Commission File Number 000-27969

Immersion Corporation
(Exact name of registrant as specified in its charter)

Delaware
*(State or other jurisdiction of
incorporation or organization)*

94-3180138
*(IRS Employer
Identification No.)*

801 Fox Lane
San Jose, California 95131
(Address of principal executive offices, zip code)

(408) 467-1900
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Common Stock, \$0.001 par value	The Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act:
None

Edgar Filing: IMMERSION CORP - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the registrant's common stock held by non-affiliates of the registrant on June 30, 2009, the last business day of the registrant's most recently completed second fiscal quarter, was \$108,261,883 (based on the closing sales price of the registrant's common stock on that date). Shares of the registrant's common stock held by each officer and director and each person whom owns 5% or more of the outstanding common stock of the registrant have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes. Number of shares of common stock outstanding at March 3, 2010: 27,999,593

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the definitive Proxy Statement for the 2010 Annual Meeting are incorporated by reference into Part III hereof.

Forward-looking Statements

In addition to historical information this Annual Report on Form 10-K includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). The forward-looking statements involve risks and uncertainties.

Forward-looking statements are identified by words such as anticipates, believes, expects, intends, may, will, other similar expressions. However, these words are not the only way we identify forward-looking statements. In addition, any statements which refer to expectations, projections, or other characterizations of future events, or circumstances, are forward-looking statements. Actual results could differ materially from those projected in the forward-looking statements as a result of a number of factors, including those set forth below in Management s Discussion and Analysis of Financial Condition and Results of Operations Risk Factors and those described elsewhere in this report , and those described in our other reports filed with the Securities and Exchange Commission (SEC). We caution you not to place undue reliance on these forward-looking statements, which speak only as of the date of this report, and we undertake no obligation to update these forward-looking statements after the filing of this report. You are urged to review carefully and consider our various disclosures in this report and in our other reports publicly disclosed or filed with the SEC that attempt to advise you of the risks and factors that may affect our business.

PART I

Item 1. Business

Overview

Immersion Corporation is a leading provider of haptic technologies that allow people to use their sense of touch more fully when operating a wide variety of digital devices. To achieve this heightened interactivity, we develop and market or license a wide range of hardware and software technologies and products. While we believe that our technologies are broadly applicable, we are currently focusing our marketing and business development activities on the following target application areas: automotive, consumer electronics, gaming, and commercial and industrial devices and controls; medical simulation; and mobile communications. We manage these application areas under two operating and reportable segments: 1) the Touch Line of Business and 2) the Medical Line of Business. See Management s Discussion and Analysis of Financial Condition and Results of Operations as well as the notes to the consolidated financial statements for financial information for these segments for the past three years.

In some markets, such as video console gaming, consumer electronics, mobile phones, and automotive controls, we license our technologies to manufacturers who use them in products sold under their own brand names. In other markets, such as medical simulation, we sell products manufactured under our own brand name through direct sales to end users, distributors, original equipment manufacturers (OEMs), or value-added resellers. From time to time, we also engage in development projects for third parties.

Our objective is to drive adoption of our touch technologies across markets and applications to improve the user experience with digital devices and systems. We and our wholly owned subsidiaries hold more than 800 issued or pending patents in the U.S. and other countries, covering various aspects of hardware and software technologies.

Immersion Corporation was incorporated in 1993 in California and reincorporated in Delaware in 1999. We consummated our initial public offering on November 12, 1999.

Haptics and Its Benefits

In the world of computers, consumer electronics, and digital devices and controls, meaningful haptic (touch) information is limited or missing. For example, when dialing a number or entering text on a conventional touchscreen, users feel only the touchscreen surface, without the subtle, yet confirming sensation we expect from mechanical switches and keyboards.

Table of Contents

To supply richer, more meaningful haptic feedback – also known as force feedback, touch feedback, or tactile feedback – electronic input/output devices can be made to generate physical forces. Our programmable haptic technologies embedded in many types of devices can give users physical sensations appropriate to the situation. Users can feel as though they are interacting with different textures and mass, compliant springs, solid barriers, deep or shallow detents. They can feel the force or resistance as they push a virtual button, scroll through a list, or encounter the end of a menu. In a video or mobile game, users can feel the gun recoil, the engine rev, or the crack of the bat meeting the ball. When simulating the placement of cardiac pacing leads, a user can feel the forces that would be encountered when navigating the leads through a beating heart, providing a more realistic experience of performing this procedure. These forces are created by actuators, such as motors, which are built into devices such as joysticks, steering wheels, gamepads, personal music players, mobile phones, and medical training simulators. Actuators can also be designed into devices used in automotive, industrial, medical, or retail kiosk and point-of-sale systems, such as digital switches, rotary controls, touchscreens, and touch surfaces.

We believe the programmability of our haptic products is a key differentiator over purely electro-mechanical systems and can drive the further adoption of cost effective and more reliable digital devices. A programmable device can supply a tactile response appropriate to the context of operation for systems and devices of many types. These tactile cues can help users operate more intuitively or realize a more enjoyable or natural experience. Used in combination with sight and sound cues, haptic feedback adds a compelling, engaging, meaningful multimodal aspect to the user interface. Our haptic products and technologies can also add a tactile quality to interactions that have been devoid of tactile confirmation, such as when using a touchpad or touchscreen. Independent research shows that the confirmation and navigational cues obtained by programmable haptics can aid in performance and accuracy and increase user satisfaction. The addition of programmable haptics can help in the conversion from purely mechanical rotary controls to digital devices or from a mechanical keyboard, switch, or button interface to an electronic touchscreen.

Programmability also supplies more flexibility in the types of responses that are possible, in upgradeability, in consistent performance that will not degrade over time, and in the potential for personalized settings. Multiple mechanical controls can be consolidated into one versatile programmable control that can save space and improve ergonomics. Conversely, one programmable control device can be implemented as many different types of controls with context-appropriate touch feedback, which can simplify inventory.

Our Solutions

Our goal is to improve the way people interact with digital devices by engaging their sense of touch. Our core competencies include our understanding of how interactions should feel and our knowledge of how to use technology to achieve that feeling. Our strength in both of these areas has resulted in many novel applications.

We believe that our touch-enabled products and technologies give users a more complete, intuitive, enjoyable, and realistic experience. Our patented designs include software elements such as real-time software algorithms and authoring tools, and specialized hardware elements, such as motors, sensors, transmissions, and control electronics. Together, these software and hardware elements enable tactile sensations that are context-appropriate within the application.

We have developed haptic systems for many types of hardware input/output devices such as gamepads, joysticks, mobile phones, rotary controls, touchscreens, and flexible and rigid endoscopy devices for medical simulations.

We have developed many mechanisms to convey forces to the user's hands or body. These include vibro-tactile actuators, direct-, belt-, gear-, or cable-driven mechanisms and other proprietary devices that supply textures and vibration, resistance, and damping forces to the user.

To develop our real-time electronic actuator controllers, we had to address challenges such as size, accuracy, resolution, frequency, latency requirements, power consumption, and cost. Our control solutions include both closed-loop and open-loop control schemes. In closed-loop control, the firmware reads inputs from the input/output devices, and then calculates and applies the output forces in real time based on the input data. In open-loop control, a triggering event will activate the firmware to calculate and send the output signal to the actuator in real time.

Table of Contents

We have developed many software solutions for various operating systems and computing platforms including Windows-based and Apple personal computers, automotive, and mobile handset operating systems. Our inventions include control algorithms for efficiently driving relevant families of actuators (such as spinning mass actuators, linear actuators, and piezo-electric systems) as well as several generations of authoring tools for creating, visualizing, modifying, archiving, and experiencing haptic feedback.

Licensed Solutions

In some markets, such as video console gaming, consumer electronics, mobile phones, and automotive controls, we license our technologies to OEMs or their suppliers who then include our technologies in products sold under their own brand names.

We offer our expertise to our licensees to help them design and integrate touch effects into their products. This expertise includes turn-key engineering and integration services, design kits for prototyping, authoring tools, application programming interfaces, and the development of hardware and software technologies that are compatible with industry standards.

Turn-key Engineering and Integration Services We offer engineering assistance, including technical and design assistance and integration services that allow our licensees to incorporate our touch-enabling products and technologies into their products at a reasonable cost and in a shortened time frame. This allows them to get to market quickly by using our years of haptic development and solution deployment expertise. We offer product development solutions including product software libraries, design, prototype creation, technology transfer, actuator selection, component sourcing, development/integration kits, sample source code, comprehensive documentation, and other engineering services. In addition, we help ensure a quality end-user experience by offering testing and certification services to a number of licensees.

Design Kits for Prototyping We offer several design kits for customers to use for technology evaluation, internal evaluation, usability testing, and focus group testing. The kits include components and documentation that designers, engineers, and system integrators need for prototyping TouchSense touch feedback into an existing or sample product.

Authoring Tools We license authoring tools that enable haptic designers and software developers to quickly design and incorporate custom touch feedback into their own applications. Authoring tools allow designers to create, modify, experience, and save or restore haptic effects for a haptic device. The tools are the equivalent of a computer-aided design application for haptics. Our authoring tools support vibro-tactile haptic devices (such as mobile phones, touchscreens, and vibro-tactile gaming peripherals), as well as kinesthetic haptic devices (such as rotary devices, 2D devices, and joysticks). Various haptic effect parameters can be defined and modified, and the result immediately experienced. Our authoring tools run on mainstream operating systems such as Microsoft Windows.

Application Programming Interfaces or (APIs) Our APIs provide haptic-effect generation capability. This allows designers and software programmers to focus on adding haptic effects to their applications instead of struggling with the mechanics of programming real-time algorithms and handling communications between computers and devices. Some of our haptic APIs are device independent (for example, they work with scroll wheels, rotary knobs, 2D joysticks, and other devices) to allow flexibility and reusability. Others are crafted to meet the needs of a particular customer or industry.

Compatible with Industry Standards We have designed our hardware and software technologies for our licensees to be compatible with industry hardware and software standards. Our technologies operate across multiple platforms and comply with such standards as Microsoft's entertainment application programming interface, DirectX, and a standard communications interface, Universal Serial Bus known as (USB). More generally, our software driver and API

technology has been designed to be easily ported to a variety of operating systems including Windows, Windows CE, Mac OS X, BREW/REX (from QUALCOMM), Java (J2SE), various Linux platforms including Android, Maemo and VxWorks.

Table of Contents

Manufactured Product Solutions

We produce our products using both contracted and in-house manufacturing. We manufacture and sell some of our products under the Immersion brand name through a combination of direct sales, distributors, and value-added resellers. These products include:

medical and surgical simulation systems used for training medical professionals in minimally invasive medical and surgical procedures including endoscopy, laparoscopy, and endovascular;

components used in our haptic touchscreen and touch surface solutions;

programmable rotary control technology and reference design for operating a wide range of devices; and

electronic control boards for wheels and joysticks used in arcade games, research, and industrial applications.

We also manufacture some products on a private-label basis for customers. In addition, we may resell another manufacturer's product into our customer base such as certain types of medical simulators.

As we previously announced in late 2008, we divested our line of 3D products in 2009. These products included our:

MicroScribe® digitizers;

a 3D interaction product line; and

SoftMouse® 3D positioning device.

Touch Line of Business

Products and Markets

Gaming Devices We have licensed our TouchSense intellectual property to Microsoft for use in its gaming products, to Apple Computer for use in its operating system, and to Sony Computer Entertainment for use in its legacy and current PlayStation console gaming products. We have also licensed our TouchSense intellectual property to over a dozen gaming peripheral manufacturers and distributors, including Logitech and Mad Catz, to bring haptic technology to PC platforms including both Microsoft Windows and Apple operating systems, as well as to video game consoles.

In the video game console peripheral market, we have licensed our intellectual property for use in hundreds of spinning mass tactile feedback devices and force feedback devices such as steering wheels and joysticks to various manufacturers including dreamGear, Gemini, Griffin, Hori, i-CON, Intec, Katana, Logitech, Mad Catz, Microsoft, NYKO, Performance Designed Products or (PDP) (formerly Electro Source LLC), Radica, and Sony. These products are designed to work with one or more video game consoles including the Xbox and Xbox 360 from Microsoft; the PlayStation, PlayStation 2, and PlayStation 3 from Sony; and the N64, GameCube, and Wii from Nintendo. Currently, products sold to consumers using TouchSense technology include PC joysticks, steering wheels, and gamepads from various licensees.

For the years ended December 31, 2009, 2008, and 2007, respectively 19%, 30%, and 24% of our total revenues were generated from PC and console gaming revenues.

In the arcade entertainment market, our products include steering wheel and joystick control electronics that provide industrial strength and quality force feedback that enable very realistic simulations.

In the casino and bar-top amusement market, we signed an agreement with 3M Touch Systems in 2005 that allows them to manufacture and distribute its MicroTouch touch screens with our TouchSense technology. 3M Touch Systems and seven system integrators demonstrated this technology in pre-production touchscreen monitors at the 2008 Global Gaming Expo.

Mobile Communications and Portable Devices We developed TouchSense solutions for the mobile phone market and a variety of portable devices.

Table of Contents

The TouchSense Solution for Mobile Phones for handset OEMs, operators, and application developers includes a TouchSense Player, a lightweight and powerful vibration playback system that is embedded in the phone, and a TouchSense software toolkit, including a PC-based composition tool for creating haptic effects for inclusion in content and applications. Haptic effects can be used in alerts, e-mail, games, messages, ringtones, touchscreen interactions, and other user interface features to add information or identification, signal status or message arrival, and heighten interest or fun. With a TouchSense-enabled phone, users can send and receive a wide range of vibro-tactile haptic effects independently from or in synchronicity with audio, video, and application program content.

Our licensees currently include the top three makers of mobile phones by volume in the world: Nokia, Samsung, and LG Electronics plus others such as Pantech Co., Ltd. and KTF Technologies Inc. In 2009, approximately 75 million handsets with TouchSense technology were shipped by our licensees. Since its launch in the first handset in 2005, our TouchSense technology has shipped in over 100 million handsets. In December 2009, we worked with Synaptics and other market leaders to present a mobile concept phone that demonstrates new usage models and user experience with integrated haptics. We intend to expand applications for TouchSense technologies in new user experiences in mobile phones.

For the years ended December 31, 2009, 2008, and 2007, respectively 29%, 17%, and 8% of our total revenues were generated from mobile communications.

TouchSense components include technologies for haptic touchscreens and programmable haptic rotary controls. In early 2009, Samsung launched its new dual touchscreen Digital Still Cameras (TL220 and TL225) and P3 personal media player with Immersion haptic feedback technology for touchscreen interactions. In 2008 Cue Acoustics announced and began shipping a premium AM/FM radio and iPod docking station that includes a TouchSense rotary control module as its primary control mechanism. In 2007, CTT-Net of Korea launched the world's first personal navigation devices, (PNDs) to use Immersion's TouchSense technology to provide tactile feedback for touchscreen interactions in a global positioning system, (GPS). We intend to expand applications for TouchSense technologies into a broader range of portable devices, including remote controls for home entertainment systems, medical diagnostic and therapeutic equipment, test and measurement equipment, portable terminals, game devices, and media players.

Automotive We have developed TouchSense technology for rotary controls, touchscreens, and touch surfaces appropriate for use in automobiles. TouchSense rotary technology can consolidate the control of multiple systems into a single module that provides the appropriate feel for each function. This allows the driver convenient access to many systems and supplies context-sensitive cues for operation. TouchSense touchscreen and touch surface technology provides tactile feedback for an otherwise unresponsive surface such as an all digital switch or touchscreen. Programmable haptic touchscreen, touch surface, and rotary controls of many types can be used to provide a space-saving, aesthetic look and a confirming response for the driver that can help reduce glance time.

We have also conducted various funded development efforts and provided tools and evaluation licenses to several major automobile manufacturers and suppliers interested in touch-enabled automobile controls.

We have licensed our TouchSense rotary technology for use in vehicle controls since 2002. Siemens VDO Automotive (now Continental) has licensed our technology for use in the high-end Volkswagen Phaeton sedan and Bentley cars. ALPS Electric, also a licensee, has produced a haptic rotary control that has been included in the Mercedes-Benz S-Class sedan. ALPS also produced a two-dimensional haptic control module called the Remote Touch controller in the Lexus RX 350 and 450h. These 2010 Lexus models were announced in November 2008 and launched in the U.S. in February 2009. Other licensees of TouchSense technology in the automotive industry include: Methode Electronics, Inc., a global designer and manufacturer of electronic component and subsystem devices; Visteon Corporation, a leading global automotive supplier that designs, engineers, and manufactures innovative climate, interior, electronic and lighting products for vehicle manufacturers; Volkswagen, Europe's largest automaker;

and SMK Corporation of Tokyo, a global manufacturer of electromechanical components. Since its launch in the first vehicle in 2001 our TouchSense technology has shipped in over 2.4 million vehicles.

For the years ended December 31, 2009, 2008, and 2007, respectively 6%, 9%, and 12% of our total revenues were from automotive customers.

Table of Contents

3D and Mechanical CAD Design During 2008, we sold three-dimensional and mechanical computer-aided design products that allow users to create three-dimensional computer models directly from physical objects and also to precisely measure manufactured parts. We also manufactured and sold the CyberGlove system. In addition, we manufactured and sold specialized products such as computer peripherals that incorporate advanced computer peripheral technologies. We divested these product lines by the second quarter of 2009.

Sales and Distribution

Sales of our products generally do not experience seasonal fluctuations, except that royalties from gaming peripherals, tend to be higher during the year-end holiday shopping season. However, there may be variations in the timing of revenue recognition from development contracts depending on numerous factors including contract milestones and operations scheduling. Our products typically incorporate readily available commercial components.

In the PC and video console gaming, consumer electronics, mobility, and automotive markets, we establish licensing relationships through our business development efforts.

In mobility, sales relationships must be established with operators, handset manufacturers, and content developers worldwide. We have signed license agreements with mobile handset manufacturers for the incorporation of TouchSense technology into certain mobile phone handsets. We have established relationships with CDMA platform developer QUALCOMM, Incorporated and with smartphone operating system developer Symbian, Ltd.

We employ a direct sales force in the United States, Europe, and Asia to license our TouchSense software products. In gaming, our sales force is also augmented through co-marketing arrangements. As part of our strategy to increase our visibility and promote our touch-enabling technology, our consumer-products licensees may also require our licensees to display the TouchSense technology logo on their end products.

We sell our touchscreen and touch surface products to OEMs and system integrators using a worldwide direct sales force. In addition, the technology is licensed to large system integrators and OEMs in automotive and other markets.

In the automotive market, we use a worldwide direct sales force to work with vehicle manufacturers and component suppliers. We have licensed our technology to leading automotive component suppliers including Methode, ALPS Electric, SMK, and Visteon as part of our strategy to speed adoption of our TouchSense technologies across the automotive industry.

In 2009, we began implementing a strategy to broaden and expand market penetration by licensing our TouchSense technology into several chip manufacturers, including Atmel, Cypress and IDT, with the goal that these licensees will broaden their product offerings with the addition of haptics.

Competition

With respect to touch-enabled consumer products, we are aware of several companies that claim to possess touch feedback technology applicable to the consumer market. In addition, we are aware of several companies that currently market unlicensed touch feedback products in consumer markets.

In the Touch line of business, the principal competitive factors are the strength of the intellectual property underlying the technology, the technological expertise and design innovation and the use, reliability and cost-effectiveness of the products. We believe we compete favorably in all these areas.

Several companies also currently market touch feedback products that are competitive to ours in non-consumer markets. These companies could also shift their focus to the consumer market. In addition, our licensees or other companies may develop products that compete with products employing our touch-enabling technologies, but are based on alternative technologies, or develop technologies that are similar or superior to our technologies, duplicate our technologies, or design around our patents. Many of our licensees, including Microsoft, LG Electronics, Logitech, Nokia, Samsung, and others have greater financial and technical resources upon which to draw in attempting to develop computer peripheral or mobile phone technologies that do not make use of our touch-enabling technologies.

Table of Contents

For licensed applications, our competitive position is partially dependent on the competitive positions of our licensees that pay a license and/or royalty. Our licensees' markets are highly competitive. We believe that the principal competitive factors in our licensees' markets include price, performance, user-centric design, ease-of-use, quality, and timeliness of products, as well as the manufacturer's responsiveness, capacity, technical abilities, established customer relationships, retail shelf space, advertising, promotional programs, and brand recognition. Touch-related benefits in some of these markets may be viewed simply as enhancements and compete with nontouch-enabled technologies.

Medical Line of Business

Products and Markets

We have developed numerous simulation technologies that can be used for medical training and testing. By enabling a medical simulator to more fully engage users' sense of touch, our technologies can support realistic simulations that are effective in teaching medical students, doctors, and other health professionals what it feels like to perform a given procedure. The use of our simulators allows these professionals to perfect their practice in an environment that poses no risks to patients, where mistakes have no dire consequences, and where animal or cadaver use is unnecessary.

In addition, organizations wanting to train customers or sales staff on medical procedures and on the use of new tools and medical devices engage us to develop special simulators. Examples of projects we have completed include simulation of venous access, minimally invasive vein harvesting, hysteroscopy, and aortic valve and pacemaker lead placement.

We have four medical simulation product lines: the Virtual IV system, which simulates needle-based procedures such as intravenous catheterization and phlebotomy; the Endoscopy AccuTouch® System, which simulates endoscopic procedures, including bronchoscopy and lower and upper GI procedures; the CathLabVR System, which simulates endovascular interventions including cardiac pacing, angiography, angioplasty, and carotid and coronary stent placement; and the LapVR System, which simulates minimally invasive procedures involving abdominal and pelvic organs. In addition, we sell an arthroscopy surgical simulator for certain arthroscopic surgical procedures on knees and shoulders based on GMV's insightArthroVR system.

These systems are used for training and educational purposes to enable health professionals to feel simulated forces that they would experience during actual medical procedures, such as encountering an arterial obstruction. The systems are designed to provide a realistic training environment augmented by real-time graphics that include anatomic models developed from actual patient data and high-fidelity sound that includes simulated patient responses.

All of our medical products are comprised of a hardware system, an interface device, and software modules that include several cases of increasing difficulty, allowing users to develop their skills by experiencing a broad range of pathologies in differing anatomical conditions.

We design each product line to maximize the number of procedures that can be simulated with minimal additional customer hardware investment. These systems then enable potential additional sales of software to the installed base of hardware systems. We currently have over 25 software modules available that replicate a range of medical procedures, such as intravenous catheterization, laparoscopy, bronchoscopy, colonoscopy, cardiac pacing, and carotid and coronary angioplasty.

In 2009, we entered the robotic surgical market by licensing our TouchSense technology to MAKO Surgical. We intend to pursue additional licensees to further expand our licensing business into this market.

In February 2010, we announced our intention to focus our medical line of business on licensing opportunities in medical simulation, robotic surgical devices, and other medical surgical devices. In March 2010 we entered into an agreement to sell certain assets of the Endoscopy, Endovascular, and Laparoscopy medical simulation product lines. See Note 19 of the consolidated financial statements.

Table of Contents

Sales and Distribution

Sales of these products may experience seasonal fluctuations related to teaching hospitals' summer residency programs. The latter may depend on numerous factors including contract milestones and timing of work performed against the contract.

With respect to medical simulation products, we employ a direct sales force and a network of international distributors that sell simulation systems to hospitals, colleges and universities, nursing schools, medical schools, emergency medical technician training programs, the military, medical device companies, and other organizations involved in procedural medicine. During 2009, we signed agreements with additional distributors for sales of our products in Europe, and Asia Pacific regions.

In the robotic surgical market and other medical licensing markets, we establish licensing relationships through our business development efforts.

For the years ended December 31, 2009, 2008, and 2007, respectively 41%, 40%, and 52%, of our total revenues were generated from the medical line of business. For the year ended December 31, 2007, 12% of our total revenues consisting of licensing, product revenue, or development revenues were from one customer.

Competition

There are several companies that currently sell simulation products to medical customers. Some simulators target the same minimally invasive procedures as do ours, while others sell mannequin-based systems for emergency response training. All simulators compete at some level for the same funding in medical institutions. Competitors include Symbionix USA Corporation, Mentice Corporation, Medical Education Technologies, Inc., and Medical Simulation Corporation. The principal competitive factors are the quality of the simulation for the type of medical procedure being simulated, technological sophistication, and price. We believe we compete favorably on all three.

Research and Development

Our success depends on our timely ability to invent, improve, and reduce the cost of our technologies in a timely manner; to design and develop products to meet specifications based on research and our understanding of customer needs and expectations; and to collaborate with our licensees who are integrating our technologies into theirs.

Immersion Engineering We have assembled a multi-disciplinary team of highly skilled engineers and scientists with the experience required for development of touch-enabling technology. The team's experience includes skills related to mechanical engineering, electrical engineering, embedded systems and firmware, control techniques, software, quality control, haptic content design, and project and process management. For medical simulations, we have assembled a team of experts who are skilled at modeling the anatomy and physiology of various medical cases, creating graphical renderings, designing haptic feedback, and devising advanced control algorithms to simulate realistic navigation for medical procedures, such as through the body's blood vessels.

Application Engineering & Technical Support We may provide application engineering and technical support during integration of our touch-enabling technology into customer products. To facilitate the validation and adoption of touch-enabling technology, we have developed various design kits. These kits may include actuators, mounting suggestions, controller boards, software libraries, programming examples, and documentation. Our application engineers support customer use of these design kits, including through phone and e-mail technical support and onsite training. Our application engineers and technical support staff may also help install our products, train customers on their use, and provide ongoing product support, particularly for medical training simulators.

Licensee Interaction Typically, collaborative development efforts are structured using a four-phase approach including Product Definition, Concept Development, Detail Design, and Production Design phases. This four-phase design process is typically used for designing new systems when the solution is not known beforehand. Each phase includes formal design reviews and documentation. The continuation of our development effort is contingent upon successful completion and acceptance of prior phases. This method helps ensure that the

Table of Contents

customer's financial risk is minimized and that project deliverables remain consistent with the goals established in the Product Definition phase.

Product Development Process For product development, we follow a product design process based on ISO 9001 guidance. This process starts with the typical marketing and product requirement stages, and once approved, typically moves on to product planning and design, prototyping, then alpha, beta, and first-run production development and testing stages. All of these stages are typically supported by documentation procedures and tools, design reviews, revision management, and other quality criteria. This careful, step-wise process helps us meet our design and quality requirements and to help make business decisions to continue, modify, or end product development. For our medical simulation products, we may add stages to help ensure our systems are very realistic and closely emulate the real medical procedures.

