset by the addition of new assets and the impairment of two lost satellites during the second quarter of 2016. No satellite losses occurred during 2015. The Company will continue to evaluate the useful lives of its current satellites on an ongoing basis through the full deployment of Iridium NEXT as the satellites are placed into service. The Company does not believe the loss of these satellites in 2016 is an indicator of impairment of the remaining individual satellites or the constellation as of September 30, 2016. The changes in estimate will also have an effect on future periods through the deployment of Iridium NEXT.

### 3. Cash and Cash Equivalents, Restricted Cash and Marketable Securities

#### Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of ninety days or less to be cash equivalents. These investments, along with cash deposited in institutional money market funds, commercial paper,

Edgar Filing: Iridium Communications Inc. - Form 10-Q

regular interest bearing and non-interest bearing depository accounts, are classified as cash and cash equivalents in the accompanying condensed consolidated balance sheet. The following table summarizes the Company's cash and cash equivalents:

	September 30, 2016 (in thousands)	December 31, 2015	Recurring Fair Value Measurement
Cash and cash equivalents:			
Cash	\$ 114,237	\$ 67,005	
Money market funds	254,530	118,660	Level 1
Commercial paper	5,239	-	Level 2
Total cash and cash equivalents	\$ 374,006	\$ 185,665	

## Restricted Cash

The Company is required to maintain a minimum cash reserve for debt service related to its \$1.8 billion loan facility (the "Credit Facility") (see Note 4). As of September 30, 2016 and December 31, 2015, the Company's restricted cash balance, which includes a minimum cash reserve for debt service related to the Credit Facility and the interest earned on these amounts, was \$113.1 million and \$91.1 million, respectively.

## Marketable Securities

Marketable securities consist of fixed-income debt securities and commercial paper with an original maturity in excess of ninety days. These investments are classified as available-for-sale and are included in marketable securities within current assets in the accompanying condensed consolidated balance sheets. All investments are carried at fair value. Unrealized gains and losses, net of taxes, are reported as a component of other comprehensive income or loss. The specific identification method is used to determine the cost basis of the marketable securities sold. There were no material realized gains or losses on the sale of marketable securities for the three and nine months ended September 30, 2016 and 2015. The Company regularly monitors and evaluates the fair value of its investments to identify other-than-temporary declines in value. The Company determined that the decline in fair value of its investments is temporary at September 30, 2016 as the Company does not intend to sell these securities, and it is not likely that the Company will be required to sell the securities before the recovery of their amortized cost basis.

The following tables summarize the Company's marketable securities:

	As of September 30, 2016				
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value	Recurring Fair Value Measurement
	(in thousands)				
Fixed-income debt securities	\$39,977	\$ 37	\$ (4 )	\$ 40,010	Level 2
U.S. treasury notes	12,336	22	-	12,358	Level 2
Total marketable securities	\$52,313	\$ 59	\$ (4 )	\$ 52,368	

	As of December 31, 2015				
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value	Recurring Fair Value Measurement
	(in thousands)				
Fixed-income debt securities	\$181,636	\$ 4	\$ (200 )	\$ 181,440	Level 2
Commercial paper	9,821	-	(1 )	9,820	Level 2
U.S. treasury notes	12,079	-	(10 )	12,069	Level 2
Total marketable securities	\$203,536	\$ 4	\$ (211 )	\$ 203,329	

The following table presents the contractual maturities of the Company's marketable securities:

	As of September 30, 2016		As of December 31, 2015	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value

Edgar Filing: Iridium Communications Inc. - Form 10-Q

	(in thousands)			
Mature within one year	\$35,954	\$35,981	\$169,728	\$169,619
Mature after one year and within three years	16,359	16,387	33,808	33,710
Total	\$52,313	\$52,368	\$203,536	\$203,329

#### 4. Commitments and Contingencies

##### Commitments

##### Thales

In June 2010, the Company executed a primarily fixed-price full-scale development contract (the “FSD”) with Thales Alenia Space France (“Thales”) for the design and build of satellites for Iridium NEXT. The total price under the FSD is \$2.3 billion, and the Company expects payment obligations under the FSD to extend through 2018. As of September 30, 2016, the Company had made aggregate payments of \$1,671.7 million to Thales, of which \$1,417.0 million were from borrowings under the Credit Facility, and which were capitalized as construction in progress within property and equipment, net in the accompanying condensed consolidated balance sheet. The Company currently uses the Credit Facility to pay 85% of each invoice received from Thales under the FSD, with the remaining 15% funded from cash on hand. Once the Credit Facility is fully drawn, the Company expects to pay 100% of each

invoice received from Thales from cash and marketable securities on hand as well as internally generated cash flows, including contracted cash flows from hosted payloads and potential cash flows from Iridium PRIME<sup>SM</sup>.

#### SpaceX

In March 2010, the Company entered into an agreement with Space Exploration Technologies Corp. (“SpaceX”) to secure SpaceX as the primary launch services provider for Iridium NEXT (as amended to date, the “SpaceX Agreement”). The total price under the SpaceX Agreement for seven launches and a reflight option in the event of a launch failure is \$468.1 million. As of September 30, 2016, the Company had made aggregate payments of \$338.7 million to SpaceX, which were capitalized as construction in progress within property and equipment, net in the accompanying condensed consolidated balance sheet. In addition, the Company made a \$3.0 million refundable deposit to SpaceX in the first quarter of 2014 for the reservation of additional future launches, which is not included in the total contract price.

#### Kosmotras

In June 2011, the Company entered into an agreement with International Space Company Kosmotras (“Kosmotras”) as a supplemental launch service provider for Iridium NEXT (the “Kosmotras Agreement”). In June 2013, the Company exercised an option for one launch to carry two Iridium NEXT satellites. If the Company does not exercise any additional options, the total cost under the contract including this single launch will be \$51.8 million. As of September 30, 2016, the Company had made aggregate payments of \$36.8 million to Kosmotras, which were capitalized as construction in progress within property and equipment, net in the accompanying condensed consolidated balance sheet. In June 2015, the Company agreed with Kosmotras to replace the remaining options with a new set of options to purchase up to six dedicated launches. Kosmotras has to date been unable to obtain permission to launch the Company’s satellites, and the Company is exploring other options to launch additional satellites. The Company may also be unable to recover the amounts already paid to Kosmotras.

#### Credit Facility

In October 2010, the Company entered into a \$1.8 billion credit facility with a syndicate of bank lenders, which was amended and restated in May 2014 (as further amended to date, the “Credit Facility”). As of September 30, 2016, the Company reported \$1,546.8 million in borrowings from the credit facility in the accompanying condensed consolidated balance sheet, net of \$123.1 million of deferred financing costs, for an aggregate total of \$1,669.9 million in borrowings. The unused portion of the Credit Facility as of September 30, 2016 was \$130.1 million. Pursuant to the Credit Facility, the Company maintains a minimum cash reserve for debt repayment. As of September 30, 2016, the minimum required cash reserve balance was \$113.0 million, which is classified as restricted cash in the accompanying condensed consolidated balance sheet. The minimum cash reserve requirement will increase to \$189.0 million in 2017.

Interest costs incurred under the Credit Facility were \$19.8 million and \$57.0 million for the three and nine months ended September 30, 2016, respectively, and \$16.7 million and \$47.2 million for the three and nine months ended September 30, 2015, respectively. All interest costs incurred related to the Credit Facility have been capitalized during the construction period of the Iridium NEXT assets. The Company pays interest on a semi-annual basis in April and October through a combination of a cash payment and a deemed additional loan.

