FOREST LABORATORIES, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements
(Unaudited)

1. Basis of Presentation:

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of Management, all adjustments (consisting of only normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three-month period ended June 30, 2002 are not necessarily indicative of the results that may be expected for the year ending March 31, 2003. For further information refer to the consolidated financial statements and footnotes thereto incorporated by reference in the Company's Annual Report on Form 10-K for the year ended March 31, 2002.

2. Inventories:

Edgar Filing: FOREST LABORATORIES INC - Form 10-Q

Inventories, net of reserves for obsolescence, consist of the following:

(In thousands)	June 30, 2002	
	<u>(Unaudited)</u>	<u>March 31, 2002</u>
Raw materials	\$121,288	\$186,646
Work in process	6,242	14,480
Finished goods	<u>230,319</u>	<u>147,089</u>
	\$357,849	\$348,215
	=====	=====

3. Intangible Assets:

Marketing agreement:

In December 2001, the Company signed a marketing agreement with Sankyo Pharma Inc. to co-promote Benicar™ for the treatment of hypertension. The Company will co-promote the product for a period of six years and receive a share of the product profits during that period as defined. The Company will receive a reduced share of the product profits thereafter. Benicar was commercially launched in the first quarter of fiscal 2003, at which time the Company paid Sankyo \$43,960,000. The costs incurred for Benicar were included in other intangible assets and will be amortized in the future based on estimated revenues.

4. Net Income Per Share:

A reconciliation of shares used in calculating basic and diluted net income per share follows:

(In thousands)	Three Months Ended	
	<u>June 30,</u>	
	<u>2002</u>	<u>2001</u>
Basic	179,404	176,770
Effect of assumed conversion of employee stock options and warrants	<u>6,349</u>	<u>7,747</u>
Diluted	185,753	184,517
	=====	=====

Options to purchase approximately 2,370,750 shares of common stock at exercise prices ranging from \$75.72 to \$82.97 per share that were outstanding during a portion of the three-month period ended June 30, 2002 were not included in the computation of diluted earnings per share because they were anti-dilutive. Options to purchase approximately 2,336,800 shares of common stock at an exercise price of \$66.91 per share that were outstanding during a portion of the three-month period ended June 30, 2001 were not included in the computation of diluted earnings per share because they were anti-dilutive. These options expire through 2010.

FOREST LABORATORIES, INC. AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

Financial Condition and Liquidity

Net current assets increased by \$29,042,000 from March 31, 2002. Increases in marketable securities, accounts receivable and inventories resulted primarily from increases in sales, particularly Celexa™. Celexa, a selective serotonin reuptake inhibitor (SSRI) for the treatment of depression is our leading product and continues to show strong growth. Inventory levels were also impacted by the buildup of Lexapro™, the single isomer of Celexa, in anticipation of a launch during fiscal 2003. Cash decreased during the quarter principally as the result of the Company increasing its investment in long-term marketable securities in order to receive more favorable rates of return on invested funds. The Company also made a \$43,960,000 payment to Sankyo Pharma upon the launch of Benicar™, an angiotensin receptor blocker for the treatment of hypertension. Pursuant to a co-promotion agreement, Forest will co-promote Benicar with Sankyo for a period of six years and receive a share of the product profits, as defined. The Company will continue to receive a reduced residual share of the product profits, thereafter. The payment to Sankyo was included in license agreements, product rights and other intangible assets, and will be amortized against future revenues. The increase in accounts payable, accrued expenses and income taxes payable was due to increases in the level of the Company's overall ongoing operations.

Property, plant and equipment increased as the result of the continuing expansion of the Company's facilities in order to meet current and future product demands and an expanding workforce. The Company is renovating both a newly acquired building on Long Island to be used as a research and development facility and recently leased office space in New Jersey. Further property expansions and acquisitions are likely in the future, including the expansion of its packaging and distribution facility also located on Long Island, to meet the needs from increased sales and related production, warehousing and distribution, and for products under development.

The Company is a party to several license agreements for products currently under development that may obligate Forest, in future periods, to pay additional amounts subject to the achievement of certain product milestones, as defined.

Management believes that current cash levels coupled with funds to be generated by ongoing operations will continue to provide adequate liquidity to facilitate potential acquisitions of products and capital investments.