Research We have a dedicated team of experts in haptics and multimodal systems focused on investigating the next generations of haptic products for existing and new markets. The team has expertise in actuator design, mounting, control software, and human factors. We are also actively seeking and establishing worldwide research collaborations to reinforce our technical leadership and expand our innovative advancements. In addition, we have entered into numerous contracts with corporations and government agencies that help fund advanced research and development. Our government contracts permit us to retain ownership of the technology developed under the contracts, provided that we supply the applicable government agency a license to use the technology for noncommercial purposes.

For the years ended December 31, 2009, 2008, and 2007, research and development expenses were \$12.5 million, \$13.1 million, and \$10.4 million respectively.

Intellectual Property

We believe that intellectual property protection is crucial to our business. We rely on a combination of patents, copyrights, trade secrets, trademarks, nondisclosure agreements with employees and third parties, licensing arrangements, and other contractual agreements with third parties to protect our intellectual property.

Our failure to obtain or maintain adequate protection for our intellectual property rights for any reason could hurt our competitive position. There is no guarantee that patents will be issued from the patent applications that we have filed or may file. Our issued patents may be challenged, invalidated, or circumvented, and claims of our patents may not be of sufficient scope or strength, or issued in the proper geographic regions, to provide meaningful protection or any commercial advantage.

We and our wholly owned subsidiaries hold more than 800 issued or pending patents in the U.S. and other countries that cover various aspects of our hardware and software technologies. Some of our U.S. patents have begun to expire starting in 2007. We amortize our patents over their estimated useful lives, generally 10 years.

Where we believe it is appropriate, we will protect our intellectual property rights through the legal system. For example, we filed a complaint against Sony Computer Entertainment, Inc. and Sony Computer Entertainment of America, Inc. (collectively Sony Computer Entertainment) on February 11, 2002 in the U.S. District Court for the Northern District Court of California. On March 1, 2007, Immersion and Sony Computer Entertainment announced that the patent litigation at the U.S. Court of Appeals for the Federal Circuit was concluded. See Item 3. Legal Proceedings for further details and discussion of the litigation proceedings and conclusion.

On April 16, 2008, we announced that our wholly owned subsidiary, Immersion Medical, Inc., filed lawsuits for patent infringement in the United States District Court for the Eastern District of Texas against Mentice AB, Mentice SA, Symbionix USA Corp., and Symbionix Ltd. We intend to vigorously prosecute this lawsuit.

Investor Information

You can access financial and other information in the Investor Relations section of our Web site at www.immersion.com. We make available, on our Web site, free of charge, copies of our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to

Table of Contents

Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after filing such material electronically or otherwise furnishing it to the SEC.

The charters of our audit committee, our compensation committee, and our nominating/corporate governance committee, and our Code of Business Conduct and Ethics (including code of ethics provisions that apply to our principal executive officer, principal financial officer, controller, and senior financial officers) are also available at our Web site under Corporate Governance. These items are also available to any stockholder who requests them by calling +1 408.467.1900.

The SEC maintains an Internet site that contains reports, proxy, and information statements, and other information regarding issuers that file electronically with the SEC at www.sec.gov.

Employees

As of December 31, 2009, we had 124 full-time employees, including 54 in research and development, 29 in sales and marketing, and 41 in legal, finance, administration, and operations. As of that date, we also had 17 independent contractors. None of our employees are represented by a labor union, and we consider our employee relations to be positive.

Executive Officers

The following table sets forth information regarding our executive officers as of March 9, 2010.

Name	Position with the Company	Age
Victor Viegas	Interim Chief Executive Officer and member of the Board of Directors	53
Henry Hirvela	Interim Chief Financial Officer	58
G. Craig Vachon	Senior Vice President and General Manager, Touch Line of Business	46

Mr. Viegas has served as Interim Chief Executive Officer since October 2009 and as a member of the Board of Directors since October 2002. Mr. Viegas was the Company's Chief Executive Officer from October 2002 through April 2008, and President from February 2002 through April 2008. Mr. Viegas was also Chairman of the Board of Directors from October 2007 to February 2009. Mr. Viegas also served as Chief Financial Officer until February 2005, having joined the Company in August 1999 as Chief Financial Officer, Vice President, Finance. From June 1996 to August 1999, he served as Vice President, Finance and Administration and Chief Financial Officer of Macrovision Corporation, a developer and licensor of video and software copy protection technologies. From October 1986 to June 1996, he served as Vice President of Finance and Chief Financial Officer of Balco Incorporated, a manufacturer of advanced automotive service equipment. He holds a B.S. in Accounting and an M.B.A. from Santa Clara University. Mr. Viegas is also a Certified Public Accountant (inactive) in the State of California.

Mr. Hirvela has been serving as Interim Chief Financial Officer since October 2009 and as a consultant to the Company since August 2009. From May 2008 to November 2008, Mr. Hirvela served as executive vice president and Chief Financial Officer of BRE Properties, Inc., a real estate investment trust, where he was responsible for all financial functions including investor relations, SEC and internal reporting, internal controls, cost accounting, and budgeting and planning. Prior to that time, Mr. Hirvela served as Chief Financial Officer of VistaCare, Inc., a medical services company, from March 2006 to February 2008. Prior to this engagement, Mr. Hirvela founded Phoenix Management Partners, LLC in September 2002, during which time he served as President and CEO of Vigilant Systems, Inc. and served as Chairman and Director for Three-Five Systems, Inc., an electronic manufacturing services

company, from February 2003 to September 2006. From 1996 to 2000, Mr. Hirvela served as Vice President and Chief Financial Officer for Scottsdale-based Allied Waste Industries, Inc. Prior to this, Mr. Hirvela held a variety of management positions with Bank of America, Texas Eastern Corporation and Browning-Ferris Industries. He holds a bachelor's degree from the United States International University and an M.B.A. from the Johnson Graduate School of Management at Cornell University.

G. Craig Vachon joined Immersion in September 2008 as Vice President and General Manager, Mobility Group. Effective January 12, 2009. Mr. Vachon was promoted to Senior Vice President and General Manager of the Touch Line of Business. From February 2006 to September 2008, Mr. Vachon served as Vice President of Corporate Development of Atrua Technologies, Inc. where he was charged with identifying and evaluating organic and

Table of Contents

inorganic opportunities to expand the business and enhance shareholder value. From March 2004 to February 2006, Mr. Vachon served as the CEO and President of Varatouch Technology, Inc., which was acquired by Atrua Technologies, Inc. in February 2006. From November 2001 to November 2003, he served as CEO and Chairman of Sirenic, Inc. Mr. Vachon holds a B.S. in Communication and an M.S. in Business Communication from Emerson College.

Item 1A. Risk Factors

You should carefully consider the following risks and uncertainties, as well as other information in this report and our other SEC filings, in considering our business and prospects. If any of the following risks or uncertainties actually occurs, our business, financial condition, or results of operations could be materially adversely affected. The following risks and uncertainties are not the only ones facing us. Additional risks and uncertainties of which we are unaware or that we currently believe are immaterial could also materially adversely affect our business, financial condition, or results of operations. In any case, the trading price of our common stock could decline, and you could lose all or part of your investment. See also the Forward-looking Statements discussion in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Company Risks

If we fail to establish and maintain proper and effective internal controls and if we fail to remediate existing internal control deficiencies, our ability to produce accurate financial statements on a timely basis could be impaired, which would adversely affect our consolidated operating results, our ability to operate our business and our stock price.

In connection with the internal investigation conducted by the audit committee into revenue recognition of certain transactions in our Medical line of business, we determined that we did not have adequate internal financial and accounting controls to produce accurate and timely financial statements. Among the material weaknesses identified in our review, we determined that we had material weaknesses with respect to revenue recognition. In addition, as set forth in 2007, we determined that we had a material weakness in controls over accounting for income taxes. In reviewing our financial statements in preparation for the restatement we determined that we also had material weaknesses in our controls over accounting for stock-based compensation, the adoption of new accounting standards, inventory control management and accounting for fixed assets. For a further discussion of these material weaknesses, see Item 9A of this Report. Although we have begun implementing new processes and procedures to improve our internal controls, our Interim Chief Executive Officer and Interim Chief Financial Officer determined that as of December 31, 2009, our internal controls over financial reporting were not effective to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external reporting in accordance with generally accepted accounting principles in the United States.

Ensuring that we have adequate internal financial and accounting controls and procedures in place to produce accurate financial statements on a timely basis is a costly and time-consuming effort that needs to be re-evaluated frequently. Any failure on our part to remedy identified material weaknesses, or any additional delays or errors in our financial reporting, whether or not resulting from the identified material weakness relating to revenue recognition or any other material weaknesses, could cause our financial reporting to be unreliable and could have a material adverse effect on our business, results of operations, or financial condition and could have a substantial adverse impact on the trading price of our common stock.

We do not expect that our internal control over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Because of the inherent limitations in all control systems, no evaluation of

controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within our company will have been detected. As discussed in this Form 10-K, management has identified material weaknesses in the past and may identify additional material weaknesses in the future.

Table of Contents

We are required to comply with Section 404 of the Sarbanes Oxley Act of 2002. We have expended significant resources in developing the necessary documentation and testing procedures required by Section 404 of the Sarbanes Oxley Act. Our management has concluded that we did not maintain effective control over financial reporting as of December 31, 2009 based on the criteria in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. We cannot be certain that the actions we have taken and are taking to improve our internal controls over financial reporting will be sufficient or that we will be able to implement our planned processes and procedures in a timely manner. In addition, we may be unable to produce accurate financial statements on a timely basis. Any of the foregoing could cause investors to lose confidence in the reliability of our consolidated financial statements, which could cause the market price of our common stock to decline and make it more difficult for us to finance our operations and growth.

Our current litigation is expensive, disruptive, and time consuming, and will continue to be, until resolved, and regardless of whether we are ultimately successful, could adversely affect our business.

We are currently a party to various legal proceedings. Due to the inherent uncertainties of litigation, we cannot accurately predict how these cases will ultimately be resolved. In addition, it is possible that as a result of our internal investigation described elsewhere in this report, we may be subject to additional litigation and investigations by government authorities such as the SEC. We anticipate that currently pending litigation will continue to be costly and that future litigation or investigations will result in additional legal expenses, and there can be no assurance that we will be successful or able to recover the costs we incur in connection with litigation or investigations. We expense litigation and investigatory costs as incurred, and only accrue for costs that have been incurred but not paid to the vendor as of the financial statement date. Litigation and investigations have diverted, and are likely to continue to divert, the efforts and attention of some of our key management and personnel. As a result, until such time as it is resolved or concluded, litigation and investigations could adversely affect our business. Further, any unfavorable outcome could adversely affect our business. For additional background on this and our other litigation, please see Notes 11 and 16 to the consolidated financial statements in Part I and Item 3. Legal Proceedings of this Part I.

The uncertain global economic environment could reduce our revenues and could have an adverse effect on our financial condition and results of operations.

The current global economic recession could materially hurt our business in a number of ways including, longer sales and renewal cycles, delays in adoption of our products or technologies, increased risk of competition, increased risk of inventory obsolescence, higher overhead costs as a percentage of revenue, delays in signing or failing to sign customer agreements, or signing customer agreements at reduced purchase levels. In addition, our suppliers, customers, potential customers, and business partners are facing similar challenges, which could materially and adversely affect the level of business they conduct with us or in the level of sales of products that include our technology. The current economic downturn may lead to a reduction in corporate, university, or government budgets for research and development in sectors including the automotive, aerospace, mobility, and medical sectors, which use our products. Sales of our products or technology may be adversely affected by cuts in these research and development budgets. Furthermore, a prolonged tightening of the credit markets could significantly impact our ability to liquidate investments or reduce the rate of return on investments.

We had an accumulated deficit of \$99 million as of December 31, 2009, have a history of losses, expect to experience losses in the future, and may not achieve or maintain profitability in the future.

Since 1997, we have incurred losses in all but four quarters. We need to generate significant ongoing revenue to return to profitability. We anticipate that we will continue to incur expenses as we:

continue to develop our technologies;

increase our sales and marketing efforts;

attempt to expand the market for touch-enabled technologies and products and change our business;

protect and enforce our intellectual property;

Table of Contents

- pursue strategic relationships;
- incur costs related to pending litigation;
- acquire intellectual property or other assets from third-parties; and
- invest in systems and processes to manage our business.

If our revenues grow more slowly than we anticipate or if our operating expenses exceed our expectations, we may not achieve or maintain profitability.

We have little or no control or influence on our licensees' design, manufacturing, promotion, distribution, or pricing of their products incorporating our touch-enabling technologies, upon which we generate royalty revenue.

A key part of our business strategy is to license our intellectual property to companies that manufacture and sell products incorporating our touch-enabling technologies. Sales of those products generate royalty and license revenue for us. For the years ended December 31, 2009, 2008 and 2007, 51%, 51% and 39%, respectively, of our total revenues were royalty and license revenues. We do not control or influence the design, manufacture, quality control, promotion, distribution, or pricing of products that are manufactured and sold by our licensees, nor can we control consolidation within an industry which could either reduce the number of licensing products available or reduce royalty rates for the combined licensees. In addition, we generally do not have commitments from our licensees that they will continue to use our technologies in current or future products. As a result, products incorporating our technologies may not be brought to market, achieve commercial acceptance, or otherwise generate meaningful royalty revenue for us. For us to generate royalty revenue, licensees that pay us per-unit royalties must manufacture and distribute products incorporating our touch-enabling technologies in a timely fashion and generate consumer demand through marketing and other promotional activities. If our licensees' products fail to achieve commercial success or if products are recalled because of quality control problems, our revenues will not grow and could decline.

Peak demand for products that incorporate our technologies, especially in the video console gaming and computer gaming peripherals market, typically occurs in the fourth calendar quarter as a result of increased demand during the year-end holiday season. If our licensees do not ship products incorporating our touch-enabling technologies in a timely fashion or fail to achieve strong sales in the fourth quarter of the calendar year, we may not receive related royalty and license revenue.

Due to recent turnover, our executive management team has limited experience working together and if there are difficulties within this team, it could impede the execution of our business strategy.

Recently, we have experienced a number of changes in our executive team. Our success will depend to a significant extent on the management team's ability to implement a successful strategy, to successfully lead and motivate our employees, and to work effectively together and with the board of directors. If this leadership team is not successful, our ability to execute our business strategy would be impeded.

We have experienced significant change in our business, and we cannot assure you that these changes will result in increased revenue or profitability.

Our business has undergone significant changes in recent periods, including the divestiture of our 3D business, new management, consolidation of our medical business and personnel changes and focus on additional target markets. In addition, we recently announced our intention to transition from the medical simulation products business. These

changes have required, and will likely in the future require, significant investments of cash and other resources, as well as management's time and attention and have placed significant strains on our managerial, financial, engineering, or other resources. We cannot assure you that these efforts will result in growing our business successfully or in increased operating performance.

Table of Contents

We may not be able to continue to derive significant revenues from makers of peripherals for popular video gaming platforms.

A significant portion of our gaming royalty revenues come from third-party peripheral makers who make licensed gaming products designed for use with popular video game console systems from Microsoft, Sony, and Nintendo. Video game console systems are closed, proprietary systems, and video game console system makers typically impose certain requirements or restrictions on third-party peripheral makers who wish to make peripherals that will be compatible with a particular video game console system. If third-party peripheral makers cannot or are not allowed to obtain or satisfy these requirements or restrictions, our gaming royalty revenues could be significantly reduced. Furthermore, should a significant video game console maker choose to omit touch-enabling capabilities from its console system or somehow restrict or impede the ability of third parties to make touch-enabling peripherals, it may very well lead our gaming licensees to stop making products with touch-enabling capabilities, thereby significantly reducing our gaming royalty revenues.

Under the terms of our agreement with Sony, Sony receives a royalty-free license to our worldwide portfolio of patents. This license permits Sony to make, use, and sell hardware, software, and services covered by our patents in its PS1, PS2, and PS3 systems for a fixed license payment. The PS3 console system was launched in late 2006 in the United States and Japan without force feedback capability. Sony has since released new PS3 controllers with vibration feedback. We do not know to what extent Sony will allow third-party peripheral makers to make licensed PS3 gaming products with vibration feedback to interface with the PS3 console. To the extent Sony selectively limits their licensing to leading third-party controller makers to make PS3 controllers with vibration feedback, our licensing revenue from third-party PS3 peripherals will continue to be severely limited. Sony continues to sell the PS2, and our third party licensees continue to sell licensed PS2 peripherals. However, U.S. sales of PS2 peripherals continue to decline as more consumers switch to the PS3 console system and other next-generation console systems like the Nintendo Wii and Microsoft Xbox 360.

Both the Microsoft Xbox 360 and Nintendo Wii include touch-enabling capabilities. For the Microsoft Xbox 360 video console system launched in November 2005, Microsoft has, to date, not yet broadly licensed third parties to produce peripherals for its Xbox 360 game console. To the extent Microsoft does not fully license third parties, Microsoft's share of all aftermarket Xbox 360 game controller sales will likely remain high or increase, which we expect will limit our gaming royalty revenue. Additionally, Microsoft is now making touch-enabled steering wheel products covered by their royalty-free, perpetual, irrevocable license to our worldwide portfolio of patents that could compete with our licensees' current products for which we earn per unit royalties.

Because we have a fixed payment license with Microsoft, our royalty revenue from licensing in the gaming market and other consumer markets has declined and may further do so if Microsoft increases its volume of sales of touch-enabled gaming products and consumer products at the expense of our other licensees.

Under the terms of our present agreement with Microsoft, Microsoft receives a royalty-free, perpetual, irrevocable license to our worldwide portfolio of patents. This license permits Microsoft to make, use, and sell hardware, software, and services, excluding specified products, covered by our patents. We will not receive any further revenues or royalties from Microsoft under our current agreement with Microsoft. Microsoft has a significant share of the market for touch-enabled console gaming computer peripherals and is pursuing other consumer markets such as mobile phones, PDAs, and portable music players. Microsoft has significantly greater financial, sales, and marketing resources, as well as greater name recognition and a larger customer base than some of our other licensees. In the event that Microsoft increases its share of these markets, our royalty revenue from other licensees in these market segments might decline.

We generate revenues from touch-enabling components that are sold and incorporated into third-party products. We have little or no control or influence over the design, manufacture, promotion, distribution, or pricing of those third-party products.

Part of our business strategy is to sell components that provide touch feedback capability in products that other companies design, manufacture, and sell. Sales of these components generate product revenue. However, we do not control or influence the design, manufacture, quality control, promotion, distribution, or pricing of products that are

Table of Contents

manufactured and sold by those customers that buy these components. In addition, we generally do not have commitments from customers that they will continue to use our components in current or future products. As a result, products incorporating our components may not be brought to market, meet quality control standards, or achieve commercial acceptance. If the customers fail to stimulate and capitalize upon market demand for their products that include our components, or if products are recalled because of quality control problems, our revenues will not grow and could decline.

The terms in our agreements may be construed by our licensees in a manner that is inconsistent with the rights that we have granted to other licensees, or in a manner that may require us to incur substantial costs to resolve conflicts over license terms.

We have entered into, and we expect to continue to enter into, agreements pursuant to which our licensees are granted rights under our technology and intellectual property. These rights may be granted in certain fields of use, or with respect to certain market sectors or product categories, and may include exclusive rights or sublicensing rights. We refer to the license terms and restrictions in our agreements, including, but not limited to, field of use definitions, market sector, and product category definitions, collectively as License Provisions.

Due to the continuing evolution of market sectors, product categories, and licensee business models, and to the compromises inherent in the drafting and negotiation of License Provisions, our licensees may, at some time during the term of their agreements with us, interpret License Provisions in their agreements in a way that is different from our interpretation of such License Provisions, or in a way that is in conflict with the rights that we have granted to other licensees. Such interpretations by our licensees may lead to claims that we have granted rights to one licensee which are inconsistent with the rights that we have granted to another licensee.

In addition, after we enter into an agreement, it is possible that markets and/or products, or legal and/or regulatory environments, will evolve in a manner that we did not foresee or was not foreseeable at the time we entered into the agreement. As a result, in any agreement, we may have granted rights that will preclude or restrict our exploitation of new opportunities that arise after the execution of the agreement.

If we are unable to enter into new licensing arrangements with our existing licensees and with additional third-party manufacturers for our touch-enabling technologies, our royalty revenue may not grow.

Our revenue growth is significantly dependent on our ability to enter into new licensing arrangements. Our failure to enter into new or renewal of licensing arrangements will cause our operating results to suffer. We face numerous risks in obtaining new licenses on terms consistent with our business objectives and in maintaining, expanding, and supporting our relationships with our current licensees. These risks include:

the lengthy and expensive process of building a relationship with potential licensees;

the competition we may face with the internal design teams of existing and potential licensees;

difficulties in persuading product manufacturers to work with us, to rely on us for critical technology, and to disclose to us proprietary product development and other strategies;

difficulties with persuading potential licensees who may have developed their own intellectual property or licensed intellectual property from other parties in areas related to ours to license our technology versus continuing to develop their own or license from other parties;

challenges in demonstrating the compelling value of our technologies in new applications like mobile phones, portable devices, and touchscreens;

difficulties in persuading existing and potential licensees to bear the development costs and risks necessary to incorporate our technologies into their products;

difficulties in obtaining new licensees for yet-to-be commercialized technology because their suppliers may not be ready to meet stringent quality and parts availability requirements;

inability to sign new gaming licenses if the video console makers choose not to license third parties to make peripherals for their new consoles; and

Table of Contents

reluctance of content developers, mobile phone manufacturers, and service providers to sign license agreements without a critical mass of other such inter-dependent supporters of the mobile phone industry also having a license, or without enough phones in the market that incorporate our technologies.

Our consolidation of and transition from our Medical operations and other restructurings may not be successful, and may negatively impact our business.

In May 2009, we moved the operations of our Medical line of business from Maryland to our headquarters in San Jose, California and we have also reduced our workforce in recent periods. Consolidations and business restructurings involve numerous risks and uncertainties, including, but not limited to: the potential loss of key employees, customers and business partners; market uncertainty related to our future business plans; the incurrence of unexpected expenses or charges; diversion of management attention from other key areas of our business; negative impacts on employee morale; and other potential dislocations and disruptions to the business. In addition, if our business expands, it may be more difficult for us to attract additional personnel and develop the resources we would need to support a larger customer base.

We also intend to transition from our medical simulation products business which could continue to disrupt our overall business. For the years ended December 31, 2009, 2008 and 2007, 41%, 40% and 52%, respectively, of our total revenues were from our medical line of business. Accordingly, if we are unable to manage this consolidation and transition effectively, our overall business and operating results could be materially and adversely affected.

Litigation regarding intellectual property rights could be expensive, disruptive, and time consuming; could result in the impairment or loss of portions of our intellectual property; and could adversely affect our business.

Intellectual property litigation, whether brought by us or by others against us, has caused us to expend, and may cause us to expend in future periods, significant financial resources as well as divert management's time and efforts. From time to time, we initiate claims against third parties that we believe infringe our intellectual property rights. We intend to enforce our intellectual property rights vigorously and may initiate litigation against parties that we believe are infringing our intellectual property rights if we are unable to resolve matters satisfactorily through negotiation. Litigation brought to protect and enforce our intellectual property rights could be costly, time-consuming, and difficult to pursue in certain venues, and distracting to management and potential customers and could result in the impairment or loss of portions of our intellectual property. In addition, any litigation in which we are accused of infringement may cause product shipment delays, require us to develop non-infringing technologies, or require us to enter into royalty or license agreements even before the issue of infringement has been decided on the merits. If any litigation were not resolved in our favor, we could become subject to substantial damage claims from third parties and indemnification claims from our licensees. We could be enjoined from the continued use of the technologies at issue without a royalty or license agreement. Royalty or license agreements, if required, might not be available on acceptable terms, or at all. If a third party claiming infringement against us prevailed, and we may not be able to develop non-infringing technologies or license the infringed or similar technologies on a timely and cost-effective basis, our expenses could increase and our revenues could decrease.

While we attempt to avoid infringing known proprietary rights of third parties, third parties may hold, or may in the future be issued, patents that could be infringed by our products or technologies. Any of these third parties might make a claim of infringement against us with respect to the products that we manufacture and the technologies that we license. From time to time, we have received letters from companies, several of which have significantly greater financial resources than we do, asserting that some of our technologies, or those of our licensees, infringe their intellectual property rights. Certain of our licensees may receive similar letters from these or other companies from time to time. Such letters or subsequent litigation may influence our licensees' decisions whether to ship products

incorporating our technologies. In addition, such letters may cause a dispute between our licensees and us over indemnification for the infringement claim. Any of these notices, or additional notices that we or our licensees could receive in the future from these or other companies, could lead to litigation against us, either regarding the infringement claim or the indemnification claim.

Table of Contents

We have acquired patents from third parties and also license some technologies from third parties. We must rely upon the owners of the patents or the technologies for information on the origin and ownership of the acquired or licensed technologies. As a result, our exposure to infringement claims may increase. We generally obtain representations as to the origin and ownership of acquired or licensed technologies and indemnification to cover any breach of these representations. However, representations may not be accurate and indemnification may not provide adequate compensation for breach of the representations. Intellectual property claims against our licensees, or us, whether or not they have merit, could be time-consuming to defend, cause product shipment delays, require us to pay damages, harm existing license arrangements, or require us or our licensees to cease utilizing the technologies unless we can enter into licensing agreements. Licensing agreements might not be available on terms acceptable to us or at all. Furthermore, claims by third parties against our licensees could also result in claims by our licensees against us for indemnification.

The legal principles applicable to patents and patent licenses continue to change and evolve. Legislation and judicial decisions that make it easier for patent licensees to challenge the validity, enforceability, or infringement of patents, or make it more difficult for patent licensors to obtain a permanent injunction, obtain enhanced damages for willful infringement, or to obtain or enforce patents, may adversely affect our business and the value of our patent portfolio. Furthermore, our prospects for future revenue growth through our royalty and licensing based businesses could be diminished.

Product liability claims could be time-consuming and costly to defend and could expose us to loss.