Nine Months Ended September 30, 2016		
	Deemed	
Cash	Loan	Total

Edgar Filing: Iridium Communications Inc. - Form 10-Q

	(in thousands)		
Beginning interest payable	\$3,720	\$8,514	\$12,234
Interest incurred	17,219	39,778	56,997
Interest payments	(10,985)	(25,136)	(36,121)
Ending interest payable	\$9,954	\$23,156	\$33,110

	Nine Months Ended September 30, 2015		
	Deemed		
	Cash	Loan	Total
	(in thousands)		
Beginning interest payable	\$2,936	\$6,653	\$9,589
Interest incurred	14,416	32,827	47,243
Interest payments	(8,911)	(20,282)	(29,193)
Ending interest payable	\$8,441	\$19,198	\$27,639

The Company is obligated to pay a cash commitment fee of 0.80% per year, in semi-annual installments, on any undrawn portion of the Credit Facility. In April 2016, the Company paid \$1.2 million as a semi-annual installment of the commitment fee. The commitment fee payable on the undrawn portion of the Credit Facility as of September 30, 2016 was \$0.7 million and is included in accrued expenses and other current liabilities in the accompanying condensed consolidated balance sheet.

#### Contingencies

From time to time, in the normal course of business, the Company is party to various pending claims and lawsuits. The Company is not aware of any such actions that it would expect to have a material adverse impact on its business, financial results or financial condition.

#### 5. Stock-Based Compensation

The Company accounts for stock-based compensation at fair value. The fair value of stock options is determined at the grant date using the Black-Scholes option pricing model. The fair value of restricted stock units (“RSUs”) is equal to the closing price of the underlying common stock on the grant date. The fair value of an award that is ultimately expected to vest is recognized on a straight-line basis over the requisite service or performance period and is classified in the condensed consolidated statements of operations and comprehensive income in a manner consistent with the classification of the recipient’s compensation. The expected vesting of the Company’s performance-based RSUs is based upon the likelihood that the Company achieves the defined performance goals. The level of achievement of performance goals, if any, is determined by the compensation committee of the Company’s Board of Directors. Stock-based awards to non-employee consultants are expensed at their fair value as services are provided according to the terms of their agreements and are classified in selling, general and administrative expenses in the accompanying condensed consolidated statements of operations and comprehensive income.

In May 2015, the Company’s stockholders approved the 2015 Equity Incentive Plan (the “2015 Plan”) to provide stock-based awards, including nonqualified stock options, incentive stock options, restricted stock and other equity securities, as incentives and rewards for employees, consultants and non-employee directors. Members of the Company’s board of directors received a portion of their annual compensation in the form of equity awards under the 2015 Plan. An aggregate amount of approximately 126,000 RSUs were granted in January 2016, which will vest in full on the first anniversary of the grant date. The estimated aggregate grant date fair value of the RSUs granted to the directors in January 2016 was \$1.0 million. In January 2015, an aggregate amount of approximately 103,000 stock options and 62,000 RSUs were granted to the board of directors, with 25% vesting on the last day of each calendar quarter in 2015. The estimated aggregate grant date fair value of the stock options and RSUs granted to the directors in January 2015 was \$0.4 million and \$0.6 million, respectively.

During the nine months ended September 30, 2016 and 2015, the Company granted approximately 249,000 and 742,000 stock options, respectively, to its employees, with an estimated aggregate grant date fair value of \$0.9 million and \$2.9 million, respectively. Additionally, during the nine months ended September 30, 2016 and 2015, the Company granted 573,000 and 596,000 service-based RSUs, respectively, to its employees, with an estimated aggregate grant date fair value of \$4.0 million and \$5.6 million, respectively. Employee stock options and service-based RSUs generally vest over a four-year service period, with 25% vesting on the first anniversary of the grant date and the remainder vesting ratably on a quarterly basis thereafter.

In March 2016, the Company awarded approximately 1,335,000 performance-based RSUs to the Company’s executives and employees (the “Bonus RSUs”). The Company records stock-based compensation expense related to performance-based RSUs when it is considered probable that the performance conditions will be met. Vesting of the

March 2016 Bonus RSUs is dependent upon the Company's achievement of defined performance goals for the 2016 fiscal year. Management believes it is probable that certain RSUs will vest. The level of achievement, if any, of performance goals will be determined by the compensation committee of the Company's Board of Directors and, if such goals are achieved, the March 2016 Bonus RSUs will vest, subject to continued employment, in March 2017. The estimated aggregate grant date fair value of the March 2016 Bonus RSUs was \$9.4 million.

Additionally, in March 2016 and March 2015, the Company awarded approximately 119,000 and 161,000 performance-based RSUs, respectively, to the Company's executives (the "March Performance RSUs"). Vesting of the 2016 and 2015 March Performance RSUs is dependent upon the Company's achievement of defined performance goals over a two-year period (fiscal years 2016 and 2017 for the March Performance RSUs granted in 2016 and fiscal years 2015 and 2016 for the March Performance RSUs granted in 2015). Management believes it is probable that certain RSUs will vest. The number of March Performance RSUs that will ultimately vest may range from 0% to 150% of the original grant based on the level of achievement of the performance goals. If the Company achieves the performance goals, 50% of the March Performance RSUs will vest in March of the second year after grant and the remaining 50% will vest in March of the third year after grant, in each case subject to the executive's continued service as of the vesting date. The estimated aggregate grant date fair value of the March Performance RSUs was \$0.8 million for the 2016 grants and \$1.5 million for the 2015 grants.

In June 2016 and June 2015, the Company granted approximately 35,000 RSUs and 30,000 stock options, respectively, to non-employee consultants. The RSUs and stock options are generally subject to service-based vesting. The RSUs vest 50% in June 2017 and quarterly thereafter through June 2018. The stock options vest quarterly through June 2017. The estimated aggregate grant date fair value of the RSUs granted to non-employee consultants in June 2016 was \$0.3 million. The fair value of the consultant options is the then-current fair value attributable to the vesting portions of the awards, calculated using the Black-Scholes option pricing model. The estimated aggregate grant date fair value of the stock options granted to non-employee consultants in June 2015 was \$0.2 million.

## 6. Equity Transactions and Instruments

### Preferred Stock

The Company is authorized to issue 2.0 million shares of preferred stock with a par value of \$0.0001 per share. As described below, the Company issued 1.0 million shares of preferred stock in the fourth quarter of 2012 and 0.5 million shares of preferred stock in the second quarter of 2014. The remaining 0.5 million authorized shares of preferred stock remain undesignated and unissued as of September 30, 2016.

### Series A Cumulative Perpetual Convertible Preferred Stock

In the fourth quarter of 2012, the Company issued 1.0 million shares of its 7.00% Series A Cumulative Perpetual Convertible Preferred Stock (the "Series A Preferred Stock") in a private offering. The Company received proceeds of \$96.5 million from the sale of the Series A Preferred Stock, net of the aggregate \$3.5 million in initial purchaser discount and offering costs. The net proceeds of this offering were used to partially fund the construction and deployment of Iridium NEXT and for other general corporate purposes.