Results of Operations

Net sales increased \$116,681,000 to \$467,189,000 or 33% as compared to the same period last year. Forest's leading product Celexa, accounted for most of the increase with sales of \$351,435,000, an increase of \$113,349,000 or 48% from last year, of which \$110,727,000 was due to volume. Celexa has continued its strong growth, and as of June 30, 2002 had captured a 17.2% share of total prescriptions in the SSRI market. Sales of Tiazac® declined \$4,084,000 during the quarter of which \$1,145,000 was due to volume declines and \$2,939,000 was due to price. Sales of Aerobid®, which have been, and continue to be, subject to competition in the inhaled steroid market, declined \$1,235,000 during the current quarter. The remainder of the net sales change was due to increases in the Company's generic and non-promoted product lines, of which \$3,602,000 was due to volume and \$5,049,000 was due to price.

Other income increased by \$2,994,000 or 35% during the current quarter as compared to the first quarter of last year primarily due to higher interest income resulting from an increase in funds available for investment.

Cost of sales as a percentage of sales was 24% during the current quarter, unchanged from the same period last year.

Selling, general and administrative expenses increased \$16,609,000 during the current quarter as compared to the same period last year. During the current quarter, a 600-person salesforce expansion, begun in the third quarter of fiscal 2002, was completed. This expansion, which was necessitated by the Benicar launch, as well as other anticipated product launches, particularly Lexapro, brings the Company's total salesforce to approximately 2,100 representatives and managers.

Research and development expense increased by \$15,516,000 or 45% during the current quarter as compared to the same period last year, due primarily to costs associated with ongoing clinical trials and from staff increases and associated costs required to support currently marketed products and products in various stages of development. During the quarter, particular emphasis was placed on several of the Company's recently licensed products, including memantine and dexloxiglumide. Memantine, a moderate-affinity uncompetitive N-methyl D-aspartate (NMDA) receptor antagonist, is being developed for the treatment of Alzheimer's Disease and neuropathic pain. The Company filed an NDA for memantine's treatment of Alzheimer's Disease on August 1, 2002. The filing includes two pivotal clinical trials, one conducted in the U.S. and the other in Europe. It is possible the FDA may not accept the filing because the clinical trial conducted in Europe did not include one of the endpoints they have historically required for evaluation of treatments for mild-to-moderate Alzheimer's Disease. The FDA has sixty days to determine if the NDA will be accepted for filing and review. Dexloxiglumide, for the treatment of constipation-prone irritable bowel syndrome, is currently in Phase III clinical testing. Spending also continued for ongoing trials for Lexapro, for which Forest received an approvable letter in January 2002. Other products currently in our pipeline for which clinical studies are being conducted include: neramexane, an NMDA receptor antagonist, which is currently in Phase II clinical trials and is being tested for various CNS disorders; Aerospan® for asthma and oxycodone/ibuprofen for moderate to severe pain which are both currently under final review with the FDA; and lercanidipine, for the treatment of hypertension, for which Forest received an approvable letter on August 1, 2002. Forest hopes to launch both Aerospan and lercanidipine in fiscal 2004. As a result of the growing pipeline of products, the Company anticipates further increases in research and development for next year and beyond.

The effective income tax rate was 24% for the current quarter as compared to 28% for the same period last year. As anticipated, the lower effective tax rate was a direct result of the increase in the proportion of income recognized by our Irish subsidiary, which is both the licensee and manufacturer of Celexa and several other products under development. The Company's Irish subsidiary is subject to a significantly lower tax rate than the rate in effect in the United States.

The Company expects to continue its profitability in fiscal 2003 with continued growth of its principal promoted products.

Inflation has not had a material effect on the Company's operations for the periods presented.

Forward Looking Statements

Except for the historical information contained herein, the Management Discussion and other portions of this annual report contain forward looking statements that involve a number of risks and uncertainties, including the difficulty of predicting FDA approvals, acceptance and demand for new pharmaceutical products, the impact of competitive products and pricing, the timely development and launch of new products and the risk factors listed from time to time in the Company's filings with the SEC, including the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2002.

Quantitative and Qualitative Disclosures About Market Risk

In the normal course of business, operations of the Company may be exposed to fluctuations in currency values and interest rates. These fluctuations can vary the costs of financing, investing and operating transactions. Because the Company had no debt and only minimal foreign currency transactions, there was no material impact on earnings of

fluctuations in interest and currency exchange rates.

Part II - Other Information

Item 1. Legal Proceedings

Reference is hereby made to the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2002, for a description of certain legal proceedings to which the Company is a party.

Item 6. Exhibits and Reports on Form 8-K

- (a) Exhibit 99.1 and Exhibit 99.2
- (b) Reports on Form 8-K. None

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