Our products or our licensees' products may have flaws or other defects that may lead to personal or other injury claims. If products that we or our licensees sell cause personal injury, property injury, financial loss, or other injury to our or our licensees' customers, the customers or our licensees may seek damages or other recovery from us. Although we intend to transition from the medical products business, we could face product liability claims for products that we have sold or that any successor may sell in the future. Defending any claims against us, regardless of merit, would be time-consuming, expensive to defend, and distracting to management, and could result in damages and injure our reputation, the reputation of our technology and services, and/or the reputation of our products, or the reputation of our licensees or their products. This damage could limit the market for our and our licensees' products and harm our results of operations. In addition, if our business liability insurance coverage proves inadequate or future coverage is unavailable on acceptable terms or at all, our business, operating results and financial condition could be adversely affected.

In the past, manufacturers of peripheral products including certain gaming products such as joysticks, wheels, or gamepads, have been subject to claims alleging that use of their products has caused or contributed to various types of repetitive stress injuries, including carpal tunnel syndrome. While we have not experienced any product liability claims to date, we could face such claims in the future, which could harm our business and reputation. Although our license agreements typically contain provisions designed to limit our exposure to product liability claims, existing or future laws or unfavorable judicial decisions could limit or invalidate the provisions.

Our products are complex and may contain undetected errors, which could harm our reputation and future product sales.

Any failure to provide high quality and reliable products, whether caused by our own failure or failures of our suppliers or OEM customers, could damage our reputation and reduce demand for our products. Our products have in the past contained, and may in the future contain, undetected errors or defects. Some errors in our products may only be discovered after a product has been shipped to customers. Any errors or defects discovered in our products after commercial release could result in loss of revenue, loss of customers, and increased service and warranty costs, any of which could adversely affect our business.

Table of Contents

The nature of some of our products may also subject us to export control regulation by the U.S. Department of State and the Department of Commerce. Violations of these regulations can result in monetary penalties and denial of export privileges.

Our sales to customers in some areas outside the United States could be subject to government export regulations or restrictions that prohibit us from selling to customers in some countries or that require us to obtain licenses or approvals to export such products internationally. Delays or denial of the grant of any required license or approval, or changes to the regulations, could make it difficult or impossible to make sales to foreign customers in some countries and could adversely affect our revenue. In addition, we could be subject to fines and penalties for violation of these export regulations if we were found in violation. Such violation could result in penalties, including prohibiting us from exporting our products to one or more countries, and could materially and adversely affect our business.

Compliance with directives that restrict the use of certain materials may increase our costs and limit our revenue opportunities.

Our products and packaging must meet all safety, electrical, labeling, marking, or other requirements of the countries into which we ship products or our resellers sell our products. We have to assess each product and determine whether it complies with the requirements of local regulations or whether they are exempt from meeting the requirements of the regulations. If we determine that a product is not exempt and does not comply with adopted regulations, we will have to make changes to the product or its documentation if we want to sell that product into the region once the regulations become effective. Making such changes may be costly to perform and may have a negative impact on our results of operations. In addition, there can be no assurance that the national enforcement bodies of the regions adopting such regulations will agree with our assessment that certain of our products and documentation comply with or are exempt from the regulations. If products are determined not to be compliant or exempt, we will not be able to ship them in the region that adopts such regulations until such time that they are compliant, and this may have a negative impact on our revenue and results of operations.

Because personal computer peripheral products that incorporate our touch-enabling technologies currently work with Microsoft's operating system software, our costs could increase and our revenues could decline if Microsoft modifies its operating system software.

Our hardware and software technologies for personal computer peripheral products that incorporate our touch-enabling technologies are currently compatible with Microsoft's Windows 2000, Windows Me, Windows XP, and Windows Vista operating systems, including DirectX, Microsoft's entertainment API. Modifications and new versions of Microsoft's operating system and APIs (including DirectX and Windows 7) may require that we and/or our licensees modify the touch-enabling technologies to be compatible with Microsoft's modifications or new versions, and this could cause delays in the release of products by our licensees. If Microsoft modifies its software products in ways that limit the use of our other licensees' products, our costs could increase and our revenues could decline.

In addition, Microsoft announced that its new product, Windows 7, will feature a new multi-touch input function, allowing users to use multiple fingers simultaneously to interact with touch surfaces. Enabling multi-location touch-feedback will require us to innovate hardware and software, enable Windows 7 API's with multi-touch output support, and work with our licensees and third parties to integrate such features. There are feasibility risks with both hardware and software, and there may be potential delays in the revenue growth of haptically-enabled multi touch surfaces.

If we are unable to develop open source compliant products, our ability to license our technologies and generate revenues would be impaired.

We have seen, and believe that we will continue to see, an increase in customers requesting that we develop products that will operate in an open source environment. Developing open source compliant products, without imperiling the intellectual property rights upon which our licensing business depends, may prove difficult under

Table of Contents

certain circumstances, thereby placing us at a competitive disadvantage for new product designs. As a result, our revenues may not grow and could decline.

The market for certain touch-enabling technologies and touch-enabled products is at an early stage and if market demand does not develop, we may not achieve or sustain revenue growth.

The market for certain of our touch-enabling technologies and certain of our licensees' touch-enabled products is at an early stage. If we and our licensees are unable to develop demand for touch-enabling technologies and touch-enabled products, we may not achieve or sustain revenue growth. We cannot accurately predict the growth of the markets for these technologies and products, the timing of product introductions, or the timing of commercial acceptance of these products.

Even if our touch-enabling technologies and our licensees' touch-enabled products are ultimately widely adopted, widespread adoption may take a long time to occur. The timing and amount of royalties and product sales that we receive will depend on whether the products marketed achieve widespread adoption and, if so, how rapidly that adoption occurs.

We expect that we will need to pursue extensive and expensive marketing and sales efforts to educate prospective licensees, component customers, and end users about the uses and benefits of our technologies and to persuade software developers to create software that utilizes our technologies. Negative product reviews or publicity about our company, our products, our licensees' products, haptic features, or haptic technology in general could have a negative impact on market adoption, our revenue, and/or our ability to license our technologies in the future.

If we fail to protect and enforce our intellectual property rights, our ability to license our technologies and generate revenues would be impaired.

Our business depends on generating revenues by licensing our intellectual property rights and by selling products that incorporate our technologies. We rely on our significant patent portfolio to protect our proprietary rights. If we are not able to protect and enforce those rights, our ability to obtain future licenses or maintain current licenses and royalty revenue could be impaired. In addition, if a court or the patent office were to limit the scope, declare unenforceable, or invalidate any of our patents, current licensees may refuse to make royalty payments, or they may choose to challenge one or more of our patents. It is also possible that:

our pending patent applications may not result in the issuance of patents;

our patents may not be broad enough to protect our proprietary rights; and

effective patent protection may not be available in every country in which we or our licensees do business.

We also rely on licenses, confidentiality agreements, other contractual agreements, and copyright, trademark, and trade secret laws to establish and protect our proprietary rights. It is possible that:

laws and contractual restrictions may not be sufficient to prevent misappropriation of our technologies or deter others from developing similar technologies; and

policing unauthorized use of our patented technologies, trademarks, and other proprietary rights would be difficult, expensive, and time-consuming, within and particularly outside of the United States of America.

Certain terms or rights granted in our license agreements or our development contracts may limit our future revenue opportunities.

While it is not our general practice to sign license agreements that provide exclusive rights for a period of time with respect to a technology, field of use, and/or geography, or to accept similar limitations in product development contracts, we have entered into such agreements and may in the future. Although additional compensation or other benefits may be part of the agreement, the compensation or benefits may not adequately compensate us for the limitations or restrictions we have agreed to as that particular market develops. Over the life of the exclusivity period, especially in markets that grow larger or faster than anticipated, our revenue may be limited and less than

Table of Contents

what we could have achieved in the market with several licensees or additional products available to sell to a specific set of customers.

If we fail to develop new or enhanced technologies for new applications and platforms, we may not be able to create a market for our technologies or our technologies may become obsolete, and our ability to grow and our results of operations might be harmed.

Our initiatives to develop new and enhanced technologies and to commercialize these technologies for new applications and new platforms may not be successful or timely. Any new or enhanced technologies may not be favorably received by consumers and could damage our reputation or our brand. Expanding our technologies could also require significant additional expenses and strain our management, financial, and operational resources.

Moreover, technology products generally have relatively short product life cycles and our current products may become obsolete in the future. Our ability to generate revenues will be harmed if:

we fail to develop new technologies or products;

the technologies we develop infringe on third-party patents or other third-party rights;

our new technologies fail to gain market acceptance; or

our current products become obsolete or no longer meet new regulatory requirements.

Our ability to achieve revenue growth also depends on our continuing ability to improve and reduce the cost of our technologies and to introduce these technologies to the marketplace in a timely manner. If our development efforts are not successful or are significantly delayed, companies may not incorporate our technologies into their products and our revenue growth may be impaired.

We have limited engineering, customer service, technical support, quality assurance and manufacturing resources to design and fulfill favorable product delivery schedules and sufficient levels of quality in support of our different product areas. Products and services may not be delivered in a timely way, with sufficient levels of quality, or at all, which may reduce our revenue.

Engineering, customer service, technical support, quality assurance, and manufacturing resources are deployed against a variety of different projects and programs to provide sufficient levels of quality necessary for channels and customers. Success in various markets may depend on timely deliveries and overall levels of sustained quality and customer service. Failure to provide favorable product and program deliverables and quality and customer service levels, or provide them at all, may disrupt channels and customers, harm our brand, and reduce our revenues.

The higher cost of products incorporating our touch-enabling technologies may inhibit or prevent their widespread adoption.

Personal computer and console gaming peripherals, mobile devices, touchscreens, and automotive and industrial controls incorporating our touch-enabling technologies can be more expensive than similar competitive products that are not touch-enabled. Although major manufacturers, such as ALPS Electric Co., BMW, LG Electronics, Logitech, Microsoft, Nokia, Samsung, and Sony have licensed our technologies, the greater expense of development and production of products containing our touch-enabling technologies, together with the higher price to the end customer, may be a significant barrier to their widespread adoption and sale.

Medical licensing and certification authorities may not recommend or require use of our technologies for training and/or testing purposes and certain legislation that may encourage the use of simulators may not become law, significantly slowing or inhibiting the market penetration of our medical simulation technologies.

Several key medical certification bodies, including the American Board of Internal Medicine (ABIM), the American Board of Surgery (ABS), and the American College of Cardiology (ACC), have great influence in recommending particular medical methodologies, including medical training and testing methodologies, for use by

Table of Contents

medical professionals. In the event that the ABIM and the ACC, as well as other, similar bodies, do not endorse medical simulation products in general, or our products or products incorporating our technology in particular, as a training and/or testing tool, and in addition in the event that the Enhancing Simulation Act of 2009 does not pass into law, market penetration for our products or products incorporating our technology in the medical market could be significantly and adversely affected.

The markets in which we participate or may target in the future are intensely competitive, and if we do not compete effectively, our operating results could be harmed.

Our target markets are rapidly evolving and highly competitive. Many of our competitors and potential competitors are larger and have greater name recognition, much longer operating histories, larger marketing budgets, and significantly greater resources than we do, and with the introduction of new technologies and market entrants, we expect competition to intensify in the future. We believe that competition in these markets will continue to be intense and that competitive pressures will drive the price of our products and our licensees' products downward. These price reductions, if not offset by increases in unit sales or productivity, will cause our revenues to decline. If we fail to compete effectively, our business will be harmed. Some of our principal competitors offer their products or services at a lower price, which has resulted in pricing pressures. If we are unable to achieve our target pricing levels, our operating results would be negatively impacted. In addition, pricing pressures and increased competition generally could result in reduced sales, reduced margins, losses, or the failure of our application suite to achieve or maintain more widespread market acceptance, any of which could harm our business.

We face competition from internal design teams of existing and potential OEM customers. In addition, as a result of their licenses to our patent portfolios, we could face competition from Microsoft and Sony. Our licensees or other third parties may also seek to develop products using our intellectual property or develop alternative designs that attempt to circumvent our intellectual property or that they believe do not require a license under our intellectual property. These potential competitors may have significantly greater financial, technical, and marketing resources than we do, and the costs associated with asserting our intellectual property rights against such products and such potential competitors could be significant. Moreover, if such alternative designs were determined by a court not to require a license under our intellectual property rights, competition from such unlicensed products could limit or reduce our revenues.

Additionally, if haptic technology gains market acceptance, more research by universities and/or corporations or other parties may be performed potentially leading to strong intellectual property positions by third parties in certain areas of haptics or the launch of haptics products before we commercialize our own technology.

Many of our current and potential competitors, including Microsoft, are able to devote greater resources to the development, promotion, and sale of their products and services. In addition, many of our competitors have established marketing relationships or access to larger customer bases, distributors, and other business partners. As a result, our competitors might be able to respond more quickly and effectively than we can to new or changing opportunities, technologies, standards or customer requirements. Further, some potential customers, particularly large enterprises, may elect to develop their own internal solutions. For all of these reasons, we may not be able to compete successfully against our current and future competitors.

Winning business is subject to a competitive selection process that can be lengthy and requires us to incur significant expense, and we may not be selected.

Our primary focus is on winning competitive bid selection processes, known as "design wins," so that haptics will be included in our customers' equipment. These selection processes can be lengthy and can require us to incur significant design and development expenditures. We may not win the competitive selection process and may never generate any

revenue despite incurring significant design and development expenditures. Because we typically focus on only a few customers in a product area, the loss of a design win can sometimes result in our failure to get haptics added to new generation products. This can result in lost sales and could hurt our position in future competitive selection processes because we may not be perceived as being a technology leader.

After winning a product design for one of our customers, we may still experience delays in generating revenue from our products as a result of the lengthy development and design cycle. In addition, a delay or cancellation of a

Table of Contents

customer's plans could significantly adversely affect our financial results, as we may have incurred significant expense and generated no revenue. Finally, if our customers fail to successfully market and sell their equipment it could materially adversely affect our business, financial condition, and results of operations as the demand for our products falls.

Automobiles incorporating our touch-enabling technologies are subject to lengthy product development periods, making it difficult to predict when and whether we will receive automotive royalties.

The product development process for automobiles is very lengthy, sometimes longer than four years. We may not earn royalty revenue on our automotive technologies unless and until automobiles featuring our technologies are shipped to customers, which may not occur until several years after we enter into an agreement with an automobile manufacturer or a supplier to an automobile manufacturer. Throughout the product development process, we face the risk that an automobile manufacturer or supplier may delay the incorporation of, or choose not to incorporate, our technologies into its automobiles, making it difficult for us to predict the automotive royalties we may receive, if any. After the product launches, our royalties still depend on market acceptance of the vehicle or the option packages if our technology is an option (for example, a navigation unit), which is likely to be determined by many factors beyond our control.

A limited number of customers account for a significant portion of our revenue, and the loss of major customers could harm our operating results.

Our 3 largest customers accounted for approximately 34% of our total net revenue for 2009. We cannot be certain that customers that have accounted for significant revenue in past periods, individually or as a group, will continue to generate revenue in any future period. If we lose a major customer or group of customers, our revenue could decline if we are unable to replace revenue from other sources.

Our international expansion efforts subject us to additional risks and costs.

We intend to expand international activities. International operations are subject to a number of difficulties and special costs, including:

compliance with multiple, conflicting and changing governmental laws and regulations;

laws and business practices favoring local competitors;

foreign exchange and currency risks;

difficulty in collecting accounts receivable or longer payment cycles;

import and export restrictions and tariffs;

difficulties staffing and managing foreign operations;

difficulties and expense in enforcing intellectual property rights;

business risks, including fluctuations in demand for our products and the cost and effort to conduct international operations and travel abroad to promote international distribution and overall global economic conditions;

multiple conflicting tax laws and regulations; and

political and economic instability.

Our international operations could also increase our exposure to international laws and regulations. If we cannot comply with foreign laws and regulations, which are often complex and subject to variation and unexpected changes, we could incur unexpected costs and potential litigation. For example, the governments of foreign countries might attempt to regulate our products and services or levy sales or other taxes relating to our activities. In addition, foreign countries may impose tariffs, duties, price controls, or other restrictions on foreign currencies or trade barriers, any of which could make it more difficult for us to conduct our business.

Table of Contents

We might be unable to retain or recruit necessary personnel, which could slow the development and deployment of our technologies.

Our ability to develop and deploy our technologies and to sustain our revenue growth depends upon the continued service of our management and other key personnel, many of whom would be difficult to replace. Furthermore, we believe that there are a limited number of engineering and technical personnel that are experienced in haptics. Management and other key employees may voluntarily terminate their employment with us at any time upon short notice. The loss of management or key personnel could delay product development cycles or otherwise harm our business.

We believe that our future success will also depend largely on our ability to attract, integrate, and retain sales, support, marketing, and research and development personnel. Competition for such personnel is intense, and we may not be successful in attracting, integrating, and retaining such personnel. Given the protracted nature of if, how, and when we collect royalties on new design contracts, it may be difficult to craft compensation plans that will attract and retain the level of salesmanship needed to secure these contracts. Additionally some of our executive officers and key employees hold stock options with exercise prices above the current market price of our common stock or that are largely vested. Each of these factors may impair our ability to retain the services of our executive officers and key employees. Our technologies are complex and we rely upon the continued service of our existing personnel to support licensees, enhance existing technologies, and develop new technologies.

If our facilities were to experience catastrophic loss, our operations would be seriously harmed.

Our facilities could be subject to a catastrophic loss such as fire, flood, earthquake, power outage, or terrorist activity. A substantial portion of our research and development activities, manufacturing, our corporate headquarters, and other critical business operations are located near major earthquake faults in San Jose, California, an area with a history of seismic events. An earthquake at or near our facilities could disrupt our operations, delay production and shipments of our products or technologies, and result in large expenses to repair and replace the facility. While we believe that we maintain insurance sufficient to cover most long-term potential losses at our facilities, our existing insurance may not be adequate for all possible losses. In addition, California has experienced problems with its power supply in recent years. As a result, we have experienced utility cost increases and may experience unexpected interruptions in our power supply that could have a material adverse effect on our sales, results of operations, and financial condition.

Investment Risks

Our quarterly revenues and operating results are volatile, and if our future results are below the expectations of public market analysts or investors, the price of our common stock is likely to decline.

Our revenues and operating results are likely to vary significantly from quarter to quarter due to a number of factors, many of which are outside of our control and any of which could cause the price of our common stock to decline.

These factors include:

- the establishment or loss of licensing relationships;
- the timing and recognition of payments under fixed and/or up-front license agreements;
- the timing of work performed under development agreements;

the timing of our expenses, including costs related to litigation, stock-based awards, acquisitions of technologies, or businesses;

the timing of introductions and market acceptance of new products and product enhancements by us, our licensees, our competitors, or their competitors;

our ability to develop and improve our technologies;

Table of Contents

our ability to attract, integrate, and retain qualified personnel;

seasonality in the demand for our products or our licensees' products; and

our ability to build or ship products on a timely basis.

Our stock price may fluctuate regardless of our performance.

The stock market has experienced extreme volatility that often has been unrelated or disproportionate to the performance of particular companies. These market fluctuations may cause our stock price to decline regardless of our performance. The market price of our common stock has been, and in the future could be, significantly affected by factors such as: actual or anticipated fluctuations in operating results; announcements of technical innovations; announcements regarding litigation in which we are involved; changes by game console manufacturers to not include touch-enabling capabilities in their products; new products or new contracts; sales or the perception in the market of possible sales of large number of shares of our common stock by insiders or others; stock repurchase activity; changes in securities analysts' recommendations; changing circumstances regarding competitors or their customers; governmental regulatory action; developments with respect to patents or proprietary rights; inclusion in or exclusion from various stock indices; and general market conditions. In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has been initiated against that company.

Provisions in our charter documents and Delaware law could prevent or delay a change in control, which could reduce the market price of our common stock.

Provisions in our certificate of incorporation and bylaws may have the effect of delaying or preventing a change of control or changes in our board of directors or management, including the following:

- our board of directors is classified into three classes of directors with staggered three-year terms;
- only our chairperson of the board of directors, a majority of our board of directors or 10% or greater stockholders are authorized to call a special meeting of stockholders;
- our stockholders can only take action at a meeting of stockholders and not by written consent;
- vacancies on our board of directors can be filled only by our board of directors and not by our stockholders;
- our restated certificate of incorporation authorizes undesignated preferred stock, the terms of which may be established and shares of which may be issued without stockholder approval; and
- advance notice procedures apply for stockholders to nominate candidates for election as directors or to bring matters before an annual meeting of stockholders.

In addition, certain provisions of Delaware law may discourage, delay, or prevent someone from acquiring or merging with us. These provisions could limit the price that investors might be willing to pay in the future for shares.

We may engage in acquisitions that could dilute stockholders' interests, divert management attention, or cause integration problems.

As part of our business strategy, we have in the past and may in the future, acquire businesses or intellectual property that we feel could complement our business, enhance our technical capabilities, or increase our intellectual property portfolio. The pursuit of potential acquisitions may divert the attention of management and cause us to incur various expenses in identifying, investigating, and pursuing suitable acquisitions, whether or not they are consummated.

If we consummate acquisitions through the issuance of our securities, our stockholders could suffer significant dilution. Acquisitions could also create risks for us, including:

- unanticipated costs associated with the acquisitions;

- use of substantial portions of our available cash to consummate the acquisitions;

- diversion of management's attention from other business concerns;

Table of Contents

difficulties in assimilation of acquired personnel or operations

failure to realize the anticipated benefits of acquired intellectual property or other assets;

charges associated with amortization of acquired assets or potential charges for write-down of assets associated with unsuccessful acquisitions;

potential intellectual property infringement claims related to newly acquired product lines; and

potential costs associated with failed acquisition efforts.

Any acquisitions, even if successfully completed, might not generate significant additional revenue or provide any benefit to our business.

As our business grows, such growth may place a significant strain on our management and operations and, as a result, our business may suffer.

We plan to continue expanding our business, and any significant growth could place a significant strain on our management systems, infrastructure and other resources. We recently transitioned the preparation of all of our internal reporting to upgraded management information systems and are in the process of implementing this system for all of our subsidiaries. If we encounter problems with the implementation of these systems, we may have difficulties preparing or tracking internal information, which could adversely affect our financial results. We will need to continue to invest the necessary capital to upgrade and improve our operational, financial and management reporting systems. If our management fails to manage our growth effectively, we could experience increased costs, declines in product quality, or customer satisfaction, which could harm our business.

Item 1B. *Unresolved Staff Comments*

None.

Item 2. *Properties*

We lease a facility in San Jose, California of approximately 48,000 square feet, which serves as our corporate headquarters and includes our sales, marketing, administration, research and development, manufacturing, and distribution functions for the Touch operating segment. Products produced in San Jose include several of our touch interface products, including rotary encoders, components to enable tactile feedback in touchscreens, and various arcade gaming products. The facility is also used for the Medical operating segment including the sales, marketing, administration, research and development, manufacturing, and distribution functions for the Endoscopy AccuTouch System, the CathLab VR System, Virtual IV System, the Lap VR System, and the insightArthroVR arthroscopy surgical simulator. The lease for this property expires in June 2014 and can be extended to June 2018.

We lease a facility in Montreal, Quebec, Canada of approximately 6,416 square feet, for our subsidiary, Immersion Canada, Inc. The facility is used for research and development and administration functions. The lease for this property expires in October 2015.

We lease office space in Seocho-gu, Seoul, Korea. The facility is used for sales and marketing support and research and development functions. This lease expires in November 2011.

We lease office space in Espoo, Finland for use by our sales and technical support function. The lease agreement is cancelable upon a three month notice.

We believe that our existing facilities are adequate to meet our current needs.

Item 3. Legal Proceedings

In re Immersion Corporation Initial Public Offering Securities Litigation

We are involved in legal proceedings relating to a class action lawsuit filed on November 9, 2001 in the U.S. District Court for the Southern District of New York, *In re Immersion Corporation Initial Public Offering Securities Litigation*, No. Civ. 01-9975 (S.D.N.Y.), related to In re Initial Public Offering Securities Litigation,

Table of Contents

No. 21 MC 92 (S.D.N.Y.). The named defendants are Immersion and three of our current or former officers or directors (the Immersion Defendants), and certain underwriters of our November 12, 1999 initial public offering (IPO). Subsequently, two of the individual defendants stipulated to a dismissal without prejudice.

The operative amended complaint is brought on purported behalf of all persons who purchased our common stock from the date of our IPO through December 6, 2000. It alleges liability under Sections 11 and 15 of the Securities Act of 1933 and Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, on the grounds that the registration statement for the IPO did not disclose that: (1) the underwriters agreed to allow certain customers to purchase shares in the IPO in exchange for excess commissions to be paid to the underwriters; and (2) the underwriters arranged for certain customers to purchase additional shares in the aftermarket at predetermined prices. The complaint also appears to allege that false or misleading analyst reports were issued. The complaint does not claim any specific amount of damages.

Similar allegations were made in other lawsuits challenging over 300 other initial public offerings and follow-on offerings conducted in 1999 and 2000. The cases were consolidated for pretrial purposes. On February 19, 2003, the District Court ruled on all defendants' motions to dismiss. The motion was denied as to claims under the Securities Act of 1933 in the case involving us as well as in all other cases (except for 10 cases). The motion was denied as to the claim under Section 10(b) as to us, on the basis that the complaint alleged that we had made acquisition(s) following the IPO. The motion was granted as to the claim under Section 10(b), but denied as to the claim under Section 20(a), as to the remaining individual defendant.

In September 2008, all of the parties to the lawsuits reached a settlement, subject to documentation and approval of the District Court. The Immersion Defendants would not be required to contribute to the settlement. Subsequently, an underwriter defendant filed for bankruptcy and other underwriter defendants were acquired. On April 2, 2009, final documentation evidencing the settlement was presented to the District Court for approval. If the settlement is not approved by the District Court, we intend to defend the lawsuit vigorously.

Immersion Corporation v. Mentice AB, Mentice SA, Symbionix USA Corp., and Symbionix Ltd.

On April 16, 2008, we announced that our wholly owned subsidiary, Immersion Medical, Inc., filed lawsuits for patent infringement in the United States District Court for the Eastern District of Texas against Mentice AB, Mentice SA, Symbionix USA Corp., and Symbionix Ltd (collectively the Defendants), seeking damages and injunctive relief. On July 11, 2008, Mentice AB and Mentice SA (collectively, Mentice) answered the complaint by denying the material allegations and alleging counterclaims seeking a judicial declaration that the asserted patents were invalid, unenforceable, or not infringed. On July 11, 2008, Symbionix USA Corp. and Symbionix Ltd, (collectively, Symbionix) filed a motion to stay or dismiss the lawsuit, and a motion to transfer venue for convenience to the Northern District of Ohio. On September 29, 2009, the court granted Symbionix's motion to transfer the case. On December 7, 2009, the case was transferred to the Northern District of Ohio. The court has not set a trial schedule. We intend to vigorously prosecute this lawsuit.