Holders of Series A Preferred Stock are entitled to receive cumulative cash dividends at a rate of 7.00% per annum of the \$100 liquidation preference per share (equivalent to an annual rate of \$7.00 per share). Dividends are payable quarterly in arrears on each March 15, June 15, September 15 and December 15. The Series A Preferred Stock does not have a stated maturity date and is not subject to any sinking fund or mandatory redemption provisions. The Series A Preferred Stock ranks senior to the Company's common stock and pari passu with the Company's 6.75% Series B Cumulative Perpetual Convertible Preferred Stock (the "Series B Preferred Stock") with respect to dividend rights and rights upon the Company's liquidation, dissolution or winding-up. Holders of Series A Preferred Stock generally have no voting rights except for limited voting rights if the Company fails to pay dividends for six or more quarterly periods (whether or not consecutive) and in other specified circumstances. Holders of Series A Preferred Stock may convert some or all of their outstanding Series A Preferred Stock at an initial conversion rate of 10.6022 shares of common stock per \$100 liquidation preference, which is equivalent to an initial conversion price of approximately \$9.43 per share of common stock (subject to adjustment in certain events).

During each of the three and nine months ended September 30, 2016 and 2015, the Company paid cash dividends of \$1.8 million and \$5.3 million, respectively, to holders of the Series A Preferred Stock. As of September 30, 2016 and December 31, 2015, the Company had accrued \$0.3 million in cash dividends for the holders of the Series A Preferred Stock, which is included within accrued expenses and other current liabilities in the accompanying condensed consolidated balance sheets.

On or after October 3, 2017, the Company may, at its option, convert some or all of the Series A Preferred Stock into the number of shares of common stock that are issuable at the then-applicable conversion rate, subject to specified conditions. On or prior to October 3, 2017, the holders of Series A Preferred Stock will have a special right to convert some or all of the Series A Preferred Stock into shares of common stock in the event of fundamental changes described in the Certificate of Designations for the Series A Preferred Stock, subject to specified conditions and

limitations. In certain circumstances, the Company may also elect to settle conversions in cash as a result of these fundamental changes.

#### Series B Cumulative Perpetual Convertible Preferred Stock

In May 2014, the Company issued 500,000 shares of its Series B Preferred Stock in an underwritten public offering at a price to the public of \$250 per share. The purchase price received by the Company, equal to \$242.50 per share, reflected an underwriting discount of \$7.50 per share. The Company received proceeds of \$120.8 million from the sale of the Series B Preferred Stock, net of the \$3.8 million underwriter discount and \$0.4 million of offering costs. The net proceeds of this offering are being used to partially fund the construction and deployment of Iridium NEXT and for other general corporate purposes.

Holders of Series B Preferred Stock are entitled to receive cumulative cash dividends at a rate of 6.75% per annum of the \$250 liquidation preference per share (equivalent to an annual rate of \$16.875 per share). Dividends are payable quarterly in arrears on each March 15, June 15, September 15 and December 15. The Series B Preferred Stock does not have a stated maturity date and is not subject to any sinking fund or mandatory redemption provisions. The Series B Preferred Stock ranks senior to the Company's common stock and pari passu with respect to the Company's Series A Preferred Stock with respect to dividend rights and rights upon the Company's voluntary or involuntary liquidation, dissolution or winding-up. Holders of Series B Preferred Stock generally have no voting rights except for limited voting rights if the Company fails to pay dividends for six or more quarterly periods (whether or not

consecutive) and in other specified circumstances. Holders of Series B Preferred Stock may convert some or all of their outstanding Series B Preferred Stock at an initial conversion rate of 33.456 shares of common stock per \$250 liquidation preference, which is equivalent to an initial conversion price of approximately \$7.47 per share of common stock (subject to adjustment in certain events).

During each of the three and nine months ended September 30, 2016 and 2015, the Company paid cash dividends of \$2.1 million and \$6.3 million, respectively, to holders of the Series B Preferred Stock. As of September 30, 2016 and December 31, 2015, the Company had accrued \$0.4 million in cash dividends for the holders of the Series B Preferred Stock, which is included within accrued expenses and other current liabilities in the accompanying condensed consolidated balance sheet.

On or after May 15, 2019, the Company may, at its option, convert some or all of the Series B Preferred Stock into the number of shares of common stock that are issuable at the then-applicable conversion rate, subject to specified conditions. On or prior to May 15, 2019, in the event of certain specified fundamental changes, holders of the Series B Preferred Stock will have the right to convert some or all of their shares of Series B Preferred Stock into the greater of (i) a number of shares of the Company's common stock as subject to adjustment plus the make-whole premium, if any, and (ii) a number of shares of the Company's common stock equal to the lesser of (a) the liquidation preference divided by the market value of the Company's common stock on the effective date of such fundamental change and (b) 81.9672 (subject to adjustment). In certain circumstances, the Company may elect to cash settle any conversions in connection with a fundamental change.

## 7. Net Income Per Share

The Company calculates basic net income per share by dividing net income attributable to common stockholders by the weighted-average number of shares of common stock outstanding during the period. Diluted net income per share takes into account the effect of potential dilutive common shares when the effect is dilutive. The effect of potential dilutive common shares, including common stock issuable upon exercise of outstanding stock options, is computed using the treasury stock method. The effect of potential dilutive common shares from the conversion of outstanding convertible preferred securities is computed using the as-if converted method at the stated conversion rate. The RSUs granted to members of the Company's board of directors contain non-forfeitable rights to dividends and therefore are considered to be participating securities in periods of net income. The calculation of basic and diluted net income per share excludes net income attributable to the unvested RSUs from the numerator and excludes the impact of unvested RSUs from the denominator.

The computations of basic and diluted net income per share are as follows:

	Three Months Ended September 30,	
	2016	2015
	(in thousands, except per share data)	
<b>Numerator:</b>		
Net income attributable to common stockholders		
(numerator for basic net income per share)	\$ 27,696	\$ 25,688
Dividends on Series A Preferred Stock	1,750	1,750
Dividends on Series B Preferred Stock	2,109	2,109

Edgar Filing: Iridium Communications Inc. - Form 10-Q

Numerator for diluted net income per share	\$ 31,555	\$ 29,547
Denominator:		
Denominator for basic net income per share - weighted		
average outstanding common shares	96,067	95,317
Dilutive effect of stock options	293	31
Dilutive effect of contingently issuable shares	-	18
Dilutive effect of Series A Preferred Stock	10,602	10,602
Dilutive effect of Series B Preferred Stock	16,728	16,728
Denominator for diluted net income per share	123,690	122,696
Net income per share attributable to common		
stockholders - basic	\$ 0.29	\$ 0.27
Net income per share attributable to common		
stockholders - diluted	\$ 0.26	\$ 0.24

For the three months ended September 30, 2016, options to purchase 2.8 million shares of common stock were not included in the computation of diluted net income per share, as the effect would be anti-dilutive. For the three months ended September 30, 2015, 1.4

million unvested non-performance-based RSUs were excluded from the computation of basic net income per share and not included in the computation of diluted net income per share, as the effect would be anti-dilutive, and 1.7 million unvested performance-based RSUs were not included in the computation of basic and diluted net income per share, as certain performance criteria have not been satisfied.

For the three months ended September 30, 2015, options to purchase 4.9 million shares of common stock were not included in the computation of diluted net income per share, as the effect would be anti-dilutive. For the three months ended September 30, 2016, 1.4 million unvested non-performance based RSUs were excluded from the computation of basic net income per share and not included in the computation of diluted net income per share, as the effect would be anti-dilutive, and 0.4 million unvested performance-based RSUs were not included in the computation of basic and diluted net income per share, as certain performance criteria have not been satisfied.

