DATA I/O ANNOUNCES FOURTH QUARTER AND 2004 FINANCIAL RESULTS

Redmond, Wash., Feb. 16, 2005 - Data I/O Corporation (NASDAQ: DAIO), the leading provider of manual and automated device programming systems, today announced financial results for the fourth quarter and year ended Dec. 31, 2004.

Revenues were \$5.8 million for the fourth quarter of 2004, compared with \$6.6 million reported in the fourth quarter of 2003. Fourth quarter gross margins were 53.8 percent, compared with 54.8 percent in the fourth quarter of 2003.

In accordance with U.S. generally accepted accounting principles (GAAP), net loss for the fourth quarter of 2004 was \$584,000 or a net loss of \$0.07 per share, compared with net income of \$337,000 or \$0.04 per share in the fourth quarter of 2003. The quarterly income comparison reflects the lower sales volume for the fourth quarter, a decline in gross margin percentage, increased investment in development projects, investment in establishing our China operations and a restructuring charge of \$60,000 in the fourth quarter of 2004.

Total cash and short-term investments were \$6.6 million at Dec. 31, 2004. The company remains debt-free.

Fiscal Year 2004 Results

For the year ended Dec. 31, 2004, Data I/O reported revenues of \$27.3 million, a 10.6 percent increase from revenues of \$24.7 million in 2003. The net loss for 2004 was \$92,000 or \$0.01 per share, compared with net income of \$1.3 million or \$0.16 per share for 2003. The annual income comparison reflects the lower gross margin percentage, increased investment in development projects, investment in establishing our China operations, higher commissions and selling expenses, increased marketing costs associated with our ImageWriter in-system programming initiative and restructuring charges of \$562,000. Gross margins in 2004 were 53.4 percent, compared with 55.4 percent in the prior year.

Data I/O announced on Feb. 14, 2005 that it will amend previously issued financial statements for the fiscal year ended Dec. 31, 2003 and prior periods, due to a cumulative overstatement of demonstration inventory equipment accumulated depreciation and a corresponding overstatement of depreciation (international selling) expense of approximately \$112,000. For the year ending Dec. 31, 2003, Data I/O will amend its financial statements due to a \$65,000 overstatement of depreciation (international selling) expense. No adjustment was required for the years ended Dec. 31, 2002 and 2001 other than to reflect a \$47,000 increase in retained earnings related to the cumulative effect of this error from the periods prior to 2001. These adjustments have been reflected in the 2003 comparison data included here.

"As we mentioned in our Dec. 22, 2004 news release, the fourth quarter financial

Edgar Filing: DATA I/O CORP - Form 8-K

results reflect the seasonality of our customers' businesses as some of our customers delayed shipments until the first quarter of 2005," said Fred Hume, president and CEO. "Our disappointments in these delays were compounded by the fact that a major shipment to China was also delayed in customs for over two weeks. Had we been able to recognize that shipment we would have been toward the higher end of the guidance provided in the news release. The positive side is that January revenues provide a good start for the first quarter, and we remain confident that 2005 will be a good year for Data I/O."

"During the fourth quarter, we introduced products that will serve expanded worldwide markets. We began shipment of the ImageWriter, Data I/O's solution for in-system programming. This product was launched first in Europe, where there is an established market for programmable microcontrollers used in automotive applications. We continue to see in-system programming as an important growth area for Data I/O.

"We also launched the newest version of our RoadRunner product to support the Panasonic CM402 placement machine. This machine is used by Samsung as well as other Asian handset manufacturers," said Hume.

"Also in the fourth quarter, we introduced the PS-588, our newest solution for automated programming that provides a much higher level of throughput for high volume programming than previously available at a lower cost per part. We expect to begin shipment of this product during the second quarter of 2005," said Hume.

First Quarter 2005 Guidance

Data I/O currently expects that revenues in the first quarter of 2005 will be approximately \$7 million. Gross margins are expected to be approximately 54 percent.

Conference Call Information

A conference call discussing the fourth quarter and 2004 financial results will follow this release today at 8:00 a.m. Pacific time/11:00 a.m. Eastern time. To listen to the call, please dial (212) 287-1616, passcode: Data I/O. A taped replay will be made available approximately one hour after the conclusion of the call and will remain available for one week. To access the replay, dial (203) 369-1061.
