Cautionary Statement Regarding Forward Looking Information

This Form 10-K includes statements pertaining to anticipated financial performance, business endeavors, product development, and other similar matters. These statements, which may include words such as "may," "likely," "projected," "expect," "anticipate," "believe," "intend," and other like expressions, constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995. A variety of factors could cause actual results and experiences to differ materially from the anticipated results or other expectations expressed in forward-looking statements. The risks and uncertainties that may affect the operations, performance, and results of business include, but are not limited to, the following:

Difficult conditions globally and in the U.S. economy may materially and adversely affect our business and results of operations.

Our investment portfolio is subject to several risks which may lessen the value of our invested assets and the amounts credited to policyholders.

The determination of valuation and impairments of fixed income securities include estimations and assumptions that are subjective and prone to differing interpretations and could materially impact our results of operations or financial condition.

Changing interest rates and credit spreads, market volatility and general economic conditions affect the risks and the returns on both our investment portfolio and our products.

We are subject to incurring difficulties in marketing and distributing our products through our current and future distribution channels.

We are subject to a downgrade in our financial strength ratings which may negatively affect our ability to attract and retain independent distributors, make our products less attractive to consumers, and may have an adverse effect on our operations.

We are subject to competition from new sources as well as companies having substantially greater financial resources, higher ratings, and more expansive product offerings which could have an adverse impact upon our business levels and profitability.

We are subject to regulation, changes to existing laws, and investigations which may affect our profitability or means of operation.

Changes in accounting standards issued by standard-setting bodies may adversely affect our financial statements and affect the management of business operations.

We may be subject to unfavorable judicial developments, including the time and expense of litigation, which potentially could affect our financial position and results of operations.

We could be liable with respect to liabilities ceded to reinsurers if the reinsurers fail to meet the obligations assumed by them.

We are subject to policy claims experience which can fluctuate from period to period and vary from past results or expectations.

We are subject to assumption inaccuracies regarding future mortality, persistency, and interest rates used in determining deferred policy acquisition costs which may require us to accelerate our amortization.

Occurrence of natural or man-made disasters and catastrophes could adversely affect our ability to conduct business operations and the financial condition and results of operations.

Our enterprise risk management practices and procedures may prove to be ineffective exposing us to unidentified or unanticipated risks.

We are dependent upon effective information technology systems and the development and implementation of new technologies.

The Company could be adversely affected by changes to tax law or interpretations of existing tax law which could reduce the demand for certain insurance products.

The Company may be required to establish a valuation allowance against its deferred tax assets which could materially affect the Company's results of operations and financial condition.

Competition for employees is intense and the Company may not be able to attract and retain highly skilled people needed to support its business.

See Part 1A, Risk Factors, for additional information.

PART I

ITEM 1. BUSINESS

General

National Western Life Insurance Company (hereinafter referred to as "National Western" or "company" where insurance operations are being discussed) is a stock life insurance company, chartered in the State of Colorado in 1956, and doing business in forty-nine states, the District of Columbia, and four U.S. territories or possessions. National Western is also licensed in Haiti, and although not otherwise licensed, accepts applications from and issues policies to residents of various international countries. Such policies are underwritten, accepted, and issued in the United States based upon applications submitted by independent contractors. National Western provides life insurance products for the savings and protection needs of approximately 123,000 policyholders and for the asset accumulation and retirement needs of 137,900 annuity contract holders.

On October 1, 2015, National Western completed its previously announced holding company reorganization pursuant to the Agreement and Plan of Merger, dated April 6, 2015, which was approved by the shareholders of National Western at its Annual Meeting of Shareholders held on June 19, 2015. As a result of the reorganization, National Western became a wholly owned subsidiary of National Western Life Group, Inc. (hereinafter referred to as "NWLGI", "Company", or "Registrant"), a Delaware Corporation, and NWLGI replaced National Western as the publicly held company. Consequently, all filings with the Securities and Exchange Commission ("SEC") from October 2, 2015 and forward will be filed by NWLGI under CIK No. 0001635984. For purposes of filing this Form 10-K, the accompanying consolidated financial statements and notes thereto have been titled "National Western Life Group, Inc." to reflect the current name of the public registrant with the parenthetical notation "formerly National Western Life Insurance Company and Subsidiaries" to reflect the reporting entity for the periods covered herein.