	Nine Months Ended September 30,	
	2016	2015
	(in thousands, except per share data)	
Numerator:		
Net income attributable to common stockholders		
(numerator for basic net income per share)	\$ 75,352	\$ 64,977
Dividends on Series A Preferred Stock	5,250	5,250
Dividends on Series B Preferred Stock	6,327	6,327
Numerator for diluted net income per share	\$ 86,929	\$ 76,554
Denominator:		
Denominator for basic net income per share - weighted		
average outstanding common shares	95,890	94,972
Dilutive effect of stock options	188	316
Dilutive effect of contingently issuable shares	-	37
Dilutive effect of Series A Preferred Stock	10,602	10,602
Dilutive effect of Series B Preferred Stock	16,728	16,728
Denominator for diluted net income per share	123,408	122,655
Net income per share attributable to common		
stockholders - basic	\$ 0.79	\$ 0.68
Net income per share attributable to common		
stockholders - diluted	\$ 0.70	\$ 0.62

For the nine months ended September 30, 2016, options to purchase 4.0 million shares of common stock were not included in the computation of diluted net income per share, as the effect would be anti-dilutive. For the nine months ended September 30, 2015, 1.4 million unvested non-performance-based RSUs were excluded from the computation of basic net income per share and not included in the computation of diluted net income per share, as the effect would be anti-dilutive, and 1.5 million unvested performance-based RSUs were not included in the computation of basic and diluted net income per share, as certain performance criteria has not been satisfied.

For the nine months ended September 30, 2015, options to purchase 1.8 million shares of common stock were not included in the computation of diluted net income per share, as the effect would be anti-dilutive. For the nine months ended September 30, 2015, 1.4 million unvested non-performance-based RSUs were excluded from the computation of basic net income per share and not included in the computation of diluted net income per share, as the effect would be anti-dilutive, and 0.5 million unvested performance-based RSUs were not included in the computation of basic and diluted net income per share, as certain performance criteria have not been satisfied.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

You should read the following discussion along with our Annual Report on Form 10-K for the fiscal year ended December 31, 2015, filed on February 25, 2016 with the Securities and Exchange Commission, or the SEC, as well as our condensed consolidated financial statements included in this Form 10-Q.

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. For this purpose, any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Such forward-looking statements include those that express plans, anticipation, intent, contingencies, goals, targets or future development or otherwise are not statements of historical fact. Without limiting the foregoing, the words "believe," "anticipate," "plan," "expect," "intend" and similar expressions are intended to identify forward-looking statements. These forward-looking statements are based on our current expectations and projections about future events, and they are subject to risks and uncertainties, known and unknown, that could cause actual results and developments to differ materially from those expressed or implied in such statements. The important factors discussed under the caption "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015 filed on February 25, 2016, could cause actual results to differ materially from those indicated by forward-looking statements made herein. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

### Overview of Our Business

We are engaged primarily in providing mobile voice and data communications services using a constellation of orbiting satellites. We are the second largest provider of satellite-based mobile voice and data communications services based on revenue, and the only commercial provider of communications services offering true global coverage. Our satellite network provides communications services to regions of the world where wireless or wireline networks do not exist or are limited, including remote land areas, open oceans, airways, the polar regions, and regions where the telecommunications infrastructure has been affected by political conflicts or natural disasters.

We provide voice and data communications services to businesses, the U.S. and foreign governments, non-governmental organizations and consumers via our satellite network, which has an architecture of 66 in-orbit satellites with in-orbit spares and related ground infrastructure. We utilize an interlinked mesh architecture to route traffic across our satellite constellation using radio frequency crosslinks between satellites. This unique architecture minimizes the need for local ground facilities to support the constellation, which facilitates the global reach of our services and allows us to offer services in countries and regions where we have no physical presence.

We sell our products and services to commercial end-users through a wholesale distribution network, encompassing more than 80 service providers, more than 215 value-added resellers, or VARs, and more than 65 value-added manufacturers, or VAMs, which create and sell technology that uses the Iridium® network either directly to the end user or indirectly through other service providers, VARs or dealers. These distributors often integrate our products and services with other complementary hardware and software and have developed a broad suite of applications using our products and services to target specific lines of business. We expect that demand for our services will increase as more applications are developed and deployed that utilize our technology.

At September 30, 2016, we had approximately 838,000 billable subscribers worldwide, representing an increase of 7% from approximately 781,000 billable subscribers at September 30, 2015. We have a diverse customer base, with end users in the following lines of business: land-based handset; machine-to-machine, or M2M; maritime; aviation; and government.

We recognize revenue from both the sale of equipment and the provision of services. We expect a higher proportion of our future revenue will be derived from service revenue. Revenues from providing voice and data service historically have generated higher gross margins than sales of subscriber equipment.

Our new satellite constellation, Iridium NEXT, will maintain the architecture of our current constellation, with 66 in-orbit satellites, as well as in-orbit and ground spares. We have contracted with Thales Alenia Space France, or Thales, to construct the Iridium NEXT satellites, which are designed to be compatible with our current constellation and current end-user equipment, so that as the Iridium NEXT satellites are launched, they will replace satellites in the current constellation without affecting the service to our end users. We plan to deploy 70 satellites (66 operational and 4 in-orbit spares) on seven Falcon 9 rockets launched by Space Exploration Technologies Corporation, or SpaceX. In September 2016, SpaceX experienced an anomaly with one of its rockets and has suspended launches pending the completion of its investigation. We expect to begin launching Iridium NEXT satellites shortly after SpaceX concludes its investigation and announces a return to flight. Based on the length of historical anomaly reviews and the current planned schedule of contracted launches, we expect to complete the SpaceX launches in 2018. We have also contracted to deploy two satellites on a Dnepr rocket launched by International Space Company Kosmotras, or Kosmotras. However, Kosmotras has to date been unable to obtain permission to launch our satellites, and as a result we are exploring other options to launch additional satellites for in-orbit spares.

We estimate the costs associated with the design, build and launch of Iridium NEXT and related ground infrastructure upgrades through 2018 to be approximately \$3 billion. Our funding plan for these costs includes the substantial majority of the funds available under our \$1.8 billion credit facility, or the Credit Facility, together with cash on hand and internally generated cash flows, including contracted cash flows from hosted payloads and potential cash flows from Iridium PRIME<sup>SM</sup>.

The Iridium NEXT constellation will also host the Aireon<sup>SM</sup> system to provide a global air traffic surveillance service through a series of automatic dependent surveillance-broadcast, or ADS-B, receivers on the Iridium NEXT satellites. Aireon LLC, our joint venture with the air navigation service providers, or ANSPs, of Canada, Italy, Denmark and Ireland, has contracted to provide the Aireon service to a number of ANSPs, including our co-investors in Aireon and NATS (En Route) PLC, the ANSP of the United Kingdom. Aireon also plans to offer the service to other ANSPs worldwide including the U.S. Federal Aviation Administration, or FAA. Aireon will pay us a fee to host the ADS-B receivers on Iridium NEXT, as well as data services fees for the delivery of the air traffic surveillance data over the Iridium NEXT system. In addition, we have entered into an agreement with Harris Corporation, the manufacturer of the Aireon hosted payload, pursuant to which Harris pays us fees to allocate the remaining hosted payload capacity to its customers, and Harris has contracted to pay us data service fees on behalf of these customers.

## Recent Developments

### Iridium NEXT

As described above, we expect to begin launching Iridium NEXT shortly after SpaceX announces a return to flight. Ten Iridium NEXT satellites have been delivered to Vandenberg Air Force Base and mated to the SpaceX dispenser for the first launch; additional Iridium NEXT satellites are under various stages of construction at the assembly, integration and test facility; our ground infrastructure upgrades are complete, and our Satellite Network Operations Center is ready to support Iridium NEXT. All hardware components have been qualified for use in space and the platform software is nearly complete.