In re Immersion Corporation Securities Litigation

In September and October 2009, various putative shareholder class action and derivative complaints were filed in federal and state court against us and certain current and former Immersion directors and officers.

On September 2, 2009, a securities class action complaint was filed in the United States District Court for the Northern District of California against us and certain of our current and former directors and officers. Over the following five weeks, four additional class action complaints were filed. (One of these four actions was later voluntarily dismissed.) The securities class action complaints name us and certain current and former Immersion

directors and officers as defendants and allege violations of federal securities laws based on our issuance of allegedly misleading financial statements. The various complaints assert claims covering the period from May 2007 through July 2009 and seek compensatory damages allegedly sustained by the purported class members.

On December 21, 2009, these class actions were consolidated by the court as *In Re Immersion Corporation Securities Litigation*. On the same day, the court appointed a lead plaintiff and lead plaintiff's counsel. The lead

Table of Contents

plaintiff will file a consolidated complaint following our restatement of financial statements to which defendants will then have an opportunity to file responsive pleadings.

In re Immersion Corporation Derivative Litigation

On September 15, 2009, a putative shareholder derivative complaint was filed in the United States District Court for the Northern District of California, purportedly on behalf of us and naming certain of our current and former directors and officers as individual defendants. Thereafter, two additional putative derivative complaints were filed in the same court.

The derivative complaints arise from the same or similar alleged facts as the federal securities actions and seek to bring state law causes of action on behalf of us against the individual defendants for breaches of fiduciary duty, gross negligence, abuse of control, gross mismanagement, breach of contract, waste of corporate assets, unjust enrichment, as well as for violations of federal securities laws. The federal derivative complaints seek compensatory damages, corporate governance changes, unspecified equitable and injunctive relief, the imposition of a constructive trust, and restitution. On November 17, 2009, the court consolidated these actions as *In re Immersion Corporation Derivative Litigation* and appointed lead counsel. Plaintiffs will file a consolidated derivative complaint following our restatement of financial statements, to which defendants will then have the opportunity to file responsive pleadings.

Shaw v. Richardson et al.

On October 7, 2009, a putative shareholder derivative complaint was filed in the Superior Court of the State of California for the County of Santa Clara, purportedly on behalf of us, seeking compensatory damages, equitable and injunctive relief, and restitution. The complaint names certain current and former directors and officers of us as individual defendants. This complaint arises from the same or similar alleged facts as the federal securities actions and seeks to bring causes of action on behalf of us against the individual defendants for breaches of fiduciary duty, waste of corporate assets and unjust enrichment. The court has issued an order staying this action.

We cannot predict the ultimate outcome of the above-mentioned federal and state actions, and we are unable to estimate any potential liability we may incur.

Table of Contents**PART II****Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***

Our common stock is traded on the Nasdaq Global Market under the symbol IMMR. The following table sets forth, for the periods indicated, the high and low sales prices for our common stock on such market.

	High	Low
Fiscal year ended December 31, 2009		
Fourth Quarter	\$ 4.96	\$ 3.42
Third Quarter	\$ 4.66	\$ 3.41
Second Quarter	\$ 5.17	\$ 2.80
First Quarter	\$ 6.10	\$ 2.31
Fiscal year ended December 31, 2008		
Fourth Quarter	\$ 6.35	\$ 2.72
Third Quarter	\$ 7.92	\$ 5.22
Second Quarter	\$ 11.82	\$ 6.43
First Quarter	\$ 13.38	\$ 6.61

On March 3, 2010, the closing price was \$4.53 and there were 142 holders of record of our common stock. Because many of such shares are held by brokers and other institutions on behalf of stockholders, we are unable to estimate the total number of stockholders represented by these record holders.

Issuer Repurchases of Equity Securities

On November 1, 2007, our Board of Directors authorized a share repurchase program of up to \$50,000,000. This share repurchase authorization has no expiration date and does not require us to repurchase a specific number of shares. The timing and amount of any share repurchase will depend on the share price, corporate and regulatory requirements, economic and market conditions, and other factors. The repurchase authorization may be modified, suspended, or discontinued at any time. We have currently stopped repurchasing shares under this share repurchase program.

Dividend Policy

We have never declared or paid any cash dividends on our common stock and we do not anticipate paying cash dividends in the foreseeable future. We currently intend to retain any earnings to fund future growth, product development, and operations.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the consolidated financial statements and notes thereto.

This Management's Discussion and Analysis of Financial Condition and Results of Operations includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The forward-looking statements involve risks and uncertainties. Forward-looking statements are identified by words such as anticipates, believes, expects, intends, will, and other similar expressions. However, these words are not the only way we identify forward-looking statements. In addition, any statements, which refer to expectations, projections, or other characterizations of future events or circumstances, are forward-looking statements. Actual results could differ materially from those projected in the forward-looking statements as a result of a number of factors, including those set forth in Item 1A, Risk Factors, those described elsewhere in this report, and those described in our other reports filed with the SEC. We caution you not to place undue reliance on these forward-looking statements, which speak only as of the date of this report, and we undertake no obligation to release the results of any revisions to these forward-looking statements that could occur after the filing of this report.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates and assumptions, including those related to revenue recognition, stock-based compensation, bad debts, inventory reserves, short-term investments, warranty obligations, patents and intangible assets, contingencies, and litigation. We base our estimates and assumptions on historical experience and on various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates and assumptions.

We believe the following are our most critical accounting policies as they require our significant judgments and estimates in the preparation of our consolidated financial statements:

Revenue Recognition

We recognize revenues in accordance with applicable accounting standards, including Accounting Standards Codification (ASC) 605-10-S99, Revenue Recognition (ASC 605-10-S99); ASC 605-25, Multiple Element Arrangements (ASC 605-25); and ASC 985-605, Software-Revenue Recognition (ASC 985-605). We derive our revenues from three principal sources: royalty and license fees, product sales, and development contracts. As described below, significant management judgments and estimates must be made and used in connection with the revenue recognized in any accounting period. Material differences may result in the amount and timing of our revenue for any period based on the judgments and estimates made by our management. Specifically, in connection with each transaction involving our products, we must evaluate whether: (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred, (iii) the fee is fixed or determinable, and (iv) collectibility is probable. We apply these criteria as discussed below.

Persuasive evidence of an arrangement exists: For a license arrangement, we require a written contract, signed by both the customer and us. For a stand-alone product sale, we require a purchase order or other form of

written agreement with the customer.

Delivery has occurred. We deliver software and product to our customers physically and deliver software also electronically. For physical deliveries not related to software, our transfer terms typically include transfer of title and risk of loss at our shipping location. For electronic deliveries, delivery occurs when we provide the customer access codes or keys that allow the customer to take immediate possession of the software.

Table of Contents

The fee is fixed or determinable. Our arrangement fee is based on the use of standard payment terms which are those that are generally extended to the majority of customers. For transactions involving extended payment terms, we deem these fees not to be fixed or determinable for revenue recognition purposes and revenue is deferred until the fees become due and payable.

Collectibility is probable. To recognize revenue, we must judge collectibility of the arrangement fees, which we do on a customer-by-customer basis pursuant to our credit review policy. We typically sell to customers with whom we have a history of successful collection. For new customers, we evaluate the customer's financial position and ability to pay. If we determined that collectibility is not probable based upon our credit review process or the customer's payment history, we recognize revenue when payment is received.

Royalty and license revenue We recognize royalty revenue based on royalty reports or related information received from the licensee and when collectibility is deemed reasonably assured. The terms of the royalty agreements generally require licensees to give us notification of royalties within 30 to 45 days of the end of the quarter during which the sales occur. We recognize license fee revenue for licenses to our intellectual property when earned under the terms of the agreements. Generally, revenue is recognized on a straight-line basis over the expected term of the license.

Product sales We recognize revenue from the sale of products and the license of associated software if any, and expense all related costs of products sold, once delivery has occurred and customer acceptance, if required, has been achieved. We have determined that the license of software for the medical simulation products is incidental to the product as a whole. We typically grant our customers a warranty which guarantees that our products will substantially conform to our current specifications for generally twelve months from the delivery date pursuant to the terms of the arrangement. Historically, warranty-related costs have not been significant. Extended warranty contract revenues are recognized ratably over the contractual period.

Development contracts and other revenue Development contracts and other revenue is comprised of professional services (consulting services and/or development contracts). Professional services revenues are recognized under the proportional performance accounting method based on physical completion of the work to be performed or completed performance method. A provision for losses on contracts is made, if necessary, in the period in which the loss becomes probable and can be reasonably estimated. Revisions in estimates are reflected in the period in which the conditions become known. To date, such losses have not been significant.

Multiple element arrangements We enter into multiple element arrangements in which customers purchase a time-based license which include a combination of software and/or intellectual property licenses, professional services and to a lesser extent, post contract customer support. For arrangements that include software and professional services, the services are not essential to the functionality of the software, and customers typically purchase consulting services to facilitate the adoption of our technology, but they may also decide to use their own resources or appoint other professional service organizations to perform these services. Contract fees for professional services and post-contract customer support are not frequently sold on a stand-alone basis and as such, we do not have sufficient evidence of fair value. For these arrangements, revenue is recognized over the period of the ongoing obligation which is generally consistent with the contractual term of the time-based license.

Our revenue recognition policies are significant because our revenues are a key component of our results of operations. In addition, our revenue recognition determines the timing of certain expenses, such as commissions and royalties.

Stock-based Compensation Stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense on a straight-line basis over the requisite service period, which is the vesting

period.

Table of Contents

Valuation and amortization method We use the Black-Scholes model, single-option approach to determine the fair value of stock options, and ESPP shares. All share-based payment awards are amortized on a straight-line basis over the requisite service periods of the awards, which are generally the vesting periods. The determination of the fair value of stock-based payment awards on the date of grant using an option-pricing model is affected by our stock price as well as assumptions regarding a number of complex and subjective variables. These variables include actual and projected employee stock option exercise behaviors that impact the expected term and forfeiture rates, our expected stock price volatility over the term of the awards, risk-free interest rate, and expected dividends.

If factors change and we employ different assumptions for estimating stock-based compensation expense in future periods, or if we decide to use a different valuation model, the future periods may differ significantly from what we have recorded in the current period and could materially affect our operating results.

The Black-Scholes model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable, characteristics not present in our option grants and ESPP shares. Existing valuation models, including the Black-Scholes and lattice binomial models, may not provide reliable measures of the fair values of our stock-based compensation. Consequently, there is a risk that our estimates of the fair values of our stock-based compensation awards on the grant dates may bear little resemblance to the actual values realized upon the exercise, expiration, early termination, or forfeiture of those stock-based payments in the future. Certain stock-based payments, such as employee stock options, may expire and be worthless or otherwise result in zero intrinsic value as compared to the fair values originally estimated on the grant date and reported in our financial statements. Alternatively, value may be realized from these instruments that are significantly higher than the fair values originally estimated on the grant date and reported in our financial statements. There currently is no market-based mechanism or other practical application to verify the reliability and accuracy of the estimates stemming from these valuation models, nor is there a means to compare and adjust the estimates to actual values.

See Note 10 to the consolidated financial statements for further information regarding stock compensation disclosures.

Accounting for Income Taxes

We use the asset and liability method of accounting for income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized and are reversed at such time that realization is believed to be more likely than not.

Our judgments, assumptions, and estimates relative to the current provision for income tax take into account current tax laws, our interpretation of current tax laws, and possible outcomes of current and future audits conducted by foreign and domestic tax authorities. We have established reserves for income taxes to address potential exposures involving tax positions that could be challenged by tax authorities. Although we believe our judgments, assumptions, and estimates are reasonable, changes in tax laws or our interpretation of tax laws and any future tax audits could significantly impact the amounts provided for income taxes in our consolidated financial statements.

Our assumptions, judgments, and estimates relative to the value of a deferred tax asset take into account predictions of the amount and category of future taxable income, such as income from operations or capital gains income. Actual operating results and the underlying amount and category of income in future years could render inaccurate our current assumptions, judgments, and estimates of recoverable net deferred taxes. Any of the assumptions, judgments, and estimates mentioned above could cause our actual income tax obligations to differ from our estimates, thus materially impacting our financial position and results of operations.

Short-term Investments

Our short-term investments consist primarily of highly liquid commercial paper and government agency securities purchased with an original or remaining maturity of greater than 90 days on the date of purchase. We

Table of Contents

classify all debt securities with readily determinable market values as available-for-sale. Even though the stated maturity dates of these debt securities may be one year or more beyond the balance sheet date, we have classified all debt securities as short-term investments as they are reasonably expected to be realized in cash or sold within one year. These investments are carried at fair market value with unrealized gains and losses considered to be temporary in nature reported as a separate component of other comprehensive income (loss) within stockholders' equity.

We follow the accounting guidance to assess whether our investments with unrealized loss positions are other than temporarily impaired. Realized gains and losses and declines in value judged to be other than temporary are determined based on the specific identification method and are reported in the consolidated statement of operations. Factors considered in determining whether a loss is temporary include the length of time and extent to which fair value has been less than the cost basis, the financial condition and near-term prospects of the investee, and our intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value.

Effective January 1, 2008, we adopted the provisions of ASC 820, Fair Value Measurements and Disclosures (ASC 820), which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements required under other accounting pronouncements. ASC 820 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. ASC 820 also requires that a fair value measurement reflect the assumptions market participants would use in pricing an asset or liability based on the best information available. Assumptions include the risks inherent in a particular valuation technique (such as a pricing model) and/or the risks inherent in the inputs to the model.

In February 2008, the FASB revised ASC 820, that delays the effective date of ASC 820 for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually) until fiscal years beginning after November 15, 2008. The delay is intended to allow the FASB and constituents additional time to consider the effect of various implementation issues that have arisen, or that may arise, from the application of ASC 820. The adoption of this guidance did not have a material impact on the Company's consolidated results of operations, financial position or cash flows. Further information about short-term investments may be found in Note 2 to the consolidated financial statements.

Recovery of Accounts Receivable

We maintain allowances for doubtful accounts for estimated losses resulting from our review and assessment of our customers' ability to make required payments. If the financial condition of one or more of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances might be required.

Inventory Valuation

We reduce our inventory value for estimated obsolete and slow moving inventory in an amount equal to the difference between the cost of inventory and the net realizable value based upon assumptions about future demand and market conditions. If actual future demand and market conditions are less favorable than those projected by management, additional inventory write-downs may be required.

Intangible Assets

We have acquired patents and other intangible assets. In addition, we capitalize the external legal and filing fees associated with patents and trademarks. We assess the recoverability of our intangible assets, and we must make assumptions regarding estimated future cash flows and other factors to determine the fair value of the respective assets that affect our consolidated financial statements. If these estimates or related assumptions change in the future, we

may be required to record impairment charges for these assets. We amortize our intangible assets related to patents and trademarks, once they are issued, over their estimated useful lives, generally 10 years. Future changes in the estimated useful life could affect the amount of future period amortization expense that we will incur. During the year ended December 31, 2009, we capitalized costs associated with patents and trademarks of \$2.3 million. Our total amortization expense for the same period was \$829,000.

Table of Contents

Restructuring Costs

We calculate our Restructuring costs based upon our estimate of workforce reduction costs, asset impairment charges, and other appropriate charges resulting from a restructuring. Based on our assumptions, judgments, and estimates, we determine whether we need to record an impairment charge to reduce the value of the asset carried on our balance sheet to its estimated fair value. Assumptions, judgments and estimates about future values are complex and often subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy.

The above listing is not intended to be a comprehensive list of all of our accounting policies. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP, with no need for management's judgment in their application. There are also areas in which management's judgment in selecting any available alternative would not produce a materially different result.

Results of Operations

Overview of 2009

We continued to invest in research, development, sales, and marketing in our key business segments. Key events in the year were as follows:

We believe that our haptics technology is included in 100 million phones worldwide.

We completed the divestiture of our 3D product line. Operations of our 3D product line have been retrospectively classified as discontinued operations in our consolidated statement of operations.

In conjunction with moving our medical operating segment to San Jose, our reduction of workforce from our Montreal medical business operations, and other workforce reductions in our Touch segment, we had restructuring costs of \$1.5 million. We had physical inventory write offs of \$593,000 primarily consisting of physical count to book adjustments of medical equipment parts. We also recognized fixed asset write offs of demo equipment of \$682,000 primarily resulting from a reconciliation of the fixed asset records to the physical inventory at the time of the move. In addition we had inventory obsolescence and scrap expenses of \$1.3 million primarily of medical equipment parts.

In February, 2010, we announced plans to focus primarily on a licensing model in the future. In March 2010 we entered into an agreement to sell certain assets of the Endoscopy, Endovascular, and Laparoscopy medical simulation product lines. Correspondingly, we plan to pursue the medical segment via a licensing approach. Under a licensing approach, we anticipate that the manufacturing and selling of simulator products to the medical training industry will not be an ongoing focus for us, and therefore, we hope to achieve certain cost reductions in 2010. Revenue in 2009 for these product lines was approximately \$6 million. In 2010, we also expect to continue to focus on the execution of plans in our established businesses to increase revenue and make selected investments for longer-term growth areas. Our success could be limited by several factors, including the current macro-economic climate, the timely release of our new products and our licensees' products, continued market acceptance of our products and technology, the introduction of new products by existing or new competitors, and the cost of ongoing litigation. For a further discussion of these and other risk factors, see Item 1A Risk Factors.

Table of Contents

The following table sets forth our statement of operations data as a percentage of total revenues:

	Years Ended December 31,		
	2009	2008	2007
Revenues:			
Royalty and license	51.2%	50.9%	39.4%
Product sales	43.0	39.7	46.9
Development contracts and other	5.8	9.4	13.7
Total revenues	100.0	100.0	100.0
Costs and expenses:			
Cost of product sales (exclusive of amortization of intangibles shown separately below)	29.9	26.9	24.1
Sales and marketing	48.1	55.3	34.1
Research and development	45.1	46.7	34.5
General and administrative	78.3	68.8	42.1
Amortization and impairment of intangibles	3.2	3.2	3.8
Litigation settlements, conclusions, and patent license		74.1	(447.6)
Restructuring costs	5.3	0.5	
Total costs and expenses	209.9	275.5	(309.0)
Operating income (loss)	(109.9)	(175.5)	409.0
Change in fair value of warrant liability	1.9		
Interest and other income	2.8	15.0	22.0
Interest and other expense		(0.9)	(3.4)
Income (loss) from continuing operations before provision for income taxes	(105.2)	(161.4)	427.6
Benefit (provision) for income taxes	1.1	(18.2)	(42.6)
Income (loss) from continuing operations	(104.1)	(179.6)	385.0
Discontinued operations, net of provision for income taxes	2.1	(2.6)	3.5
Net income (loss)	(102.0)%	(182.2)%	388.5%

Total revenue	\$ 27,725	(1)%	\$ 27,981	(7)%	\$ 30,140

Fiscal 2009 Compared to Fiscal 2008

Total Revenue Our total revenue for the year ended December 31, 2009 decreased by \$256,000, or 1%, to \$27.7 million, from \$28.0 million in 2008.

Royalty and license revenue Royalty and license revenue is comprised of royalties earned on sales by our licensees and license fees charged for our intellectual property portfolio. Royalty and license revenue decreased by \$52,000 or less than 0.5% from 2008 to 2009. The decrease in royalty and license revenue was primarily due to a

Table of Contents

decrease in royalty and license revenue from gaming and automotive licensees partially offset by increased revenue from licensees of mobile and medical devices. Revenues from gaming customers in 2008 which did not recur in 2009 included previously deferred revenues from ISLLC totaling \$1.1 million which was recognized after we concluded our litigation with it. In addition, BMW has removed our technology from certain controller systems, which also caused automotive royalties to decline in 2009 compared to 2008. We plan on focusing most of our future business on a licensing model for both the touch and medical segments.

Based on our litigation conclusion and business agreement entered into with Sony Computer Entertainment in March 2007, we are recognizing a minimum of \$30.0 million as royalty and license revenue from March 2007 through March 2017, which amount to approximately \$750,000 per quarter. The revenue from our third-party peripheral licensees included in royalty and license revenue has generally continued to decline primarily due to i) the reduced sales of past generation video console systems due to the launches of the next-generation console models from Microsoft Xbox 360, Sony PlayStation 3 (PS3), and Nintendo Wii, and ii) the decline in third-party market share of aftermarket game console controllers due to the launch of next-generation peripherals by manufacturers of console systems.

Sony has, to date, not yet broadly licensed third parties to produce peripherals of the PS3 system. To the extent Sony discourages or impedes third-party controller makers from making more PS3 controllers with vibration feedback, our licensing revenue from third-party PS3 peripherals will continue to be severely limited.

For the Microsoft Xbox 360 video console system launched in November 2005, Microsoft has, to date, not broadly licensed third parties to produce game controllers. Because our gaming royalties come mainly from third-party manufacturers, unless Microsoft broadens its licenses to third-party controller makers, particularly with respect to wireless controllers for Xbox 360, our gaming royalty revenue may decline. Additionally, Microsoft is now making touch-enabled wheels covered by its royalty-free, perpetual, irrevocable license to our worldwide portfolio of patents that could compete with our licensees' current or future products for which we earn per unit royalties. For the Nintendo Wii video console system launched in December 2006, Nintendo has, to date, not yet broadly licensed third parties to produce game controllers for its Wii game console. Because our gaming royalties come mainly from third-party manufacturers, unless Nintendo broadens its licenses to third-party controller makers, our gaming royalty revenue may decline.

Product sales Product sales increased by \$814,000 or 7% from 2008 to 2009. The increase in product sales was primarily due to an increase in medical product sales of \$983,000 partially offset by a decrease in touch product sales of \$169,000. Increased medical product sales were mainly due to the recognition of \$1.0 million in revenue from an international medical customer for whom revenues could not be recognized until the agreement with the customer was terminated in the third quarter of 2009 partially offset by decreases of other medical product sales. Touch interface product sales decreased primarily due to reduced sales of touchscreen and touch panel components and arcade entertainment products. In March 2010 we entered into an agreement to sell certain assets of the Endoscopy, Endovascular, and Laparoscopy medical simulation product lines. See Note 19 of the consolidated financial statements. Revenue in 2009 for these product lines was approximately \$6 million. Medical product sales are expected to significantly decline in the future since we will be transitioning to a license model and will have only one product line remaining, the Virtual IV product line.

Development contracts and other revenue Development contracts and other revenue decreased by \$1.0 million or 39% from 2008 to 2009. Development contracts and other revenue is comprised of revenue on commercial contracts. The decrease was mainly attributable to a decrease in medical contract revenue of \$916,000 due to a lower volume of work performed under medical contracts in 2009 compared to 2008. We continue to transition our engineering resources from certain commercial development contract efforts to development efforts that focus on leveraging our existing sales and channel distribution capabilities. Accordingly, we do not expect development contract revenue to grow significantly in the future.

For the year ended December 31, 2009, revenues generated in North America, Europe, Far East, and Rest of the World represented 47%, 14%, 37%, and 2%, respectively, compared to 67%, 15%, 15%, and 3%, respectively, for the year ended December 31, 2008. The shift in revenues among regions was mainly due to an increase in Touch royalty revenue and Medical product sales in the Far East; a decrease in Touch royalty revenue, medical product revenue, and medical contract revenue in North America; a decrease in Touch royalty revenue from Europe; and a

Table of Contents

decrease in medical product sales from the Rest of the World. We mainly attribute the increase in revenue in the Far East to increased shipments by licensees of mobile devices, partially due to the addition of increased international sales and support personnel in 2008, and recognition of \$1.0 million from an international medical customer as discussed above. The decrease in Touch royalty revenue in North America is partially attributable to previously deferred revenues from ISLLC totaling \$1.1 million which was recognized in 2008 after we concluded our litigation with them. Three customers accounted for 34% of our sales in 2009 and two customers accounted for 22% of our sales in 2008. As medical product sales are expected to decline in the future since these offerings will no longer be a core strategy, we may see our sales concentrated in fewer large customers in the future.

Fiscal 2008 Compared to Fiscal 2007

Total Revenue Our total revenue for the year ended December 31, 2008 decreased by \$2.1 million, or 7%, to \$28.0 million, from \$30.1 million in 2007.

Royalty and license revenue Royalty and license revenue increased by \$2.4 million or 20% from 2007 to 2008 and was all from our Touch segment. The increase in royalty and license revenue was primarily a result of an increase in mobile device license and royalty revenue of \$2.1 million and an increase in gaming royalties of \$1.2 million, offset in part by a decrease in royalties for touch interface products of \$942,000.

Mobile device license and royalty revenue increased primarily due to the increase in the shipment of TouchSense enabled phones by LG Electronics that began in the second quarter of 2007, the signing of a new license contract with mobile device manufacturer Nokia at the end of the second quarter of 2007, and the shipment of additional TouchSense enabled phones by our licensees in 2008.

The increase in gaming royalties compared to 2007 was mainly due to previously deferred royalty revenues from ISLLC totaling \$1.0 million which was recognized after we concluded our litigation with them. There was also an increase in royalty and license revenue from an increase in sales of new steering wheel products from Logitech. In addition, there was a full year of royalty and license revenue from first-party gaming licensee Sony Computer Entertainment that increased revenue year over year. Although the revenue from our third-party peripheral licensees had generally continued to decline primarily due to i) the reduced sales of past generation video console systems due to the launches of the next-generation console models from Microsoft (Xbox 360), Sony (PlayStation 3), and Nintendo (Wii), and ii) the decline in third-party market share of aftermarket game console controllers due to the launch of next-generation peripherals by manufacturers of console systems, we saw the decline begin to stabilize, as manifested by the release of new steering wheel products from Logitech for the PlayStation 3.

Touch interface product royalties decreased mainly due to the recognition of certain automotive royalty payments in the second quarter of 2007 that did not recur. In addition, BMW has begun to remove our technology from certain controller systems, that also caused automotive royalties to decline.

Product sales Product sales decreased by \$3.0 million or 21% from 2007 to 2008. The decrease in product sales was primarily due to decreased medical product sales of \$3.1 million, mainly due to decreased sales of our endoscopy, endovascular, laparoscopy, and Virtual IV simulator platforms partially offset by increases in our arthroscopy simulators. These decreases were primarily due to decreased international sales and delays in new product introductions. Touch interface products increased by \$96,000 due to additional sales of touchscreen and touch panel components, rotary modules, and arcade entertainment products.

