(Address of principal executive offices) (Zip code)

Ronald E. Robison  
1221 Avenue of the Americas, New York, New York 10020  
(Name and address of agent for service)

Registrant's telephone number, including area code: 212-762-4000

Date of fiscal year end: May 31, 2005

Date of reporting period: November 30, 2004

Item 1 - Report to Shareholders

Welcome, Shareholder:

In this report, you'll learn about how your investment in Morgan Stanley Municipal Income Opportunities Trust performed during the semiannual period. We will provide an overview of the market conditions, and discuss some of the factors that affected performance during the reporting period. In addition, this report includes the Fund's financial statements and a list of Fund investments.

Market forecasts provided in this report may not necessarily come to pass. There is no assurance that the Fund will achieve its investment objective. The Fund is subject to market risk, which is the possibility that market values of securities owned by the Fund will decline and, therefore, the value of the Fund's shares may be less than what you paid for them. Accordingly, you can lose money investing in this Fund.

FUND REPORT

For the six-month period ended November 30, 2004

MARKET CONDITIONS

The economy continued to grow through the six-month period ending November 30, 2004. During the spring and summer it hit what Federal Reserve Board Chairman Alan Greenspan described as a "soft patch." Oil prices almost doubled, reaching

## Edgar Filing: MORGAN STANLEY MUNICIPAL INCOME OPPORTUNITIES TRUST - Form N-CSRS

record highs, and employment growth weakened. However, by November, disappointment over weak payroll numbers proved short-lived after the release of a strong October report and an upward revision to previous months. Oil prices also backed off from their peak.

By April 2004, the market had begun to anticipate that the Federal Reserve Board (the Fed) would begin to increase short-term interest rates in response to higher commodity prices and reduced concern about the risk of deflation. In a series of four measured moves between June and the end of November, the Fed did increase the federal funds rate, from 1.00 to 2.00 percent.

Rising inflation fears led to rising bond yields from April to June. The market changed course in July, however, with yields falling from July through October as investors became concerned with slower growth. With the improvement in employment the market again reversed direction and long-term municipal bond yields rose in November. Higher short-term interest rates reduced the yield pickup for extending to longer maturities, and the yield curve flattened. Lower-quality municipal bonds performed strongly in this environment, as the difference in yields (known as the "yield spread") between AAA and BBB rated bonds narrowed.

The ratio of municipal yields to Treasury yields, which serves as a gauge of relative performance, indicated that municipals generally remained attractive relative to Treasuries during the period. As a result, taxable investors such as insurance companies and hedge funds that normally focus on other sectors of the bond market supported municipal bond prices by "crossing over" to purchase municipal bonds.

### PERFORMANCE ANALYSIS

For the six-month period ended November 30, 2004, Morgan Stanley Municipal Income Opportunities Trust's (OIA) total NAV return was 5.95%. The Fund's total market return was 9.66%. OIA's share price was trading at a 4.20% discount to its NAV on November 30, 2004. Past performance is no guarantee of future results.

Monthly dividends for the fourth quarter of 2004, declared in September, were increased from \$0.04 to \$0.0425 per share to reflect the Fund's current and projected earnings level. The Fund's level of undistributed net investment income was \$0.111 per share on November 30, 2004, versus \$0.092 per share six months earlier.

OIA is a non-leveraged closed-end fund that invests primarily in higher-yielding municipal bonds. As a result, more than 50 percent of the portfolio is invested in nonrated issues. Currently, OIA has only one holding, representing less than 1 percent of net assets that is nonperforming.

OIA's duration,\* a measure of interest-rate sensitivity, has been targeted to be shorter than its benchmark index, thus reducing interest-rate volatility. This

2

positioning reduced upside performance as rates declined but helped performance when interest rates rose. The Fund's duration was 6.8 years. The Fund's net assets of \$157 million were diversified across 85 credits in 12 long-term sectors.

The Fund's procedure for reinvesting all dividends and distributions in common shares is through purchases in the open market. This method helps support the market value of the Fund's shares. In addition, we would like to remind you that

## Edgar Filing: MORGAN STANLEY MUNICIPAL INCOME OPPORTUNITIES TRUST - Form N-CSRS

the Trustees have approved a procedure whereby the Fund may, when appropriate, purchase shares in the open market or in privately negotiated transactions at a price not above market value or net asset value, whichever is lower at the time of purchase.

-----  
PERFORMANCE DATA QUOTED REPRESENTS PAST PERFORMANCE, WHICH IS NO GUARANTEE OF FUTURE RESULTS, AND CURRENT PERFORMANCE MAY BE LOWER OR HIGHER THAN THE FIGURES SHOWN. Investment return, net asset value and common share market price will fluctuate and fund shares, when sold, may be worth more or less than their original cost.