As a result of the delays in the Iridium NEXT launch schedule during the second and third quarters of 2016, we updated the estimated useful lives of the current satellites and extended the lives to be consistent with the expected deployment of Iridium NEXT. We will continue to evaluate the useful lives of our current satellites through the full deployment of Iridium NEXT as the satellites are placed into service.

The Credit Facility requires us to obtain insurance covering the launch and first 12 months of operation of the Iridium NEXT satellites. We have completed the placement of this insurance, which covers all seven contracted launches on SpaceX rockets and a launch on a Dnepr rocket by Kosmotras, as well as the first 12 months of operation of the Iridium NEXT satellites on such launches.

Our insurance program uses our spare satellites and a prepaid relaunch right with SpaceX to self-insure a portion of our launch and in-orbit risks, as permitted under the Credit Facility. While we believe this has enabled us to obtain insurance at a substantially lower cost than would have been possible without the spares and relaunch right, if we use our spares to replace lost satellites, we will likely choose to purchase additional satellites to maintain a backup supply of spares. The cost of such additional spares is not included in the \$3 billion estimated cost for the design, build and launch of Iridium NEXT and related infrastructure upgrades through 2018.

## Material Trends and Uncertainties

Our industry and customer base has historically grown as a result of:

- demand for remote and reliable mobile communications services;
- increased demand for communications services by disaster and relief agencies, and emergency first responders;

- a broad wholesale distribution network with access to diverse and geographically dispersed niche markets;
- a growing number of new products and services and related applications;
- improved data transmission speeds for mobile satellite service offerings;
- regulatory mandates requiring the use of mobile satellite services;
- a general reduction in prices of mobile satellite services and subscriber equipment; and
- geographic market expansion through the ability to offer our services in additional countries.

Nonetheless, we face a number of challenges and uncertainties in operating our business, including:

- our ability to develop and launch Iridium NEXT;
- our ability to develop new and innovative products and services for Iridium NEXT;
- our ability to access the Credit Facility to meet our future capital requirements for the manufacture and launch of the Iridium NEXT satellites;

16

---

our ability to generate sufficient internal cash flows, including contracted cash flows from hosted payloads and potential cash flows from Iridium PRIME, to fund a portion of the costs associated with Iridium NEXT and support ongoing business;

Aireon LLC's ability to successfully deploy and market its space-based ADS-B global aviation monitoring service to be carried as a hosted payload on the Iridium NEXT system;

Aireon's ability to raise sufficient funds to pay hosting fees to us;

our ability to maintain the health, capacity, control and level of service of our existing satellite network through the transition to Iridium NEXT;

changes in general economic, business and industry conditions, including the effects of currency exchange rates;

our reliance on a single primary commercial gateway and a primary satellite network operations center;

competition from other mobile satellite service providers and, to a lesser extent, from the expansion of terrestrial-based cellular phone systems and related pricing pressures;

market acceptance of our products;

regulatory requirements in existing and new geographic markets;

rapid and significant technological changes in the telecommunications industry;

reliance on our wholesale distribution network to market and sell our products, services and applications effectively;

reliance on single-source suppliers for the manufacture of most of our subscriber equipment and for some of the components required in the manufacture of our end-user subscriber equipment and our ability to purchase parts that are periodically subject to shortages resulting from surges in demand, natural disasters or other events; and

reliance on a few significant customers, particularly agencies of the U.S. government, for a substantial portion of our revenue, as a result of which the loss or decline in business with any of these customers may negatively impact our revenue, and risk of collectability of accounts receivable is more concentrated.

Edgar Filing: Iridium Communications Inc. - Form 10-Q

Comparison of Our Results of Operations for the Three Months Ended September 30, 2016 and 2015

(\$ in thousands)	Three Months Ended September 30,		Three Months Ended September 30,		Change

Commercial Service Revenue

	Three Months Ended						Change		
	September 30, 2016			September 30, 2015					
	(Revenue in millions and subscribers in thousands)								
	Billable		ARPU	Billable		ARPU	Billable		ARPU
Revenue	Subscribers	(1) (2)	Revenue	Subscribers	(1) (2)	Revenue	Subscribers	ARPU	
Commercial voice and data	\$48.0	358	\$ 44	\$47.2	360	\$ 43	(2)	\$ 1	
Commercial M2M data	17.3	398	15	16.0	352	15	46	-	
Total Commercial	\$65.3	756		\$63.2	712	\$2.1	44		

- (1) Billable subscriber numbers shown are at the end of the respective period.
- (2) Average monthly revenue per unit, or ARPU, is calculated by dividing revenue in the respective period by the average of the number of billable subscribers at the beginning of the period and the number of billable subscribers at the end of the period and then dividing the result by the number of months in the period. ARPU excludes revenue from our non-subscriber satellite, timing, and location service that was launched in the second quarter of 2016.

For the three months ended September 30, 2016, commercial voice and data revenue increased slightly primarily due to increases in Iridium push-to-talk, or PTT, services and Iridium OpenPort® services, as well as a \$0.9 million one-time benefit from the recognition of revenue associated with unused minutes on an expiring contract. These increases were partially offset by continued declines in telephony airtime usage.

For the three months ended September 30, 2016, commercial M2M data revenue increased primarily due to a 13% increase in commercial M2M data billable subscribers.

We anticipate continued growth in billable commercial subscribers for the remainder of 2016.

## Government Service Revenue

	Three Months Ended					
	September 30, 2016		September 30, 2015		Change	
	(Revenue in millions and subscribers in thousands)					
	Billable	Subscribers <sup>(1)</sup>	Billable	Subscribers <sup>(1)</sup>	Revenue	Subscribers
Government service revenue	\$22.0	82	\$18.0	69	\$4.0	13

(1) Billable subscriber numbers shown are at the end of the respective period.

Government service revenues for the three months ended September 30, 2016 increased to \$22.0 million from \$18.0 million in the prior year period as a result of a contractual price increase under the Enhanced Mobile Satellite Services, or EMSS, contract with the U.S. government's Defense Information Systems Agency. Under this contract, revenue is a fixed monthly amount and is not based on subscribers or usage, allowing an unlimited number of users access to existing services. As we continue to innovate and better meet the needs of our customers, additional services not contemplated under the current EMSS contract may be provided in future periods at an amount mutually agreed upon by both parties.

## Subscriber Equipment Revenue

Subscriber equipment revenue decreased \$1.3 million, or 6%, for the three months ended September 30, 2016 compared to the prior year period. The decrease was primarily due to lower handset unit sales partially offset by increased Iridium M2M device unit sales.

## Engineering and Support Service Revenue

	Three Months Ended		
	September		
	30, 2016	30, 2015	Change
	(In millions)		
Government	\$4.9	\$3.6	\$1.3
Commercial	0.7	0.1	0.6
Total	\$5.6	\$3.7	\$1.9

Engineering and support service revenue increased by \$1.9 million, or 51%, for the three months ended September 30, 2016 compared to the prior year period primarily as a result of multiple U.S. Department of Defense, or DoD, contracts entered into in late 2015 to adapt the Iridium Extreme® handset for DoD use and continue the gateway modernization efforts.

## Operating Expenses

## Cost of Services (exclusive of depreciation and amortization)

Cost of services (exclusive of depreciation and amortization) includes the cost of network engineering and operations staff, including contractors, software maintenance, product support services and cost of services for government and

commercial engineering and support service revenue.

