Item 2.06. Material Impairments.

See Item 8.01 below for a description of the write-off of a portion of a regulatory asset relating to the pension balancing account.

Item 8.01. Other Events.

As previously reported, in December 2017, Northwest Natural Gas Company (NW Natural), a wholly-owned subsidiary of Northwest Natural Holding Company (NW Holdings), filed an Oregon general rate case. On October 26, 2018, the Public Utility Commission of Oregon (OPUC) issued an order in the NW Natural rate case (Order). The Order froze NW Natural's pension balancing account as of October 31, 2018. The Order also directed that, beginning on November 1, 2018, NW Natural is authorized to increase the amount of FAS 87 pension expense included in base rates by \$8.1 million, for a total annual collection of \$11.9 million. The Order also directed NW Natural and the other parties to the rate case to engage in further regulatory proceedings to resolve open issues with respect to the recovery of the pension balancing account, and treatment of the 10-month deferral period benefits associated with the Tax Cuts and Jobs Act (TCJA). NW Natural expected these proceedings to also determine the appropriateness of NW Natural's remeasurement of the regulated utility excess deferred income taxes pursuant to TCJA and the return of these excess deferred income taxes to customers directly or by applying them for the customers' benefit.

As previously disclosed, on February 4, 2019, NW Natural, OPUC Staff, Oregon Citizen's Utility Board (CUB), and the Alliance of Western Energy Customers (AWEC), which comprised all of the parties to the Rate Case, filed with the OPUC a joint stipulation addressing the remaining items related to the pension balancing account and TCJA benefits in the Rate Case (Settlement).

On March 25, 2019, the OPUC approved the Settlement in its entirety (Pension Order).

Under the Pension Order, the OPUC found that NW Natural properly recorded the remeasurement of regulated utility excess deferred income taxes pursuant to the effects of TCJA, and that all of NW Natural's TCJA-related dockets are resolved. Commencing April 1, 2019, NW Natural is ordered to return excess deferred income taxes pursuant to TCJA as follows: (i) an annual credit to base rates of \$3.4 million; (ii) a credit of \$3.0 million per year for five years to sale customers; (iii) a credit to customers' benefit of \$5.44 million of deferred income taxes, and \$7.07 million of TCJA benefits deferred between January 1, 2018 and October 31, 2018, reflected as a reduction to NW Natural's pension balancing account, described below. As a result of these returns and credits, as of April 1, 2019, NW Natural's rate base is ordered to increase by \$15.38 million, and the revenue requirement is ordered to increase \$1.43 million. If NW Natural files a general rate case within five years of the date of the Pension Order, this revenue requirement may be adjusted as part of that general rate case.

As to the future operation and timing of rate recovery of amounts reflected in NW Natural's pension balancing account, the Pension Order provides that, effective October 31, 2018, NW Natural would: (i) reduce the amount of the frozen pension balancing account by \$10.5 million, and apply \$12.51 million of the Company's deferred TCJA benefits, for a total reduction of the pension balancing account of approximately \$23.01 million; and (ii) reduce the interest rate on the pension balancing account from NW Natural's authorized rate of return of 7.317 percent to 4.3 percent. NW Natural would then collect the remainder of the pension balancing account balance over ten years in a customer tariff of \$7.3

million per year beginning on April 1, 2019. After giving effect to the Pension Order, NW Natural expects it will recognize a \$10.5 million write-off to the regulatory asset relating to the pension balancing account, resulting in an after-tax charge to earnings of approximately \$6.7 million in the first quarter of 2019.