There is no guarantee that any securities mentioned will continue to perform well or be held by the Fund in the future.

\* A measure of the sensitivity of a bond's price to changes in interest rates, expressed in years. Each year of duration represents an expected 1 percent change in the price of a bond for every 1 percent change in interest rates. The longer a bond's duration, the greater the effect of interest-rate movements on its price. Typically, funds with shorter durations perform better in rising-interest-rate environments, while funds with longer durations perform better when rates decline.

### LARGEST SECTORS

Hospital Revenue	14.9%
Retirement and Life Care Facilities Revenue	14.8%
IDR/PCR*	14.2%
Tax Allocation Revenue	11.1%

Morgan Stanley Municipal Income Opportunities Trust  
NOTES TO FINANCIAL STATEMENTS - NOVEMBER 30, 2004 (UNAUDITED)

1. Organization and Accounting Policies

Morgan Stanley Municipal Income Opportunities Trust (the "Fund") is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The Fund's investment objective is to provide a high level of current income which is exempt from federal income tax. The Fund was organized as a Massachusetts business trust on June 22, 1988 and commenced operations on September 19, 1988.

The following is a summary of significant accounting policies:

A. Valuation of Investments -- (1) portfolio securities are valued by an outside independent pricing service approved by the Trustees. The pricing service uses both a computerized grid matrix of tax-exempt securities and evaluations by its staff, in each case based on information concerning market transactions and quotations from dealers which reflect the mean between the last reported bid and asked price. The portfolio securities are thus valued by reference to a combination of transactions and quotations for the same or other securities believed to be comparable in quality, coupon, maturity, type of issue, call provisions, trading characteristics and other features deemed to be relevant. The Trustees believe that timely and reliable market quotations are generally not readily available for purposes of valuing tax-exempt securities and that the valuations supplied by the pricing service are more likely to approximate the fair value of such securities; (2) futures are valued at the latest sale price on the commodities exchange on which they trade unless it is determined that such price does not reflect their market value, in which case they will be valued at their fair value as determined in good faith under procedures established by and under the supervision of the Trustees; and (3) short-term debt securities having a maturity date of more than sixty days at time of purchase are valued on a mark-to-market basis until sixty days prior to maturity and thereafter at amortized cost based on their value on the 61st day. Short-term debt securities having a maturity date of sixty days or less at the time of purchase are valued at amortized cost.

B. Accounting for Investments -- Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses on security transactions are determined by the identified cost method. Discounts are accreted and premiums are amortized over the life of the respective securities. Interest income is accrued daily except where collection is not expected.

C. Federal Income Tax Policy -- It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable and nontaxable income to its shareholders. Accordingly, no federal income tax provision is required.

D. Dividends and Distributions to Shareholders -- Dividends and distributions to shareholders are recorded on the ex-dividend date.

15

## Edgar Filing: MORGAN STANLEY MUNICIPAL INCOME OPPORTUNITIES TRUST - Form N-CSRS

Morgan Stanley Municipal Income Opportunities Trust  
NOTES TO FINANCIAL STATEMENTS - NOVEMBER 30, 2004 (UNAUDITED) continued

E. Futures Contracts -- A futures contract is an agreement between two parties to buy and sell financial instruments or contracts based on financial indices at a set price on a future date. Upon entering into such a contract, the Fund is required to pledge to the broker cash, U.S. Government securities or other liquid portfolio securities equal to the minimum initial margin requirements of the applicable futures exchange. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments known as variation margin are recorded by the Fund as unrealized gains and losses. Upon closing of the contract, the Fund realizes a gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

F. Use of Estimates -- The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and disclosures. Actual results could differ from those estimates.

### 2. Investment Advisory/Administration Agreements

Pursuant to an Investment Advisory Agreement with Morgan Stanley Investment Advisors Inc. (the "Investment Adviser"), the Fund pays an advisory fee, calculated weekly and payable monthly, by applying the annual rate of 0.50% to the Fund's weekly net assets.

Effective November 1, 2004, pursuant to an Administration Agreement with Morgan Stanley Services Company Inc. (the "Administrator"), an affiliate of the Investment Adviser, the Fund pays an administration fee, calculated weekly and payable monthly, by applying the annual rate of 0.08% to the Fund's weekly net assets. Prior to November 1, 2004, the annual rate was 0.30%.

### 3. Security Transactions and Transactions with Affiliates

The cost of purchases and proceeds from sales of portfolio securities, excluding short-term investments, for the six months ended November 30, 2004 aggregated \$10,497,998 and \$13,640,329, respectively.

Morgan Stanley Trust, an affiliate of the Investment Adviser and Administrator, is the Fund's transfer agent. At November 30, 2004, the Fund had transfer agent fees and expenses payable of approximately \$18,800.