Cost of services (exclusive of depreciation and amortization) increased \$1.9 million, or 14%, for the three months ended September 30, 2016 from the prior year period, primarily due to an increase in scope of work for government sponsored contracts and related costs.

#### Cost of Subscriber Equipment

Cost of subscriber equipment includes the direct costs of equipment sold, which consist of manufacturing costs, allocation of overhead, and warranty costs.

Cost of subscriber equipment decreased by \$0.1 million, or 1%, for the three months ended September 30, 2016 compared to the prior year period. This decrease is primarily due to a lower volume of handset sales, typically our higher margin product, offset by higher volumes of M2M device sales.

#### Research and Development

Research and development expenses increased by \$1.6 million, or 45%, for the three months ended September 30, 2016 compared to the prior year period due to increased spend on Iridium NEXT projects.

### Selling, General and Administrative

Selling, general and administrative expenses that are not directly attributable to the sale of services or products include sales and marketing costs as well as employee-related expenses (such as salaries, wages, and benefits), legal, finance, information technology, facilities, billing and customer care expenses.

Selling, general and administrative expenses increased by \$1.2 million, or 7%, for the three months ended September 30, 2016 compared to the prior year period, primarily due to increases in employee-related expenses and professional fees, partially offset by the completion of our supplier transition effort in 2015 and a decrease in non-income taxes.

### Depreciation and Amortization

Depreciation and amortization expense decreased by \$1.1 million, or 9%, for the three months ended September 30, 2016 compared to the prior year period, primarily due to continued changes in the estimated useful lives of the satellites within our current constellation. We updated our analysis of the current satellites' remaining useful lives in the third quarter of 2016. We will continue to evaluate the useful lives of our current satellites through the full deployment of Iridium NEXT as the satellites are placed into service.

### Other Income (Expense)

#### Undrawn Credit Facility Fees

Commitment fees on the undrawn portion of the Credit Facility were \$0.3 million for the three months ended September 30, 2016 compared to \$0.8 million for the prior year period. The decrease of the commitment fee is directly related to the increase in the amounts borrowed under the Credit Facility as we continue to finance the development of Iridium NEXT.

#### Provision for Income Taxes

For the three months ended September 30, 2016, our income tax provision was \$18.6 million, compared to \$16.4 million for the prior year period. The increase in the income tax provision is primarily related to an increase in our income before taxes and higher state income taxes compared to the prior period. The increase in state taxes was primarily related to Arizona tax law change that resulted in a greater benefit in the prior period compared to the current period. If our current estimates change in future periods, the impact on the deferred tax assets and liabilities may change correspondingly.

### Net Income

Net income was \$31.6 million for the three months ended September 30, 2016, an increase of \$2.0 million from the prior year period. This increase in net income was driven by a \$6.8 million increase in total revenue, which was primarily the result of the \$4.0 million revenue increase from the EMSS contract, as well as a \$0.5 million decrease in undrawn credit facility fees. These increases in income were partially offset by the \$3.5 million increase in total operating expenses, as well as the \$2.3 million increase in the provision for income taxes.

Total Commercial	\$184.6	756		\$180.6	712		\$4.0	44	

(1) Billable subscriber numbers shown are at the end of the respective period.

(2) Average monthly revenue per unit, or ARPU, is calculated by dividing revenue in the respective period by the average of the number of billable subscribers at the beginning of the period and the number of billable subscribers at the end of the period and then dividing the result by the number of months in the period. ARPU excludes

revenue from our non-subscriber satellite, timing, and location service that was launched in the second quarter of 2016.

For the nine months ended September 30, 2016, commercial voice and data revenue increased slightly primarily due to increases in revenue from Iridium PTT services, Iridium OpenPort services and other services, as well as a \$0.9 million one-time benefit from the recognition of revenue associated with unused minutes on an expiring contract. These increases were partially offset by continued declines in telephony airtime usage.

For the nine months ended September 30, 2016, commercial M2M data revenue increased primarily due to a 13% increase in commercial M2M data billable subscribers.

We anticipate continued growth in billable commercial subscribers for the remainder of 2016.

## Government Service Revenue

	Nine Months Ended					
	September 30, 2016		September 30, 2015		Change	
	(Revenue in millions and subscribers in thousands)					
	Billable		Billable		Billable	
	Revenue	Subscribers <sup>(1)</sup>	Revenue	Subscribers <sup>(1)</sup>	Revenue	Subscribers
Government service revenue	\$66.0	82	\$54.0	69	\$12.0	13

(1) Billable subscriber numbers shown are at the end of the respective period.

Government service revenues for the nine months ended September 30, 2016 increased \$12.0 million as a result of a contractual price increase under the EMSS contract as described above.

## Subscriber Equipment Revenue

Subscriber equipment revenue increased \$1.3 million, or 2%, for the nine months ended September 30, 2016 compared to the prior year period. The increase was primarily due to higher unit sales of our Iridium Pilot® terminals and Iridium M2M devices, partially offset by fewer sales of our handsets and L-Band transceivers.

## Engineering and Support Service Revenue

	Nine Months Ended		
	September 30,		Change
	2016	September 30, 2015	
	(In millions)		
Government	\$15.9	\$ 13.1	\$ 2.8
Commercial	1.8	0.7	1.1
Total	\$17.7	\$ 13.8	\$ 3.9

Engineering and support service revenue increased by \$3.9 million, or 28%, for the nine months ended September 30, 2016 compared to the prior year period primarily as a result of multiple DoD contracts entered into in late 2015 to adapt the Iridium Extreme® handset for DoD use and continue the gateway modernization efforts.

## Operating Expenses

### Cost of Services (exclusive of depreciation and amortization)

Cost of services (exclusive of depreciation and amortization) increased \$5.1 million, or 12%, for the nine months ended September 30, 2016 from the prior year period, primarily due to an increase in scope of work for government sponsored contracts and related costs.

### Cost of Subscriber Equipment

Cost of subscriber equipment increased by \$2.3 million, or 7%, for the nine months ended September 30, 2016 compared to the prior year period. This increase is primarily due to a decline in the warranty provision for our Iridium OpenPort terminal during the nine months ended September 30, 2015 that did not recur in the nine months ended September 30, 2016. The remaining cost difference is related to a higher volume of Iridium Pilot terminal sales and M2M device sales, partially offset by decreased sales of handsets and L-Band transceivers. Additionally, our related costs decreased due to improved manufacturing costs on certain products.

### Research and Development

Research and development expenses decreased by \$0.4 million, or 3%, for the nine months ended September 30, 2016 compared to the prior year period due to decreased spend on M2M device product development.

### Selling, General and Administrative

Selling, general and administrative expenses increased by \$3.3 million, or 6%, for the nine months ended September 30, 2016 compared to the prior year period, primarily due to increases in employee-related expenses and professional fees, partially offset by the completion of our supplier transition effort in 2015 and a decrease in non-income taxes.

## Depreciation and Amortization

Depreciation and amortization expense decreased by \$1.5 million, or 4%, for the nine months ended September 30, 2016 compared to the prior year period, primarily due to continued changes in the estimated useful lives of the satellites within our current constellation, partially offset by the addition of new assets and the impairment charges that we recorded during the second quarter of 2016 as a result of two satellites having ceased operations. We updated our analysis of the current satellites' remaining useful lives in both the second and the third quarters of 2016. We will continue to evaluate the useful lives of our current satellites through the full deployment of Iridium NEXT as the satellites are placed into service.

