As disclosed in our Quarterly Report on Form 10-Q for the three months ended December 31, 2004, we have adopted the Emerging Issues Task Force ( EITF ) consensus for Issue No. 04-8, The Effect of Contingently Convertible Instruments on Diluted Earnings per Share. This consensus requires us to consider all instruments with contingent conversion features that are based on the market price of our stock in our diluted earnings per share calculations regardless of whether the market price conversion triggers are then met. The consensus also requires prior-period earnings per share calculations to be restated to conform to this guidance for comparative purposes. Attached as Exhibit 99 to this Form 8-K and incorporated by reference herein are our consolidated financial statements as of September 30, 2004 and 2003, and for each of the years in the three-year period ended September 30, 2004, reflecting the adoption of EITF Issue 04-08. As a result, we have retroactively adjusted our diluted earnings per share calculations to include approximately 9,101,000 shares of our common stock which is issuable upon conversion of our 1.5% senior convertible notes for all periods after August 2003.