Development contracts and other revenue Development contracts and other revenue decreased by \$1.5 million or 36% from 2007 to 2008. The decrease was mainly attributable to a decrease in medical contract revenue of \$1.3 million due to the completion of work performed under medical contracts that occurred in 2007 through the first

six months of 2008, and decreased touch interface product contract revenue of \$564,000 primarily due to contracts being completed during the year. Partially offsetting this, there was increased revenue recognized on mobile device development contracts and support of \$370,000.

Table of Contents**Cost of Product Sales**

	2009	% Change	2008	% Change	2007
	(\$ in thousands)				
Cost of product sales	\$ 8,289	10%	\$ 7,516	3%	\$ 7,272
% of product sales	70%		68%		51%

Our cost of product sales consists primarily of materials, labor, and overhead. It excludes amortization and impairment of intangibles. There is no cost of product sales associated with royalty and license revenue or development contract revenue. Cost of product sales increased by \$773,000 or 10% from 2008 to 2009. The increase in cost of product sales was primarily due to an increase in excess and obsolete inventory provisions and scrap expense of \$873,000, increased physical inventory write off costs of \$601,000, an increase of material and production costs of \$363,000, and increased freight costs of \$103,000, partially offset by decreased overhead costs of \$1.3 million. The increase in obsolescence and inventory scrap expense was mainly due to additional excess and obsolescence write-off and inventory scrap mainly from medical product parts. The physical inventory write off costs primarily consisted of physical count to book adjustments of medical equipment parts in the second quarter of 2009. The increase in direct material costs was mainly a result of increased product sales. Overhead costs decreased mainly as a result of reduced salary expense from decreased headcount. Cost of product sales increased as a percentage of product revenue to 70% in 2009 from 68% in 2008. This increase is mainly due to the increased costs mentioned above, partially offset by the reduced overhead costs from decreased headcount mentioned above. In March 2010 we entered into an agreement to sell certain assets of the Endoscopy, Endovascular, and Laparoscopy medical simulation product lines. See Note 19 of the consolidated financial statements. Cost of product sales for medical products are expected to decline in the future since we will have only one product line remaining, the Virtual IV product line.

Cost of product sales increased by \$244,000 or 3% from 2007 to 2008. The increase in cost of product sales was primarily due to an increase of overhead costs of \$383,000, an increase in excess and obsolete inventory provisions of \$235,000, increased provision for warranty and repair costs of \$177,000, and increased royalties of \$137,000 partially offset by decreased material and production costs of \$666,000. Overhead costs increased, in part, as a result of increased salary expense from additional headcount and other costs of programs to improve quality processes within our manufacturing operations. The decrease in direct material costs was mainly a result of decreased product sales. Royalty costs increased due to increased sales of certain medical products with associated royalty costs. Cost of product sales increased as a percentage of product revenue to 68% in 2008 from 51% in 2007. This increase is mainly due to reduced sales and the increased overhead and other costs mentioned above.

Expenses

	2009	% Change	2008	% Change	2007
	(\$ in thousands)				
Sales and marketing	\$ 13,324	(14)%	\$ 15,472	51%	\$ 10,272

Restructuring costs	1,462	930%	142	*%	

* Percentage not meaningful.

Sales and Marketing Our sales and marketing expenses are comprised primarily of employee compensation and benefits, sales commissions, advertising, trade shows, brochures, market development funds, travel, and an allocation of facilities costs. Sales and marketing expenses decreased by \$2.1 million or 14% in 2009 compared to 2008. The decrease was primarily due to decreased compensation, benefits, and overhead of \$1.3 million primarily due to decreased sales and marketing headcount; decreased marketing, advertising, and public relations costs of \$520,000; decreased employee recruitment expense of \$394,000; a decrease in bad debt expense of \$371,000; and

Table of Contents

decreased sales and marketing travel expense of \$89,000; partially offset by increased write offs of fixed assets of \$506,000 primarily demo equipment resulting from a reconciliation of fixed asset records to the physical inventory at the time of the move of our Medical line of business from Maryland to San Jose. In March 2010 we entered into an agreement to sell certain assets of the Endoscopy, Endovascular, and Laparoscopy medical simulation product lines which will cause some of our sales and marketing expenses to decrease in the future. See Note 19 of the consolidated financial statements. We are taking steps to reduce our sales and marketing expenses, although we expect to continue to focus our sales and marketing efforts on mobile device, touchscreen, and medical market licensing opportunities to build greater market acceptance for our touch technologies.

Sales and marketing expenses increased by \$5.2 million or 51% in 2008 compared to 2007. The increase was primarily due to increased compensation, benefits, and overhead of \$2.2 million, increased marketing, advertising, and public relations costs of \$1.1 million, increased sales and marketing travel expense of \$622,000, increased consulting costs of \$551,000 to supplement our sales and marketing staff, increased office and facilities expenses of \$307,000, an increase in bad debt expense of \$236,000, and increased employee recruiting costs of \$163,000. The increased sales and marketing expenses were primarily due to an increase in sales and marketing headcount and the expanding of our sales and marketing efforts internationally. In addition, the increased compensation, benefits, and overhead expense was mainly due to an increase in sales and marketing headcount, increased compensation for sales and marketing personnel, and increased non-cash stock based compensation charges.

Research and Development Our research and development expenses are comprised primarily of employee compensation and benefits, consulting fees, tooling and supplies, and an allocation of facilities costs. Research and development expenses decreased by \$565,000 or 4% in 2009 compared to 2008. The decrease was primarily due to decreased lab and prototyping expenses of \$282,000, decreased employee recruiting expenses of \$179,000, and decreased compensation, benefits, and overhead expense of \$125,000. The decreased compensation, benefits, and overhead expense was primarily due to decreased research and development headcount. We are taking steps to reduce our research and development expenses.

Research and development expenses increased by \$2.7 million or 26% in 2008 compared to 2007. The increase was primarily due to increased compensation, benefits, and overhead expense of \$1.7 million, increased professional and consulting expense of \$585,000 to supplement our engineering staff, and an increase in lab and prototyping expenses of \$277,000 in support of sales efforts. The increased compensation, benefits, and overhead expense was primarily due to increased research and development headcount and increased non-cash stock-based compensation charges.

General and Administrative Our general and administrative expenses are comprised primarily of employee compensation and benefits, legal and professional fees, office supplies, travel, and an allocation of facilities costs. General and administrative expenses increased by \$2.5 million or 13% in 2009 compared to 2008. The increase was primarily due to increased legal, professional, and license fee expense of \$1.5 million, increased compensation, benefits, and overhead of \$864,000, and loss on fixed assets of \$108,000 partially offset by decreased travel costs of \$48,000. The increased legal, professional, and license fee expenses were primarily due to increased accounting, audit and legal costs resulting from our internal investigation and restatement costs incurred in 2009, offset by reduced litigation costs of \$2.7 million, mainly Microsoft litigation which was settled in 2008. The increased compensation, benefits, and overhead expense was primarily due to changes in executive personnel that resulted in additional costs and increased non-cash stock-based compensation charges. We expect that the dollar amount of general and administrative expenses will continue to be a significant component of our operating expenses. We continued to incur costs related to the restatement of our historical financial statements in the first quarter of 2010 and will continue to incur litigation costs as we assert our intellectual property and contractual rights and defend lawsuits brought against us.

General and administrative expenses increased by \$6.6 million or 52% in 2008 compared to 2007. The increase was primarily due to increased legal, professional, and license fee expense of \$3.4 million, increased compensation, benefits, and overhead of \$2.5 million, increased travel costs of \$274,000, and increased supplies and office and facilities expense of \$183,000. The increased legal, professional, and license fee expenses were primarily due to increased litigation and other activities that we were engaged in, mainly the litigation with Microsoft; increased consulting costs; and increased recruiting costs due to management changes. The increased compensation, benefits,

Table of Contents

and overhead expense was primarily due to changes in executive personnel that resulted in additional costs, increased general and administrative headcount, increased compensation for general and administrative personnel, and increased non-cash stock-based compensation charges.

Amortization and impairment of Intangibles Our amortization impairment of intangibles is comprised primarily of patent amortization and other intangible amortization along with impairment or write off of abandoned and expired patents. Amortization and impairment of intangibles increased slightly by \$6,000 or 1% from 2008 to 2009. The increase was primarily attributable to an increase from the cost and number of new patents being amortized along with the impairment of certain patents partially offset by some intangible assets reaching full amortization. Amortization and impairment of intangibles decreased by \$258,000 or 23% from 2007 to 2008. The decrease was primarily attributable to some intangible assets reaching full amortization partially offset by an increase from the cost and number of new patents being amortized.

Litigation Settlements, Conclusions, and Patent License There were no litigation settlements, conclusions, and patent license expenses in the year ended December 31, 2009, which was a decrease of \$20.8 million compared to 2008, all of which related to our settlement with Microsoft. Litigation settlements, conclusions, and patent license was \$20.8 million of expense for 2008, compared to income of \$134.9 million for the same period in 2007, a change of \$155.7 million. For 2007, the \$134.9 million was comprised of \$119.9 million related to Sony Computer Entertainment and \$15.0 million related to the release of the Microsoft long-term customer advance.

Restructuring Restructuring costs increased by \$1.3 million from 2008 to 2009. Restructuring costs of \$1.5 million for the year ended December 31, 2009 consist primarily of severance benefits and move and close down of facility costs paid in connection with the reduction of workforce from our Montreal medical business operations and relocation of the Maryland medical business operations to San Jose. Restructuring costs in 2009 also included severance benefits paid as the result of the reduction of workforce due to business changes in our Touch segment. Restructuring costs for the year ended December 31, 2008 consist primarily of severance benefits paid as the result of the reduction of workforce due to business changes in our Touch segment of \$142,000. There were no restructuring charges incurred for the year ended 2007.

Interest and Other Income / Expense

	2009	% Change	2008	% Change	2007
	(\$ in thousands)				
Change in fair value of warrant liability	\$ 517	*%	\$	*%	\$
Interest and other income	777	(81)%	4,174	(37)%	6,623
Interest and other expense	(4)	(98)%	(250)	(76)%	(1,024)

* Percentage not meaningful.

Change in fair value of warrant liability In January 2009, we adopted ASC 815-40, Contracts in Entity's own Equity. For the year ended December 31, 2009, we had a gain from the change in fair value of the warrant liability of \$517,000. There was no gain or loss from the change in fair value of the warrant liability for the years ended December 31, 2008 or 2007. We do not expect to have any further charges for a change in the fair value of the warrant liability since the warrants expired in December 2009.

Interest and Other Income Interest and other income consist primarily of interest income and dividend income from cash and cash equivalents and short-term investments and gain on sale of short-term investments. Interest and other income decreased by \$3.4 million from 2008 to 2009. This was primarily the result of decreased interest income due to a reduction in cash equivalents and short-term investments and reduced interest rates on cash, cash equivalents, and short-term investments. In addition, interest income included the accretion of interest income from Sony Computer Entertainment of \$377,000 in 2009 compared to \$904,000 in 2008. This interest accretion was complete at the end of 2009.

Interest and other income decreased by \$2.4 million from 2007 to 2008. This was primarily the result of decreased interest income due to a reduction in cash equivalents and short-term investments and reduced interest rates on cash, cash equivalents, and short-term investments.

Table of Contents

Interest and Other Expense Interest and other expense consists primarily of interest and accretion expense on our 5% Senior Subordinated Convertible Debentures (5% Convertible Debentures) and accretion and dividend expense on our long-term customer advance from Microsoft along with impairment losses on long term notes receivable. Interest and other expense decreased by \$246,000 from 2008 to 2009 primarily due to the reduction of impairment losses on long term notes receivable.

Interest and other expense decreased by \$774,000 from 2007 to 2008 due to the elimination of interest expense from the conversion and redemption of our 5% Convertible Debentures during the third quarter of 2007 partially offset by impairment losses on long term notes receivable.

Benefit (Provision) for Taxes

	2009	% Change	2008 (\$ in thousands)	% Change	2007
Benefit (provision) for income taxes	\$ 310	106%	\$ (5,088)	60%	\$ (12,850)

Benefit (Provision) for Income Taxes For the year ended 2009, we recorded a benefit for income taxes of \$310,000 yielding an effective tax rate of 1.1%. The current year tax benefit is reflective of the recording of a benefit for the alternative minimum tax and net operating loss carrybacks, R&D monetization, valuation allowance on specific deferred tax assets, and foreign withholding tax expense. Accordingly, the effective tax rate differs from the statutory rate. For the year ended 2008, we recorded a provision for income taxes of \$5.1 million yielding an effective tax rate of 11.3%. The tax provision for the year ended 2008 is reflective of the recording of a full valuation allowance against our entire deferred tax asset balance in the period due to losses in fiscal 2008, the variability of operating results, and near term projected losses. Accordingly, the effective tax rate differs from the statutory rate. For the year ended 2007, we recorded a provision for income taxes of \$12.9 million yielding an effective tax rate of 10.0%. The 2007 tax provision is primarily reflective of federal and state tax expense as a result of our pre-tax income of \$128.9 million mainly due to the litigation conclusions and patent license from Sony Computer Entertainment, see Note 13 to the consolidated financial statements. The effective tax rate differs from the statutory rate primarily due to the significant reduction in our valuation allowance against deferred tax assets as we used the majority of our net operating loss carryforwards against current year taxable income.

Discontinued Operations

	2009	% Change	2008 (\$ in thousands)	% Change	2007
Gain on sale of discontinued operations	\$ 237	*%	\$	*%	\$
Gain (loss) from discontinued operations	\$ 340	146%	\$ (732)	(169)%	\$ 1,059

* Percentage not meaningful.

Discontinued Operations In the year ended December 31, 2009, we ceased operations of the 3D product line and sold our CyberGlove family of products, SoftMouse 3D positioning device family of products, and our Microscribe family of products, and recorded gains on sales of discontinued operations of \$237,000. Accordingly, the operations of the

3D product line have been classified as discontinued operations in the consolidated statement of operations. Gain from discontinued operations, net of tax, increased by \$1.1 million for the year ended December 31, 2009 compared to the same period in 2008, primarily due to the decrease in activity due to the ceasing of 3D operations in the quarter ended March 31, 2009. This resulted in reduced sales volumes and reduced costs and expenses including inventory and asset impairment charges associated with 3D operations during 2008. Loss from discontinued operations increased for the year ended December 31, 2008 compared to 2007, primarily due to increased costs and expenses, including inventory and asset impairment charges associated with 3D operations during 2008 offset by a reduction in income tax provision.

Segment Results for the Years Ended December 31, 2009, 2008, and 2007 are as follows:

We have two operating and reportable segments. One segment, Touch, develops and markets touch feedback technologies that enable software and hardware developers to enhance realism and usability in their computing,

Table of Contents

entertainment, and industrial applications. The second segment, Medical, develops, manufactures, and markets medical training simulators that recreate realistic healthcare environments.

	2009	% Change	2008 (\$ in thousands)	% Change	2007
Revenues:					
Touch	\$ 16,374	(3)%	\$ 16,912	16%	\$ 14,590
Medical	11,386	2%	11,180	(29)%	15,639
Intersegment eliminations	(35)		(111)		(89)
Total	\$ 27,725	(1)%	\$ 27,981	(7)%	\$ 30,140
Operating Income (Loss)*:					
Touch	\$ (15,678)	61%	\$ (40,289)	(133)%	\$ 122,771
Medical	(14,777)	(68)%	(8,808)	(1765)%	529
Intersegment eliminations	(1)		3		(22)
Total	\$ (30,456)	38%	\$ (49,094)	(140)%	\$ 123,278

* Segment expenses relating to our corporate operations are not allocated but are included in the Touch segment as that is how they are considered for management evaluation purposes. As a result, the segment information may not be indicative of the financial position or results of operations that would have been achieved had these segments operated as unaffiliated entities.

Fiscal 2009 Compared to Fiscal 2008

Touch segment Revenues from the Touch segment decreased by \$538,000, or 3% in 2009 compared to 2008. Royalty and license revenues decreased by \$190,000, mainly due to decreased revenue from gaming and automotive licensees partially offset by increased revenue from licensees of mobile devices. Revenues from gaming customers in 2008 which did not recur in 2009 included previously deferred revenues from ISLLC totaling \$1.1 million which was recognized after we concluded our litigation with it. In addition, BMW has removed our technology from certain controller systems, which also caused automotive royalties to decline in 2009 compared to 2008. Product sales decreased by \$246,000 primarily due to a decrease in product sales from touch interface products, mainly due to decreased sales of touchscreen and touch panel components and decreased sales of commercial gaming products, partially offset by increased integrated circuit chip sales. Development contract revenue decreased by \$102,000 primarily due to decreased development contracts and support mainly from our mobility customers. The segment's operating loss decreased by \$24.6 million in 2009 as compared to 2008. The change was primarily due to the Microsoft settlement expense in 2008 of \$20.8 million; a decrease in general and administrative expenses of \$1.9 million; a decrease in sales and marketing expenses of \$1.5 million; and increased gross margin of \$1.5 million partially offset by an increase in research and development expenses of \$568,000 and increased restructuring charges of \$427,000. General and administrative expense decreased primarily due to reduced litigation costs, mainly Microsoft litigation which was settled in 2008. The decreased sales and marketing expenses were primarily due to reduced salary expense from a decrease in sales and marketing headcount. Increased margin was mainly a result of reduced salary expense from decreased operations headcount.

Medical segment Revenues from Medical increased by \$206,000 or 2%, from 2008 to 2009. Increased revenues were primarily due to increased product sales of \$983,000 and increased royalty and license revenue of \$140,000, partially offset by decreased development contract revenue of \$916,000. Increased medical product sales were mainly due to the recognition of \$1.0 million in revenue from an international medical customer for whom revenues could not be recognized until the agreement with the customer was terminated in the third quarter of 2009, partially offset by decreases of other medical product sales. The decrease in medical contract revenue was mainly attributable to a lower volume of work performed under medical contracts in 2009 compared to 2008. The segment's operating loss increased by \$6.0 million in 2009 as compared to 2008. The increased operating loss was mainly due to a decrease in gross margin of \$2.5 million primarily due to increased obsolescence and scrap expense

Table of Contents

and physical inventory write off; increased general and administrative expenses of \$4.4 million; and increased restructuring costs of \$893,000, partially offset by decreased research and development expenses of \$1.1 million and decreased sales and marketing expenses of \$657,000. The increase in obsolescence and inventory scrap expense was mainly due to additional excess and obsolescence write-off and inventory scrap mainly from medical product parts. The physical inventory write off costs primarily consisted of physical count to book adjustments of medical equipment parts in the second quarter of 2009. General and administrative expense increased primarily due to increased accounting, audit and legal costs resulting from our internal investigation and restatement costs incurred in 2009. The increased restructuring costs were mainly due to the reduction of workforce of Montreal medical personnel and relocation of the Maryland medical business operations to San Jose. The decreased research and development and sales and marketing expenses were primarily due to reduced salary expense from a decrease in related headcount. In March 2010 we entered into an agreement to sell certain assets of the Endoscopy, Endovascular, and Laparoscopy medical simulation product lines. See Note 19 of the consolidated financial statements. Revenue in 2009 for these product lines was approximately \$6 million. Segments results are expected to decline significantly in the future since we will be transitioning to a license model and will have only one product line remaining, the Virtual IV product line.

Fiscal 2008 Compared to Fiscal 2007

Touch segment Revenues from the Touch segment increased by \$2.3 million, or 16% in 2008 compared to 2007. Royalty and license revenues increased by \$2.4 million, mainly due to an increase in mobile device license and royalty revenue primarily due to the shipment of additional TouchSense enabled phones, and an increase in gaming royalties mainly due to the recognition of previously deferred revenues from ISLLC and the increase in sales of new steering wheel products from Logitech offset by a decrease in touch interface product royalties mainly due to the recognition of certain automotive royalty payments in the second quarter of 2007 that did not recur. Product sales increased by \$134,000 primarily due to an increase in product sales from touch interface products, mainly due to increased sales of touchscreen and touch panel components and increased sales of commercial gaming products. Development contract revenue decreased by \$180,000, primarily due to reduced touch interface product contract revenue, partially offset by increased revenue on mobile device development contracts and support. The segment's operating income changed by \$163.1 million to an operating loss in 2008 as compared to an operating profit in 2007. The change was primarily due to increased litigation settlements, conclusions, and patent license income of \$134.9 million (\$119.9 million from Sony Computer Entertainment and \$15.0 million related to the release of the Microsoft long-term customer advance) occurring in 2007 and the Microsoft settlement expense in 2008 of \$20.8 million; an increase in general and administrative expenses of \$4.5 million; an increase in sales and marketing expenses of \$2.9 million; an increase of research and development expenses of \$1.9 million, and increased restructuring charges of \$142,000. The change from income in 2007 to a loss in 2008 was partially offset by increased gross margin of \$1.8 million mainly from increased royalty and license revenue and decreased amortization and impairment of intangibles of \$255,000.

Medical segment Revenues from Medical decreased by \$4.5 million or 29%, from 2007 to 2008. The decrease was primarily due to a decrease in medical product sales of \$3.1 million mainly due to decreased sales of our endoscopy, endovascular, laparoscopy, and Virtual IV simulator platforms partially offset by increases in our arthroscopy simulators; and a decrease of \$1.3 million in medical development contract revenue due to work completed under medical contracts in 2007. The decrease in medical contracts also represents continued efforts to move away from development work during the period and concentrate on product sales and licensing. The decrease in product sales was primarily due to decreased international sales and delays in new product introductions. The segment's operating income changed by \$9.3 million to a loss in 2008 as compared to a profit in 2007. The loss was mainly due to a decrease in gross margin of \$4.2 million primarily due to decreased sales and a change in product sales mix, increased sales and marketing expenses of \$2.3 million primarily due to international sales and marketing efforts, increased general and administrative expenses of \$2.1 million, mainly litigation and legal costs, and increased research and development expenses of \$756,000.

Liquidity and Capital Resources

Our cash, cash equivalents, and short-term investments consist primarily of money market funds and highly liquid commercial paper and government agency securities. All of our short-term investments are classified as available-for-sale. The securities are stated at market value, with unrealized gains and losses reported as a component of accumulated other comprehensive income, within stockholders' equity.

Table of Contents

On December 31, 2009, our cash, cash equivalents, and short-term investments totaled \$63.7 million, a decrease of \$22.0 million from \$85.7 million on December 31, 2008.

In March 2007, we concluded our patent infringement litigation against Sony Computer Entertainment and we received \$97.3 million. Furthermore, we entered into a new business agreement under which, we are to receive twelve quarterly installments of \$1.875 million for a total of \$22.5 million beginning on March 31, 2007 and ending on December 31, 2009. As of December 31, 2009, we had received eleven of these installments.

On June 18, 2007, Microsoft filed a complaint against us in the U.S. District Court for the Western District of Washington alleging one claim for breach of a contract. After conducting discovery and filing various motions, on August 25, 2008 the parties agreed to settle all claims. Under the terms of the settlement, we paid Microsoft \$20.8 million in October 2008.

Net cash used in operating activities during 2009 was \$18.3 million, a change of \$12.1 million from the \$30.4 million used in operating activities during 2008. Cash used in operations during 2009 was primarily the result of a net loss of \$28.3 million, a decrease of \$1.7 million due to a change in accrued compensation and other current liabilities due to the timing of payments and a decrease of \$1.4 million due to a change in accounts payable due to the timing of payments. These decreases were offset by an increase of \$3.4 million due to a change in accounts receivable, an increase of \$1.4 million due to a change in inventories and an increase of \$1.4 million due to a change in deferred revenue and customer advances. Accounts receivable decreased primarily due to the timing of sales during the year and increased collection efforts. Inventory decreased primarily due to the changed forecasts affecting inventory purchases and inventory obsolescence and scrapping. Cash provided by operations during 2009 was also impacted by noncash charges and credits of \$6.7 million, including \$4.5 million of noncash stock-based compensation, \$1.6 million in depreciation and amortization, \$894,000 in amortization and impairment of intangibles, an increase to loss on disposal of equipment of \$726,000, partially offset by a credits from the change in market value of warrant liability of \$517,000 and gain on sales of discontinued operations of \$237,000.

Net cash used in operating activities during 2008 was \$30.4 million, a change of \$115.0 million from the \$84.6 million provided by operating activities during 2007. Cash used in operations during 2008 was primarily the result of a net loss of \$51.0 million, a decrease of \$1.5 million due to a change in other long-term liabilities, a decrease of \$1.3 million due to a change in prepaid expenses and other current assets, a decrease of \$1.0 million due to a change in accounts receivable, and a decrease of \$415,000 due to a change in income taxes payable. These decreases were offset by an increase of \$7.3 million due to a change in deferred income taxes, a \$6.1 million increase due to a change in deferred revenue and customer advances and long-term customer advance from Microsoft, an increase of \$2.4 million due to a change in accrued compensation and other current liabilities, and an increase of \$1.5 million due to a change in accounts payable. Cash provided by operations during 2008 was also impacted by noncash charges and credits of \$7.6 million, including \$5.3 million of noncash stock-based compensation, \$1.2 million in depreciation and amortization, \$888,000 in amortization and impairment of intangibles, an increase to allowance for doubtful accounts of \$351,000, partially offset by a credit of \$220,000 from excess tax benefits from stock-based compensation.

Net cash used in investing activities during 2009 was \$26.9 million, compared to the \$25.3 million provided by investing activities during 2008, a decrease of \$52.2 million. Net cash used in investing activities during 2009 consisted of an increase in proceeds from maturities of available -for- sale investments of \$75.0 million, offset by purchases of available -for- sale investments of \$98.0 million; \$2.6 million used to purchase intangibles, primarily due to capitalization of external patent filing and application costs, and a \$1.6 million increase in purchases of property and equipment. Net cash provided by investing activities during 2008 was \$25.3 million, compared to the \$55.2 million used in investing activities during 2007, an increase of \$80.5 million. Net cash provided by investing activities during the period consisted of an increase in maturities or sales of short-term investments of \$90.0 million, partially offset by purchases of short-term investments of \$59.2 million; \$3.1 million used to purchase property and

equipment, and a \$2.4 million increase in intangibles, primarily due to capitalization of external patent filing and application costs.