## Other Income (Expense)

### Undrawn Credit Facility Fees

Commitment fees on the undrawn portion of the Credit Facility were \$1.2 million for the nine months ended September 30, 2016 compared to \$2.6 million for the prior year period. The decrease of the commitment fee is directly related to the increase in the amounts borrowed under the Credit Facility as we continue to finance the development of Iridium NEXT.

### Provision for Income Taxes

For the nine months ended September 30, 2016, our income tax provision was \$49.3 million, compared to \$45.4 million for the prior year period. The change in the income tax provision is primarily related to an increase in our income before income taxes and higher state income taxes compared to the prior period. The increase in state taxes is primarily related to Arizona tax law change that resulted in a greater benefit in the prior period compared to the current period. If our current estimates change in future periods, the impact on the deferred tax assets and liabilities may change correspondingly.

## Net Income

Net income was \$86.9 million for the nine months ended September 30, 2016, an increase of \$10.4 million from the prior year period. This increase in net income was driven by a \$21.2 million increase in total revenue, which was primarily related to the \$12.0 million revenue increase from the EMSS contract, as well as a \$1.4 million decrease in undrawn credit facility fees. These increases in income were partially offset by an increase of \$8.8 million in total operating expenses and a \$3.9 million increase in the provision for income taxes.

## Liquidity and Capital Resources

As of September 30, 2016, our total cash and cash equivalents balance was \$374.0 million, and our marketable securities balance was \$52.4 million. Our principal sources of liquidity are cash, cash equivalents and marketable securities, internally generated cash flows, and the Credit Facility. Our principal liquidity requirements are to meet capital expenditure needs, principally the design, build and launch of Iridium NEXT, as well as for working capital, interest payments on the Credit Facility, and dividend payments on our Series A Preferred Stock and Series B Preferred Stock.

We estimate the aggregate costs associated with the design, build and launch of Iridium NEXT and related infrastructure upgrades through 2018 to be approximately \$3 billion. Our funding plan for these costs includes the substantial majority of the funds available under the Credit Facility, together with cash and marketable securities on hand, and internally generated cash flows, including contracted cash flows from hosted payloads and potential cash flows from Iridium PRIME.

While the contracted cash flows from our primary hosted payload customer, Aireon, are interest-bearing if not paid on time, we expect those hosted payload payments will continue to be delayed. Aireon is working to secure contracts with ANSPs, including the FAA, for the sale of Aireon's space-based ADS-B services. Aireon is currently seeking to raise the capital it will need to fund its continued operations and our hosted payload payments. Its ability to fund our hosted payload payments in the previously anticipated timeframe has been adversely affected by delays in its sales efforts to these ANSPs, which we believe in part results from delays in the launch of the Iridium NEXT system. If Aireon is unable to begin making its hosting payments to us in 2017, we will need to adjust our funding plan. As previously reported, in anticipation of potential delays in receipt of the Aireon hosting payments, we entered into discussions with our Credit Facility lenders to delay or reduce our payment obligations to fund the cash reserve account for debt repayment, or DSRA. We are also in discussions with Thales to delay some of the construction milestone payments that we otherwise anticipate making in 2017 under our full scale development contract, or FSD, with Thales. We may also consider, or be required to adopt in connection with concessions from our lenders, other cash preservation measures, such as temporary suspension of dividend payments on our Series A Preferred Stock and Series B Preferred Stock, but we do not expect to issue additional equity in connection with any such arrangement. If we are successful in these negotiations, we expect that these adjustments to our funding plan, including the cash preservation measures, would allow us to avoid any liquidity shortfall through at least 2017.

We currently use the Credit Facility to pay 85% of each invoice we receive from Thales under our contract for the development and construction of our Iridium NEXT satellites, with the remaining 15% funded from cash, cash equivalents and marketable securities on hand. We also utilize the Credit Facility to fund the COFACE insurance premiums and a portion of the interest under the Credit Facility. Once the Credit Facility is fully drawn, which we expect to occur in early 2017, we expect to pay 100% of each invoice we receive from Thales and all interest on the Credit Facility from cash, cash equivalents and marketable securities on hand, and internally generated cash flows, including contracted cash flows from hosted payloads and potential cash flows from Iridium PRIME.

The Credit Facility contains borrowing restrictions, including financial performance covenants and covenants relating to hosted payloads, and there can be no assurance that we will be able to continue to borrow funds under the Credit Facility. There can also be no assurance that our internally generated cash flows, including those from Iridium PRIME and hosted payloads on our Iridium NEXT satellites, will meet our current expectations. If we do not generate sufficient cash flows, or if the cost of implementing Iridium NEXT or the other elements of our business plan are higher than anticipated, we may need further external funding. Our ability to obtain additional funding may be adversely affected by a number of factors, including global economic conditions, and such funding may not be available on reasonable terms or at all. If we are not able to secure such funding in a timely manner, our ability to maintain our network, to design, build and launch Iridium NEXT and related ground infrastructure, products and services, and to pursue additional growth opportunities will be impaired, and we would likely need to delay some elements of our Iridium NEXT development. Our liquidity and our ability to fund our liquidity requirements also

depend on our future financial performance, which is subject to general economic, financial, regulatory and other factors that are beyond our control.

Holders of Series A Preferred Stock and Series B Preferred Stock are entitled to receive cumulative cash dividends at an annual rate of \$7.00 and \$16.875 per share, respectively. Dividends are payable quarterly in arrears on each March 15, June 15, September 15 and December 15. For each full quarter that the Series A Preferred Stock or Series B Preferred Stock, as applicable, is outstanding, and assuming that no shares have been converted into common stock, we are required to pay cash dividends of \$1.75 million and \$2.1 million, respectively, per quarter. We expect that we will satisfy dividend requirements, if and when declared, from internally generated cash flows.

As of September 30, 2016, we reported \$1,546.8 million in borrowings under the Credit Facility in our condensed consolidated balance sheet, net of \$123.1 million of deferred financing costs, for an aggregate balance of \$1,669.9 million outstanding under the Credit Facility. The unused portion of the Credit Facility as of September 30, 2016 was \$130.1 million. Pursuant to the Credit Facility, we maintain the DSRA. As of September 30, 2016, the DSRA balance was \$113.0 million, which is classified as restricted cash in our condensed consolidated balance sheet. The DSRA requirement will increase to \$189.0 million in 2017. In addition to the minimum debt service levels, financial covenants under the Credit Facility, as amended to date, include:

an available cash balance of at least \$25 million;

24

---

a debt-to-equity ratio, which is calculated as the ratio of total net debt to the aggregate of total net debt and total stockholders' equity, of no more than 0.7 to 1, measured each June 30 and December 31;  
 specified maximum levels of annual capital expenditures (excluding expenditures on the construction of Iridium NEXT satellites) through the year ending December 31, 2024;  
 specified minimum levels of consolidated operational earnings before interest, taxes, depreciation and amortization, or operational EBITDA, for the 12-month periods ending each December 31 and June 30 through December 31, 2017;  
 specified minimum cumulative cash flow requirements from customers who have hosted payloads on our satellites, measured each December 31 and June 30, from June 30, 2016 through December 31, 2017;  
 a debt service coverage ratio, measured during the repayment period, of not less than 1 to 1.5; and  
 specified maximum leverage levels during the repayment period that decline from a ratio of 4.73 to 1 for the twelve months ending June 30, 2018 to a ratio of 2.36 to 1 for the twelve months ending December 31, 2024.

Our available cash balance, as defined by the Credit Facility, was \$391.7 million as of September 30, 2016. Our debt-to-equity ratio was 0.5 to 1 as of June 30, 2016, the last point at which it was required to be measured. We were also in compliance with the operational EBITDA and hosted payload cash flow covenants set forth above as of June 30, 2016, the last point at which they were required to be measured, and with the capital expenditure covenant as of December 31, 2015, the last point at which it was required to be measured.

