**DATA I/O ANNOUNCES 13% REVENUE GROWTH,
HIGHEST FIRST QUARTER REVENUE IN DECADE**

Sales up 13% for First Quarter,

Net Income of \$532,000 for First Quarter

Sales Pipeline Returns to Pre-Recession Peak Levels

Redmond, WA, April 21, 2011 Data I/O Corporation (NASDAQ: DAIO), the leading global provider of advanced programming and IP management solutions used in the manufacturing of flash and flash-based intelligent devices, today announced financial results for the first quarter ended March 31, 2011.

Highlights

- First quarter 2011 revenue increased 12.7 percent to \$7.0 million from \$6.3 million in the same period last year and increased sequentially from \$6.9 million in the fourth quarter of 2010
- Asian revenues grew 101 percent compared to the first quarter of 2010
- First quarter 2011 gross margin improved sequentially to 59.1 percent from 56.4 percent in the prior quarter
- First quarter 2011 net income was \$532,000, or \$0.06 per diluted share
- Cash increased during the quarter to \$19 million

Financial Results

Revenues for the first quarter of 2011 were \$7.0 million, up 12.7 percent compared with \$6.3 million in the first quarter of 2010 and up sequentially from \$6.9 million in the fourth quarter of 2010. Net income in the first quarter of 2011 was \$532,000, or \$0.06 per diluted share, compared with net income of \$709,000 or \$0.08 per diluted share, in the first quarter of 2010. The decrease in net income is attributed primarily to higher development expenses associated with new products to be released later this year.

On a regional basis, Asia had the highest growth this period, with revenue growth of 101 percent over the first quarter of 2010, and 31 percent sequentially over the fourth quarter of 2010. Europe had revenue growth of 6 percent over the first quarter of 2010 and was flat compared to the fourth quarter of 2010. The Americas declined 33 percent compared to the first quarter of 2010, particularly due to decreased sales in Mexico and less custom software sales. Data I/O ended the quarter with a backlog of \$0.9 million, compared to \$1.1 million at the end of the first quarter of 2010 and \$1.6 million at December 31, 2010.

Orders for the first quarter of 2011 were \$6.1 million compared with \$5.9 million in the first quarter of 2010 and \$6.6 million in the fourth quarter of 2010, said Joel Hatlen, Vice President and CFO. During the quarter, programming centers continued their purchases of new equipment, demonstrating their business recovery and the need for new capacity. We also witnessed a recovery in our Asia business early in the first quarter, and despite the decline in the Americas in that period, we are now seeing a recovery in the second quarter in that region as well.

Gross margin as a percentage of sales in the first quarter of 2011 was 59.1 percent, compared with 60.0 percent in the first quarter of 2010 and 56.4 percent in the fourth quarter of 2010. The increase compared to the fourth quarter of 2010 was primarily due to the product mix and improved variances. Operating expenses increased by \$639,000 in the first quarter of 2011 to \$3.5 million compared to \$2.9 million in the same period in 2010. The \$402,000 increase in Research and Development expense was primarily due to the use of outside resources and materials to accelerate our growth initiatives. Sales, General and Administrative expense increased to \$2.2 million in the first quarter of 2011 from \$1.9 million in the same period in 2010 due to increased use of outside professional consultants, higher compensation costs and incentive compensation based on financial results.

The Company's cash position at March 31, 2011 increased during the quarter to \$19.0 million. Accounts receivable increased to \$5.5 million at March 31, 2011 compared to \$5.0 million at December 31, 2010, primarily due to more sales shipments taking place late in the quarter, and increased from \$4.7 million at March 31, 2010, primarily due to the increase in sales volume. Inventories were at \$3.5 million at March 31, 2011, down from \$3.6 million at December 31, 2010 and from \$3.7 million at March 31, 2010. Deferred revenue was \$1.6 million at March 31, 2011 and December 31, 2010.

We are pleased to start the year with excellent revenues for the quarter and solid financial results, said Fred Hume, President and CEO. The \$7 million in revenue is the highest level we've witnessed in a first quarter seasonally, our weakest in more than 10 years. We are excited by our new product initiatives, and as such, we have continued to use temporary resources to accelerate their development to introduce several of them to the market later this year. In addition, these initiatives expand our available markets and cement our position as the leader in advanced programming solutions.

Conference Call Information

A conference call discussing the first quarter and 2011 financial results will follow this release today at 2 p.m. Pacific time/5 p.m. Eastern time. To listen to the conference call, please dial (612) 288-0329 passcode: DAIO. A taped replay will be made available approximately one hour after the conclusion of the call and will remain available for one week. To access the replay, please dial (320) 365-3844, access code: 201265. The conference call will also be simultaneously web cast over the Internet; visit the News and Events section of the Data I/O Corporation website at <http://www.dataio.com> to access the call from the site. This web cast will be recorded and available for replay on the Data I/O Corporation website approximately two hours after the conclusion of the conference call.

About Data I/O Corporation

With almost 40 years of expertise in delivering intellectual property to programmable devices, Data I/O offers complete, integrated manufacturing solutions in wireless, automotive, programming center, semiconductor, and industrial control market segments for OEM, ODM, EMS and semiconductor companies. Data I/O is the leader in programming and provides hardware and software solutions for turn-key programming and device testing services, as well as in-system (on-board), in-line (right before use at the SMT line), or in-socket (off-line) programming. These solutions are scalable for small, medium and large volume applications with different device mixes. Data I/O Corporation has headquarters in Redmond, Wash., with sales and services worldwide. For further information, visit the company's website at <http://www.dataio.com>.

Forward Looking Statement

Statements in this news release concerning future results from operations, financial position, economic conditions, product releases and any other statement that may be construed as a prediction of future performance or events are forward-looking statements which involve known and unknown risks, uncertainties and other factors which may cause actual results to differ materially from those expressed or implied by such statements. These factors include uncertainties as to levels of orders, ability to record revenues, release schedules, market acceptance of new products, changes in economic conditions and market demand, pricing and other activities by competitors, and other risks including those described from time to time in the Company's filings on Forms 10K and 10Q with the Securities and Exchange Commission (SEC), press releases and other communications.
