Zi Corporation Adopts RADVISION V2OIP(TM) Technology for
IP Phone Solution

RADVISION'S H.323 ENABLING TECHNOLOGY USED TO DEVELOP INTELLIGENT INTERFACE
FOR ZI CORPORATION'S IP PHONE SOLUTION

Mahwah, New Jersey, and Calgary, AB, March 26, 2001 -- RADVISION (NASDAQ: RVSN), the leading provider of award-winning, industry-standard products and technology for real-time voice and video over IP (V2oIPTM), and Zi Corporation, a technology company focused on developing and delivering intelligent interface solutions and services to the wireless and consumer electronics sectors, today announced the adoption of RADVISION's H.323 enabling technology for Zi Corporation's IP phone solution.

"As a leader in the development of Voice over IP solutions for the global market, Zi Corporation is pleased to adopt RADVISION's H.323 enabling technology for our IP phone solutions," said Thomson Lee, Zi Services general manager, Zi Corporation. "With the help of RADVISION's technology, we are able to quickly bring to market a robust solution that meets industry standards."

Zi Corporation will use RADVISION's H.323 Toolkit to develop an intelligent user interface for their IP phone solution. Zi Corporation's IP phone supports standard features such as call forward, call transfer, call hold, call waiting and conference calling. Additional attributes include LCD display, programmable function keys with LEDs, Microsoft(R) NetMeeting interoperability, and network enabled upgrades.

Edgar Filing: RADVISION LTD - Form 6-K

"RADVISION's protocol toolkits were developed to help companies bring innovative and effective new products and services to market in a timely manner," said Dr. Michelle Blank, vice president of galactic marketing for RADVISION. "Zi Corporation's IP phone is an excellent example of the kinds of IP-centric products that RADVISION's enabling technology has helped to make possible."

About H.323 Toolkit

RADVISION's H.323 core protocol enables the creation of real-time voice and video calls over IP networks. The H.323 Protocol Toolkit consists of H.225 RAS, RTP/RTCP and Q.931 Call Signaling. RADVISION also offers optional modules for H.235 Security features as well as H.450 Supplemental Services for a more robust solution. Designed to be platform independent, the RADVISION H.323 protocol toolkit is available for numerous operating systems including various UNIX versions, real-time OSs for embedded systems, as well as Windows, including Windows NT and Win CE.