The covenants regarding capital expenditures, operational EBITDA and hosted payload cash flows are calculated in connection with a measurement, which we refer to as available cure amount, that is derived using a complex calculation based on overall cash flows, as adjusted by numerous measures specified in the Credit Facility. In a period in which our capital expenditures exceed, or our operational EBITDA or hosted payload cash flows fall short of, the amount specified in the respective covenant, we would be permitted to allocate available cure amount, if any, to prevent a breach of the applicable covenant. As of June 30, 2016, the last point at which it was measured, we had no available cure amount, although it was not necessary for us to apply any available cure amount to maintain compliance with the covenants. The available cure amount has fluctuated significantly from one measurement period to the next, and we expect that it will continue to do so.

The covenants also place limitations on our ability and that of our subsidiaries to carry out mergers and acquisitions, dispose of assets, grant security interests, declare, make or pay dividends, enter into transactions with affiliates, fund payments under the FSD with Thales from our own resources, incur additional indebtedness, or make loans, guarantees or indemnities. If we are not in compliance with the financial covenants under the Credit Facility, after any opportunity to cure such non-compliance, or we otherwise experience an event of default under the Credit Facility, the lenders may require repayment in full of all principal and interest outstanding under the Credit Facility. It is unlikely we would have adequate funds to repay such amounts prior to the scheduled maturity of the Credit Facility. If we fail to repay such amounts, the lenders may foreclose on the assets we have pledged under the Credit Facility, which include substantially all of our assets and those of our domestic subsidiaries.

We believe that our liquidity sources will provide sufficient funds for us to meet our liquidity requirements for at least the next 12 months, provided we receive the contractual hosting payment from Aireon or are successful in adjusting our funding plan, as discussed above.

#### Cash Flows

The following table summarizes our cash flows:

Nine Months Ended			Change
2016	2015		
September 30,			
(in thousands)			

Edgar Filing: Iridium Communications Inc. - Form 10-Q

Cash provided by operating activities	\$ 164,559	\$ 162,938	\$ 1,621
Cash used in investing activities	\$(81,366 )	\$(213,331 )	\$ 131,965
Cash provided by financing activities	\$ 104,660	\$ 130,688	\$(26,028 )

Cash Flows from Operating Activities

Net cash provided by operating activities for the nine months ended September 30, 2016 increased \$1.6 million from the prior year period principally due to changes in working capital requirements compared to the prior period.

25

---

### Cash Flows from Investing Activities

Net cash used in investing activities for the nine months ended September 30, 2016 decreased by \$132.0 million compared to the prior year period primarily due to an \$112.0 million increase in net sales of marketable securities and a \$20.0 million decrease in capital expenditures primarily related to Iridium NEXT.

### Cash Flows from Financing Activities

Net cash provided by financing activities for the nine months ended September 30, 2016 decreased by \$26.0 million from the prior year period primarily due to the increase in restricted cash deposits to support the credit facility covenant.

### Off-Balance Sheet Arrangements

We do not currently have any off-balance sheet arrangements, as such term is defined in Item 303(a)(4)(ii) of the SEC's Regulation S-K, that have or are reasonably likely to have a material current or future effect on our financial condition, results of operations, liquidity or capital resources.

### Seasonality

Our results of operations have been subject to seasonal usage changes for commercial customers, and we expect that our results will be affected by similar seasonality effects in the future. March through October are typically the peak months for commercial voice services revenue and related subscriber equipment sales. Commercial M2M revenue has been less subject to seasonal usage changes, and revenue from our fixed-price U.S. government contract is not subject to seasonal fluctuations.

### Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States, or U.S. GAAP. The preparation of these financial statements requires the use of estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to revenue recognition, collectability of accounts receivable, useful lives of property and equipment, long-lived assets and other intangible assets, inventory, internally developed software, deferred financing costs, asset retirement obligations, income taxes, stock-based compensation, warranty expenses, loss contingencies, and other estimates. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. During the three months ended September 30, 2016, there were no material changes to our critical accounting policies and use of estimates.

### Recent Accounting Pronouncements

Refer to Note 2 to our condensed consolidated financial statements for a full description of recent accounting pronouncements and recently adopted pronouncements.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Interest income earned on our cash, cash equivalents and marketable securities balances is subject to interest rate fluctuations. For the three months ended September 30, 2016, a one-half percentage point increase or decrease in interest rates would not have had a material effect on our interest income.

We had borrowed an aggregate \$1,669.9 million under the Credit Facility as of September 30, 2016. A portion of the draws we make under the Credit Facility bear interest at a floating rate equal to the London Interbank Offered Rate, or LIBOR, plus 1.95% and will, accordingly, subject us to interest rate fluctuations in future periods. Had the currently outstanding borrowings under the Credit Facility been outstanding throughout the three months ended September 30, 2016, a one-half percentage point increase or decrease in the LIBOR would have changed our interest cost by approximately \$0.3 million for the three months ended September 30, 2016.

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, marketable securities, accounts receivable and accounts payable. At times we maintain cash and cash equivalent deposit balances in excess of Federal Deposit Insurance Corporation limits, and we may have marketable securities balances in excess of Securities Investment Protection Corporation limits. However, we maintain our cash, cash equivalents and marketable securities with financial institutions with high credit ratings. The majority of our cash is swept nightly into funds that invest in or are collateralized by U.S. government-backed securities. We invest in marketable securities consisting of U.S. treasury notes, fixed income debt instruments and commercial paper debt instruments with fixed interest rates and maturity dates within three years of original purchase. Due to the credit quality and nature of these debt instruments, we do not believe there has been a significant change in our market risk exposure since December 31, 2015. Accounts receivable are due from both domestic and international customers. We perform credit evaluations of our customers' financial condition and record reserves to provide for estimated credit losses. Accounts payable are owed to both domestic and international vendors.

We also currently hold marketable securities consisting of commercial paper and fixed-income debt securities. As of September 30, 2016, a 100 basis point change in interest rates would not have had a material impact on the fair value of our marketable securities.

### ITEM 4. CONTROLS AND PROCEDURES.

#### Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our chief executive officer, who is our principal executive officer, and our chief financial officer, who is our principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act, as of the end of the period covered by this report. In evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs. In addition, the design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Because of the inherent limitations in a control system, misstatements due to error or fraud may occur and not be detected.

Based on this evaluation, our chief executive officer and our chief financial officer concluded that our disclosure controls and procedures were effective, as of the end of the period covered by this report, to provide reasonable assurance that information required to be disclosed by us in reports we file or submit under the Exchange Act is

recorded, processed, summarized and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms, and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosures.

#### Changes in Internal Control Over Financial Reporting

During the quarter ended September 30, 2016, there were no changes in our internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II.

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

None.

ITEM 1A. RISK FACTORS.

Our business is subject to risks and events that, if they occur, could adversely affect our financial condition and results of operations and the trading price of our securities. In addition to the other information set forth in this quarterly report on Form 10-Q, you should carefully consider the factors discussed in “Part I, Item 1A. Risk Factors” of our Annual Report on Form 10-K for the fiscal year ended December 31, 2015, filed with the Securities and Exchange Commission on February 25, 2016. There have been no material changes from the risk factors described in the annual report.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

ITEM 5. OTHER INFORMATION.

None.

ITEM 6. EXHIBITS.  
See the exhibit index.