Net cash provided by financing activities during 2009 was \$278,000 compared to \$16.6 million used during 2008, or a \$16.9 million decrease from the prior year. Net cash provided by financing activities for 2009 consisted of issuances of common stock and exercises of stock options and warrants. Net cash used in financing activities during

Table of Contents

2008 was \$16.6 million compared to \$25.2 million provided by financing activities during 2007, or a \$41.8 million increase from the prior year. Net cash used in financing activities for the period consisted primarily of treasury stock repurchases of \$18.4 million, partially offset by issuances of common stock and exercises of stock options and warrants in the amount of \$1.6 million, and an increase of \$220,000 from excess tax benefits from tax deductible stock-based compensation.

We believe that our cash and cash equivalents will be sufficient to meet our working capital needs for at least the next twelve months. We will continue to protect and defend our extensive intellectual property portfolio across all business segments. With our plan to focus on a licensing approach, we hope to achieve certain cost reductions in 2010. We anticipate that capital expenditures for the year ended December 31, 2010 will total less than \$1,500,000 in connection with anticipated maintenance and upgrades to operations and infrastructure. Cash flows from our discontinued operations have been included in our consolidated statement of cash flows with continuing operations within each cash flow category. The absence of cash flows from discontinued operations is not expected to affect our future liquidity or capital resources. Additionally, if we acquire one or more businesses, patents, or products, our cash or capital requirements could increase substantially. In the event of such an acquisition, or should any unanticipated circumstances arise that significantly increase our capital requirements, we may elect to raise additional capital through debt or equity financing. Any of these events could result in substantial dilution to our stockholders. There is no assurance that such additional capital will be available on terms acceptable to us, if at all.

Summary Disclosures about Contractual Obligations and Commercial Commitments

The following table reflects a summary of our contractual cash obligations and other commercial commitments as of December 31, 2009 (in thousands):

Contractual Obligations	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Operating Leases	\$ 3,266	\$ 737	\$ 2,036	\$ 493	\$

As discussed in Note 13 to the consolidated financial statements we adopted new accounting requirements for uncertain tax benefits on January 1, 2007. At December 31, 2009, we had a liability for unrecognized tax benefits totaling \$654,000 including interest of \$26,000, of which approximately \$225,000 could be payable in cash. Due to the uncertainties related to these tax matters, we are unable to make a reasonably reliable estimate when cash settlement with a taxing authority will occur. Settlement of such amounts could require the utilization of working capital.

Recent Accounting Pronouncements

See Note 1 to the consolidated financial statements for information regarding the effect of new accounting pronouncements on our financial statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to financial market risks, including changes in interest rates and foreign currency exchange rates. Changes in these factors may cause fluctuations in our earnings and cash flows. We evaluate and manage the exposure to these market risks as follows:

Cash Equivalents, Short-term Investments, and Long-Term Investments We have cash equivalents, short-term investments, and long-term investments of \$60.6 million as of December 31, 2009. These securities are subject to interest rate fluctuations. An increase in interest rates could adversely affect the market value of our fixed income securities. A hypothetical 100 basis point increase in interest rates would result in an approximate \$345,000 decrease in the fair value of our cash equivalents, short-term investments, and long-term investments as of December 31, 2009.

We limit our exposure to interest rate and credit risk by establishing and monitoring clear policies and guidelines for our cash equivalents and short-term investment portfolios. The primary objective of our policies is to preserve principal while at the same time maximizing yields, without significantly increasing risk. Our policy's guidelines limit exposure to loss by limiting the sums we can invest in any individual security and restricting

Table of Contents

investment to securities that meet certain defined credit ratings. We do not use derivative financial instruments in our investment portfolio to manage interest rate risk.

Foreign Currency Exchange Rates A substantial majority of our revenue, expense, and capital purchasing activities are transacted in U.S. dollars. However, we do incur certain operating costs for our foreign operations in other currencies but these operations are limited in scope and thus we are not materially exposed to foreign currency fluctuations. Additionally we have some reliance on international and export sales that are subject to the risks of fluctuations in currency exchange rates. Because a substantial majority of our international and export revenues, as well as expenses, are typically denominated in U.S. dollars, a strengthening of the U.S. dollar could cause our products to become relatively more expensive to customers in a particular country, leading to a reduction in sales or profitability in that country. We have no foreign exchange contracts, option contracts, or other foreign currency hedging arrangements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Immersion Corporation:

We have audited the accompanying consolidated balance sheets of Immersion Corporation and subsidiaries (the Company) as of December 31, 2009 and 2008, and the related consolidated statements of operations, stockholders equity (deficit), and cash flows for each of the three years in the period ended December 31, 2009. Our audits also included the financial statement schedule listed in the Index at Item 15 (a) 2. These financial statements and financial statement schedule are the responsibility of the Company s management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Immersion Corporation and subsidiaries as of December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2009, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company s internal control over financial reporting as of December 31, 2009, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 30, 2010 expressed an adverse opinion on the effectiveness of the Company s internal control over financial reporting because of material weaknesses.

IMMERSION CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Significant Accounting Policies

Description of Business

Immersion Corporation (the Company) was incorporated in 1993 in California and reincorporated in Delaware in 1999 and develops, manufactures, licenses, and supports a wide range of hardware and software technologies and products that enhance digital devices with touch interaction.

Principles of Consolidation and Basis of Presentation

The consolidated financial statements include the accounts of Immersion Corporation and its majority-owned subsidiaries. All intercompany accounts, transactions, and balances have been eliminated in consolidation. The Company has prepared the accompanying consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP).

Cash Equivalents

The Company considers all highly liquid instruments purchased with an original or remaining maturity of less than three months at the date of purchase to be cash equivalents.

Short-term Investments

The Company's short-term investments consist primarily of highly liquid commercial paper and government agency securities purchased with an original or remaining maturity of greater than 90 days on the date of purchase. The Company classifies debt securities with readily determinable market values as available-for-sale. Even though the stated maturity dates of these debt securities may be one year or more beyond the balance sheet date, the Company has classified all debt securities as short-term investments as they are reasonably expected to be realized in cash or sold within one year. These investments are carried at fair market value with unrealized gains and losses considered to be temporary in nature reported as a separate component of other comprehensive income (loss) within stockholders equity.

The Company follows the guidance provided by ASC 320 to assess whether our investments with unrealized loss positions are other than temporarily impaired. Realized gains and losses and declines in value judged to be other than temporary are determined based on the specific identification method and are reported in the consolidated statement of operations. Factors considered in determining whether a loss is temporary include the length of time and extent to which fair value has been less than the cost basis, the financial condition and near-term prospects of the investee, and our intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value.

Allowance for Doubtful Accounts

The Company maintains an allowance for doubtful accounts for estimated losses resulting from its review and assessment of its customers' ability to make required payments. The Company reviews its trade receivables by aging categories to identify significant customers with known disputes or collection issues. For accounts not specifically

identified, the Company provides reserves based on historical levels of credit losses and reserves.

Inventories

Inventories are stated at the lower of cost (principally on a standard cost basis which approximates FIFO) or market. The Company reduces its inventory value for estimated obsolete and slow moving inventory in an amount equal to the difference between the cost of inventory and the net realizable value based upon assumptions about future demand and market conditions.

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Property and Equipment*

Property is stated at cost and is generally depreciated using the straight-line method over the estimated useful life of the related asset. The estimated useful lives are as follows:

Computer equipment and purchased software	3 years
Machinery and equipment	3-5 years
Furniture and fixtures	5 years

Leasehold improvements are amortized over the shorter of the lease term or their useful life.

Intangible Assets

Intangible assets with finite useful lives are amortized and intangible assets with indefinite lives are not amortized but rather are tested at least annually for impairment.

In addition to purchased intangible assets, the Company capitalizes the external legal and filing fees associated with its patents and trademarks. These costs are amortized utilizing the straight-line method, which approximates the pattern of consumption over the estimated useful lives of the respective assets, generally ten years.

Long-lived Assets

The Company evaluates its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of that asset may not be recoverable. An impairment loss would be recognized when the sum of the undiscounted future net cash flows expected to result from the use of the asset and its eventual disposition is less than its carrying amount. Measurement of an impairment loss for long-lived assets and certain identifiable intangible assets that management expects to hold and use is based on the fair value of the asset.

Product Warranty

The Company sells its products with warranties ranging from three to sixty months. The Company records the estimated warranty costs when the revenue is recognized. Historically, warranty-related costs have not been significant.

Revenue Recognition

The Company recognizes revenues in accordance with applicable accounting standards, including Accounting Standards Codification (ASC) 605-10-S99, Revenue Recognition (ASC 605-10-S99); ASC 605-25, Multiple Element Arrangements (ASC 605-25); and ASC 985-605, Software-Revenue Recognition (ASC 985-605). The Company derives its revenues from three principal sources: royalty and license fees, product sales, and development contracts. As described below, significant management judgments and estimates must be made and used in connection with the revenue recognized in any accounting period. Material differences may result in the amount and timing of revenue for any period based on the judgments and estimates made by management. Specifically, in connection with each

transaction involving products, the Company must evaluate whether: (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred, (iii) the fee is fixed or determinable, and (iv) collectibility is probable. The Company applies these criteria as discussed below.

Persuasive evidence of an arrangement exists: For a license arrangement, the Company requires a written contract, signed by both the customer and the Company. For a stand-alone product sale, the Company requires a purchase order or other form of written agreement with the customer.

Delivery has occurred. The Company delivers software and product to customers physically and delivers software also electronically. For physical deliveries not related to software, the transfer terms typically include transfer of title and risk of loss at the Company's shipping location. For electronic deliveries,

Table of Contents

IMMERSION CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

delivery occurs when the Company provides the customer access codes or keys that allow the customer to take immediate possession of the software.

The fee is fixed or determinable. The Company's arrangement fee is based on the use of standard payment terms which are those that are generally extended to the majority of customers. For transactions involving extended payment terms, the Company deems these fees not to be fixed or determinable for revenue recognition purposes and revenue is deferred until the fees become due and payable.

Collectibility is probable. To recognize revenue, the Company must judge collectibility of the arrangement fees, which is done on a customer-by-customer basis pursuant to the credit review policy. The Company typically sells to customers with whom there is a history of successful collection. For new customers, the Company evaluates the customer's financial position and ability to pay. If it is determined that collectibility is not probable based upon the credit review process or the customer's payment history, revenue is recognized when payment is received.

Royalty and license revenue The Company recognizes royalty revenue based on royalty reports or related information received from the licensee and when collectibility is deemed reasonably assured. The terms of the royalty agreements generally require licensees to give the Company notification of royalties within 30 to 45 days of the end of the quarter during which the sales occur. The Company recognizes license fee revenue for licenses to intellectual property when earned under the terms of the agreements. Generally, revenue is recognized on a straight-line basis over the expected term of the license.

Product sales The Company recognizes revenue from the sale of products and the license of associated software if any, and expense all related costs of products sold, once delivery has occurred and customer acceptance, if required, has been achieved. The Company has determined that the license of software for the medical simulation products is incidental to the product as a whole. The Company typically grants to customers a warranty which guarantees that products will substantially conform to the Company's current specifications for generally twelve months from the delivery date pursuant to the terms of the arrangement. Historically, warranty-related costs have not been significant. Extended warranty contract revenues are recognized ratably over the contractual period.

Development contracts and other revenue Development contracts and other revenue is comprised of professional services (consulting services and/or development contracts). Professional services revenues are recognized under the proportional performance accounting method based on physical completion of the work to be performed or completed performance method. A provision for losses on contracts is made, if necessary, in the period in which the loss becomes probable and can be reasonably estimated. Revisions in estimates are reflected in the period in which the conditions become known. To date, such losses have not been significant.

Multiple element arrangements The Company enters into multiple element arrangements in which customers purchase a time-based license which include a combination of software and/or intellectual property licenses, professional services and to a lesser extent, post contract customer support. For arrangements that include software and professional services, the services are not essential to the functionality of the software, and customers typically purchase consulting services to facilitate the adoption of the Company's technology, but they may also decide to use their own resources or appoint other professional service organizations to perform these services. Contract fees for professional services and post-contract customer support are not frequently sold on a stand-alone basis and as such,

the Company does not have sufficient evidence of fair value. For these arrangements, revenue is recognized over the period of the ongoing obligation which is generally consistent with the contractual term of the time-based license.

Table of Contents

IMMERSION CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company's revenue recognition policies are significant because revenues are a key component of the Company's results of operations. In addition, the Company's revenue recognition determines the timing of certain expenses, such as commissions and royalties.

Advertising

Advertising costs (including obligations under cooperative marketing programs) are expensed as incurred and included in sales and marketing expense. Advertising expense was \$78,000, \$229,000, and \$102,000 in 2009, 2008, and 2007, respectively.

Research and Development

Research and development costs are expensed as incurred. The Company has generated revenues from development contracts with the United States government and other commercial customers that have enabled it to accelerate its own product development efforts. Such development revenues have only partially funded the Company's product development activities, and the Company generally retains ownership of the products developed under these arrangements. As a result, the Company classifies all development costs related to these contracts as research and development expenses.

Income Taxes

The Company uses the asset and liability method of accounting for income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized and are reversed at such time that realization is believed to be more likely than not.

Software Development Costs

Certain of the Company's products include software. Costs for the development of new software products and substantial enhancements to existing software products are expensed as incurred until technological feasibility has been established, at which time any additional costs would be capitalized. The Company considers technological feasibility to be established upon completion of a working model of the software and the related hardware. Because the Company believes its current process for developing software is essentially completed concurrently with the establishment of technological feasibility, no costs have been capitalized to date.

Stock-based Compensation

Stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense on a straight-line basis over the requisite service period, which is the vesting period. See Note 10 for further information regarding the Company's stock-based compensation assumptions and expenses.

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Comprehensive Income (Loss)*

Comprehensive income (loss) includes net income (loss) as well as other items of comprehensive income. The Company's other comprehensive income consists of foreign currency translation adjustments and unrealized gains and losses on available-for-sale securities. The components of accumulated other comprehensive income are as below.

	2009	December 31, 2008	2007
	(In thousands)		
Net unrealized losses on short-term investments	\$ (35)	\$ 19	\$ 7
Foreign currency translation adjustment	101	90	130
Accumulated other comprehensive income	\$ 66	\$ 109	\$ 137

Use of Estimates

The preparation of consolidated financial statements and related disclosures in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include valuation of short-term investments, income taxes including uncertain tax provisions, revenue recognition, stock-based compensation, contingent liabilities from litigation, and accruals for other liabilities. Actual results could differ from those estimates.

Concentration of Credit Risks

Financial instruments that potentially subject the Company to a concentration of credit risk principally consist of cash, cash equivalents, short term investments, and accounts receivable. The Company invests primarily in money market accounts and highly liquid instruments purchased with an original or remaining maturity of greater than 90 days on the date of purchase. Deposits held with banks may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed upon demand. The Company sells products primarily to companies in North America, Europe, and the Far East. To reduce credit risk, management performs periodic credit evaluations of its customers' financial condition. The Company maintains reserves for estimated potential credit losses, but historically has not experienced any significant losses related to individual customers or groups of customers in any particular industry or geographic area.

Certain Significant Risks and Uncertainties

The Company operates in a dynamic industry and, accordingly, can be affected by a variety of factors. For example, management of the Company believes that changes in any of the following areas could have a negative effect on the Company in terms of its future financial position and results of operations: the mix of revenues; the loss of significant customers; fundamental changes in the technology underlying the Company's products; market acceptance of the

Company's and its licensees' products under development; the availability of contract manufacturing capacity; development of sales channels; litigation or other claims in which the Company is involved; the ability to successfully assert its patent rights against others; the impact of the global economic downturn; the hiring, training, and retention of key employees; successful and timely completion of product and technology development efforts; and new product or technology introductions by competitors.

Fair Value of Financial Instruments

Financial instruments consist primarily of cash equivalents, short-term investments, accounts receivable and accounts payable. Cash equivalents and short term investments are stated at fair value based on quoted market

Table of Contents

IMMERSION CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

prices. The recorded cost of accounts receivable and accounts payable approximate the fair value of the respective assets and liabilities.

Foreign Currency Translation

The functional currency of the Company's foreign subsidiary is U.S. dollars. Accordingly, gains and losses from the translation of the financial statements of the foreign subsidiary are reported as a separate component of accumulated other comprehensive income. Foreign currency transaction gains and losses are included in earnings.

Recent Accounting Pronouncements

In April 2008, the FASB issued ASC 350-30, *Determination of the Useful Life of Intangible Assets*. (ASC 350-30). ASC 350-30 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. ASC 350-30 is effective for fiscal years beginning after December 15, 2008. The adoption of this guidance did not have a material impact on the Company's consolidated results of operations, financial position or cash flows.

In April 2009, the FASB issued ASC 320-10, *Recognition and Presentation of Other-Than-Temporary Impairments* (ASC 320-10). This ASC amends the other-than-temporary impairment guidance for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments in the financial statements. The most significant change the guidance brings is a revision to the amount of other-than-temporary loss of a debt security recorded in earnings. ASC 320-10 is effective for interim and annual reporting periods ending after June 15, 2009. The adoption of this guidance did not have a material impact on the Company's consolidated results of operations, financial position or cash flows.

In April 2009, the FASB issued ASC 820-10, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (ASC 820-10). ASC 820-10 provides guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased. This ASC also includes guidance on identifying circumstances that indicate a transaction is not orderly. This guidance emphasizes that even if there has been a significant decrease in the volume and level of activity for the asset or liability and regardless of the valuation technique(s) used, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. ASC 820-10 is effective for interim and annual reporting periods ending after June 15, 2009, and is applied prospectively. The adoption of this guidance did not have a material impact on the Company's consolidated results of operations, financial position or cash flows.

In April 2009, the FASB issued ASC 825-10, *Interim Disclosures about Fair Value of Financial Instruments*. (ASC 825-10). This guidance requires disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This guidance also requires those disclosures in summarized financial information at interim reporting periods. ASC 825-10 is effective for interim and annual reporting periods ending after June 15, 2009. The adoption of this guidance did not have a material impact on the Company's consolidated results of operations, financial position or cash flows.

In May 2009, the FASB issued ASC 855-10, Subsequent Events (ASC 855-10). ASC 855-10 provides guidance on management's assessment of subsequent events and incorporates this guidance into accounting literature. It also requires entities to disclose the date through which they have evaluated subsequent events and whether the date corresponds with the release of their financial statements. This guidance is effective for all interim and annual periods ending after June 15, 2009. The adoption of this guidance did not have a material impact on the Company's consolidated results of operations or financial position. In February 2010, the FASB issued Accounting Standards Update 2010-09 which eliminates the requirement to disclose the date through which subsequent events

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

have been evaluated for SEC filers. This guidance, effective upon issuance, did not have a material impact on the Company's results of operations, financial position, or cash flows.

In September 2009, the FASB ratified Accounting Standards Update (ASU) 2009-13 (update to ASC 605), Revenue Arrangements with Multiple Deliverables (ASU 2009-13 (update to ASC 605)). This guidance addresses criteria for separating the consideration in multiple-element arrangements. ASU 2009-13 (update to ASC 605) requires companies to allocate the overall consideration to each deliverable by using a best estimate of the selling price of individual deliverables in the arrangement in the absence of vendor-specific objective evidence or other third-party evidence of the selling price. ASU 2009-13 (update to ASC 605) will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010 and early adoption will be permitted. The Company is currently evaluating the potential impact, if any, of the adoption of ASU 2009-13 (update to ASC 605) on its consolidated results of operations and financial condition.

In September 2009, the FASB also ratified ASU 2009-14 (update to ASC 605), Certain Revenue Arrangements That Include Software Elements (ASU 2009-14 (update to ASC 605)). ASU 2009-14 (update to ASC 605) provides guidance to exclude (a) non-software components of tangible products and (b) software components of tangible products that are sold, licensed, or leased with tangible products when the software components and non-software components of the tangible product function together to deliver the tangible product's essential functionality. ASC 2009-14 (update to ASC 605) has an effective date that is consistent with ASU 2009-13 (update to ASC 605) above. The Company is currently evaluating the potential impact, if any, of the adoption of ASC 2009-14 (update to ASC 605) on its consolidated results of operations and financial condition.

2. Fair Value Disclosures*Cash Equivalents, Short-term Investments, and Warrant Derivative Liabilities*

The financial instruments of the Company measured at fair value on a recurring basis are cash equivalents, short-term investments, and warrant derivative liabilities. The Company's cash equivalents and short-term investments are classified within Level 1 or Level 2 of the fair value hierarchy because they are valued using quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. The Company's warrant derivative liabilities are classified within Level 3 of the fair value hierarchy because they are valued using unobservable inputs which reflect the reporting entity's own assumptions that market participants would use in pricing the liability. Unobservable inputs are developed based on the best information available in the circumstances and also include the Company's own data.

The types of instruments valued based on quoted market prices in active markets include most U.S. government agency securities and most money market securities. Such instruments are generally classified within Level 1 of the fair value hierarchy.

The types of instruments valued based on quoted prices in markets that are less active, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency and include most investment-grade corporate commercial papers. Such instruments are generally classified within Level 2 of the fair value hierarchy.

The types of instruments valued based on unobservable inputs which reflect the reporting entity's own assumptions that market participants would use in pricing the liability include the warrant derivative liability. Such instruments are generally classified within Level 3 of the fair value hierarchy.

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Financial instruments measured at fair value on a recurring basis as of December 31, 2009 and December 31, 2008 are classified based on the valuation technique in the table below:

	December 31, 2009			Total
	Fair Value Measurements Using			
	Level 1	Level 2	Level 3	
	(In thousands)			
Assets:				
U.S. government agency securities	\$ 49,071	\$	\$	49,071
Money market accounts	11,546			11,546
Total assets at fair value	\$ 60,617	\$	\$	\$ 60,617

The above table excludes \$3.1 million of cash held in banks.

	December 31, 2008			Total
	Fair Value Measurements Using			
	Level 1	Level 2	Level 3	
	(In thousands)			
Assets:				
Corporate commercial paper	\$	\$ 24,971	\$	\$ 24,971
U.S. government agency securities	23,978			23,978
Money market accounts	34,429			34,429
Total assets at fair value	\$ 58,407	\$ 24,971	\$	\$ 83,378

The above table excludes \$2.4 million of cash held in banks.

The following table provides a summary of changes in fair value in the Level 3 financial instrument for the twelve months ending December 31, 2009:

Warrant Derivative Liability	Year Ended December 31, 2009

Intangibles and other assets, net	\$ 10,897	\$ 9,491

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company amortizes its intangible assets related to patents and trademarks, over their estimated useful lives, generally 10 years. Amortization of intangibles excluding impairments during the years ended December 31, 2009, 2008, and 2007 was \$827,000, \$842,000 and \$1.0 million, respectively. The estimated annual amortization expense for intangible assets as of December 31, 2009 is \$1.2 million in 2010, \$1.3 million in 2011, \$1.3 million in 2012, \$1.2 million in 2013, \$1.1 million in 2014, and \$4.7 million in total for all years thereafter, assuming no future acquisitions, write-offs, or impairment charges. For the years ended December 31, 2009 and 2008, the patents in process included in Patents and Technology were \$7.0 million and \$5.7 million, respectively.

Total deferred revenue and customer advances	\$ 6,578	\$ 8,042

7. Long-term Debt*5% Senior Subordinated Convertible Debentures (5% Convertible Debentures)*

On December 23, 2004, the Company issued an aggregate principal amount of \$20.0 million of 5% Convertible Debentures. The 5% Convertible Debentures original maturity date was December 22, 2009. On July 27, 2007, the Company announced that it had notified the holders of its 5% Convertible Debentures of its intent to redeem all of the 5% Convertible Debentures in full, pursuant to the mandatory redemption provision. Approximately \$20.1 million of principal and accrued interest was then outstanding under the 5% Convertible Debentures. Under the terms of the 5% Convertible Debentures, once the closing bid price of the Company's common stock exceeded \$14.053 per share for 20 consecutive trading days, the Company could redeem the 5% Convertible Debentures at the end of a 30-day notice period. Prior to the end of the 30-day period, the holders of the 5% Convertible Debenture could have elected to convert the principal and accrued interest outstanding into shares of the Company's common stock at a conversion price of \$7.0265 per share. The 5% Convertible Debentures ceased to accrue further interest upon the Company's election to affect the mandatory redemption. During the notice period, \$17.2 million of 5% Convertible Debentures and approximately \$67,000 of accrued interest were converted into 2,656,677 shares of common stock. At the end of the notice period in 2007, \$1.4 million of 5% Convertible Debentures were redeemed for cash. Interest expense of

approximately \$106,000 was incurred from unaccreted interest recognized upon the redemption of \$1.4 million of 5% Convertible Debentures. Amounts outstanding at both December 31, 2009 and 2008 were \$0.

8. Long-term Deferred Revenue

On December 31, 2009, long-term deferred revenue was \$18.9 million and included approximately \$16.8 million of deferred revenue from Sony Computer Entertainment. On December 31, 2008, long-term deferred revenue was \$16.0 million and included approximately \$14.5 million of deferred revenue from Sony Computer Entertainment. See Note 11 for further discussion.

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****9. Commitments**

The Company leases several of its facilities, vehicles, and some office equipment under noncancelable operating lease arrangements that expire at various dates through 2015.

Minimum future lease payments are as follows:

	Operating Leases (In thousands)
2010	\$ 737
2011	721
2012	649
2013	666
2014	397
Thereafter	96
Total future minimum lease payments	\$ 3,266

Rent expense was \$986,000, \$1.2 million, and \$1.2 million in 2009, 2008, and 2007, respectively.

10. Stock-based Compensation

The Company's equity incentive program is a long-term retention program that is intended to attract, retain, and provide incentives for talented employees, consultants, officers, and directors, and to align stockholder and employee interests. Essentially all of the Company's employees participate in the equity incentive program. The Company may grant options, stock appreciation rights, restricted stock, restricted stock units (RSUs), performance shares, performance units, and other stock-based or cash-based awards to employees, directors, and consultants. Since inception, the Company has approved programs that allow the recipient the right to purchase up to 21,095,474 shares of its common stock. Under these programs, stock options may be granted at prices not less than the fair market value on the date of grant for incentive stock options and not less than 85% of fair market value on the date of grant for nonstatutory stock options. These options generally vest over 4 years and expire 10 years from the date of grant. RSUs generally vest over 3 years. On December 31, 2009, 4,320,277 shares of common stock were available for grant, and there were 5,041,235 options to purchase shares of common stock outstanding, as well as 225,055 restricted stock awards and units outstanding.

