The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157 (FAS 157), Fair Value Measurements, effective November 1, 2008. FAS 157 established a three-tier hierarchy to prioritize the assumptions, referred to as inputs, used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 - quoted prices in active markets for identical investments

Level 2 - other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 - significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At January 31, 2009, the inputs used in valuing the Fund's investments, which are carried at value, were as follows:

|              | <b>Valuation Inputs</b>             | <b>Investments in Securities</b> |
|--------------|-------------------------------------|----------------------------------|
| Level 1      | Quoted Prices                       | \$ 814,223,141                   |
| Level 2      | Other Significant Observable Inputs | 469,332,966                      |
| Level 3      | Significant Unobservable Inputs     |                                  |
| <b>Total</b> |                                     | <b>\$ 1,283,556,107</b>          |

The Fund held no investments or other financial instruments at October 31, 2008 whose fair value was determined using Level 3 inputs.