The Company's total assets increased to \$11.6 billion at December 31, 2015, from \$11.4 billion at December 31, 2014. The Company generated revenues of \$589.8 million, \$708.8 million and \$860.3 million in 2015, 2014 and 2013, respectively. In addition, NWLGI generated net income of \$98.4 million, \$105.6 million and \$96.2 million in 2015, 2014 and 2013, respectively.

Products

National Western offers a broad portfolio of individual whole life, universal life and term insurance plans, and annuities, including supplementary riders. In the following discussion, the Company reports sales and other statistical information. These statistics are derived from various sales tracking and administrative systems and are not derived from the Company's financial reporting systems or financial statements. These statistics are used to measure the relative progress of our marketing and acquisition efforts. Sales data for traditional life insurance is based upon annualized premiums, while universal life sales are based on annualized "target" premiums which are those premiums upon which full first year commissions are paid. Sales of annuities are measured based on the amount of deposits received. These statistics attempt to measure only some of the many factors that may affect future profitability, and therefore, are not intended to be predictive of future profitability.

Life Products. The company's life products provide protection for the life of the insured and, in some cases, allow for cash value accumulation on a tax-deferred basis. These product offerings include universal life insurance ("UL"), interest-sensitive whole life, and traditional products such as term insurance coverage. Interest sensitive products such as UL accept premiums that are applied to an account value. Deducted from the account value are costs of insurance

charges which vary by age, gender, plan, and class of insurance, as well as various expense charges. Interest is credited to account values at a fixed interest rate generally determined in advance and guaranteed for a policy year at a time, subject to minimum guaranteed rates specified in the policy contract. A slight variation to this general interest crediting practice involves equity-index universal life ("EIUL") policies whose credited interest may be linked in part to an outside index such as the S&P 500[®] Composite Stock Price Index ("S&P 500 Index[®]") at the election of the policyholder. These products offer both flexible and fixed premium modes and provide policyholders with flexibility in the available coverage, the timing and amount of premium payments and the amount of the death benefit, provided there are sufficient policy funds to cover all policy charges for the coming year. Traditional products generally provide for a fixed death benefit payable in exchange for regular premium payments.

Table of Contents

Annuity Products. Annuity products sold include flexible premium and single premium deferred annuities, equity-index (fixed-index) annuities, and single premium immediate annuities. These products can be tax qualified or nonqualified annuities. A fixed single premium deferred annuity ("SPDA") provides for a single premium payment at the time of issue, an accumulation period, and an annuity payout period commencing at some future date. A flexible premium deferred annuity ("FPDA") provides the same features but allows, generally with some conditions, additional payments into the contract. Interest is credited to the account value of the annuity initially at a current rate of interest which is guaranteed for a period of time, typically the first year. After this period, the interest credited is subject to change based upon market rates and product profitability subject to a minimum guaranteed rate specified in the contract. Interest accrues during the accumulation period generally on a tax-deferred basis to the contract holder. After a number of years specified in the annuity contract, the owner may elect to have the proceeds paid as a single payment or as a series of payments over a period of time. The owner is permitted at any time during the accumulation period to withdraw all or part of the annuity account balance subject to contract provisions such as surrender charges and market value adjustments. A fixed-index deferred annuity performs essentially in the same manner as SPDAs and FPDAs with the exception that, in addition to a fixed interest crediting option, the contract holder has the ability to elect an interest crediting mechanism that is linked, in part, to an outside index such as the S&P 500 Index®. A single premium immediate annuity ("SPIA") foregoes the accumulation period and immediately commences an annuity payout period.

The following table sets forth information regarding the company's sales activity by product type. Life insurance sales are measured by annualized first year premiums.

	Years Ended December 31,		
	2015	2014	2013
	(In thousands)		
Annuities:			
Fixed-index deferred	\$685,928	730,693	717,258
Other deferred	52,001	70,505	74,834
Single premium immediate	5,839	15,313	13,380
Total annuities	\$743,768	816,511	805,472
Life:			
Fixed-index universal life insurance	\$31,972	34,239	35,643
Other universal life insurance	2,805	4,748	5,223
Traditional life and other	2,995	3,597	3,312
Total life	\$37,772	42,584	44,178

Table of Contents

The table below sets forth information regarding the company's life insurance in force for each date presented.

	Insurance In Force as of December 31,	
	2015	2014
	(\$ in thousands)	
Universal life:		
Number of policies	47,660	50,950
Face amounts	\$5,497,270	\$6,819,120