On June 6, 2007, the Company's stockholders approved the Immersion Corporation 2007 Equity Incentive Plan (the 2007 Plan). The 2007 Plan replaced the Company's 1997 Stock Option Plan (the 1997 Plan). Effective June 6, 2007, the 1997 Plan was terminated. Under the 2007 Plan, the Company may grant stock options, stock appreciation rights, restricted stock, RSUs, performance shares, performance units, and other stock-based or cash-based awards to employees and consultants. The 2007 Plan also authorizes the grant of awards of stock options, stock appreciation

rights, restricted stock, and restricted stock units to non-employee members of the Company's Board of Directors and deferred compensation awards to officers, directors, and certain management or highly compensated employees. The 2007 Plan authorizes the issuance of 2,303,232 shares of the Company's common stock, and up to an additional 1,000,000 shares subject to awards that remain outstanding under the 1997 Plan as of June 6, 2007 and which subsequently terminate without having been exercised or which are forfeited to the Company.

On April 30, 2008, the Company's Board of Directors approved the issuance of equity awards under the Immersion Corporation 2008 Employment Inducement Award Plan (the 2008 Plan). Under the 2008 Plan, the Company may issue awards in the form of stock options, stock appreciation rights, restricted stock purchase rights, restricted stock bonuses, RSUs, performance shares, performance units, deferred compensation awards, and other cash and stock awards. Such awards may be granted to new employees who had not previously been a director or

Table of Contents

IMMERSION CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

former employees or directors whose period of service was followed by a bona-fide period of non-employment. On February 25, 2009, 1,200,000 additional shares were reserved for issuance under the 2008 Employment Inducement Award Plan.

Employee Stock Purchase Plan

The Company has an Employee Stock Purchase Plan. Under the ESPP, eligible employees may purchase common stock through payroll deductions at a purchase price of 85% of the lower of the fair market value of the Company's stock at the beginning of the offering period or the purchase date. Participants may not purchase more than 2,000 shares in a six-month offering period or purchase stock having a value greater than \$25,000 in any calendar year as measured at the beginning of the offering period. A total of 500,000 shares of common stock are reserved for the issuance under the ESPP plus an automatic annual increase on each January 1 hereafter through January 1, 2010 by an amount equal to the lesser of 500,000 shares per year or a number of shares determined by the Board of Directors. As of December 31, 2009, 428,189 shares had been purchased since the inception of the ESPP. Under ASC 718-10, the ESPP is considered a compensatory plan and the Company is required to recognize compensation cost related to the fair value of common stock purchased under the ESPP.

On January 1, 2009, 500,000 additional shares were reserved for issuance upon the exercise of purchase rights that may be granted under the ESPP Plan.

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Stock Options*

The following table sets forth the summary of option activity under the Company's stock option program:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (In years)	Aggregate Intrinsic Value
Outstanding at January 1, 2007 (5,403,314 exercisable at a weighted average price of \$7.65 per share)	7,585,423	7.40

(1) There were 1,283 options that net settled in 2007.

The number of shares subject to options expected to vest as of December 31, 2009 is approximately 4.7 million.

The aggregate intrinsic value is calculated as the difference between the exercise price of the underlying awards and the quoted price of the Company's common stock for the options that were in-the-money at December 31, 2009. The aggregate intrinsic value of options exercised under the Company's stock option plans, determined as of the date of option exercise was \$174,200 for the year ended December 31, 2009.

Restricted Stock Units

Restricted stock unit activity for the twelve months ended December 31, 2008 and 2009 are as follows:

	Number of Shares	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding balance at December 31, 2007			
Awarded	34,500		
Released			
Forfeited			
Outstanding balance at December 31, 2008	34,500		
Awarded	292,287		
Released	(10,528)		
Forfeited	(118,204)		
Outstanding balance at December 31, 2009	198,055	1.21	\$ 907,092
Expected to vest at December 31, 2009	148,206	1.21	\$ 678,782

The aggregate intrinsic value is calculated as the market value as of the end of the reporting period.

Stock-based Compensation

Valuation and amortization method The Company uses the Black-Scholes-Merton option pricing model (Black-Scholes model), single-option approach to determine the fair value of stock options and ESPP shares. All share-based payment awards are amortized on a straight-line basis over the requisite service periods of the awards, which are generally the vesting periods. The determination of the fair value of stock-based payment awards on the date of grant using an option-pricing model is affected by the Company's stock price as well as assumptions regarding a number of complex and subjective variables. These variables include actual and projected employee stock option exercise behaviors, the Company's expected stock price volatility over the term of the awards, risk-free interest rate, and expected dividends.

Expected term The Company estimates the expected term of options granted by calculating the average term from the Company's historical stock option exercise experience. The expected term of ESPP shares is the length of the offering period. The Company used the simplified method approved by the SEC to determine the expected term for options granted prior to December 31, 2007.

Expected volatility The Company estimates the volatility of its common stock taking into consideration its historical stock price movement and its expected future stock price trends based on known or anticipated events.

Risk-free interest rate The Company bases the risk-free interest rate that it uses in the option pricing model on U.S. Treasury zero-coupon issues with remaining terms similar to the expected term on the options.

Expected dividend The Company does not anticipate paying any cash dividends in the foreseeable future and therefore uses an expected dividend yield of zero in the option-pricing model.

Forfeitures The Company is required to estimate future forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. The Company uses historical data to estimate pre-vesting option forfeitures and records stock-based compensation expense only for those awards that are expected to vest.

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The assumptions used to value option grants and shares under the ESPP are as follows:

	Options			Employee Stock Purchase Plan		
	2009	2008	2007	2009	2008	2007
Expected life (in years)	5.5	5.5	6.25	0.5	0.5	0.5
Interest rate	2.1%	2.7%	4.5%	0.4%	2.0%	5.1%
Volatility	68%	63%	60%	109%	88%	50%
Dividend yield						

Total stock-based compensation recognized in the consolidated statements of operations is as follows:

	Year Ended December 31,		
	2009	2008	2007
	(In thousands)		
Income Statement Classifications			
Cost of product sales	\$ 162	\$ 209	\$ 109
Sales and marketing	853	1,369	905
Research and development	1,149	1,396	969
General and administrative	2,360	2,259	1,343
Total continuing operations	4,524	5,233	3,326
Discontinued operations		94	120
Total	\$ 4,524	\$ 5,327	\$ 3,446

The benefits of tax deductions in excess of recognized compensation expense are required to be reported as a financing cash flow, rather than as an operating cash flow. This requirement will reduce net operating cash flows and increase net financing cash flows in periods after adoption. For the years ended December 31, 2009, 2008 and 2007, the Company recorded \$0, \$220,000, and \$13.6 million, respectively, of excess tax benefits from stock-based compensation.

The Company had calculated an additional paid-in capital (APIC) pool. The APIC pool represents the excess tax benefits related to stock-based compensation that are available to absorb future tax deficiencies. The Company includes only those excess tax benefits that have been realized. If the amount of future tax deficiencies is greater than the available APIC pool, the Company will record the excess as income tax expense in its consolidated statements of operations.

As of December 31, 2009, there was \$8.5 million of unrecognized compensation cost, adjusted for estimated forfeitures, related to non-vested stock options, restricted stock awards and restricted stock units granted to the Company's employees and directors. This cost will be recognized over an estimated weighted-average period of approximately 2.88 years for options, 0.17 years for restricted stock awards and 2.17 years for restricted stock units. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures.

Stock Repurchase Program

On November 1, 2007, the Company announced its Board of Directors authorized the repurchase of up to \$50 million of the Company's common stock. The Company may repurchase its stock for cash in the open market in accordance with applicable securities laws. The timing of and amount of any stock repurchase will depend on share price, corporate and regulatory requirements, economic and market conditions, and other factors. The stock repurchase authorization has no expiration date, does not require the Company to repurchase a specific number of shares, and may be modified, suspended, or discontinued at any time.

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

During the twelve months ended December 31, 2008, the Company repurchased 2.8 million shares for \$18.4 million at an average cost of \$6.60 through open market repurchases. This amount is classified as treasury stock on the Company's consolidated balance sheet. There were no stock repurchases in 2009.

Warrants

The Company adopted ASC 815-40, effective January 1, 2009. ASC 815-40 provides that an entity should use a two step approach to evaluate whether an equity-linked financial instrument is indexed to its own stock, including evaluating the instrument's contingent exercise and settlement provisions. Therefore, warrants to purchase 426,951 shares of the Company's common stock issued in 2004 that were previously classified within stockholders equity have been retroactively restated upon adoption of ASC 815-40 and classified within Other Current Liabilities due to the presence of a warrant adjustment feature that allows for a change in the number of shares subject to issuance and a change in the exercise price of the warrant under certain circumstances, including the issuance of stock for cash in a secondary offering. The warrants expired on December 23, 2009 and marked to market with changes to fair value recognized in non-operating income. The Company calculated the fair value of warrants as of January 1, 2009 using the Black-Scholes option pricing model, assuming a risk-free rate of 1.6%, a volatility factor of 66.9% and a contractual life of one year. Accordingly, a derivative liability was established in the amount of \$517,000 with an offset to warrants of \$1.7 million and the cumulative effect of the change in accounting principle in the amount of \$1.2 million recognized as an adjustment to the opening balance of retained earnings as of January 1, 2009. As of December 31, 2009, the Company eliminated the remaining balance of the warrants derivative liability with a credit to non-operating income of \$25,828 because the warrants expired unexercised.

11. Litigation Settlement, Conclusions, and Patent License

In 2003, the Company executed a series of agreements with Microsoft that provided for settlement of its lawsuit against Microsoft as well as various licensing, sublicensing, and equity and financing arrangements. Under the terms of these agreements, in the event that the Company elected to settle the action in the United States District Court for the Northern District of California entitled *Immersion Corporation v. Sony Computer Entertainment of America, Inc., Sony Computer Entertainment Inc. and Microsoft Corporation*, Case No. C02-00710 CW (WDB), as such action pertains to Sony Computer Entertainment, and grant certain rights, the Company would be obligated to pay Microsoft a minimum of \$15.0 million for amounts up to \$100.0 million received from Sony Computer Entertainment, plus 25% of amounts over \$100.0 million up to \$150.0 million, and 17.5% of amounts over \$150.0 million. The Company determined that the conclusion of its litigation with Sony Computer Entertainment did not trigger any payment obligations under its Microsoft agreements. Accordingly, the liability of \$15.0 million that was in the financial statements at December 31, 2006 was extinguished, and the Company accounted for this sum during 2007 as litigation conclusions and patent license income. However, on June 18, 2007, Microsoft filed a complaint against the Company in the U.S. District Court for the Western District of Washington alleging one claim for breach of a contract. Microsoft alleged that the Company breached a Sublicense Agreement executed in connection with the parties settlement in 2003 of the Company's claims of patent infringement against Microsoft. The complaint alleged that Microsoft was entitled to payments that Microsoft contends are due under the Sublicense Agreement as a result of Sony Computer Entertainment's satisfaction of the judgment in the Company's lawsuit against Sony Computer Entertainment and payment of other sums to the Company. In a letter sent to the Company dated May 1, 2007, Microsoft stated that it believed the Company owed Microsoft at least \$27.5 million, an amount that was subsequently increased to \$35.6 million. Although the Company disputed Microsoft's allegations, on August 25, 2008 the parties

agreed to settle all claims. The Company had made no offers to settle prior to August 25, 2008. Under the terms of the settlement, the Company paid Microsoft \$20.8 million in October 2008.

In March 2007, the Company's patent infringement litigation with Sony Computer Entertainment concluded. Sony Computer Entertainment satisfied the judgment against it from the United States District Court for the Northern District of California, which included damages, pre-judgment interest, costs and interest totaling \$97.3 million, along with compulsory license fees already paid to the Company of \$30.6 million and interest

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

earned on these fees of \$1.8 million. As of March 19, 2007, the Company and Sony Computer Entertainment entered into an agreement whereby the Company granted Sony Computer Entertainment and certain of its affiliates a worldwide, non-transferable, non-exclusive license under the Company's patents that have issued, may issue, or claim a priority date before March 2017 for the going forward use, development, manufacture, sale, lease, importation, and distribution of Sony Computer Entertainment's current and past PlayStation and related products. The license does not cover adult, foundry, medical, automotive, industrial, mobility, or gambling products. Subject to the terms of the agreement, the Company also granted Sony Computer Entertainment and certain of its affiliates certain other licenses (relating to PlayStation games, backward compatibility of future consoles, and the use of their licensed products with certain third party products), an option to obtain licenses in the future with respect to future gaming products and certain releases and covenants not to sue. Sony Computer Entertainment granted the Company certain covenants not to sue and agreed to pay the Company twelve quarterly installments of \$1.875 million (for a total of \$22.5 million) beginning on March 31, 2007 and ending on December 31, 2009, and may pay the Company certain other fees and royalty amounts. In total, the Company will receive a minimum of \$152.2 million through the conclusion of the litigation and the business agreement. In accordance with the guidance from ASC 605, the Company has allocated the present value of the total payments, equal to \$149.9 million, between each element based on their relative fair values. Under this allocation, the Company recorded \$119.9 million as litigation conclusions and patent license income, and the remaining \$30.0 million is allocated to deferred license revenue to the extent payment is received in advance of revenue recognition. Such deferred revenue was \$16.8 million at December 31, 2009. The Company recorded \$2.4 million, \$3.0 million, and \$3.0 million as revenue for the years ended December 31, 2007, 2008, and 2009, respectively. On December 31, 2009, the Company had recorded \$8.4 million of the \$30.0 million as revenue and will record the remaining \$21.6 million as revenue, on a straight-line basis, over the remaining capture period of the patents licensed, ending March 19, 2017. The Company has accounted for future payments in accordance with ASC 835. Under ASC 835, the Company determined the present value of the \$22.5 million future payments to equal \$20.2 million. The Company is accounting for the difference of \$2.3 million as interest income as each \$1.875 million quarterly payment installment becomes due. This amount is accounted for at December 31, 2008 in deferred revenue.

On October 20, 2004, Internet Services LLC (ISLLC) filed claims against the Company in its lawsuit against Sony Computer Entertainment in the U.S. District Court for the Northern District of California, alleging that the Company breached a contract with ISLLC by suing Sony Computer Entertainment for patent infringement relating to haptically-enabled software whose topics or images are allegedly age-restricted, for judicial apportionment of damages between ISLLC and the Company of the damages awarded by the jury, and for a judicial declaration with respect to ISLLC's rights and duties under agreements with the Company. On December 29, 2004, the District Court issued an order dismissing ISLLC's claims against Sony Computer Entertainment with prejudice and dismissing ISLLC's claims against the Company without prejudice to ISLLC. On January 12, 2005, ISLLC filed Amended Cross-Claims and Counterclaims against the Company that contained similar claims. On March 24, 2005, the District Court again dismissed certain of these claims with prejudice and dismissed the other claims without prejudice.

On February 8, 2006, ISLLC filed a lawsuit against the Company in the Superior Court of Santa Clara County. ISLLC's complaint sought a share of the damages awarded to the Company in the Sony litigation and of the Microsoft settlement proceeds, and generally restated the claims already adjudicated by the District Court. On March 16, 2006, the Company answered the complaint, cross claimed for declaratory relief, breach of contract by ISLLC, and for rescission of the contract, and removed the lawsuit to federal court. The case was assigned to Judge Wilken in the U.S. District Court for the Northern District of California as a case related to the previous proceedings involving Sony Computer Entertainment and ISLLC. On May 10, 2007, ISLLC filed a motion in the District Court to remand its latest

action to the Superior Court, or in the alternative, for leave to file an amended complaint. The Company opposed ISLLC's motion, and cross-moved for judgment on the pleadings. On June 26, 2007, the District Court ruled on the motions, denying ISLLC's motion to remand or for leave to file an amended complaint, and granting in part the Company's motion for judgment on the pleadings. The District Court also dismissed one of

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

ISLLC's claims. However, on May 16, 2008, the District Court entered an order granting the Company's motion for summary judgment on all of ISLLC's claims, as well as the Company's counterclaim for declaratory relief. As a result, the only claims remaining in the action were the Company's counterclaims against ISLLC. On August 22, 2008, the Company settled its counterclaims against ISLLC and amended the terms of its existing business agreement with ISLLC. On August 25, 2008, the District Court entered an order dismissing the Company's counterclaims and closed the case. For the year ended December 31, 2008, the Company recognized \$1.1 million in royalty and license revenue as of result of this settlement with ISLLC.

12. Restructuring Costs and Discontinued Operations

The Company accounts for restructuring costs and discontinued operations in accordance with ASC 420, Exit or Disposal Cost Obligations. The following table sets forth the charges and expenses relating to continuing operations that are included in the restructuring line on the Company's consolidated statement of operations for the year ended December 31, 2009:

	December 31, 2008		Year Ended December 31,			December 31, 2009	
	Restructuring Reserve	Add Charges	Non-Cash Adjustments (In thousands)	Net Expense	Deduct Cash Payments	Restructuring Reserve	
Medical workforce reductions	\$	\$ 570	\$ (98)	\$ 472	\$ (472)	\$	
Touch workforce reductions	142	558	(31)	527	(669)		
Medical division location transition		463		463	(463)		
Total	\$ 142	\$ 1,591	\$ (129)	\$ 1,462	\$ (1,604)	\$	

Restructuring Costs

On March 2, 2009, the Company announced that it was relocating its Medical business operations from Gaithersburg, Maryland to San Jose, California. In addition, the Company closed down the Medical portion of its Montreal operations in the third quarter of 2009. These Medical workforce reductions were recorded as Medical segment restructuring charges for the year ended December 31, 2009. Total costs for the relocation of the Medical business operations and the workforce reductions for the year ended December 31, 2009 were \$935,000. All of these restructuring costs have been paid as of December 31, 2009.

In addition, for the year ended December 31, 2009, there were reorganizations in the Company's Touch segment due to business changes causing workforce reductions that have been recorded as restructuring charges in the statement of

operations for the year ended December 31, 2009. Total costs for these reorganizations were \$527,000 for the year ended December 31, 2009 and have been paid as of December 31, 2009.

Results of discontinued operations

On November 17, 2008, the Company announced that it would divest its 3D product line which was part of its Touch segment. The Company's 3D product line consisted of a variety of products in the area of 3D digitizing, 3D measurement and inspection, and 3D interaction and included products such as MicroScribe digitizers, the CyberGlove family of products, and a SoftMouse 3D positioning device. During the first quarter of 2009, the Company sold its CyberGlove and SoftMouse 3D positioning device product families including inventory, fixed assets, and intangibles. Negotiated consideration for the sale was \$900,000 in the form of cash and notes receivable and the proceeds will be recognized when they are received. In the second quarter of 2009, the Company sold its MicroScribe device product family including inventory, fixed assets and intangibles. Negotiated consideration for the sale was \$1.8 million in the form of cash and notes receivable and the proceeds will be recognized when they are

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

received. Accordingly, the operations of the 3D product line have been retrospectively restated as discontinued operations, net of income tax, in the consolidated statement of operations for all periods presented. The assets sold consisted primarily of intangible assets that had no carrying value on the Company's books at the time of sale. The Company recognized a gain of \$237,000 on the sale of these discontinued operations from payments at the time of sale and payment on notes. Included in restructuring costs within discontinued operations for the year ended December 31, 2008 were asset impairment charges which included reserves taken against capitalized patent costs of \$255,000 and fixed asset write offs of \$20,000 due to the divesting of the 3D product line. The Company had accrued \$105,000 of severance charges relating to the termination of employment of 13 employees associated with the 3D product line at December 31, 2008 which has been paid in cash as of December 31, 2009.

The following is a summary of the components of income (loss) from discontinued operations included in the consolidated statements of operations:

	Years Ended December 31,		
	2009	2008	2007
	(In thousands)		
Revenues	\$ 714	\$ 4,895	\$ 4,773
Cost of Revenue	59	3,576	1,565
Sales and Marketing	99	1,656	1,397
Restructuring costs		395	
Income (loss) from discontinued operations before taxes	556	(732)	1,811
Benefit (provision) for taxes	(216)		(752)
Gain (loss) from discontinued operations (net of tax)	\$ 340	\$ (732)	\$ 1,059

13. Income Taxes

For the years ended December 31, 2009, 2008, and 2007, the Company recorded benefit (provision) for income taxes of \$310,000, \$(5.1) million, and \$(12.9) million, respectively, yielding effective tax rates of 1.1%, (11.3)%, and (10.0)%, respectively. The 2009 income tax benefit resulted from recording a benefit for the alternative minimum tax and net operating loss carrybacks, research and development monetization, valuation allowance on specific deferred tax assets, and foreign withholding tax expense. The 2008 provision for income tax resulted from recording a valuation allowance on specific deferred tax assets and foreign withholding tax expense. The 2007 provision for income tax was based on federal and state regular income tax payable on taxable income and foreign withholding tax expense.

The Company reported pre-tax book income (loss) from continuing operations of:

	Years Ended December 31,		
	2009	2008	2007
	(In thousands)		
Domestic	\$ (29,413)	\$ (45,456)	\$ 128,745
Foreign	247	286	132
Total	\$ (29,166)	\$ (45,170)	\$ 128,877

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The benefit (provision) for income taxes from continuing operations consisted of the following:

	(In thousands)		
Current:			
United States federal	\$ 1,390	\$ 2,810	\$ (15,929)
Foreign	(1,066)	(452)	(125)
State and local	(14)	(152)	(4,173)
Total current	310	2,206	(20,227)
Deferred:			
United States federal		(6,505)	6,578
Foreign			
State and local		(789)	799
Total deferred		(7,294)	7,377
	\$ 310	\$ (5,088)	\$ (12,850)

The Company's income tax receivable for federal purposes had been increased by the tax benefits from employee stock options in 2009. The net tax benefits from employee stock option transactions were \$98,000 for 2008 and \$14.7 million for 2007 and were reflected as an increase to additional paid-in capital in the Consolidated Statements of Stockholders' Equity (Deficit). The Company includes only the direct tax effects of employee stock incentive plans in calculating this increase to additional paid-in capital.

Deferred tax assets and liabilities are recognized for the temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes, tax losses, and credit carryforwards. Significant components of the net deferred tax assets and liabilities consisted of:

	December 31,	
	2009	2008
	(In thousands)	
Deferred tax assets:		
Net operating loss carryforwards	\$ 20,649	\$ 12,135
State income taxes	1	1
Deferred revenue	7,108	6,407
Research and development and other credits	3,790	4,088
Reserves and accruals recognized in different periods	4,594	3,756
Basis difference in investment	1,073	1,255

Capitalized R&D expenses	1,181	1,355
Other	16	1
Total deferred tax assets	38,412	28,998
Deferred tax liabilities:		
Depreciation and amortization	(3,240)	(3,451)
Valuation allowance	(35,172)	(25,547)
Net deferred tax assets	\$	\$

As of December 31, 2009, the net operating loss carryforwards for federal and state income tax purposes were approximately \$50.4 million and \$60.8 million, respectively. The federal net operating losses expire between 2019 and 2029 and the state net operating losses begin to expire in 2029. As of December 31, 2009, the Company had

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

federal and state tax credit carryforwards of approximately \$2.9 million and \$61,000, respectively, available to offset future taxable income. The federal credit carryforwards will expire between 2009 and will continue through 2029 and the California tax credits will carryforward indefinitely. In addition, as of December 31, 2009, the Company has Canadian research and development credit carryforwards of \$853,000, which will expire at various dates through 2018. These operating losses and credits carryforwards have not been reviewed by the relevant tax authorities and could be subject to adjustment upon examinations.

The Company recorded a valuation allowance for the entire deferred tax asset as a result of uncertainties regarding the realization of the asset balance due to losses in fiscal 2009, the variability of operating results, and near term projected results. In the event that the Company determines that the deferred tax assets are realizable, an adjustment to the valuation allowance may increase income in the period such determination is made. The valuation allowance does not impact the Company's ability to utilize the underlying net operating loss carryforwards.

Utilization of a portion of the Company's federal net operating loss carryforward is limited in accordance with IRC Section 382, due to an ownership change that occurred during 1999. Utilization of these losses is limited to approximately \$1.1 million annually. The remaining unused loss of \$2.8 million will expire between 2019 and 2020, if not utilized. During 2005, the Company evaluated ownership changes from 1999 to 2004 and determined that there were no further limitations on the Company's net operating loss carryforwards.

For purposes of the reconciliation between the benefit (provision) for income taxes at the statutory rate and the effective tax rate, a national U.S. 35% rate is applied as follows:

	2009	2008	2007
Federal statutory tax rate	35.0%	35.0%	(35.0)%
State taxes, net of federal benefit	3.9	3.5	(4.2)
Non-deductible interest			(0.3)
Stock compensation expense	(1.2)	(1.4)	(0.4)
Other	(2.5)	0.4	1.4
Valuation allowance	(34.1)	(48.8)	28.5
Effective tax rate	1.1%	(11.3)%	(10.0)%

Undistributed earnings of the Company's foreign subsidiaries are considered to be indefinitely reinvested and accordingly, no provision for federal and state income taxes has been provided thereon. Upon distribution of those earnings in the form of dividends or otherwise, the Company would be subject to both U.S. income taxes (subject to an adjustment for foreign tax credits) and withholding taxes payable to various foreign countries.

The Company maintains liabilities for uncertain tax positions. These liabilities involve considerable judgment and estimation and are continuously monitored by management based on the best information available, including changes in tax regulations, the outcome of relevant court cases, and other information. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	2009	2008
	Unrecognized Tax Benefits (In thousands)	Unrecognized Tax Benefits (In thousands)
Balance at beginning of year	\$ 628	\$ 628
Gross increases for tax positions of prior years		
Gross decreases for tax positions of prior years		
Settlements		
Lapse of statute of limitations		
Balance at end of year	\$ 628	\$ 628

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The unrecognized tax benefits relate primarily to federal and state research and development credits. The Company's policy is to account for interest and penalties related to uncertain tax positions as a component of income tax expense. As of December 31, 2009, the Company accrued interest or penalties related to uncertain tax positions in the amount of \$26,000. The Company does not expect any material changes to its liability for unrecognized income tax benefits during the next 12 months. As of December 31, 2009, the total amount of unrecognized tax benefits that would affect the Company's effective tax rate, if recognized, is \$225,000.

Because the Company has net operating loss and credit carryforwards, there are open statutes of limitations in which federal, state and foreign taxing authorities may examine the Company's tax returns for all years from 1993 through the current period.