The Fund has an unfunded noncontributory defined benefit pension plan covering certain independent Trustees of the Fund who will have served as independent Trustees for at least five years at the time of retirement. Benefits under this plan are based on factors which include years of service and compensation. Aggregate pension costs for the six months ended November 30, 2004 included in Trustees' fees and expenses in the Statement of Operations amounted to \$3,757. At November 30, 2004, the Fund had an accrued pension liability of \$61,721 which is included in accrued expenses

16

Morgan Stanley Municipal Income Opportunities Trust  
NOTES TO FINANCIAL STATEMENTS - NOVEMBER 30, 2004 (UNAUDITED) continued

in the Statement of Assets and Liabilities. On December 2, 2003, the Trustees voted to close the plan to new participants and eliminate the future benefits growth due to increases to compensation after July 31, 2003.

Edgar Filing: MORGAN STANLEY MUNICIPAL INCOME OPPORTUNITIES TRUST - Form N-CSRS

Effective April 1, 2004, the Fund began an unfunded Deferred Compensation Plan (the "Compensation Plan") which allows each independent Trustee to defer payment of all, or a portion, of the fees he receives for serving on the Board of Trustees. Each eligible Trustee generally may elect to have the deferred amounts credited with a return equal to the total return on one or more of the Morgan Stanley funds that are offered as investment options under the Compensation Plan. Appreciation/depreciation and distributions received from these investments are recorded with an offsetting increase/decrease in the deferred compensation obligation and do not affect the net asset value of the Fund.

4. Shares of Beneficial Interest

Transactions in shares of beneficial interest were as follows:

	SHARES	PAR VALUE OF SHARES	CAPITAL PAID IN EXCESS OF PAR VALUE
	-----	-----	-----
Balance, May 31, 2003.....	20,756,472	\$207,564	\$186,928,7
Treasury shares purchased and retired (weighted average discount 5.83%).....	(377,200)	(3,772)	(2,703,3
Reclassification due to permanent book/tax differences.....	--	--	(4,848,5
	-----	-----	-----
Balance, May 31, 2004.....	20,379,272	203,792	179,376,8
Treasury shares purchased and retired (weighted average discount 4.46%)*.....	(360,400)	(3,604)	(2,616,9
	-----	-----	-----
Balance, November 30, 2004.....	20,018,872	\$200,188	\$176,759,9
	=====	=====	=====

\* The Trustees have voted to retire the shares purchased.

5. Federal Income Tax Status

The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations which may differ from generally accepted accounting principles. These "book/tax" differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassification. Dividends and distributions which exceed net investment income and net realized capital gains for tax purposes are reported as distributions of paid-in-capital.

As of May 31, 2004, the Fund had a net capital loss carryforward of \$7,279,954 of which \$700,037 will expire on May 31, 2006, \$87,017 will expire on May 31, 2008, \$4,628,820 will

17

Morgan Stanley Municipal Income Opportunities Trust  
 NOTES TO FINANCIAL STATEMENTS - NOVEMBER 30, 2004 (UNAUDITED) continued

expire on May 31, 2009 and \$1,864,080 will expire on May 31, 2011 to offset future capital gains to the extent provided by regulations.

## Edgar Filing: MORGAN STANLEY MUNICIPAL INCOME OPPORTUNITIES TRUST - Form N-CSRS

As of May 31, 2004, the Fund had temporary book/tax differences attributable to post-October losses (capital losses incurred after October 31 within the taxable year which are deemed to arise on the first business day of the Fund's next taxable year) and book amortization of discount on debt securities.

### 6. Dividends

The Fund declared the following dividends from net investment income:

DECLARATION DATE	AMOUNT PER SHARE	RECORD DATE	PAYABLE DATE
September 28, 2004	\$0.04	December 10, 2004	December 23, 2004
December 28, 2004	\$0.0425	January 7, 2005	January 21, 2005
December 28, 2004	\$0.0425	February 4, 2005	February 18, 2005
December 28, 2004	\$0.0425	March 4, 2005	March 18, 2005

### 7. Expense Offset

The expense offset represents a reduction of the custodian fees for earnings on cash balances maintained by the Fund.

### 8. Risks Relating to Certain Financial Instruments

The Fund may invest a portion of its assets in residual interest bonds, which are inverse floating rate municipal obligations. The prices of these securities are subject to greater market fluctuations during periods of changing prevailing interest rates than are comparable fixed rate obligations.

To hedge against adverse interest rate changes, the Fund may invest in financial futures contracts or municipal bond index futures contracts ("futures contracts").

These futures contracts involve elements of market risk in excess of the amount reflected in the Statement of Assets and Liabilities. The Fund bears the risk of an unfavorable change in the value of the underlying securities. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.