14. Net Income (Loss) Per Share

The following is a reconciliation of the numerators and denominators used in computing basic and diluted net loss per share:

	Years Ended December 31,		
	2009	2008	2007
	(In thousands, except per share amounts)		
Numerator:			
Income (loss) from continuing operations	\$ (28,856)	\$ (50,258)	\$ 116,027
Gain (loss) from discontinued operations, net of tax	577	(732)	1,059
Net Income (loss) used in computing basic net income (loss) per share	\$ (28,279)	\$ (50,990)	\$ 117,086
Income (loss) from continuing operations	\$ (28,856)	\$ (50,258)	\$ 116,027
Interest on 5% Convertible Debentures			348
Income (loss) from continuing operations used in computing diluted net income (loss) per share	(28,856)	(50,258)	116,375
Gain (loss) from discontinued operations, net of tax	577	(732)	1,059
Net income (loss) used in computing diluted net income (loss) per share	\$ (28,279)	\$ (50,990)	\$ 117,434
Denominator:			
Shares used in computation of basic net income (loss) per share (weighted average common shares outstanding)	27,973	29,575	27,662
Dilutive potential common shares:			
Stock options			1,989
Warrants			305
5% Convertible Debentures			1,711

Shares used in computation of diluted net income (loss) per share	27,973	29,575	31,667
Basic net income (loss) per share from:			
Continuing operations	\$ (1.03)	\$ (1.70)	\$ 4.19
Discontinued operations	\$ 0.02	\$ (0.02)	\$ 0.04
Net Income (loss)	\$ (1.01)	\$ (1.72)	\$ 4.23
Diluted net income (loss) per share from			
Continuing operations	\$ (1.03)	\$ (1.70)	\$ 3.68
Discontinued operations	\$ 0.02	\$ (0.02)	\$ 0.03
Net Income (loss)	\$ (1.01)	\$ (1.72)	\$ 3.71

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

For the year ended December 31, 2007, options and warrants to purchase approximately 1.4 million shares of common stock with exercise prices greater than the average fair market value of the Company's stock of \$12.39 were not included in the calculation because the effect would have been anti-dilutive.

As of December 31, 2009 and 2008 the Company had securities outstanding that could potentially dilute basic earnings per share in the future, but were excluded from the computation of diluted net loss per share in the periods presented since their effect would have been anti-dilutive. These outstanding securities consisted of the following:

	December 31,	
	2009	2008
Outstanding stock options	5,041,235	7,009,667
Unvested restricted stock awards	27,000	
Unvested restricted stock units	198,055	34,500
Warrants	1,616	434,332

15. Employee Benefit Plan

The Company has a 401(k) tax-deferred savings plan under which eligible employees may elect to have a portion of their salary deferred and contributed to the 401(k) plan. Contributions may be made by the Company at the discretion of the Board of Directors. Beginning in January 2008, the Company matched 25% of the employee's contribution up to \$2,000 for the year. The Company contributed approximately \$190,000 and \$149,000 during the years ended December 31, 2009 and 2008, respectively. The Company did not make any contributions during the year ended December 31, 2007.

16. Contingencies*In re Immersion Corporation Initial Public Offering Securities Litigation*

The Company is involved in legal proceedings relating to a class action lawsuit filed on November 9, 2001 in the U.S. District Court for the Southern District of New York, *In re Immersion Corporation Initial Public Offering Securities Litigation*, No. Civ. 01-9975 (S.D.N.Y.), related to *In re Initial Public Offering Securities Litigation*, No. 21 MC 92 (S.D.N.Y.). The named defendants are the Company and three of its current or former officers or directors (the Immersion Defendants), and certain underwriters of its November 12, 1999 initial public offering (IPO). Subsequently, two of the individual defendants stipulated to a dismissal without prejudice.

The operative amended complaint is brought on purported behalf of all persons who purchased the Company's common stock from the date of the Company's IPO through December 6, 2000. It alleges liability under Sections 11 and 15 of the Securities Act of 1933 and Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, on the grounds that the registration statement for the IPO did not disclose that: (1) the underwriters agreed to allow certain customers to purchase shares in the IPO in exchange for excess commissions to be paid to the underwriters; and (2) the underwriters arranged for certain customers to purchase additional shares in the aftermarket at predetermined prices. The complaint also appears to allege that false or misleading analyst reports were issued. The complaint does

not claim any specific amount of damages.

Similar allegations were made in other lawsuits challenging over 300 other initial public offerings and follow-on offerings conducted in 1999 and 2000. The cases were consolidated for pretrial purposes. On February 19, 2003, the District Court ruled on all defendants' motions to dismiss. The motion was denied as to claims under the Securities Act of 1933 in the case involving Immersion as well as in all other cases (except for 10 cases). The motion was denied as to the claim under Section 10(b) as to the Company, on the basis that the complaint alleged that the Company had made acquisition(s) following the IPO. The motion was granted as to the claim under Section 10(b), but denied as to the claim under Section 20(a), as to the remaining individual defendant.

Table of Contents

IMMERSION CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In September 2008, all of the parties to the lawsuits reached a settlement, subject to documentation and approval of the District Court. The Immersion Defendants would not be required to contribute to the settlement. Subsequently, an underwriter defendant filed for bankruptcy and other underwriter defendants were acquired. On April 2, 2009, final documentation evidencing the settlement was presented to the District Court for approval. If the settlement is not approved by the District Court, the Company intends to defend the lawsuit vigorously.

In re Immersion Corporation Securities Litigation

In September and October 2009, various putative shareholder class action and derivative complaints were filed in federal and state court against the Company and certain current and former Immersion directors and officers.

On September 2, 2009, a securities class action complaint was filed in the United States District Court for the Northern District of California against the Company and certain of its current and former directors and officers. Over the following five weeks, four additional class action complaints were filed. (One of these four actions was later voluntarily dismissed.) The securities class action complaints name the Company and certain current and former Immersion directors and officers as defendants and allege violations of federal securities laws based on the Company's issuance of allegedly misleading financial statements. The various complaints assert claims covering the period from May 2007 through July 2009 and seek compensatory damages allegedly sustained by the purported class members.

On December 21, 2009, these class actions were consolidated by the court as *In Re Immersion Corporation Securities Litigation*. On the same day, the court appointed a lead plaintiff and lead plaintiff's counsel. The lead plaintiff will file a consolidated complaint following the Company's restatement of financial statements to which defendant will then have the opportunity to file responsive pleadings.

In re Immersion Corporation Derivative Litigation

On September 15, 2009, a putative shareholder derivative complaint was filed in the United States District Court for the Northern District of California, purportedly on behalf of the Company and naming certain of its current and former directors and officers as individual defendants. Thereafter, two additional putative derivative complaints were filed in the same court.

The derivative complaints arise from the same or similar alleged facts as the federal securities actions and seek to bring state law causes of action on behalf of the Company against the individual defendants for breaches of fiduciary duty, gross negligence, abuse of control, gross mismanagement, breach of contract, waste of corporate assets, unjust enrichment, as well as for violations of federal securities laws. The federal derivative complaints seek compensatory damages, corporate governance changes, unspecified equitable and injunctive relief, the imposition of a constructive trust, and restitution. On November 17, 2009, the court consolidated these actions as *In re Immersion Corporation Derivative Litigation* and appointed lead counsel. Plaintiffs will file a consolidated derivative complaint following the Company's restatement of financial statements to which defendants will then have the opportunity to file responsive pleadings.

Shaw V. Richardson et al.

On October 7, 2009, a putative shareholder derivative complaint was filed in the Superior Court of the State of California for the County of Santa Clara, purportedly on behalf of the Company, seeking compensatory damages, equitable and injunctive relief, and restitution. The complaint names certain current and former directors and officers of the Company as individual defendants. This complaint arises from the same or similar alleged facts as the federal securities actions and seeks to bring causes of action on behalf of the Company against the individual defendants for breaches of fiduciary duty, waste of corporate assets and unjust enrichment. The court has issued an order staying this action.

Table of Contents

IMMERSION CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company cannot predict the ultimate outcome of the above-mentioned federal and state actions, and it is unable to estimate any potential liability it may incur.

Other Contingencies

From time to time, the Company receives claims from third parties asserting that the Company's technologies, or those of its licensees, infringe on the other parties' intellectual property rights. Management believes that these claims are without merit. Additionally, periodically, the Company is involved in routine legal matters and contractual disputes incidental to its normal operations. In management's opinion, the resolution of such matters will not have a material adverse effect on the Company's consolidated financial condition, results of operations, or liquidity.

In the normal course of business, the Company provides indemnifications of varying scope to customers against claims of intellectual property infringement made by third parties arising from the use of the Company's intellectual property, technology, or products. Historically, costs related to these guarantees have not been significant, and the Company is unable to estimate the maximum potential impact of these guarantees on its future results of operations.

As permitted under Delaware law, the Company has agreements whereby it indemnifies its officers and directors for certain events or occurrences while the officer or director is, or was, serving at its request in such capacity. The term of the indemnification period is for the officer's or director's lifetime. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited; however, the Company currently has director and officer insurance coverage that limits its exposure and enables it to recover a portion of any future amounts paid. Management believes the estimated fair value of these indemnification agreements in excess of applicable insurance coverage is indeterminable.

17. Segment Reporting, Geographic Information, and Significant Customers

The Company develops, manufactures, licenses, and supports a wide range of hardware and software technologies that more fully engage users' sense of touch when operating digital devices. The Company focuses on the following target application areas: automotive, consumer electronics, entertainment, gaming, and commercial and industrial controls; medical simulation; and mobile communications. The Company manages these application areas under two operating and reportable segments: 1) Touch (previously called Immersion Computing, Entertainment, and Industrial), and 2) Medical. The Company determines its reportable segments in accordance with criteria outlined in ASC 280-10-05, Disclosures about Segments of an Enterprise and Related Information.

The Company's chief operating decision maker (CODM) is the Chief Executive Officer. The CODM allocates resources to and assesses the performance of each operating segment using information about its revenue and operating income (loss). Touch develops and markets touch feedback technologies that enable software and hardware developers to enhance realism and usability in their computing, entertainment, and industrial applications. Medical develops, manufactures, and markets medical training simulators that recreate realistic healthcare environments.

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Summarized financial information concerning the Company's reportable segments for the respective years ended December 31 is shown in the following table:

	Touch	Medical	Intersegment Eliminations(4)	Total

(1) Included in operating income (loss) and net income (loss) in 2008 and 2007 are litigation settlement, conclusions, and patent license of \$20.8 million and \$(134.9) million, respectively, for the Touch segment, see Note 12.

(2) Includes interest on 5% Convertible Debentures and amortization of 5% Convertible Debentures issued December 2004 and notes payable, recorded as interest expense.

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

- (3) Included in operating income (loss) and net income (loss) in 2008 are restructuring costs of \$142,000 for the Touch segment.
- (4) Intersegment eliminations represent eliminations for intercompany sales and cost of sales and intercompany receivables and payables between Touch and Medical segments.

The Company operates primarily in the United States of America and in Canada where it operates through its wholly owned subsidiary, Immersion Canada, Inc. Segment assets and expenses relating to the Company's corporate operations are not allocated but are included in Touch as that is how they are considered for management evaluation purposes. As a result, the segment information may not be indicative of the financial position or results of operations that would have been achieved had these segments operated as unaffiliated entities. Management measures the performance of each segment based on several metrics, including net income (loss). These results are used, in part, to evaluate the performance of, and allocate resources to each of the segments.

Revenue by Product Lines

Information regarding revenue from external customers by product lines is as follows:

	Years Ended December 31,		
	2009	2008	2007
	(In thousands)		
Revenues:			
Touch	\$ 16,339	\$ 16,801	\$ 14,501
Medical	11,386	11,180	15,639
Total	\$ 27,725	\$ 27,981	\$ 30,140

Revenue by Region

The following is a summary of revenues by geographic areas. Revenues are broken out geographically by the ship-to location of the customer. Geographic revenue as a percentage of total revenue was as follows:

	Years Ended December 31,		
	2009	2008	2007
North America	47%	67%	70%
Europe	14%	15%	16%
Far East	37%	15%	11%
Rest of the world	2%	3%	3%

Total	100%	100%	100%
-------	------	------	------

For the years ended December 31, 2009, 2008, and 2007 the Company derived 46%, 64%, and 69%, respectively, of its total revenues from the United States of America. For the year ended December 31, 2009, the Company derived 11% and 21% of its total revenues from Japan and Korea respectively. For the year ended December 31, 2008, the Company derived 10% of its total revenues from Korea. Revenues from other countries represented less than 10% individually for the periods presented.

Table of Contents**IMMERSION CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Significant Customers*

Customers comprising 10% or greater of the Company's net revenues are summarized as follows:

	Years Ended December 31,		
	2009	2008	2007
Customer A	12%	12%	13%
Customer B	*	*	12%
Customer C	*	*	*
Customer D	*	10%	*
Customer E	11%	*	*
Customer F	11%	*	*
Customer G	*	*	*
Total	34%	22%	25%

Of the significant customers noted above, Customers E and G had balances of 25% and 11% respectively of the outstanding accounts receivable at December 31, 2009. Of the significant customers noted above, Customer C had a balance of 10% of the outstanding accounts receivable at December 31, 2008. Customer B had a balance of 24% of the outstanding accounts receivable at December 31, 2007.

The majority of the Company's long-lived assets are located in the United States of America. Long-lived assets include net property and equipment and long-term investments and other assets. Long-lived assets that were outside the United States of America constituted less than 10% of the total on December 31, 2009, December 31, 2008 and December 31, 2007.

18. Quarterly Results of Operations (Unaudited)

The following table presents certain consolidated statement of operations data for the Company's eight most recent quarters:

	Dec 31, 2009	Sept 30, 2009	June 30, 2009	Mar 31, 2009	Dec 31, 2008	Sept 30, 2008	June 30, 2008	Mar 31, 2008
	(In thousands, except per share data)							
Revenues	\$ 6,944	\$ 6,593	\$ 6,682	\$ 7,506	\$ 6,467	\$ 7,055	\$ 7,619	\$ 6,840

per share basic and diluted	28,000	27,994	27,968	27,924	28,046	29,448	30,356	30,478

(1) The quarterly earnings per share information is calculated separately for each period. Therefore, the sum of such quarterly per share amounts may differ from the total for the year.

Table of Contents

IMMERSION CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Additionally, as disclosed in Note 12 the previously reported results of operations of the 3D product line for all periods presented have been reclassified and reported as a separate component of income in discontinued operations.

19. Subsequent Event

On March 30, 2010, the Company entered into agreements with CAE Healthcare USA (CAE). Under an asset purchase agreement, CAE will acquire certain assets including inventory and fixed assets and certain liabilities including warranty liabilities of the Endoscopy, Endovascular, and Laparoscopy medical simulation product lines for an approximate amount of \$1.6 million subject to purchase price adjustments. The agreement also provides for the transfer of certain employees to CAE as well as distribution agreements and customer relationships. The Company has also entered into a licensing agreement with CAE for the Immersion TouchSense patent portfolio for use in the field of Medical Training. The Company expects to close the transaction by March 31, 2010. The financial effect of this transaction cannot be estimated at the present time.

Table of Contents

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Control and Procedures*

Management's Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Interim Chief Executive Officer and Interim Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act as of December 31, 2009. The purpose of these controls and procedures is to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules, and that such information is accumulated and communicated to our management, including our Interim Chief Executive Officer and our Interim Chief Financial Officer, to allow timely decisions regarding required disclosures.

Our management, with the participation of our Interim Chief Executive Officer and Interim Chief Financial Officer evaluated our disclosure controls and procedures and determined that there were material weaknesses in our internal control over financial reporting as of December 31, 2009, as more fully described in Management's Report on Internal Control over Financial Reporting, below. A material weakness is a deficiency, or combination of deficiencies, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. Based on this evaluation and because of the material weaknesses described below, our Interim Chief Executive Officer and Interim Chief Financial Officer have concluded that our disclosure controls and procedures were not effective as of December 31, 2009.

Management's Report on Internal Control over Financial Reporting)

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Internal control over financial reporting is a process designed by, or under the supervision of, our Interim Chief Executive Officer and our Interim Chief Financial Officer and affected by our Board of Directors and management to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. Our management, with the participation of our Interim CEO and our Interim CFO, assessed the effectiveness of our internal control over financial reporting as of December 31, 2009. Management's assessment of internal control over financial reporting was conducted using the criteria in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In performing the assessment, our management concluded that, as of December 31, 2009, our internal control over financial reporting was not effective, because of the following material weaknesses that were previously identified. The remedial measures are intended to remediate the material weaknesses noted:

As set forth in our Annual Report on Form 10-K for the fiscal year ended December 31, 2007, our management determined that a material weakness existed in controls over accounting for income taxes as of December 31, 2007. During fiscal 2009, we continued to lack sufficient resources with the appropriate level of technical accounting expertise in the accounting for income taxes within the accounting function and therefore were unable to accurately perform or remediate certain of the designed controls during fiscal 2009. Our management, including the Interim CEO and the Interim CFO, has concluded that there is a continuing presence of the material weakness with respect to income taxes or ongoing implementation of remedial actions as of December 31, 2009.

As set forth in Item 9A of Amendment No. 1 to our Annual Report on Form 10-K/A for 2008, we had material weaknesses in our controls related to:

Revenue Recognition: Modifications to Sales Arrangements Our controls that are intended to ensure that changes, written or otherwise, to the terms and conditions governing each sale are documented, approved and recorded timely and accurately were not designed or operating effectively as of December 31, 2009.

Table of Contents

Revenue Recognition: Compliance with Specified Shipping Terms Our controls that are intended to determine the point at which title and risk of loss passes to the customer and to properly apply this information in the determination of our revenue recognition were not operating effectively as of December 31, 2009.

Revenue Recognition: Release of New Products for sale Our controls relating to the release and approval of new products for sale and ensuring that revenue is recognized only on fully functional products were not designed or operating effectively as of December 31, 2009.

Stock-based Compensation Our controls related to the application of forfeiture rates in the determination of stock-based compensation were not operating effectively as of December 31, 2009.

As noted in Item 4 of Amendment No. 1 to our Quarterly Report on Form 10-Q for the quarter ended March 31, 2009 and as of December 31, 2009, our controls to ensure completeness and accuracy with regard to the proper recognition, presentation and disclosure of applicable guidance in a timely manner were not operating effectively. Specifically, we determined that Emerging Issue Task Force 07-5, Determining Whether an Instrument (or an Embedded Feature) Is Indexed to an Entity's Own Stock (ASC 815-40) had not been properly adopted on January 1, 2009 with regard to the conversion feature in our MHR convertible note and certain warrants issued in 2005.

As noted in Item 4 of our Quarterly Report on Form 10-Q for the quarter ended June 30, 2009 and as of December 31, 2009, our controls over inventory and fixed assets were not operating effectively. Specifically, we determined that inventory and fixed assets, including capitalized demonstration and customer loaner equipment, were not appropriately tracked.

We reviewed the results of management's assessment with the Audit Committee of our Board of Directors. Our independent registered public accounting firm, Deloitte & Touche LLP, has issued an attestation report on our internal controls our financial reporting, included elsewhere herein, which expresses an adverse opinion on the effectiveness of our internal control over financial reporting.

Changes in internal control over financial reporting

Other than the remedial efforts to address our material weaknesses as described further below, that took place or that were ongoing during the three months ended December 31, 2009, there were no changes in our internal control over financial reporting during the three months ended December 31, 2009 that have materially affected or are reasonably likely to materially affect, our internal control over financial reporting.

Plans for Remediation

We will not be able to assess whether the steps we are taking will fully remedy the material weaknesses in our internal control over financial reporting until we have fully implemented them and a sufficient time passes in order to evaluate their effectiveness.

We have undertaken the following remedial efforts to address the material weakness in our internal control over financial reporting with respect to income taxes discussed above:

We have hired consultants to assist with the preparation of our quarterly and annual tax calculations and the related financial disclosures including the rationale for recognizing the benefits of certain tax positions in the

financial statements to an external provider with oversight responsibility remaining with the corporate controller. We continue to evaluate additional steps to remediate this material weakness.

We have undertaken the following remedial efforts to address the material weaknesses in our internal control over financial reporting with respect to revenue recognition discussed above:

We improved our documentation of existing revenue recognition policies, including policies involving non-standard terms and conditions, multiple element arrangements, modifications to shipping terms and requests for pre-release products;

Table of Contents

We have restructured our finance department such that the individuals responsible for the recognition of revenue are all located at our headquarters and report directly to the Interim CFO with clearly delineated responsibilities;

We have held training sessions on revenue recognition policies with the sales personnel and will continue to implement training and oversight of executive, finance, sales and operational personnel and new hires to ensure compliance with revenue recognition policies;

We have redesigned the quarterly sub-certification process to cover a wider variety of topics that could affect the financial statements and added more employees to this certification process;

We have implemented a process of obtaining quarterly certifications from all sales personnel certifying that they are not aware of any side agreements modifying our standard terms of contracts;

We have implemented a process of obtaining, on an annual basis, signed acknowledgments from each employee that he or she has read and is in compliance with our code of ethics and employee handbook;

We have improved our legal and financial review process of all sales order packages for all terms and conditions prior to shipment, and

We are in the process of automating the approval process for the release of all products in development to production. The approval process now requires the approval of finance personnel.

In addition, we continue to take the steps set forth in the remedial plan approved by the Audit Committee as further discussed in the Explanatory Note and Item 9 in Amendment No. 1 to our Annual Report on Form 10-K/A for 2008.

We have undertaken the following remedial efforts to address the material weakness in our internal control over financial reporting with respect to the calculation of stock-based compensation, accounting for warrants and accounting for fixed assets and inventory management discussed above:

We are in the process of adding a control procedure to test the calculation of the third-party stock-based compensation reports on a quarterly basis, and upon upgrading to new versions of the software, and to ensure timely review of the technical updates to the software;

We are in the process of adding a control procedure to test the review and implementation of all applicable new accounting pronouncements with the appropriate review by finance personnel to ensure compliance;

We are in the process of implementing control procedures to ensure capitalization and tracking of all demonstration and customer loaner equipment; and

We are in the process of reviewing our physical inventory management procedures including cycle counts to ensure proper control of inventory with appropriate review by operations and finance personnel.

Inherent Limitations on the Effectiveness of Internal Controls

A system of internal control over financial reporting is intended to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with GAAP; however no control system, no matter how well designed and operated, can provide absolute assurance that financial statement

errors and misstatements will be prevented or detected. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any within Immersion, have been detected.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Immersion Corporation:

We have audited Immersion Corporation and subsidiaries (the Company) internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on that risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. The following material weaknesses have been identified and included in management's assessment:

The Company's controls over accounting for income taxes did not operate effectively. In particular, errors were detected in the tax calculations for the quarterly and annual financial statements. The Company also lacks sufficient resources with the appropriate level of technical accounting expertise in the accounting for income taxes within the accounting function.

The Company's controls relating to the identification of modifications to standard sales arrangements were not designed or operating effectively.

The Company's controls over the identification of and accounting for shipping terms in its sales arrangements were not operating effectively.

The Company's controls over the proper review and accounting for revenue transactions containing deliverables that were not available or not fully functional were not designed or operating effectively.

Table of Contents

The Company's controls relating to the application of forfeiture rates in the determination of stock-based compensation were not operating effectively.

The Company's controls relating to the identification, evaluation, and adoption of applicable accounting guidance in a timely manner were not operating effectively.

The Company's controls over the proper management and tracking of inventory and fixed assets related to capitalized demonstration and customer loaner equipment were not operating effectively.

These material weaknesses were considered in determining the nature, timing, and extent of audit tests applied in our audit of the consolidated financial statements and financial statement schedule as of and for the year ended December 31, 2009, of the Company and this report does not affect our report on such financial statements and financial statement schedule.

In our opinion, because of the effect of the material weaknesses identified above on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of December 31, 2009, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial schedule as of and for the year ended December 31, 2009 of the Company and our report dated March 30, 2010 expressed an unqualified opinion on these financial statements and financial schedule.

PART III

The SEC allows us to include information required in this report by referring to other documents or reports we have already or will soon be filing. This is called Incorporation by Reference. We intend to file our definitive proxy statement pursuant to Regulation 14A not later than 120 days after the end of the fiscal year covered by this report, and certain information therein is incorporated in this report by reference.

Item 10. *Directors, Executive Officers and Corporate Governance*

The information required by Item 10 with respect to executive officers is set forth in Part I of this Annual Report on Form 10-K and the remaining information required by Item 10 is incorporated by reference from the sections entitled Election of Directors, Section 16(a) Beneficial Ownership Reporting Compliance, and Corporate Governance in Immersion's definitive Proxy Statement for its 2010 annual stockholders meeting.

Item 11. *Executive Compensation*

The information required by Item 11 is incorporated by reference from the section entitled Executive Compensation in Immersion's definitive Proxy Statement for its 2010 annual stockholders meeting.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

The information required by Item 12 is incorporated by reference from the section entitled Principal Stockholders and Stock Ownership by Management in Immersion's definitive Proxy Statement for its 2010 annual stockholders meeting.

Item 13. *Certain Relationships and Related Transactions, and Director Independence*

The information required by Item 13 is incorporated by reference from the section entitled Related Person Transactions and Corporate Governance Independence of Directors in Immersion's definitive Proxy Statement for its 2010 annual stockholders meeting.

Item 14. *Principal Accounting Fees and Services*

The information required by Item 14 is incorporated by reference from the section entitled Ratification of Appointment of Independent Registered Public Accounting Firm in Immersion's definitive Proxy Statement for its 2010 annual stockholders meeting.

PART IV.

Item 15. *Exhibits, Financial Statement Schedules*

(a) The following documents are filed as part of this Form:

1. *Financial Statements*

<u>Report of Independent Registered Public Accounting Firm</u>	50
<u>Consolidated Balance Sheets</u>	51
<u>Consolidated Statements of Operations</u>	52
<u>Consolidated Statements of Stockholders' Equity (Deficit)</u>	53
<u>Consolidated Statements of Cash Flows</u>	54
<u>Notes to Consolidated Financial Statements</u>	55

Table of Contents*2. Financial Statement Schedules*

The following financial statement schedule of Immersion Corporation for the years ended December 31, 2009, 2008, and 2007 is filed as part of this Annual Report and should be read in conjunction with the Consolidated Financial Statements of Immersion Corporation.

Schedule II Valuation and Qualifying Accounts
